GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center for the University of California and the Department of Mental Hygiene. It provides care and treatment for patients appropriate to the overall teaching and research program.

Program and Performance

The current program of the institute includes training programs for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Clinical and basic research projects of various kinds are under way. The facilities include an outpatient department, a 104-bed inpatient service, plus 13 day/night program beds which accommodate 26 patients.

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

Caseload:	1962-63	1963-64	1964-65	Change
Hospital inpatient days	32,932	33,261	33,261	–
Outpatient annual interviews [b]	22,075	22,500	22,500	–

Allocation of Costs: [c]	1962-63	1963-64	1964-65	Change
Inpatient department	$1,719,097	$1,775,362	$1,881,114	–
Outpatient department	573,032	591,787	627,038	–
Average Cost Per Patient:				
Inpatient (daily)	$52.20	$53.38	$56.56	$3.18 (6%)
Outpatient (per interview)	$25.96	$26.30	$27.87	$1.57 (6%)

During 1963-64, 2.3 fully reimbursed research positions were temporarily established to perform research on electroencephalograph treatment in conjunction with contractual services performed for the U.S. Department of the Navy, U.S. Public Health Service and the Department of Public Health.

During the 1964-65 fiscal year 12 positions are proposed as transfers from UCLA Neuropsychiatric Institute. The transfers result from a re-evaluation of program emphasis and needs of the programs conducted at Langley Porter Neuropsychiatric Institute and UCLA Neuropsychiatric Institute.

Reimbursements and expenditures for medical care and research services to Department of the Navy, U.S. Public Health Service, and the State Department of Public Health are not reflected in the budget year due to the uncertainty of continuation of the projects.

GENERAL ANALYSIS

Objectives

The Neuropsychiatric Institute at the University of California, Los Angeles, is a teaching and research center, and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research programs of the University and the Department of Mental Hygiene.

Program and Performance

The present facilities for the Neuropsychiatric Institute were built as a part of the Medical School of UCLA and were opened on December 1, 1960.

In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the University of California medical school. At the time the present facilities were occupied in December 1960, the program was expanded to include training for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Also included in the program are clinical and basic research projects, a day hospital program, a somatotherapy room, and a 188-bed inpatient service.

During the 1964-65 fiscal year 17 positions are scheduled to be abolished and 12 positions are scheduled to be transferred to Langley Porter Neuropsychiatric Institute. The reduction and transfer is a result of a re-evaluation of program emphasis and associated needs.

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

Caseload:	1962-63	1963-64	1964-65	Change
Hospital inpatient days	54,072	55,000	55,000	–

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito, and Monterey.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides daytime psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	3,402	3,600	3,780
Total net releases	3,549	3,744	3,880
Net transfers from other hospitals	79	–	–

During 1963-64 all farming operations except the hog ranch were discontinued resulting in the abolishment of 9.7 positions. One other administrative adjustment was the establishment of a research team consisting of 1 chief of research, 1 research social scientist, and 1 intermediate typist-clerk, financed from the special research appropriations.

For 1964-65, in addition to continuation of the 3 research team positions, 8 new positions are proposed in accordance with workload requirements at this hospital. These include 4 new social worker positions and 1 clerk requested in accordance with the workload standards for estimated admissions and resident population; 1 patients' estates and accounts specialist and 1 clerk to provide patient accounts services as indicated by workload staffing surveys; and 1 storekeeper on the basis of the volume of goods handled at this hospital and the fact that the hospital operates on 2 separate sites.

GENERAL ANALYSIS

Objectives

Atascadero State Hospital provides care and treatment for mentally disordered sex offenders, and for mentally ill male patients requiring maximum security. This hospital serves all counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department. While the facilities are designed for maximum security, the program emphasis is on treatment.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	1,264	1,300	1,360
Total net releases	1,059	1,382	1,410
Net transfers from other hospitals	—190	–	–

Administrative changes during 1963-64 included the establishment of a research team consisting of 1 research psychologist and 1 intermediate stenographer financed from special research appropriations.

The hog ranch operation is scheduled to be discontinued December 31, 1963 and the dairy June 30, 1964, resulting in the following abolishments: 1 head farmer II and 1 hog ranch operator, effective December 31, 1963, 1 dairyman and 1 assistant dairyman effective June 30, 1964. One institution fireman was transferred from Metropolitan State Hospital to increase the staff to 2 institution firemen in accordance with the State Fire Marshal's standards.

For 1964-65, in addition to the continuation of the 2 research team positions which were established administratively, 2 new positions are proposed in accordance with workload requirements at this hospital. These include 1 social worker requested in accordance with the workload standards for estimated admissions and resident population and 1 clerk to provide patient account services as indicated by workload staffing surveys.

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It serves primarily the Counties of Los Angeles, Ventura, Santa Barbara, and San Luis Obispo.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors. An after-care facility is operated by the hospital, which extends daytime psychiatric, medical, and therapy treatment as necessary, but allows patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	3,909	3,970	4,100
Total net releases	4,023	4,213	4,300
Net transfers from other hospitals	46	—	—

The following administrative adjustment was made during 1963-64: 1 farm hand position was abolished due to man-hour savings resulting from the purchase of new power-operated farming equipment.

During 1963-64 Camarillo State Hospital has been contracting for a portion of its laundry services with California Men's Colony, Department of Corrections. This contractual arrangement was undertaken to determine the feasibility of the Department of Corrections performing laundry for this hospital and other mental hospitals. In addition, the Camarillo State Hospital laundry is in extremely poor condition. Replacement was provided in the 1963-64 Budget, to be located at either Camarillo State Hospital or Men's Colony. Currently studies are being continued as to the feasibility of enlarging the laundry at Men's Colony to process both its own and the laundry for Camarillo State Hospital. It is hoped that the study will prove the advisability of doing this.

In the meantime the contractual arrangement is continued into 1964-65.

The same arrangement is proposed for 1964-65. The laundry at Camarillo State Hospital uses a large amount of patient help. This will be reduced and the number of civil service employees will also be reduced in a gradual manner reflecting the success of the operation. Salary savings have been adjusted to reflect the downward trend in the number of laundry employees as the exact number and classification are not known at this time.

GENERAL ANALYSIS

Objectives

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and mentally retarded patients. It serves primarily the Counties of El Dorado, Yolo, Sutter, Placer, Nevada, Sierra, Butte, and Plumas.

Program and Performance

It is planned that the average population at this institution during 1964-65 will total 2,200 equally divided between mentally ill (1,100) and mentally retarded (1,100). The proportion of mentally retarded patients at DeWitt has increased markedly as this hospital was selected as one of 6 hospitals to undertake a program of increasing the capacity for the mentally retarded in 1962-63. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Mentally Ill:			
Total admissions	1,065	1,120	1,180
Total net releases	1,165	1,128	1,180
Net transfers from other hospitals	—61	–	–
Mentally Retarded:			
Total admissions	–	–	–
Total net releases	38	35	40
Net transfers from other hospitals	424	139	40

For 1964-65, transfers of professional treatment positions are proposed to and from this hospital to maintain the overall workload standards for estimated admissions and resident population. These include the transfer of 1 physician and surgeon II to Stockton State Hospital and the transfer of 2 senior psychiatric social workers from Patton State Hospital.

Personnel man-years	879.1	874.1	885.1	11

GENERAL ANALYSIS

Objectives

Mendocino State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation and serves primarily the Counties of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa, and Lake.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides daytime psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	1,522	1,600	1,680
Total net releases	1,583	1,735	1,780
Net transfers from other hospitals	24	–	–

The following administrative adjustment was made during 1963-64: 1 research psychologist and 1 intermediate stenographer clerk were established as a research team financed from special research appropriations.

For 1964-65, in addition to the continuation of the 2 research team positions which were established administratively, 2 new positions are proposed in accordance with workload requirements at this hospital. It is also proposed to transfer a social worker position from Modesto State Hospital to this hospital. These three positions are requested to maintain the overall workload standard for estimated admissions and resident population.

GENERAL ANALYSIS

Objectives

Metropolitan State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and serves primarily the Counties of Los Angeles and Orange.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides daytime psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	3,371	3,660	3,810
Total net releases	3,553	3,758	3,910
Net transfers from other hospitals	49	–	–

During 1963-64 the County of Los Angeles assumed the responsibility of providing fire protection service at this hospital, making possible the abolishment of 2.3 fireman positions and the transfer of 1 fireman position to meet the fire protection service needs at Atascadero State Hospital.

For 1964-65, 13 new positions are proposed in accordance with the workload requirements at this hospital. In addition, 9 professional treatment positions are to be transferred from Patton State Hospital to maintain the overall workload standards for estimated admissions and resident population. This total proposal includes 3 positions of physician and surgeon II and the transfer of 7 similar positions from Patton State Hospital. It is proposed to add 6 new social worker positions, 3 new clerical positions and to transfer 2 clerical positions from Patton State Hospital. One patients' estates and accounts specialist and 1 clerical position are proposed to provide patient account services as indicated by workload staffing surveys.

Personnel man-years	952.4	940.1	947.7	7.6

GENERAL ANALYSIS

Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics. It serves primarily the Counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare, and Kern.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill, and emphasizes treatment rather than custody. An after-care facility is operated by this hospital, which extends daytime psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in the tabular form following:

	1962-63	1963-64	1964-65
Total admissions	926	900	900
Total net releases	1,048	1,261	1,250
Net transfers from other hospitals	101	-	-

Prior to the 1962-63 fiscal year, a limited number of mentally retarded patients were treated at this hospital. These patients were transferred during the 1961-62 fiscal year to other hospitals caring for the mentally retarded.

For 1964-65 a transfer of 1 senior psychiatric social worker position to Mendocino State Hospital is proposed to maintain the overall workload standards for estimated admissions and resident population.

During 1963-64 and 1964-65 approximately 769 obsolete beds will be demolished in order to prepare a site for future construction of a 312-bed Mental Health Center. The 1965-66 Budget will contain provision to adjust the staffing to reflect the lower population level. However, the staff is required during the budget year to accomplish the population reducton.

Personnel man-years	1,804.4	1,820.1	1,855.9	35.8

GENERAL ANALYSIS

Objectives

Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. Its patients are primarily from the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.

Program and Performance

The level of care and treatment techniques utilized at the hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill tubercular patients in the northern part of the State; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	4,450	4,800	4,990
Total net releases	4,701	4,840	5,090
Net transfers to other hospitals	156	–	–

During 1963-64 all farming operations except the dairy and poultry ranch were discontinued resulting in the abolishment of 14 positions. Other administrative adjustments during 1963-64 included the abolishment of 1 clinical laboratory technologist position due to man-hour savings resulting from the purchase of labor-saving clinical laboratory equipment, and the establishment of 1 research social scientist position for the research team financed from the special research appropriation.

For 1964-65, in addition to continuation of the research social scientist, 19 new positions are proposed in accordance with the workload requirements at this hospital. These include 8 physician and surgeon II, 5 social worker, and 4 clerical positions to maintain the workload standards for estimated admissions and resident population; and 1 patients' estates and accounts specialist and 1 clerical position to provide patient account services as indicated by workload staffing surveys.

GENERAL ANALYSIS

Objectives

Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation and a limited number of mentally retarded patients. It serves primarily the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.

Program and Performance

It is planned that the average population at this institution will consist of 3,675 mentally ill and 500 mentally retarded patients during the 1964-65 fiscal year. The mentally retarded unit was activated during the fall of 1962 to speed up the acceptance of the mentally retarded. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody. A tuberculosis treatment unit is maintained and cares for all mentally ill tubercular patients in the southern part of the State. An after-care facility, operated by this hospital, extends daytime psychiatric, medical and therapy treatment as necessary, and allows patients to return to their homes at night.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The total performance of the hospital is best measured by the number of admissions and net releases set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Mentally Ill:			
Total admissions	2,977	3,050	3,110
Total net releases	3,109	3,434	3,460
Net transfers from other hospitals	64	–	–
Mentally Retarded:			
Total admissions	–	–	–
Total net releases	22	30	30
Net transfers from other hospitals	527	27	30

The following administrative adjustment was made during 1963-64; 1 research psychologist and 1 intermediate clerk were established as a research team financed from special research appropriations.

For 1964-65, in addition to the continuation of the 2 resea team positions established administratively, 3 new positions proposed in accordance with workload requirements at this h pital. It is also proposed to transfer 11 positions to other h pitals to maintain the overall workload standards for estima admissions and resident population. This total proposal inclu the addition of 1 patients' estates and accounts specialist an clerk to provide patient accounts services as indicated by wo load staffing surveys; and 1 telephone operator to provide c erage necessitated by the recent installation of a 3-position m tiple board to accommodate the terminal leased line installati Seven physician and surgeon II, 2 senior psychiatric soc workers and 2 clerical positions are proposed for transfer other hospitals to maintain the overall workload standard f estimated admissions and resident population.

GENERAL ANALYSIS

Objectives

Stockton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation and serves primarily the Counties of Sacramento, Alpine, Amador, Alameda, Contra Costa, San Joaquin, and Calaveras.

Program and Performance

The level of care and treatment utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital, which extends daytime psychiatric, medical and therapy treatment as necessary, but allows patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	2,614	2,700	2,790
Total net releases	2,788	2,692	2,740
Net transfers from other hospitals	37	–	–

To staff the new 200-bed addition to Cottage G the following administrative adjustments in personal services were made during 1963-64: 4 senior psychiatric nurse, 16 psychiatric nurse, 4 psychiatric technician—trainee, 1 food service assistant I and 8 food service assistant I were established, while 3 senic psychiatric technician I positions were abolished.

The number and class of positions were provided on the basi of established budgetary staffing standards and ratios. When th 1963-64 Budget was prepared, positions were not requested fo the addition to Ward G because the completion of the proje was planned for the 1964-65 fiscal year. However, it was late determined that the project would be completed and ready fo occupancy for the 1963-64 fiscal year.

Two groundsman positions were established to correct a de ficiency in the grounds maintenance staff. This deficiency wa caused by the abolishment of all farming positions when th farming function was discontinued. No provision was made a that time to replace man hours that were expended on ground maintenance work. With the establishment of these positions Stockton has a total staff of 7 groundsman to care for the mai hospital and also the north hospital annex.

For 1964-65 all those positions administratively established i 1963-64 are included as proposed new positions. In addition, patients' estates and accounts specialist and 1 clerk are re quested to provide patient accounts services as indicated b workload staffing surveys. One physician and surgeon II i proposed for transfer to this hospital from DeWitt to main tain the overall workload standard for estimated admission and resident population.

GENERAL ANALYSIS

Objectives

Fairview State Hospital serves the southern counties of the State by providing care and treatment for mentally retarded patients in that area.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

This hospital was activated in the 1958-59 fiscal year, with the first patients being admitted during January, 1959. A total of 676 additional beds will be completed during the 1963-64 fiscal year.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-
Total admissions	296	270	40
Total net releases	155	146	32
Net transfers from other hospitals	—154	190	26

During 1963-64 administrative adjustments included t abolishment of 7 professional positions and 2 clerical positio related to a downward adjustment in the estimated admissio and year-end resident population at this hospital.

For 1964-65, 10 new positions are proposed in accordan with the workload requirements at this hospital. These are patients' estates and accounts specialist, and 1 clerical positi for increased workload related to 1963 legislation extendi liability to the trust accounts of the mentally retarded f payment of hospital costs; 3 physician and surgeon II, 1 clinic psychologist, 2 psychiatric social worker, and 2 clerical pos tions on the basis of the workload standards for estimated a missions and resident population.

GENERAL ANALYSIS

Objectives

Pacific State Hospital provides care and treatment for mentally retarded patients principally from the southern counties of the State.

Program and Performance

The level of care and treatment utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides daytime psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	459	385	500
Total net releases	201	214	348
Net transfers from other hospitals	—267	—190	—266

During 1963-64 administrative adjustments included the abolishment of 1 research social scientist position and the establishment of 1 chief research biochemist, financed from the special research appropriation; and the abolishment of 6 professional and 2 clerical positions related to a downward adjustment in the estimated admissions and year-end resident population for 1963-64 at this hospital.

For 1964-65, 7 new positions are proposed in accordance with the workload requirements at this hospital. These are: 1 patients' estates and accounts specialist and 1 clerical position for increased workload related to 1963 legislation extending liability for payment of hospital costs to the trust accounts of the mentally retarded; 3 professional and 1 clerical positions on the basis of the workload standards for estimated admissions and resident population; and the continuation of the chief research biochemist financed from research appropriations and established administratively during 1963-64.

GENERAL ANALYSIS

Objectives

Porterville State Hospital provides care and treatment for mentally retarded patients primarily from the central and southern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-65
Total admissions	354	180	336
Total net releases	111	177	336
Net transfers from other hospitals	—246	–	–

During 1963-64 administrative adjustments include the abo ishment of 9 professional positions and 3 clerical positions r lated to a downward adjustment in the estimated admissio and year end resident population for 1963-64 at this hospita

For 1964-65, 12 new positions are proposed in accordance wit the workload requirements at this hospital. One patients' estat and accounts specialist and 1 clerical position are propose new for increased workload related to 1963 legislation exten ing liability for payment of hospital costs to the trust accoun of mentally retarded; 2 physician and surgeons II, 4 psychiatri social workers and 2 clerical positions on the basis of the work load standards for estimated admissions and resident popula tion; and additional assistant seamstress and automotive equi ment operator positions are proposed on the basis of the ma hours required for these hospital service activities.

GENERAL ANALYSIS

Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients principally from the northern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1962-63	1963-64	1964-6
Total admissions	437	215	380
Total net releases	189	395	380
Net transfers from other hospitals	—253	—	—

Administrative adjustments in 1963-64 include the abolish ment of 13 professional and 4 related clerical positions result ing from a downward adjustment in the anticipated admission and year-end resident population at this hospital.

For 1964-65 11 new positions are requested in accordanc with workload requirements. These are 1 patients estates an accounts specialist and 1 clerical position for increased work load related to 1963 legislation extending liability to the trus accounts of mentally retarded for payment of hospital costs, physician and surgeon II, 5 psychiatric social worker and clerical positions which are requested on the basis of workloa standards for estimated admissions and resident population.

GENERAL ANALYSIS

Objectives

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Program and Performance

In fulfilling these objectives the department conducts the programs which are briefly described below. Further details of departmental activities are contained in the descriptions of the individual divisions that follow.

The department is continuing its programs of providing health services to migratory agricultural workers and its consultative services to local health departments particularly in the fields of maternal and child health, tuberculosis, public health nursing and social work, nutrition, vector control, and dental health. Field studies and consultation are provided in industrial disease, chronic disease, water and sewage sanitation, and disposal of radiological wastes. An air monitoring network and a facility for establishing air quality standards and testing motor vehicle exhaust devices are operated.

The vital records program provides registration and certified copies of birth, death, and marriage records and a registry of divorces and annulments.

A crippled children program is operated in co-operation with local health and welfare departments. This program is partially supported by a state subvention and provides medical care for crippled children whose parents are unable to provide needed services.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, radiation producing machines, radioactive isotopes, canneries, and a number of related food processing establishments.

The food and drug inspection program continues to provide protection from adulterated foods, drugs, beverages, hazardous substances and cosmetics.

The health education program stimulates education in the health field by consultation to departmental staff and local agencies and by the development of media.

A research and investigative program is provided through special projects which are financed from other than state funds.

Department-wide administrative adjustments in 1963-64 include the establishment of the equivalent of 18.5 positions. Three positions financed from overhead charges on special projects, were added on a workload basis and 7 positions were added for programs financed out of increased federal funds. A training officer was established to provide a better service by reducing training operating expense. One temporary help position was added on workload basis for vital records. The equivalent of 5 man-years in temporary help to analyze water samples on a reimbursable basis for the Water Quality Control Board and 1.5 man-years of temporary help for Motor Vehicle Pollution Control Board workload were also added, but are not proposed for continuation in 1964-65.

These adjustments are set forth in greater detail in the budgets for the individual divisions.

The budget for 1964-65 proposes the continuation of 12 of these administratively established positions on the basis of continued needs. In addition 34.5 positions are proposed to meet the requirements of on-going programs while 3.3 proposed new positions reflect the addition of new programs or extended levels of service.

Workload Requirements

The 34.5 new positions proposed to meet workload needs are summarized below:

Eight clerical workload positions in the Division of Administration which are partially supported by reimbursements.

Two auditing positions for workload in connection with audits of aid to local agencies.

One engineering position in the Division of Environmental Sanitation to assist the division chief.

Two positions for workload in the Sanitation and Radiation Laboratory.

One position in the Food and Drug Laboratory.

Two and one-half positions for workload in the Bureau of Laboratory Field Services.

Two positions in the Bureau of Chronic Disease which are to be financed by federal funds.

Eight positions, both professional and clerical, for workload increase in the Bureau of Hospitals.

One research planning specialist in the Division of Research financed from overhead funds.

Seven positions for workload in the Motor Vehicle Pollution Control Board.

Information on the proposed new positions is provided in more detail under the discussion of each divisional budget.

New Programs and Expanded Level of Service

New or extended programs proposed for 1964-65 which require additional financing include the following:

The establishment of 2 centers for the relief of persons suffering from severe respiratory diseases at an estimated cost of $200,000.

The budget contains provision for the restoration of $200,000 for contract research in the field of air pollution.

A scholarship program for 10 students, as authorized by Chapter 1633, Statutes of 1963, requiring 0.3 position for related clerical work, is included at a cost of $32,000.

One professional and 1 clerical positions are proposed for an acceleration of tuberculosis control and casefinding.

Increased need for assistance in public health statistics is the basis for a proposal to add 1 public health statistician in the Division of Research.

Financing for the treatment of epilepsy has also been included in the local assistance budget at $418,000.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration includes the Director's Office, Bureau of Accounting Services, Bureau of Administrative Services, Audits Unit, Management Analysis Unit, Bureau of Personnel and Training, Public Information, Special Projects Unit and Bureau of Vital Statistics and Data Processing. It provides administrative direction and staff services for the department and consultation to local health departments in these functions.

Program and Performance

Accounting, budget preparation and control and financial reports are provided by the Bureau of Accounting Services.

[a] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	DIVISION OF ADMINISTRATION—Continued						
	Program and Performance—Continued						

The Bureau of Administrative Services provides general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, purchasing, and an automotive pool of specialized vehicles.

Field audit of Public Health subvention programs is performed by the Audits Unit.

The Management Analysis Unit is responsible for review of systems and procedures, and establishment of workloads and staffing patterns within the department.

The Bureau of Personnel and Training administers a comprehensive personnel management program and a training program for state and local health department personnel.

The Special Projects Unit is responsible for fiscal control, budget preparation, and administrative co-ordination of research grants, special projects and sub-projects.

The Bureau of Vital Statistics and Data Processing provides direction and assistance as well as related processing services in the development of public health records and vital statistics. This unit provides service to local health agencies as well as units of the department, and includes the preparation of special interpretive reports, analysis of statistical data relating to births, deaths, marriages, population, and data processing consultation to specific programs.

One training officer I, to co-ordinate and develop new training programs from federal and other sources, was added administratively during the current year and is proposed for continuation in the budget year. This position was financed by a reduction in accredited and in-service training operating expe funds.

One assistant budget analyst and 1 personnel clerk ve added administratively during the current year, and are p posed for continuation in the budget year. They are to worl connection with increased special project activities and ar be financed from project overhead funds.

One clerk was added administratively during the curr year, and is proposed for continuation in the budget year connection with National Vital Statistics Division workloa Bureau of Vital Statistics and Data Processing to be finan from reimbursements made available for that purpose.

Seven positions, financed partially from overhead funds, proposed for addition in the budget year, in connection wi workload as follows:

1 Telephone operator,
2 Clerks,
1 Stenographer, and
1 Duplicating machine operator in Bureau of Administ tive Services; and
2 Clerks in Bureau of Accounting Services.

Two auditors are proposed in the budget year on the ba of workload in the subvention audit program.

One clerk is proposed in the budget year on the basis increased number of births, deaths, marriage, divorce and ann ment certificates in the Bureau of Vital Statistics and D Processing.

DIVISION OF ALCOHOLIC REHABILITATION

Objectives

This division engages in the demonstration treatment and rehabilitation of alcoholics. Various phases of the rehabilitation of alcoholics are investigated and studied, as well as factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.

Program and Performance

The present program consists of research, education, and demonstration treatment. Research is conducted both by state staff and other agencies under contract. Treatment of alcoholism is conducted through 10 alcoholic rehabilitation clinics.

A screening clinic in Los Angeles for alcoholics being considered for commitment to state hospitals and a recovery house program are operated under contractual arrangements with local agencies.

Public information and education programs include the publication and distribution of the Alcoholism Review and Treatment Digest, dissemination of appropriate literature and sponsorship of training institutes.

At the end of the current year 2 demonstration projects will be completed. These are the Hospital Care for Alcoholics project at Children's Hospital in San Francisco and the Detoxification Center for Acutely Intoxicated Alcoholics being conducted at the Presbyterian Medical Center in San Francisco. Also scheduled for completion during the current year is the alcoholic research contract with the Langley Porter Neuropsychiatric Institute in San Francisco.

This budget provides for the continuation of all 10 community alcoholic rehabilitation clinics at the existing level of service.

The increased amount budgeted for these clinics in 1964-65 reflects the full-year cost of the 2 new clinics established during the current year and the increased cost of services.

	DIVISION OF COMMUNITY HEALTH SERVICES						
	Objectives						
	This division has responsibility for integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, providing local health services by contract to areas without organized health departments, and for providing nursing, social work, and health education consultation and services to local health departments and other units of the State.						
	Program and Performance						
	Liaison is maintained with each of the individual local health departments, with the Conference of Local Health officers and all other divisions and bureaus of this department. For small counties who do not maintain their own health departments a minimal public health program is operated under contract. The public health residents are supervised in their local assig ments by this division. The regional medical coordinators a the Bureaus of Public Health Social Work, Public Heal Nursing, and Health Education provide recruiting, traini consultation, and technical and administrative assistance to cal health departments. Information and education services a furnished for the balance of the department.						
	State expenditures in local or county health departmen are shown in the subvention portion of the budget.						
	As provided for by Chapter 1633, Statutes of 1963, a nursi education scholarship program for 10 students is proposed f the budget year. Temporary help of $2,350 is provided for a ministration of the scholarship program, and $29,450 for t individual scholarships.

	DIVISION OF DENTAL HEALTH						
	Objectives						
	This division has responsibility for the administration of a program to protect and improve the dental health of the public.						
	Program and Performance						
	The program is implemented by advisory and consultative services to local health departments, and community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, water fluoridation, and other public health preventive measures.						
	The program for 1964-65 is extended at the same general level as in the current year.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

This division has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of the Bureaus of Radiological Health, Air Sanitation, Sanitary Engineering, Vector Control, and Food and Drug Inspection. The latter bureau includes a cannery inspection section.

The Bureau of Radiological Health has been established to bring together all activities concerned with radiation. These include maintenance of environmental surveillance of radiation sources, collection of data and interpretation of significant fluctuations in radiation levels, observation of radiation users facilities and practices, assisting in site location and other safety factors of reactor developments, and licensing or registration and inspection of all radiation sources.

The Bureau of Sanitary Engineering administers a program of consultation, inspection, and regulation in the fields of sewage disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas and water contamination.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution, assistance to local agencies in the measurement and control of air pollution and its effects, establishment of standards for maximum allowable contaminants in motor vehicle exhaust, and establishment of standards for quality of ambient air. An air monitoring network is maintained in co-operation with local air pollution authorities.

The Bureau of Food and Drug Inspection insures the purity of foods, cosmetics, and drugs in California by a program of inspecting the manufacturing, wholesale, and retail outlets throughout the State. The program not only removes particular lots of foods, cosmetics, and drugs, from consumer channels, but operates to provide a long-range program of correction and prevention of unsatisfactory environmental conditions. It also has responsibility for the enforcement of correct labeling of kosher food, and testing and enforcement of correct labeling of hazardous substances. The bureau also investigates fraudulent cancer cure devices.

Canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs; endemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated. The bureau conducts a continuous investigation of methods of disposal for urban and agricultural solid wastes. The General Sanitation Consultation Section assists local health departments in the planning, organization and administration of sound, balanced programs of environmental health.

A program to license radioactive materials and register radiation producing machines, monitoring the radioactivity level of the environment, and a radioactive waste disposal program are operated by the Bureau of Radiological Health. The motor vehicle emissions facility, maintained in Los Angeles, is supervised by the chief of the Division of Environmental Sanitation. The program of this facility is shown separately below.

One supervising sanitary engineer position is proposed in the division office to assist the division chief in dealing with new environmental health problems which have interbureau, interdivisional, and interdepartmental aspects.

MOTOR VEHICLE EMISSIONS FACILITY

Objectives

The Motor Vehicle Emissions Facility tests devices used to reduce motor vehicle emissions and also tests motor vehicles in connection with standards setting.

Program and Performance

On July 1, 1963, the department assumed the responsibility for the operation of this facility which was formerly operated by the Los Angeles Air Pollution Control District.

Laboratory work and testing of motor vehicles in connection with standards setting is provided for the department by this facility. Testing of emission control devices is conducted under contract for the Motor Vehicle Pollution Control Board.

The amount included in this budget provides not only for the operation of the facility but also for the acquisition of the equipment previously owned by the air pollution control district. The purchase price is paid over a 5-year period and recognizes the depreciated value of the equipment.

The 1964-65 program is projected at the same general level as in the current year.

[a] Grants from Federal Government and expenditures are not included in the budget totals.

DIVISION OF LABORATORIES

Objectives

This division provides laboratory services to the department and to those local areas without laboratories. It also provides consultation, investigation and reference service for local laboratories, and regulates and licenses laboratories and laboratory technicians.

Program and Performance

Individual laboratories are maintained in the fields of sanitation and radiation, industrial hygiene and air pollution, food and drug, viral and rickettsial diseases, and microbiology.

The field services section consults with, inspects, and licenses hospitals, clinical and local health department laboratories, laboratories using animals, firms producing biologics, and bone and artery banks.

One assistant public health chemist was added administratively during the current year to meet increased work in the Food and Drug Laboratory affecting the heart program. It is proposed to be continued during the budget year to be financed from increased Federal Heart Funds.

A total of $40,000 in temporary help funds was added a ministratively during the current year to perform laborato analysis of water samples for the Water Quality Control Boa on a contract basis. Continuation of this contract is not anti pated for the budget year.

One associate public health chemist and one clerk are pr posed for the budget year for the sanitation workload increa in the Sanitation-Radiation Laboratory.

One laboratory technical assistant is proposed for the Fo and Drug Laboratory to assist the toxicologist in meeting tl growing needs of the department for toxicological services.

In the Laboratory Field Services Bureau 1.5 microbiologi positions and 1 clerical position are proposed to meet the i creased workload in examining and licensing laboratory pe sonnel and licensing and inspecting clinical laboratories. Tl increased cost of these 2.5 positions will be offset by an increa in license fee revenue to the General Fund.

DIVISION OF PREVENTIVE MEDICAL SERVICES

Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, and other services necessary for the prevention of disease.

Program and Performance

The division consists of 8 units: maternal and child health, crippled children services, communicable diseases, chronic disease control, prevention of blindness, occupational health, nutrition, and hospitals.

The program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals, maternity homes, schools, physicians, and other professional groups.

The program for crippled children provides consultation and assistance to the counties in their operation of crippled children's programs including:

1. Establishment of standards for care and consultation in the maintenance of such standards.
2. Provision of funds for diagnosis and treatment. These funds are contained in the Local Assistance portion of the budget.
3. Planning and consultation in the provision of treatment and rehabilitation services.
4. Maintenance of records on these children.

In the communicable disease field, surveillance is maintained of all communicable diseases which are significant to public health in California. Clinical and administrative consultation is provided to local agencies both on a routine and emergency basis, and epidemiological field investigations are conducted. Tuberculosis control is accomplished by a subsidy program to counties for assistance in the care of tuberculosis patients. Funds for this program are contained in the Local Assistance portion of the budget. Consultation in case finding, clinic, and nursing services is also provided.

The program in chronic disease control consists of:

1. Consultation to local health agencies, hospitals, and private physicians with regard to preventive measures, and early identification of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigations and special studies of the public health significance of chronic diseases.
4. Investigation of violations of the law regarding cancer cures.
5. Investigation of the medical aspects of air pollution.

The occupational health program of the department consists of:

1. Assistance to local health departments in developing preventive health programs for detecting, preventing, and correcting health hazards in industry.
2. Consultation and educational programs to professional, industrial, and labor groups interested in occupational study of industrywide problems affecting large segments of working population.
3. Analysis of occupational health statistics.
4. Direct services to industry in the study of occupational health hazards where other resources are not available.

A subsidy program for the construction of general hospitals, nursing homes, diagnostic and treatment centers, chronic disease hospitals, and rehabilitation centers is administered by the Bureau of Hospitals. The subsidy program is shown in the local assistance portion of the budget. It also establishes standards for hospital and related facilities (including tuberculosis sanitariums), inspects and licenses these institutions, and provides limited technical consultation to them.

A program is conducted to improve the quality of care in nursing homes. A program to provide medical services for migratory agricultural workers is conducted chiefly through locally operated temporary projects and financed with federal funds.

Technical and administrative assistance in nutrition services is provided local health agencies, as well as assistance in recruiting and training of staff.

Six new positions, financed from increased federal heart and cancer funds, have been established administratively during the current year and are proposed for continuation. These positions include 1 supervising antiquackery agent and 1 clerk to be used as part of an increased effort in the investigation of cancer fraud, and 2 statisticians and 2 clerks to conduct new heart disease epidemiological studies.

One senior epidemiologist and 1 health education consultant are proposed for the budget year for increased heart and cancer program workload to be financed from additional heart and cancer federal funds.

One public health medical officer III position and 1 clerical position are proposed for the budget year to provide increased tuberculosis control and case finding.

One senior architect, 1 senior engineer, 3 drafting aid II, 1 nursing consultant, and 2 clerks are proposed for the budget year in connection with the increased workload in the modernization of hospitals and the increased workload in licensing hospitals and nursing homes.

An increase of $200,000 in contractual services is proposed for the budget year to provide research in air pollution as in the years prior to 1963-64.

[a] Grants from Federal Government and expenditures therefrom are not included in the budget totals.

DIVISION OF RESEARCH

Objectives

This division is responsible for planning, developing, promoting, co-ordinating, and maintaining the research activities and research associated activities conducted by the department both with state funds and with funds from outside sources.

Program and Performance

The Division of Research stimulates an active and effective public health research program in California by:

1. Developing and maintaining departmental research policies and plans.
2. Evaluating research proposals and operations, and recommending research priorities.
3. Maintaining liaison with other departments in State Government and appropriate local, state, federal official and voluntary agencies and academic institutions that are concerned with public health research activities.
4. Assisting in interpreting to the public and to the profession those problems that need to be solved by research, the results of that research, and the necessity for the support of public health research.
5. Consulting and assisting in the design and operation research projects.
6. Developing procedures for the centralized collation a analysis of health surveillance data.
7. Providing statistical consultation and assistance to partmental programs and local health departments.
8. Assisting in the recruitment, assignment, utilization, a training of public health statisticians in the departme

One clerical position financed from overhead charges on pr ects financed from other than state sources was added duri the current year and is proposed for continuation in the bud year, for workload in connection with research projects financ by nonstate funds.

One research planning specialist is proposed during t budget year for increased workload in connection with the panding special projects program. This position is to be financ from a general research grant from the Federal Government.

One associate public health statistician is proposed to p vide increased statistical consultation services to local hea agencies and to local special projects.

[a] Grants from Federal Government and expenditures therefrom are not included in the budget totals.

RESPIRATORY CENTERS							
This is a proposed new program to improve the conditions of many persons suffering with severe respiratory diseases. This proposal is the result of a study made by the Department of Public Health in reponse to Senate Resolution No. 44 of the 1962 Legislative Session. It is proposed that 2 regional respiratory rehabilitation centers for persons with severe respiratory disabilities be supported, 1 in the northern and 1 in the southern part of the State. These 2 centers would provide evaluation, specialized services and equipment for the severely respiratory disabled on an inpatient, outpatient and home care basis. These centers are to be operated at existing hospitals, public or private, on a contract basis, with the State providing support for only the specialized personnel, resources, and equipment necessary for the support of the centers. None of these funds will be used for the payment of individual medical care services. The normal hospitalization and medical costs for patients will be provided from the usual private, local, federal and other state sources.

MOTOR VEHICLE POLLUTION CONTROL BOARD

Objectives

The Motor Vehicle Pollution Control Board is charged with the responsibility to:

(1) determine and publish the criteria for approval of motor vehicle pollution control devices;
(2) issue certificates of approval for acceptable devices;
(3) exempt certain classes of vehicles from compliance with Chapter 3, Division 20, Health and Safety Code.

Program and Performance

The Motor Vehicle Pollution Control Board was established in the Department of Public Health under the provisions of Chapter 23, Statutes of 1960 and is responsible directly to the Governor. The board is composed of 13 members including the Director of Public Health, Director of Agriculture, Commissioner of the Highway Patrol, Director of Motor Vehicles, and 9 other members appointed by the Governor with the consent of the Senate.

Beginning January 1, 1964 the mandatory aspects of the motor vehicle pollution control program go into effect. On that date all new vehicles registered in the State will be required to have an approved crankcase device for the control of smo installed. During 1964, on a specified timetable, all commercia vehicles and all vehicles whose ownership is transferred wi be required to have an approved crankcase device installed i that vehicle is registered in a county or air pollution contro district which has elected to require such devices.

During the year 1965, on a specified timetable, all used ve hicles in participating counties and air pollution control dis tricts will be required to have approved crankcase devices in stalled.

It is anticipated that 2 or more exhaust control devices wil be approved during 1964, thus making approved exhaust con trol devices mandatory on all 1966 model cars sold in the State

Temporary help funds in the amount of $6,500 were adde administratively during the current year to provide additiona clerical assistance because of the increased workload generate by the mandatory crankcase device program.

A total of 4 new positions and $12,000 in temporary hel funds are proposed for the budget year to meet anticipate workload increases that are expected to occur when all th mandatory aspects of the crankcase program become effective

[a] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

SPECIAL PROJECT ACTIVITIES

Objectives

The department conducts many projects involving research, investigations, demonstrations, and special services of value to the development of the California public health program financed from funds which are obtained from the Federal Government or private foundations.

Program and Performance

Numerous organizations interested in furtherance of public health make funds available to the department, for activities not financed by the State. Each special activity must be related to public health needs in California or be related to investig tions or research being conducted by the State. Projects nanced by nonstate funds include overhead charges to reimbur the State for additional costs incurred. Expenditures and rein bursements from these sources are not included in budget total

Approved and pending activities are detailed indicating th type of activity and source of funding. Since project fiscal yea may not coincide with the state fiscal year, projects are assigne to the state fiscal year which most nearly coincides with th project fiscal year.

OFFICE OF THE DIRECTOR

Cancer Field Research (National Institutes of Health)
This grant provides the resources to conduct a general research program in the causes of cancer, through studies in human cancer epidemiology, cancer in animals, the connectio of viruses and cancer, and physical-chemical surveillance of th atmosphere for causative agents.

BUREAUS OF VITAL STATISTICS AND DATA PROCESSING

Medical Certification Study (Bureau of State Services)
This is an evaluative study of the reliability and accuracy of medical and health data on certificates of death. It is being conducted to extend information available for general interpretation of mortality statistics and to develop a plan of action fo California to improve the quality of medical certification o death.

DIVISION OF RESEARCH

Administrative Research and Training (Kellogg Foundation)
Mechanisms designed to stimulate, promote, co-ordinate, and evaluate public health administrative research activities are developed and tested. In co-operation with other units in the department and with local agencies, the project director: encourages and co-ordinates administrative research activities; participates in existing studies in administrative research, giving consultation in project design and development; conducts administrative research. In co-operation with the Schools of Public Health, University of California (Berkeley and Los Angeles), areas of study in public health administration valuable to student and faculty are sought.

Training Program for Epidemiologists (National Institutes of Health)
Persons from various professional disciplines receive practical training in epidemiology, as a supplement to academic studies, and an introduction to epidemiologic practice. A unique opportunity is also offered for participation in interdisciplinary study of public health problems in an operating health agency.

Rehabilitation Training (Office of Vocational Rehabilitation)
Program completed. Final report submitted to office of Vocational Rehabilitation.

General Research Support Grant (National Institutes o Health)
A grant to permit the development of the long-range research capabilities of the Department of Public Health by improving the quality, content, emphasis and direction of scientific programs. This grant is to be used to supplement other Public Health Service Awards.

Environmental Toxicants and Carcinogens (National Institutes of Health)
A joint research grant with the University of California at Davis for development of a center for the study of the possible role of food additives as environmental toxicants and carcinogens.

Decision Making (Bureau of State Services)
A study to develop approximate measures of value for application to decision making and resource allocation.

Research Planning Cardiovascular Service (Public Health Service)
A contracted seminar, now complete.

BUREAU OF MATERNAL AND CHILD HEALTH

Child Health Research Unit (Children's Bureau, Department of Health, Education, and Welfare)
This unit conducts studies of major child health problems, and provides technical assistance to state and local special studies. Current emphasis is on study of the distribution and quality of medical care for children, particularly care provided by public agencies.

Childhood Accidents (Bureau of State Services)
The frequency of medically attended injuries among a large population of children under 15 years is being investigated. This study is designed to determine whether certain personal and environmental factors are associated more with "accident" children than with "nonaccident" children.

Seatbelt Study (Bureau of State Services)
A study of the attitudes affecting the public's acceptance of automobile safety belts.

Mental Retardation Field Clinics (Children's Bureau, Department of Health, Education, and Welfare)
Field diagnostic services are provided for mentally retarded children in Southern California communities. Diagnostic techniques are being taught and local agencies encouraged to assume sponsorship of the clinics.

Health Program for Farm Workers' Families (Bureau of State Services)
A comprehensive program in support of a co-ordinated statewide plan to extend high quality health services to seasonal farm workers and their families. This program supplements services provided with state funds under the Division of Preventive Medical Services.

Obstetrical Consultant (Children's Bureau, Department of Health, Education, and Welfare)
A study toward the improvement of maternal and child health through establishment of a maternal health program in various health agencies in the State.

Farm Labor Child Health (Children's Bureau, Department of Health, Education, and Welfare)
Study completed. Now included in Health Program for Farm Workers' Families. In the Farm Labor Child Health study, the Western Branch, American Public Health Association, co-ordinated the efforts of health agencies in the western states on health programs for seasonal agricultural workers and their families. The Western Branch served as an information center on current and past efforts in this field.

DEPARTMENT OF PUBLIC HEALTH—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF CRIPPLED CHILDREN SERVICES

Congenital Heart Evaluation (Children's Bureau, Department of Health, Education, and Welfare)
Crippled Children Services will devise methods to follow up children undergoing treatment for congenital heart diseases. This will enable them to evaluate the efficacy of treatment methods.

Institute for Crippled Children Services Administrators (Children's Bureau, Department of Health, Education, and Welfare)
Institute completed. Final report made to Children's Bureau. The institute provided an opportunity for administrators in this field to discuss a revision in their national statistical report on children under the Crippled Children Services program.

BUREAU OF COMMUNICABLE DISEASES

Tuberculosis Death Study (Bureau of State Services)
A grant to define and study agency communication relative to tuberculosis detection; to define and classify by age, occupation, etc. persons contracting tuberculosis; to determine public attitudes toward seeking medical services in tuberculosis cases.

Intensive Vaccination Project (Bureau of State Services)
To provide assistance to communities in an intensified vaccination program against polio, diphtheria, tetanus and whooping cough.

Venereal Disease Casefinding (Bureau of State Services)
To counteract the rising number of cases of infectious venereal disease, casefinding and educational efforts have been increased in the State. The objectives are to demonstrate to private physicians and laboratories in local health jurisdictions, the importance of their co-operation with the health department in tracing contacts. In addition, educational material and films are being distributed to physicians, schools, and service organizations.

Venereal Disease Education (Bureau of State Services)
To develop a statewide venereal disease education program for professional personnel, school systems and the general public.

BUREAU OF CHRONIC DISEASE CONTROL

Cancer Chemotherapy (National Institutes of Health)
A data collection center for California's part in a national cancer chemotherapy evaluation program is provided. It is a part of the California Tumor Registry. Newly reported cases of cancer are registered, and previously reported cases are followed. Quality control is maintained on the abstracting of cases in hospitals; the necessary mechanical procedures are carried out to prepare punched cards for the Cancer Chemotherapy National Service Center. This provides basic data for many other cancer studies.

Air Pollution Medical Conference (Bureau of State Services)
The conference will bring together annually persons doing research in the health effects of air pollution, to exchange information, and establish goals for new studies. The department conducted a similar conference on a smaller scale in prior years. The grant provides for the publication and distribution of the proceedings.

Air Pollution Time Series Analysis (Bureau of State Services)
The statistical methods of time series analyses, which have been successful in economics and business, are being adapted to the study of the effect of air pollution and weather phenomena on health.

Human Population Laboratory (National Institutes of Health)
One population will be carefully defined for intensive study with attention focused on its personal characteristics and behavioral patterns to determine how these are related to the development of disease in this population. Studies of several chronic diseases and their interrelation are being made.

Longshoremen Heart Study (Bureau of State Services, Public Health Services)
In co-operation with Kaiser Foundation Hospital and the International Longshoremen's and Warehousemen's Union, a followup multiphasic examination of a group of longshoremen is being conducted, to determine what tests and symptoms may lead to early detection of heart disease.

Areawide Tumor Registry (Bureau of State Services, Public Health Service)
A tumor registry which will report all cases in Alameda County is being established. This is to provide a pool of information on a concentrated population for use in epidemiologic studies of cancer.

Effects of Inhaled Air Pollutants (Bureau of State Services)
This study has the aim of resolving certain problems in methods to be used in the study of associations between inhalation of polluted air and diseases of the respiratory system.

Neurological and Sensory Disease (Bureau of State Services)
To assess the need and to provide information essential for the development of a neurological and sensory disease program.

Beta Lipo Protein Study (Bureau of State Services)
To test the reliability and reproducibility of a new method for quantitative determination of beta lipo protein and to determine the correlation of beta lipo protein with total serum cholesterol.

Mexican Doctors' Program (Rosenberg Foundation)
Program complete. Final report submitted to Rosenberg Foundation. The purpose of this project was to utilize the professional competence of 2 physicians with training and experience in rural health in Mexico to provide consultation for developing California health programs for the families of domestic seasonal farmworkers.

Monograph Tabulation (National Institutes of Health)
Tabulation complete and monograph prepared. Tabulations, describing in detail some 200,000 cases of patients with neoplasms who were reported to the Tumor Registry, were supplied to the Cancer End Results Program. This data was to allow correlation of variables such as age, sex, treatment, etc., with the survival experience of the patients.

Cervical Cytology Survey (Bureau of State Services)
Study completed. Final report submitted to Bureau of State Services.

BUREAU OF OCCUPATIONAL HEALTH

Occupational Disease Evaluation (Bureau of State Services)
A contract to study the validity of the information contained in the "Doctor's First Report of Work Injury."

DEPARTMENT OF PUBLIC HEALTH—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF NUTRITION

Obesity Study (Bureau of State Services)
This is a study with the object of developing accurate, non-laboratory methods, for assessing obesity and caloric intake and expenditure, applicable to large-scale studies of morbidity and mortality.

Body Fat in Diseased States (Bureau of State Services)
A study to permit differentiation between obesity and ov weight and the relative importance of these two situations chronic disease processes.

BUREAU OF HOSPITALS

Hospital Utilization (National Institutes of Health)
A program on a statewide basis is being devised for the regular collection and evaluation of data relating to hospital utilization. The program which will be developed can be applied on a national basis; information collected to date by indepen ent surveys, by official and private agencies, provides an i adequate factual basis for effective planning on a statewide a community basis.

DIVISION OF ALCOHOLIC REHABILITATION

Drinking Patterns (National Institutes of Health)
Study complete. Final report submitted to National Institutes of Health.

Longitudinal Study of Changes in Drinking Practices (National Institutes of Health)
A grant to study changes in the drinking patterns of certain respondents from base data secured in prior survey.

Community Planning on Alcoholism (National Institutes Health)
To develop comprehensive community planning for integratio of services for treatment and study of alcoholism.

DIVISION OF LABORATORIES

Viral Disease Study (National Institutes of Health)
A study of etiology, immunology and epidemiology of viral diseases. New means are being sought to diagnose viral diseases in order to facilitate epidemiological studies of them; the role of viruses in the causation of human diseases is being evaluated.

Encephalitis Study (Rockefeller Foundation)
A general study of arthropod-borne virus diseases in being conducted. Rodents and arthropods are being investigated as reservoirs of virus.

Influenza Project (Department of Army)
This study is concerned with the etiology and prophylaxis of viral respiratory disease in military recruits. As the importance of various etiologic agents is determined, vaccines will be developed or applied and their efficacy evaluated.

Zincuria Study (National Institutes of Health)
A simplified technique for the early detection of liver damage through alcoholism is being developed by studying the amount of zinc excreted by the body under various conditions.

Fluorescent Antibody Technique (Bureau of State Services, Public Health Service)
The State is to test and demonstrate a new technique. This is a nationwide project to bring about the use of new equip ment, giving rapid standard test results, for the identificatio of bacteria associated wih rheumatic fever.

Enterovirus Sera Testing (National Institutes of Health)
Type-specific Enterovirus Immune Sera, produced in a labora tory outside the State, are to be tested and certified for th National Cancer Institute.

Microbiology Training (Bureau of State Services)
A grant to establish a training program in the Division o Laboratories in research applicable to current problems of th public health lab, as well as general orientation to areas o public health research interest.

Development and Testing of Experimental Vaccines (National Institutes of Health)
An etiologic study of acute respiratory illness and the evalua tion of respiratory disease vaccine in a population of infants.

Tuberculosis Drug Sensitivity (Bureau of State Services)
A grant to study and determine the sensitivity to various drugs used in treating tuberculosis among patients treated out side the hospital.

BUREAU OF VECTOR CONTROL

Organo-phosphorus Resistant Mosquitoes (National Institutes of Health)
A study is being made of mosquitoes resistant to organo-phosphorus insecticides, which are the primary control agents at this time. The physiological basis for organo-phosphorus resistance is being sought by comparing strains of mosquitoes which are, and are not, resistant to such insecticides.

Physiology of Mosquito Egg Hatching (National Institutes of Health)
The eggs of certain mosquitoes hatch under external stimulus. This is a study of the physiology of this phenomenon, in an attempt to find methods of interfering with or precipitating the stimulus, thereby controlling mosquitoes in the egg stage.

Biologic Control of Mosquitoes (National Institutes of Health)
Means of conducting germ warfare on mosquitoes are being sought. Some microbic parasites produce sickness and death in mosquitoes. By finding and fostering these parasites, it may be possible to devise a new and alternative method of controlling the mosquito population.

RADIOLOGICAL HEALTH

Radionuclides in Milk (Bureau of State Services)
A study to determine the extent of environmental contamination resulting from fallout and to evaluate the significance of this contamination to public health.

DIVISION OF DENTAL HEALTH

Dental Hypoplasias (National Institutes of Health)
The optimum levels of fluoride ion concentration in water supplies are being sought for different temperature zones. Concurrently, the distribution of dental caries among children in areas with varying fluoride levels is being described and compared.

DEPARTMENT OF PUBLIC HEALTH—Continued

SPECIAL PROJECT ACTIVITIES—Continued						
BUREAU OF PUBLIC HEALTH SOCIAL WORK						
Consultation in Public Health (Bureau of State Services) Although consultation is widely used in public health, no attempt has been made to describe the process, or clearly define the limits of consultation. It is the aim of this project to delineate the process and indicate under what conditions it is most effective.						
BUREAU OF NURSING						
Extra-Hospital Nursing Needs (Bureau of State Services) A study to develop a method which, when applied to specific population groups, will provide a basis for estimating out-of-hospital nursing care needs.						
DIVISION OF INTERNATIONAL HEALTH						
Division of International Health (Ford Foundation) A program to establish and maintain a pool of interested and competent individuals available for international service, the building of a training program for these individuals and the reduction of administrative deterrents for foreign service.

GENERAL ANALYSIS

Objectives

The overall objective of the Department of Rehabilitation is to intensify services to the physically and mentally handicapped in the State, including the blind; to promote a higher degree of co-ordination of services among the several functions which are brought together in the new department; and to reduce dependency through the provision of a wide variety of restorative and retraining services to those handicapped citizens in the State who otherwise are or would become public charges.

Program and Performance

The Department of Rehabilitation was established by Chapter 1747, Statutes of 1963, and officially came into being on October 1, 1963. The legislation consolidated 7 functions formerly administered by the State Department of Education: Vocational Rehabilitation Service, Disability Certification Program, Business Enterprise Program for the Blind, Field Rehabilitation Services for the Blind, Opportunity Work Centers for the Blind, Industries for the Blind, and Orientation Center for the Blind.

The department was established by transferring intact the positions and funds for the 7 functions mentioned above from the Department of Education. In addition 19 new positions were established to provide the administrative, technical, and clerical staff for various functions within the new department.

During 1963-64 the costs for the positions transferred from the 19 new administrative positions were financed in part by additional Federal reimbursements and in part by funds formerly paid to the Department of Education for departmental administrative charges. No additional General Fund support was required and, as the Legislature had been informed during hearings on the legislation creating the new department, a net savings to the General Fund has resulted.

The total budget presentation of the Department of Rehabilitation is divided into General Activities, Orientation Center, and California Industries for the Blind. The support budgets for these latter 2 programs are shown separately. The General Activities section includes the Division of Departmental Administration, Division of Vocational Rehabilitation, and Division of Rehabilitaton of the Blind. The program of each division is discussed with its detailed budget presentation, including continuing operations and workload increases. A program augmentation proposal of $1,068,169 is included in the Division of Vocational Rehabilitation presentation.

DIVISION OF VOCATIONAL REHABILITATION

Program and Performance

Prior to October 1, 1963, this division was the Vocational Rehabilitation Section, Department of Education. The division offers diagnosis and evaluation, vocational guidance, and a series of services as needed to bring the disabled individual to the point of employment, with placement on a permanent job as the final goal. These other services may include furnishing a prosthetic device, medical or psychiatric treatment, vocational training and training supplies, aid in establishing selected individuals in small business enterprises and, when needed, maintenance and transportation concurrently with vocational training or medical care.

Program direction and operation functions are carried out by a central administration unit. The Vocational Guidance and Placement function comprises the main body of the program. It is divided into 10 districts and 23 branch offices throughout the State.

In 1952 the Vocational Rehabilitation Section took steps to implement expressed legislative intent by establishing a system of priorities for acceptance of eligible cases. Public assistance cases were placed high on the priority list and since that time, a substantial number of recipients of public relief have been rehabilitated into employment. The number of cases accepted on a priority basis is increasing so rapidly that it is necessary to curtail services to referrals from sources which are not included in the priority units.

In 1954 statistical recording and reporting programs were instituted and records have been kept since that time on the nature and characteristics of the people served. In the nine year period ending June 30, 1963, 5,487 individuals and families who have been on public assistance were rehabilitated. Since the average grant for these families was $1,550 (it had increased to $1,900 in the 1960-61 fiscal year, and an estimated $1,944 in the 1962-63 fiscal year) the saving for one year would be $8,500,000 in relief payments.

The following table presents the movement of the active case load during the fiscal years 1960-61 through 1962-63:

	1960-61	1961-62	1962-63
On hand beginning of year	9,215	9,737	10,485
Accepted during year	6,900	7,715	7,889
Total active	16,115	17,452	18,374
Closed, rehabilitated	2,487	2,688	2,738
Closed, unemployed after plan developed	1,050	1,192	1,163
Closed, other reasons	2,841	2,862	3,316
Total closed	6,378	6,742	7,217
On hand end of year	9,737	10,710	11,157

Based on policies adopted by the department with the approval of the Legislature the number of rehabilitations accomplished by the Division of Vocational Rehabilitation continues to be numerically low compared to results in other states. Study of results of programs in other states indicates that in many states emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. In the past California also placed primary emphasis on numbers served. This emphasis created a condition where a substantial amount of departmental effort was directed toward bringing into the caseload persons whose needs were minimal and who might have been served through agencies such as the public employment service or community health services. This situation was changed in California and emphasis will continue to be placed on those who have the greatest need rather than a large number of rehabilitations, even though this places California on a statistical scale of results based only on numbers rehabilitated.

Regular Program Workload

For the 1964-65 fiscal year the following new positions in the Division of Vocational Rehabilitation are requested on the basis of workload increases:

1 Supervising vocational rehabilitation counselor II
1 Supervising vocational rehabilitation counselor I
6 Vocational rehabilitation counselor
8 Intermediate stenographer
1 Medical consultant
1 Associate workshop consultant

The supervising vocational rehabilitation counselor II position is proposed to direct a new district office planned for the San Bernardino area in 1964-65 to serve the needs of an expanding population in that area. The 6 counselor positions are proposed on the basis of the existing counselor to population ratio (1 counselor to each 80,830 of the state population between the ages of 16 and 64). The supervising vocational rehabilitation counselor I, 1 medical consultant, and 7 clerical positions are proposed on the basis of existing workload ratios for supervision, medical consultation, and clerical support.

The associate workshop consultant, 1 clerical position, and $10,000 in contractual funds are proposed on a workload basis related to the increased numbers of both private and public workshops established and being developed in the State, including the various workshops now operating within the Department of Rehabilitation.

During 1962-63 and 1963-64, 3 vocational rehabilitation counselor and 0.5 intermediate typist-clerk positions have been established administratively on a year-to-year basis to provide services on a contractual basis to Hope for Retarded Children

[a] Neither receipts nor expenditures of Federal funds are included in the overall budget totals.
[b] Provides for expenditures beginning October 1, 1963.

DIVISION OF VOCATIONAL REHABILITATION—Continued

Program and Performance—Continued

Regular Program Workload—Continued

in San Jose, Mt. Zion Hospital in San Francisco, and Rancho Los Amigos, a Los Angeles County facility. Since it is planned that these contractual services will continue indefinitely, these positions are proposed for permanent authorization and are included under proposed new positions for 1964-65 in addition to the positions discussed above. These 3.5 positions are fully reimbursed from federal and contracting agency funds.

Mental Hospital Program

The mental hospital program was started in 1961-62 as an extension and improvement project with matching financing of 75 percent Federal and 25 percent General Fund. The special project status ends on June 30, 1964. The program has been fully-staffed and well under way at 6 state hospitals for the mentally ill since January 1962. It is proposed that this program be incorporated into the continuing program with base program financing of 50.79 percent Federal and 49.21 percent General Fund. In view of the increasing emphasis on early discharges from the hospital and the need of and benefit from vocational rehabilitation, as well as the interest of public and private agencies in the communities receiving cases from these hospitals, there is a definite need to continue this program. In the program augmentation proposal discussed below, there is a proposal to bring this service to 3 other state hospitals not now served.

Program Augmentation

Demands for vocational rehabilitation services continue to increase far beyond available resources. In addition to regular increases caused by population growth, the special activities of the Mental Hospital Program and Public Assistance Project, and the new program of Services to the Industrially Injured substantially increase referrals and cases receiving services. These referrals represent cases of high priority consistent with the legislative mandate to serve those cases most in need. They also represent pressure on available staff time and case service money. As funds are used toward serving the individuals of these groups, less service is available to applicants from all other sources: public schools and facilities, private agencies, physicians, and the disabled general public. Many worthy applicants must be turned away or placed on waiting lists to await the availability of services.

These are some of the reasons a program augmentation is proposed as follows:

Increase the counselor to population workload ratio from the present 1 counselor to 80,830 of the population between the ages 16 and 64, to a proposed ratio of 1 counselor to 75,000 of the population between the ages of 16 and 64. This change in ratio will require 10 additional rehabilitation counselors and will enable the department not only to increase services to high priority cases but to give special attention to the mentally retarded, the deaf, and the blind.

Three rehabilitation counselors to extend services under the Mental Hospital Program to 3 additional state hospitals where the service is not now provided.

Four rehabilitation counselors to provide service to local school districts for rehabilitation evaluation and vocational counseling for educable mentally retarded students late in their regular school careers. These positions are proposed to be financed: 25 percent from the local school district, 25 percent from state sources, and 50 percent federal funds for the salary of the counselor, clerical assistance, and travel. Case service expenditures will come from the regular budgeted program.

Four job development specialists to be assigned to 4 metropolitan district offices. They will continually survey placement opportunities in all areas of vocational activity, determine labor market trends, consult with the Department of Employment, other agencies, information sources, and rehabilitation counselors as to positions which are now or might later become available for particular disability groups. As needed they will search for employment for severely handicapped clients. the outset a major focus of these specialists will be to dev job opportunities and to place blind clients in employment.

The following positions are proposed as supporting staff the above on the basis of existing staffing ratios:

4 Supervising vocational rehabilitation counselor I
1 Medical consultant
1 Vocational psychologist
18 Clerical

An increase in the allowances for case service funds budge for each rehabilitation counselor is requested. It is proposed increase annual case service funds from $21,644 to $25,000 each experienced counselor and from $10,000 to $12,500 for e new counselor. The added costs for such a program total $5 544. Since 1956-57 allowances for case service funds have b increased by 13.9 percent. The added allowances raise this 30 percent. During the same period costs of diagnoses, medi care, prostheses and hospitalization have increased appro mately 25 percent while training materials and services h increased 35 percent.

Total, 1964-65 Program Augmentation	$1,068,1
General Fund	*520,5*
Federal funds	*547,6*

Special Projects

In addition to the Mental Hospital Program, the departme has been conducting 3 other special projects: Rehabilitati Services to Recipients of Public Assistance, Rehabilitation Se ices to Recipients of Old Age and Survivors Insurance, a Services to the Industrially Injured.

The Public Assistance Project began in 1962-63 and w planned to be conducted over a 3-year period. The OA project began in 1961-62 and was planned to be conducted ov a 4-year period. The 1963-64 Legislature approved these projects for continuation through June 30, 1964, with a progre report and evaluation to be submitted for review as a part any request for continuation of the projects into 1964-65. T requested reports have been submitted and it is proposed continue these projects at the current level.

The Public Assistance Project is designed to test the pr cedure of placing vocational rehabilitation counselors in coun welfare offices, to work with county welfare social workers l early evaluation of applicants for public assistance so as determine if a disability or health problem contributes to th problem of dependency and, where indicated, the value of ear referral and vocational rehabilitation services to these appl cants. Experience to date indicates that approximately one-thir of the recipients of public assistance have a disability or healt problem that contributes to dependency. Unless vocational r habilitation services are made available, a great percent these persons will remain on relief rolls. Continuation of th project is proposed on a financing basis of 75 percent federa to 25 percent General Fund.

The Rehabilitation Service to Recipients of OASI Proje is designed to determine the advisability of serving the severel disabled of advanced age who are receiving OASI cash benefit and who, after adjudication of their claims for benefits, wer screened by disability certification counselors as having litt potential of returning to gainful employment. On a samplin basis counselors assigned to the project further evaluate thes cases, often using rehabilitation centers and rehabilitatio workshops in the evaluative process. All those served throug this project are severely disabled and of advanced age. If, afte total evaluation, there appears a reasonable possibility of th individual benefiting from vocational rehabilitation services, rehabilitation program is started.

General Activities

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF VOCATIONAL REHABILITATION—Continued

Program and Performance—Continued

Special Projects—Continued

This project was authorized to start in 1961-62. The type of case involved requires a much longer period from referral and evaluation through rehabilitation than the regular cases because of the severity of disability and in some cases the factor of advanced age. Extension of the project is desirable to determine the degree of success as measured by the vocational rehabilitation of the individuals served in this project. Financing is to continue on an 80 percent federal to 20 percent General Fund matching basis.

The 1963-64 Governor's Budget included a lump-sum amount of $300,000 to increase emphasis of services to the industrially injured through increased referrals from the Department of Industrial Relations and other referral sources. The program was approved by the Legislature with a limiting date of June 30, 1965. The following positions were administratively established to initiate this program during 1963-64 and are proposed as new positions for 1964-65:

2 Supervising vocational rehabilitation counselor I
10 Vocational rehabilitation counselor
9 Intermediate stenographer
0.3 District medical consultant

The financing for this program was originally budgeted at the base program rate of 50.79 percent federal to 49.21 percent General Fund. Some federal special project funds have been made available during 1963-64 allowing a reduction in General Fund support for this program of approximately $30,000 in 1963-64, and approximately $80,000 in 1964-65.

DIVISION OF REHABILITATON OF THE BLIND

Program and Performance

This division was established October 1, 1963, and has responsibility for basic functions related to services for the blind transferred from the Department of Education. These include the Business Enterprise Program, Field Rehabilitation Services for the Blind, Opportunity Work Centers, California Industries for the Blind, and the Orientation Center for the Blind. A chief of the division and 1 clerical position were established October 1, 1963, to provide over-all direction and co-ordination for these programs.

During 1964-65 the department has as a major objective a study and review of existing programs for the blind and organization to the end of better co-ordination of all units within the division and for total evaluation, complete rehabilitation planning and services as needed for blind applicants. The intent is to organize in such fashion that a blind applicant or a referral for any service will be evaluated in terms of his total program needs within the department.

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

	DIVISION OF REHABILITATION OF THE BLIND—Continued						
	Program and Performance—Continued						
	For 1964-65, 4 new positions are proposed on the basis of workload. These include 1 business enterprise officer for the Business Enterprise Program related to an increase of 20 in the number of vending stands to be established during 1964-65, and 3 clerical positions to provide services to the 24 existing teacher-counselor positions within the Field Rehabilitation Services for the Blind unit. This latter request is related to replacement of the teacher-counselor positions in the district offices for better program control and supervision. The budgets for the Orientation Center for the Blind and California Industries for the Blind are shown separately in sections following the General Activities budget.

OLD AGE AND SURVIVORS INSURANCE DISABILITY CERTIFICATION PROGRAM

This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program for Old Age and Survivors Insurance.

For 1964-65 the following new positions are proposed for this program: 1 supervising vocational rehabilitation counselor I, 5 vocational rehabilitation counselor, 1 senior typist-clerk, 4 intermediate typist-clerk, and 2.5 medical consultant positions. These new positions are proposed on the basis of workload and increased program emphasis as requested by the Division of Disability Operations of the Social Security Administration.

The federal agency has requested that more time be given to analysis of the vocational and personal factors as related to t adjudication process than has formerly been requested. T will be of benefit to the regular vocational rehabilitation p gram in that cases referred will be more completely evaluat and therefore better prepared for vocational rehabilitation pr essing.

During 1963-64, 9.5 of the positions shown above were est lished administratively on the basis of increased workload.

[a] Provides for expenditures beginning October 1, 1963.

[b] Neither receipts nor expenditures of Federal funds included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The State operates 3 subsidized production centers located at Berkeley, Los Angeles, and San Diego. These centers offer factory employment to blind, partially sighted, and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases, and other textile items, surgical wrappers, brushes, and rubber mats constitutes the main production program together with the fabrication and assembly of products on a subcontract basis. The administrative and physical plant operating expenses are a direct charge against the General Fund and the manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited.

Beginning with October 1, 1963, when these centers were transferred to the Department of Rehabilitation, the on-the-job training costs for new workers at the Berkeley center became subject to federal matching grants as a vocational rehabilitation service and the federal share of these costs in 1964-65 is estimated at $5,333.

For 1964-65 the 3 centers are budgeted at the same level of operations as 1963-64.

The program operated at these centers for the blind, partially sighted, and physically handicapped persons, along with the sales and fiscal detail of the manufacturing activities are discussed in the Industries for the Blind Manufacturing Fund General Analysis (see Appendix).

GENERAL ANALYSIS

Objectives

The center, formerly located in Oakland, provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the East Bay area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial types of corn brooms. Other products manufactured at this center are pillowcases, mailing bags, sewn domestic notion items, rubber mats, and commissary items for the Federal Government.

The Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administrative costs not directly related to the manufacturing process. The financial transactions of the industries for the Blind Manufacturing Fund for this center, are summarized in the following table. Administrative costs which are borne by the General Fund are excluded.

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1958-59	$820,022	$222,924	$556,467	$40,631
1959-60	829,701	214,886	657,256	—42,441
1960-61	800,138	169,442	652,719	—22,023
1961-62	790,469	156,710	631,726	2,033
1962-63	847,054	181,157	663,804	2,093

Beginning October 1, 1963, this Center's costs for on-the-job training of new workers became subject to matching grants by the Federal Government as a vocational rehabilitation service. For 1964-65 these costs are estimated to be $10,500 with a federal share of $5,333 (50.79 percent). During 1963-64, the federal share of these costs for 9 months is included in the Department of Rehabilitation, General Activities, budget.

[a] Balance of costs paid from Industries for the Blind Manufacturing Fund (see Appendix).
[b] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

GENERAL ANALYSIS

Objectives

This center provides employment to blind, visually handicapped and physically handicapped persons in the Los Angeles area to enable them to contribute to their own support.

Program and Performance

This center is the largest of the three blind manufacturing centers and has the most diversified program. The program includes the manufacture of mattresses, box springs, pillowcases, ironing board pads and covers, sterile wrappers, aprons, surgical drapes, mattress ticks, dry mops, mats, floor brushes, and commissary specialties.

The General Fund is charged with administrative costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the Industries for the Blind Manufacturing Fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1958-59	$1,432,605	$277,838	$1,038,476	$116,291
1959-60	837,826	179,665	659,017	—856
1960-61	951,856	156,716	788,712	6,428

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and some physically handicapped persons in the San Diego area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of flat mops, stick mops, mop holders and automotive seat belts. The Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administrative costs not directly related to the manufacturing process.

The financial transactions of the Industries for the Blind Manufacturing Fund for the center, excluding administrati costs which are borne by the General Fund and central offi expense borne by the Manufacturing Fund, are summarized the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profi
1958-59	$472,607	$66,072	$353,829	$52,7(
1959-60	447,057	72,880	334,808	39,2(

GENERAL ANALYSIS

Objectives

The Orientation Center accepts blind persons as trainees in an intensive program designed to assist them in becoming more self-sufficient and, in co-operation with other services available within the Department of Rehabilitation, to assist them in preparation for remunerative work.

Program and Performance

The program is designed to help enrollees regain a feeling of competence and self-confidence, to the end that they may return to the pattern of life which they would have followed in the absence of blindness. Almost all of the 80 students admitted or terminated during the fiscal year ending June 30, 1963, gained a confidence for self-help, many, with the assistance of other agencies became entirely self-supporting, others resumed their functions as homemakers, and still others were enrolled in courses of training leading to vocational or professional goals.

A blind person must learn new means of performing the various tasks and functions connected with the whole range of living. These include new techniques of travel, communication, habits of daily living and the use of one's senses other than sight in orienting oneself to the physical world. To accomplish these objectives the center offers courses in travel, Braille and typing, shop, home economics, daily living, physical conditioning, and business methods.

The period 1962-63 and 1963-64 has been one of transition during which time the program has been conducted on a reduced basis compared to previous years, because during this period the old permanent center was abandoned and the new center located in Albany was not completed. During this period the program has been operating in a temporary location in Oakland. It is planned that the new center in Albany will be ready for occupancy in July 1964. An average enrollment of 32 is estimated for 1964-65 with the enrollment estimated to reach the center's rated capacity of 40 by the end of 1964-65. It is estimated that a total of 120 enrollees will be served by the center's program during 1964-65.

During 1963-64 a 0.5 food service assistant position was temporarily established to provide necessary staffing for the feeding program at the temporary location in Oakland.

For 1964-65, 8.5 new positions are proposed on a workload basis to provide the required instructional, food service, and maintenance staff to service an increased program and larger physical plant. These include 2 teacher positions for assignment in Braille writing and typing, business principles and methods, and student counseling; 1 cook and 2.5 food service assistant positions on a post assignment basis to accommodate a 7-day-per-week feeding operation; 1 groundsman on the basis of grounds area to be serviced; and 2 janitor positions related to the square footage to be maintained and 24-hour employee coverage of the facilities.

Effective October 1, 1963, the center's total program became subject to federal matching grants (50.79 percent federal and 49.21 percent state) as a vocational rehabilitation service. For 1963-64 these federal funds are reflected in the Department of Rehabilitation, General Activities, section of the budget, and in the Orientation Center's budget for 1964-65.

GENERAL ANALYSIS

Objectives

The Department of Social Welfare has as its objectives the assurance that people in need are given assistance to sustain them and to maintain their human dignities.

Program and Performance

To carry out these objectives the Department of Social Welfare supervises the local administration of the Aid to the Blind, Aid to the Potentially Self-supporting Blind, Aid to Families with Dependent Children, Aid to the Disabled, Old Age Security, Medical Assistance for the Aged, and Public Assistance Medical Care programs. It licenses plans for the reception and care of aged and for the reception and care of children, both directly and through the accreditation of local agencies. It licenses public and private adoption agencies and provides reports to the courts for independent adoptions. It issues certificates of authority for institutions for the aged that provide life care contracts. It operates a program of medical care for the prevention of blindness and restoration of sight. It receives moneys from the Federal Government for the promotion and extension of child welfare services throughout the State and arranges for the use of such moneys for the purposes provided.

The department operates these programs under state law.

It receives grants from the Federal Government for the operation of cash assistance programs, for the medical care of assistance recipients and for child welfare services. It must submit, and maintain current with the Federal Government, operational plans which assure that these federally supported programs are operated in a manner consistent with federal law and the rules and regulations of federal agencies.

The general assistance program is entirely a county responsibility and the department exercises no authority over the nature and scope of it.

During the 1964-65 fiscal year, approximately 915,000 persons will receive money or services provided by agencies under the supervision of the department or licensed by it. The total amount paid to and for these persons, and for administrative costs, is expected to amount to about $959,500,000.

The 1963 Legislature enacted a substantial number of amendments affecting the administration of public assistance. Some of the more significant items were:

a. A change in the functions of the director and in the composition and functions of the Social Welfare Board.
b. Liberalization of eligibility criteria for assistance programs. Major changes added the unemployed parent to the Aid to Families with Dependent Children program, unemployability to the Aid to Disabled program, and included the first 30 days of coverage under Medical Assistance for the Aged.
c. Transfer of medical allowances from the assistance grant to the medical care program.
d. Requirement that all payments from absent parents be utilized for child support.
e. Operators of licensed child care activities must be cleared by a record check with the Criminal Identification and Investigation Bureau.

Changes contained in the 1963-64 portion of the budget include the conversion of operating expense funds to 9 positions to assist in changing to a data processing system. This had been provided for by the Legislature in the 1963 Budget Act. Equipment to further the conversion will be delivered on or about July 1, 1964. Savings are not anticipated until the conversion is complete and the installation is operational, sometime during 1965-66.

A total of 4.5 positions were established on July 1, 1963 to reflect the provisions of Chapter 1916, Statutes of 1963, which revised the functions of the Social Welfare Board and provided funds for implementing the change.

The administrative adjustments reflected in 1963-64 and 1964-65 are an outgrowth of the Congressional requirement for a nation-wide review of eligibility in the Aid to Families with Dependent Children program. The Federal Government has required a continuing quality control program, which necessitates continual sampling of eligibility factors in assistance cases of all programs. A total of 48 positions have been established for this purpose, financed from a special 1963 budget act appropriation and from planned savings from the administrative review function. Two existing positions are deleted to reflect this saving.

Administrative adjustments proposed and reflected in the 1964-65 Budget include the transfer of funds for the expenses of training services for the mentally retarded from the support budget to the local assistance budget. The same is done with vendor payments for the prevention of blindness program. These changes more properly reflect the location of the costs of these programs.

In addition to these adjustments a total of 50.8 new positions are requested. They are summarized below by program together with an explanation of each one requested.

SUMMARY OF PROPOSED POSITIONS AND COST

	Number of Positions	*Estimated Cost*
Direct operations	11.3	$86,062
Medical care	7.5	77,476

DETAIL OF PROPOSALS BY PROGRAM

Direct Operations

ADOPTIONS

3 Adoptions caseworker — $23,525
Three adoptions caseworkers are required for estimated workload increases in independent adoptions.

COMPLAINTS AND INQUIRIES

3 Social service consultant I — $23,525
The addition of 3 social service consultant I positions is necessary to meet the workload increases in complaints and inquiries that are expected in the area offices from the public.

DISABILITY REVIEW

3	Medical social work consultant I	$24,054
0.3	Temporary help—medical consultation	4,426
2	Intermediate stenographer	10,532
5.3		$39,012

[a] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF SOCIAL WELFARE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS—Continued

DETAILS OF PROPOSALS BY PROGRAM—Continued

Direct Operations—Continued

DISABILITY REVIEW—Continued

Chapter 510, Statutes of 1963, revised the eligibility criteria to include unemployability as qualification for Aid to the Needy Disabled effective January 1, 1965.

In addition, the existing program continues to expand at a rapid rate. To handle the overall increase in estimated workload 3 additional disability review teams will be required.

Medical Care

1	Medical program consultant I	$15,323
0.5	Pharmacist	5,206
4	General auditor II	31,821
1	Accounting technician II	5,563
1	Intermediate stenographer	5,063
–	Consultant services—hearing improvement	14,500
7.5		$77,476

Chapter 510, Statutes of 1963, revises the definition of disability to include unemployability as one of the qualifying criteria for Aid to the Disabled effective January 1, 1965. A full-time medical position is required before that time to establish medical standards relating to unemployability and to interpret the questions raised concerning the medical aspects of their application. The increased caseload and necessary staffing will also require continuing direction and co-ordination of the medical review staff.

An additional half-time pharmaceutical consultant is proposed to work on revisions to the current drug formulary as well as to answer specific questions of interpretation from those counties that are without pharmaceutical consultation.

A revised method of establishing and reviewing rates paid to county hospitals for services under the Medical Assistance to the Aged Program has been adopted by the Director of Finance. In order to establish the cost base for the rates to be paid, an audit of the actual costs of operation is necessary. To perform this function in the 77 county hospitals a staff of 4 auditors and 2 clerks is required.

The Public Assistance Medical Care Program presently provides for purchase of hearing aids for recipients. It is proposed to obtain medical consultation for development of standards of eligibility for hearing aids as well as minimum criteria of equipment performance. For this purpose $14,500 is budgeted for 1964-65. It is anticipated that such consultation may be required for a period of about 2 years, or until the program is stabilized.

Management Support

CENTRAL SERVICES

1	Social service administrator I	$11,112
1	Manual technician	9,098
10	Intermediate stenographer	48,180
12		$68,390

A staff assistant is proposed for the Deputy Director, Community Welfare Services, to relieve him of the more routine work of report review and anlysis; assistance in coordinating the physically separated units; and preparation of work plans and methods.

The volume of regulatory and instructional material issued to the local jurisdictions continues to grow and becomes more involved. A position, limited to 2 years, is requested to plan and edit this material, work on possible consolidation of separate manuals, and eliminate the non-essential distribution.

Ten additional intermediate clerical positions are proposed on a workload basis for the increased work in the central clerical pool; 2 of these are needed to reduce the average supervisory span from 11 to 9; and one of the requested positions is for a unit clerk in the Los Angeles District Operations (licensing) section which currently has 34 professional staff with one clerk.

FISCAL

1	Associate budget analyst	$9,62
1	Associate administrative analyst (accounting systems)	11,11
6	Intermediate account clerk	28,78
8		$49,52

The growth in size and complexity of the department requires the addition of a position with primary responsibility for budgetary preparation, review and control. The expanding responsibilities of the fiscal officer and increased requirements on the accounting officer have reduced the time available for adequate budget preparation and administration.

Introduction of more complex aid programs and more sophisticated fiscal processing machinery in counties has increased the volume of routine auditing required under existing procedures. It is proposed to add an accounting systems analyst to review certain county accounting and claiming procedures. Where adequate systems and controls are in use the detail review of county claims will be reduced with a resulting reduction in claim audit staff requirements.

The caseload expansion and the requirement for semimonthly payments to recipients under Chapter 510, Statutes of 1963, results in a substantial increase in the claim processing required. Six additional clerical positions are needed for this purpose.

REPORTING

1	Associate research analyst	$9,88
1	Programer II	7,97
1	Junior research analyst	6,83
5	Intermediate account clerk	24,56
8		$49,257

One associate and 1 junior research analyst and 1 programer are required for support of fiscal and workload estimates in the categorical aid programs. The addition of program sub-divisions such as the unemployed in Aid to Families with Dependent Children and unemployability in the Aid to Disabled programs has required more complicated and difficult analytical procedures to produce reliable results. The addition of the service requirements from the Federal Government and the necessity for maintaining separate records on the unemployed portion of the Aid to Families with Dependent Children program requires extensive programing for electronic data processing equipment both in the state and county offices.

The increase in amount of data reported by the counties for subsequent compilation and transmission to the Federal Government requires 5 additional clerks for editing and processing.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

DETAIL OF PROPOSALS BY PROGRAM—Continued

Standardization and Direction of Services

1	Social service consultant III	$9,685
3	Employment consultant I	28,859
4		$38,544

It is proposed to add 1 social service consultant position, financed from Federal Child Welfare Services funds, to provide direction to the department's program for placing the mentally retarded and released mental hospital patients on public assistance programs at a lesser state and county cost than is possible in an institutionalized status.

The addition of 1 employment consultant position in each of the 3 area offices of the department is necessary in order to assist counties in the development of the work relief and training programs required by Chapter 510, Statutes of 1963.

WELFARE STUDY COMMISSION

Objectives

The commission, established by Chapter 2045, Statutes of 1961, was charged with studying the entire field of public welfare in California and making recommendations for improvement of all aspects thereof. The commission ceased to exist upon adjournment of the 1963 Regular Session of the Legislature.

Program and Performance

The commission was composed of 26 members: 17 members appointed by the Governor consisting of 3 directors of a county welfare department, 1 county probation officer, 4 county supervisors, 3 county administrative officers, 1 superior court judge, 1 district attorney, and 4 persons representing the general public; the chairman of the State Social Welfare Board, the Directors of Employment, Mental Health, Public Health, and Social Welfare; and 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

In accordance with the enabling legislation, the commission made its recommendations in a report issued January 1, 1963.

Services were contracted with the Department of Social Welfare to take advantage of federal funds available for these purposes.

GENERAL ANALYSIS

The Administrator of the Highway Transportation Agency is responsible for the supervision and operation of the Departments of Public Works, Motor Vehicles, and the California Highway Patrol. He is the chief advisor to the Governor in these areas and as such participates in the development of administrative policy and insures that such policies are put into effect.

The proposed budget provides for the continuation of the existing level of service.

GENERAL ANALYSIS

Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night to assure the safe, lawful, rapid and economical use of the highway system of the State of California.

Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of 1,654 mobile units operate approximately 60,000,000 miles annually for patrol and supervision of traffic, enforcement of laws and regulations pertaining to the weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Administrative Services Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger, and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment; records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; supplies all materials used from a central stores system; and supervises radio and wire communications.

The Field Operations Division is responsible for attaining the primary objectives of the department and is supported by the Administrative Services, Operational Planning and Analysis, Safety Services, and Training Divisions, all operating within policy established by the commissioner.

The Operational Planning and Analysis Division is responsible for the conduct of operational analysis and production of data for utilization in planning and the making of management decisions; conducts planning for the purpose of translating the department's purpose and objectives into operational programs with recommendations for implementation; determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster offices; prepares statistical data; and issues orders and bulletins.

The Safety Services Division develops and distributes radio and television programs, traffic safety information and news releases; controls permits for emergency equipment; issues light and brake station licenses; co-ordinates testing of accessories for compliance with state law; operates a central auto theft record unit; writes and releases administrative regulations pertinent to departmental responsibilities; and operates a voice and wire communications center in headquarters.

The Training Division provides training of new and retraining of in-service uniformed personnel; provides training programs for nonuniformed classifications; and co-ordinates the department's training program with other state departments.

The Land and Buildings Division is not an operating function and contains no personnel. The function includes the costs of leasing, utilities, maintenance, and repairs of office building space.

Chapter 999, Statutes of 1963 relating to motor vehicle air pollution control and Chapter 2028, Statutes of 1963 relating to motor vehicle pollution control devices add to the duties and responsibilities of the Highway Patrol. Chapter 2028 provides that the department shall license motor vehicle pollution control device installation and inspection stations, certificate installers, and furnish certificates and stickers for use on vehicles that are equipped with approved devices. To implement and administer this program requires a total of 72 positions, which are included in the budget as follows: Administration Division—2 clerical positions for Accounting Section and 1 clerical position for Personnel; Field Operations Division—32 examiners, 4 field representatives and 30 man-years of temporary help; Operational Planning and Analysis Division—1 key punch operator Safety Services Division—1 examiner and 3 clerical positions Seventy of these positions (all except the 2 field representatives) were established administratively during the current year since portions of this program became effective December 1, 1963.

Chapter 2148, Statutes of 1963 assigns certain duties and responsibilities to the department relating to safety regulations of highway common carriers, petroleum contract carriers, passenger stage lines, and charter-party carriers. The Highway Patrol assumed enforcement functions formerly exercised by the Public Utilities Commission during October of 1963, at which time 3 clerical and 7 technical positions were administratively established. The budget proposes a staff of 57, consisting of 7 clerical and 50 technical positions, to carry out all of the provisions of Chapter 2148. All of these positions are in the Safety Services Division.

An additional 75 state traffic officers are included to maintain a constant level of service in the face of workload created by increasing population and vehicle registration in the State. Ten additional traffic officer positions are proposed to provide 24-hour coverage at the new Banning and Castaic weight and scale facilities. Additional overtime for state traffic officers equivalent to 10.8 man-years is included as a continuation of funds established administratively in 1963-64 for this purpose. Because of a constantly increasing workload, and in accordance with established criteria, a total of 17.8 additional clerical positions is proposed for zone and area offices.

The balance of the proposed new positions are detailed as follows:

In the Administrative Division proposed new positions include 1 personnel analyst and 4 clerical positions based on workload needs. One additional mechanic is included to overhaul and calibrate loadometers; producing a savings over the present costs of contracting this work.

Proposed new positions for the Engineering Section of the Safety Services Division include 1 assistant engineer and 3 clerical positions—all in accordance with workload requirements. One administrative assistant is proposed for the Commercial Procedures Section to process increased workload. In the Administrative Regulations Section 1 administrative assistant is proposed to replace a state traffic officer previously assigned to this function, and 1 clerical position is included on a workload basis.

One state traffic lieutenant is included for the proposed Field Extension Training Section to improve and increase the training activities of field supervisors. An additional 0.5 clerical position is included for workload in the Training Division office.

The Division of Field Operations equipment request includes $219,600 for microwave radio equipment. Of this amount, $170,800 is for the replacement of 14 radio control repeater facilities by means of microwave links. This is necessary as the present radio control repeater facilities are severely restricted as to use, due to interference with local television stations and equipment obsolescence. The amount of $48,800 is requested for 2 additional microwave links to control repeater facilities at new mountaintop sites.

GENERAL ANALYSIS

Objectives

The major objectives of the Department of Motor Vehicles—a component of the Highway Transportation Agency—are to promote the public safety on the highways by means of driver screening, licensing, and post-licensing regulatory and control actions; and to provide identification and security of property rights in vehicles by means of registration and titling procedures and by the issuance of license plates. The department also is responsible for administering statutes requiring the occupational licensing of persons and firms in several industries and specialties related to motor vehicle production, sales, use, driver training, and highway safety in California. Another charge upon the department is administration of the financial responsibility laws applicable to drivers and owners of vehicles involved in mishaps on the public highways.

Program and Performance

The department's functions are performed under policies determined by the Director of Motor Vehicles in accordance with provisions of the Vehicle Code. Duties and responsibilities are divided among 4 divisions. The public is served in 146 field offices, each under the supervision of a manager. Travel crews serve some 60 communities in which workload does not justify establishment of a field office.

Some reorganization of the department occurred during 1963-64, primarily in the investigative function, to decentralize the concentration of power in that section. Major changes in staffing and functions are outlined in the program and performance section of affected divisions.

Workload and administrative adjustments in 1963-64 added 72.4 positions for the collection of use tax—a new program required by Chapter 1858, Statutes of 1963. The State Board of Equalization will reimburse the department for the cost it incurs in carrying out the provisions of this statute. The ·i· mated cost for the current year is $429,779. Six positions ·e added for implementation of Chapters 999 and 2028, Stat ·s of 1963, assigning responsibilities to the department in ·e motor vehicle air pollution control program. Workload adj· ments accounted for the other 28.4 positions.

The major budget year increases for the department ·e 265.9 man-years for increased workload, at a cost of appr· mately $1,390,000, and 83 man-years and related expense for ·e collection of use tax at a cost of $488,518. A total of 38.8 m· years have been included for motor vehicle pollution cont·. Other budget year increases are 24.5 positions to implem·t other 1963 legislation, 38.7 man-years for planning electr·c data processing for driver licenses, and 2 positions for s·f planning of electronic data processing.

An additional amount of $268,873 is included to augment · $250,000 authorized to continue the program of study and · ploration to install an electronic data processing system · signed to automate the driver license record file; and for · conversion, if needed, in the Division of Drivers Licenses.

The cost of administering legislation relating to rapid tra· systems is not reflected in the budget. The department will · fully reimbursed for any cost and there will be no net incre· in the budget.

The following are the major workload factors for this partment.

	Actual 1962-63	Estimated 1963-64	Estimated 1964-65	
Registration	10,109,906	10,475,000	10,858,000	383,· (3.7·
Drivers licenses	2,922,813	2,956,000	3,276,000	320,· (10.8·

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DEPARTMENTAL ADMINISTRATION

Objectives

The executive officer of the department is the Director of Motor Vehicles, who by statute is responsible for administering and enforcing the provisions of the Vehicle Code relating to the department.

Program and Performance

The director's immediate executive staff includes a deputy director for operations and a deputy director for traffic safety; legal counsel; and a secretarial-stenographic staff. The division chiefs report to the director and are responsible for carrying out his policies. The Division of Administration provides additional instruments for effecting the director's administrative programs.

The Division of Administration makes available to the director, and to the other administrators of the department, the range of management services required in all executive functions. These services are: fiscal and business management, personnel and training, management analysis, research and statistical service, editorial and information services, and traffic safety education.

The general participation of the department in interstate, reciprocity, and pro-rate negotiations, related to the promotion of interstate commerce, equity in highway usage, and public safety measures, is administered by this division.

During the 1963-64 fiscal year, departmental administration was affected by a reorganization of the investigative function. As a part of this reorganization, 2 associate counsel positions were established, replacing 2 assistant chief special investigator positions formerly assigned to the investigation section of the Division of Registration.

Other increases in this division during 1963-64 include the following:

(1) 2 man-years in the personnel and training section to meet workload requirements.
(2) 6.6 man-years of temporary help for the highway safety research program, the support of which is reimbursed by the federal government.
(3) 3.1 man-years of temporary help reflect research services rendered to the United States Public Health Service in connection with the Driver vision Study Program. This program is also fully reimbursed.
(4) 1.7 man-years in the Fiscal and Business Management Section for auditing and record keeping necessary in connection with use tax collection program. The State Board of Equalization will reimburse the department for the cost incurred in carrying out this program.

There is a reduction of 1.8 man-years of temporary help in fiscal and business management because of a normal workload decrease.

The 17.2 man-years shown as proposed new positions in 1964-65 consist of:

(1) The continuation of 4 positions established during 1963-64. These are 2 associate counsel positions in the Legal Section and 2 clerical positions established in the personnel and training section to meet workload increases.
(2) 9 man-years needed to cover the anticipated workload increases in 1964-65 over the 1963-64 level.
(3) The establishment of an executive position, chief of planning, electronic data processing, and 1 clerical position in the director's office to plan and co-ordinate the department's complex data processing system.
(4) 2.2 man-years to continue the temporary help need in this division for functions relating to the use tax program.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF REGISTRATION

Objectives

The objective of the Division of Registration is to provide identification and security of the property interests represented in vehicles. As is customary in such a service, the law authorizes collection of specified fees or taxes from persons who seek title recording and registration in compliance with legal requirements. This revenue is used to support the protective services of the Highway Transportation Agency generally and to provide a substantial part of the funds necessary to plan, design, build, and maintain state highways adequate to the needs of California motorists.

A secondary purpose of the fee collection function is to carry out provisions of the Revenue and Taxation Code designed to provide revenue for cities and counties—funds derived from the tax imposed as a vehicle license fee in lieu of a local personal property tax on vehicles.

Program and Performance

In serving its major purpose, the division operates one of the world's largest title recording services. Title, registration, and identification documents are issued, and license plates or renewing devices are assigned. The division collects registration fees, weight fees, transfer fees, and penalty fees for delinquent filing of applications. It also collects a vehicle license fee when it registers a vehicle for an owner.

The collections from the registration fee transactions and the vehicle license fees together produce approximately three hundred million dollars of revenue. The sums collected as registration fees represent about one-half of this total. The funds so collected are budgeted to the support of the Department of Motor Vehicles, the Department of the California Highway Patrol, and the Highway Transportation Agency. A large balance is transmitted to the Highway Users Tax Fund for highway construction and maintenance.

The vehicle license fee portion of the fees paid by motorists registering vehicles constitutes tax in lieu of a personal property tax on motor vehicles. The state collects this "in lieu" tax and distributes it to local governments after the costs of administration have been deducted.

The core of the program of the Division of Registration is the issuance of vehicle title and registration paper and vehicle license plates. The volume of issuance is expected to reach well over 10,000,000 in 1963-64. Increases in succeeding years are expected to range between 3 and 6 percent.

Organization of the division requires support of 3 major sections: the vehicle license and title section; the automation section (more accurately identified as the electronic data processing section since the introduction of an electronic tape computer system); and the investigation section (recently reorganized with some functions reassigned to departmental administration). The last section licenses dealers, dismantlers, manufacturers and transporters to do business in the State; and reviews their use of such state forms as may be issued to them.

The 1963-64 fiscal year includes an increase of 21.2 man-years of temporary help for implementation of the new use tax collection program and 4 man-years for beginning the motor vehicle air pollution control program. There is a reduction of 3.7 man-years of previously authorized temporary help because of normal workload decreases. Two assistant chief special investigator positions were transferred to the legal section of the director's office on October 1, 1963. One accounting tabulating machine supervisor position was abolished because the work performed by it has been taken over in another division.

A total of 116.1 man-years shown as proposed new positions in the 1964-65 Budget consist of:

(1) 66.5 man-years to cover the workload increase in 1964-65 over the 1963-64 level
(2) 21.2 man-years for continuing the motor vehicle air pollution control program
(3) 28.4 man-years for continuing the use tax collection program.

DIVISION OF DRIVERS' LICENSES

Objectives

The purpose of the program of the Division of Drivers Licenses is to promote the public welfare by giving tests to determine the extent of applicants' capacities to drive with reasonable safety on the highways, to the end that the safety of the driver and of other highway users shall not be subject to unnecessary hazard.

Program and Performance

This division defines the scope and establishes the procedures of the driver testing program, acting in co-operation with the Division of Field Office Operations which has actual supervision of the department's driver license examiners. The Division of Drivers Licenses receives applications processed by examiners in the field and reviews them for accuracy and compliance with law. It checks out the record of every applicant relative to traffic law violations, accidents, and physical or mental conditions that may create hazards. After clearance, terming, and production, the Division issues the completed licenses by mail. The quantity of output currently exceeds 12,000 licenses per day.

The files referring to drivers contain some 60,000,000 documents. Names are arranged in a phonetic-alphabetic index system. Records are filed under the permanent numbers assigned to licensed drivers. Legal files contain the special material relating to drivers whose licenses have been subject to secondary review, who have been interviewed or called to hearing, and those whose histories include actions against their driving pr ilege.

The division administers the driver improvement program the State's post-licensing regulatory and control instrume Analysts in major urban centers circulate to hold hearings a interviews or conduct group driver improvement meetings communities where negligent drivers have been officially invit or summoned to appear. The senior analysts' function at hea quarters is to review the hearing and interview reports a recommendations from the field staff, to determine appropria action, and to order the suspension or revocation of licenses the issuance of a probationary license.

The division prepares or reviews publications designed convey information about licensing requirements to the moto ists of the State; sets the standards and, with the field offi division, establishes the procedures of the driver examinati and re-examination program; maintains a continuing progra of up-dating and purging of driver files and records; and pr vides a constant flow of required information to police a courts, private institutions and persons.

A major section of the division maintains the accident repor required under the financial responsibility law; holds deposi of security pending determination of damages in such case and evaluates damage and injury without placement of culp bility.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF DRIVERS' LICENSES—Continued

Program and Performance—Continued

The 1963-64 increases are 8.6 man-years for workload increases, and 14.7 man-years for administration of new duties created by legislation passed during the 1963 General Session. Increases based on new legislation include 1.7 man-years for Chapter 237, Statutes of 1963, to effect the exchange of driver record information among states signatory to the new Driver License Compact; and 13 man-years for Chapter 354, Statutes of 1963, which provides the department with discretionary authority to suspend or revoke driving privilege of any person whose record shows 2 or more violations of his written promise to appear in court. There is a reduction of 0.8 man-years due to normal workload decrease.

The 153.4 man-years shown as proposed new positions in the 1964-65 budget consist of:

(1) 90.2 man-years to cover the anticipated workload increase in 1964-65 over the 1963-64 level.

(2) 7.5 man-years to continue for a full year the exchanging of information among the Driver License Compact party states.

(3) a. 5.7 man-years to continue the program initiated in 1963-64 of sending letters to subjects of Failure-to-Appear Notices warning them that they must clear citations or face the possibility of suspension or revocation of licenses.

b. 11.3 man-years to continue for a full year the administration of Chapter 354, Statutes of 1963, which authorizes suspensions or revocations in case of drivers' failure to appear in court.

(4) 38.7 man-years, plus funds for operating expense and equipment, to continue studies and tests preliminary to installation of an electronic data processing system in the Division of Drivers Licenses. This request is in addition to the 34.2 man-years requested during 1963-64.

DIVISION OF FIELD OFFICE OPERATIONS

Objectives

The objective of the Division of Field Office Operation is to facilitate compliance with Vehicle Code laws through convenient service to the public. This is accomplished by operating a system of branch offices providing ready access to vehicle registration, driver licensing, and the other services of the department.

Program and Performance

The division maintains 146 permanent, full-time offices and 25 travel crews whose duty is to bring registration and driver licensing services to an additional 60 communities. These offices and travel crews are organized into 11 field districts. The district managers are responsible to division headquarters. The local offices are staffed with persons trained to register vehicles and with driver license examiners specially trained to apply objective tests to applicants. The regulatory services applicable to driver licensing functions, and the investigative functions applied primarily to the occupational licensing operations also require use of thoroughly trained personnel. Staffs are also assigned to facilitate the annual renewal service extended to the public through 150 branch banks in the State. These institutions offer space in their premises rent-free for this public service. Specialists in various regions of the State are assigned to the work of inspecting commercial driving schools and applicants for licenses in this occupation.

The following changes are reflected in the 1963-64 fiscal year for this division.

(1) A net increase of 3.8 man-years for janitorial positions established during the current year required to meet workload rises in field offices.
(2) An additional 0.2 man-year of clerical help in the La port office to reflect the increased workload experien in the 1963-64 fiscal year.
(3) An additional 2.7 man-years of temporary help to m workload increases in general operations.
(4) An increase of 2 man-years of temporary help for t motor vehicle air pollution control program.
(5) 49.5 man-years of temporary help for the use tax coll tion program. Cost of this program will be fully rei bursed by State Board of Equalization.
(6) A decrease of 6 man-years because of workload decrea in central control.

In addition to above changes, effective with 1963-64 fisc year night operation of various larger field offices throughou the State for one night each week for drivers license service scheduled. No additional personnel is included for this progra however $2,000 for purchase of supplies, and $84,000 in the ca tal outlay budget for lighting of outside areas, are include

A total of 166.2 man-years shown as proposed new positio in the 1964-65 fiscal year consists of:

(1) 4 man-years to continue the positions established admi istratively in 1962-63 and 1963-64 fiscal year.
(2) 2.7 man-years to continue positions requested to me workload increases in the 1963-64 fiscal year.
(3) 87.5 man-years to cover the anticipated workload increas in 1964-65 over the 1963-64 level.
(4) 2 man-years in the Los Angeles numeric file section.
(5) 17.6 man-years to continue the motor vehicle air poll tion control program.
(6) 52.4 man-years of temporary help to continue for a fu year the use tax collection program.

GENERAL ANALYSIS

Objectives

Departmental Administration has responsibility for the over-all administration and direction of the Department of Public Works. The department consists of the Divisions of Highways, Bay Toll Crossings, Contracts and Rights of Way, and Aeronautics.

Program and Performance

The executive group consists of the director, a chief deputy, 2 other exempt deputies (1 for planning and 1 for management), and 2 assistant directors.

The director's office performs the primary functions of departmental policy formulation, co-ordination, and over-all direction of the activities of the organization.

Projected staffing for the budget year continues 4 positions added to the internal audit group during the current year. These additional positions are for the purpose of auditing all construction contracts prior to completion and final payment and to include functional units of headquarters in the periodic audit program, thus increasing the effectiveness of the audits and the protection of funds. There is no change in the projected staffing for the office of the director.

The director carries out the work of the department through broad delegations of authority to the chief of each division. The division chiefs are responsible to the director for the work in their divisions.

All of the divisions within the department were created by statute.

The director serves as administrative officer of the California Highway Commission and as a member of the Public Works Board. He is also administrative officer of the California Toll Bridge Authority, an ex-officio body which is concerned with the financing, construction or acquisition of toll bridge crossings and transportation facilities appurtenant thereto. The department provides all of the staff work for the authority.

While the Division of Aeronautics is in the Department of Public Works, the State Aeronautics Board, and the director of the division who serves at the pleasure of the board, have full statutory authority and responsibility for this activity. It is financed primarily by appropriation from the General Fund.

Departmental Administration costs have been charged on a pro rata basis to the State Highway Fund and the Division of Architecture Revolving Fund. Effective October 1, 1963, the Division of Architecture was transferred to the Department of General Services. As a result, the entire cost of departmental administration is now charged to the State Highway Fund.

[a] These expenditures are not included in budget totals as they are reported in their respective agencies.

GENERAL ANALYSIS

Objectives

The Division of Aeronautics provides the necessary staff assistance to the California Board of Aeronautics in the development and maintenance of a state system of airports. It provides planning assistance in engineering, zoning, safety, and noise abatement or control.

Program and Performance

The State Board of Aeronautics consists of 5 members appointed by the Governor for 4-year terms.

The division provides protection from zone-of-approach and airspace conflicts for 600 airports and more than 200 heliports of the system. It provides assistance in the creation of new airports and heliports and in the improvement of existing facilities. The division conducts hazard and noise studies in connection with proposed school sites and sponsors aviation education and safety programs. It also provides advisory service on airport financing and administers the Airport Assistance Fund.

Section 8352 of the Revenue and Taxation Code creates the Airport Assistance Fund and provides for a continuing appropriation from the Motor Vehicle Fuel Fund in the amount of $350,000. This amount less actual costs of administration of the fund, is available each year for the purpose of assisting cities, counties, and airport districts which own and operate airports under a valid permit issued by the division. Section 21681 of the Public Utilities Code provides that $15,000 is available each year from this fund for the support of the division for the division's activities in connection with the administration of this fund. Any balance of the $15,000 a year will be used to increase the amount available for local assistance.

Because of increased workload, 1 additional clerk is included on a full-time basis, and a lesser amount of temporary help is eliminated. Provision is also made to equip the division's twin engine aircraft with radio and navigational gear necessary for all weather operation.

GENERAL ANALYSIS

Objectives

The principal functions of the Division of Highways are to plan, construct, and maintain the 16,417 miles of the state highway system. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditures of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. Chapter 1364, Statutes of 1963 amended certain sections of the Streets and Highways code effective September 20, 1963, to provide that the Administrator of Highway Transportation serve as ex officio member and chairman of the Commission and the Director of Public Works serve as administrative officer of the Commission although not a member thereof. The Commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

This program is financed through the State Highway Fund. The first highway fund was authorized by the "State Highway Act" of 1909 which provided for the First State Highway Bond Issue. Subsequently 2 more bond issues and several other highway funds were established. The State Highway Fund as it now stands was created by an act of the 1933 Legislature. The major sources of revenue to the fund are from fuel taxes, registration and weight fees, transportation tax, and federal subventions, summarized below.

REVENUE SOURCES *(State Highway Fund)*

	ACTUAL 1962-63	ESTIMATED 1963-64	ESTIMATED 1964-65
Fuel License Tax (7¢ per gallon) [c]	$275,867,917	$313,875,400	$353,278,286
Use Fuel Excise Tax (7¢ per gallon)	24,230,383	25,760,550	27,433,000
Transportation License Tax	7,170,626	13,781,405	14,707,056
Vehicle Registration, Weight Fees, Drivers' Licenses, etc.	61,542,995	74,584,932	83,813,985
Federal Aid:			
Major State Highways [d]	253,051,541	296,494,119	305,708,240
Federal-aid Secondary	8,489,195	8,762,019	8,923,539
Miscellaneous	21,516,949	13,842,754	2,027,000
Estimated Revenue Adjustment	27,834,074	—	—
Total Revenues	$679,703,680	$747,101,179	$795,891,106

[a] Differences between prior year and current year reflect the revised definition of administration to conform with sections 141 and 143 of the Streets and Highways Code with improved consistency in districts and headquarters.

[b] These positions are financed from toll bridge revenues.

[c] This is the balance of the 7-cent tax going to the State Highway Fund.

[d] For the major highway system, including interstate, primary and urban. Other federal aid is carried in federal aid miscellaneous.

[e] The budget reflects action of the State Highway Commission after printing of Salary Supplement.

DIVISION OF HIGHWAYS—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

There are additional revenues which go directly to local agencies for highway purposes without going through the State Highway Fund. In 1962-63 this amounted to $81,881,964. An additional $62,933,000 was subvened from the State Highway Fund in 1962-63 to local agencies bringing the total revenues received by local agencies from these tax sources to $144,814,964.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. Six of these districts are headed by district engineers; the Marysville, Stockton and San Diego districts are headed by assistant state highway engineers; the San Francisco and Los Angeles districts are headed by deputy state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department having its main office in Sacramento with a branch in Los Angeles.

The first expenditures for the State Highway System commenced January 1, 1912, and the total expenditures to June 30, 1963, are $6,678,859,086. In order to gain a better perspective on the entire highway program, the expenditures from various parts of the budget are summarized below.

SUMMARY OF EXPENDITURE PROGRAM *(State Highway Fund)*

	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
State Operations	$64,448,452	$70,088,605	$71,319,000
Capital Outlay:

CONTRACTS AND RIGHTS OF WAY						
Program and Performance						
The Division of Contracts and Rights of Way is a division of the Department of Public Works, administratively established by the director under government code section 14005 and by the Legislature through the enactment of Chapter 1364 during the 1963 Legislative Session. The division provides legal services for the department, including the Division of Highways. It handles legal problems and litigation arising out of such activities as eminent domain and other legal phases of highway right-of-way acquisition, including matters involving public utilities, contracts, claims, financial affairs and collections, operations of toll bridges, and activities involving other governmental agencies.

	MAINTENANCE OF STATE HIGHWAYS						
	Program and Performance						
	The function of state highway maintenance is to preserve roadways and structures in the safe and usable condition to which they have been built or improved. This description covers hundreds of different tasks, ranging from routine patching to emergency slide removal. About one-fifth of the employees of the Division of Highways are engaged in maintenance work. Replacement and restoration work on highway facilities performed by the division forces, with major work of this nature, including resurfacing, being done by contract.

	MAINTENANCE OF TOLL BRIDGES						
	Program and Performance						
	The Director of Public Works on October 16, 1963, transferred responsibility for operation and maintenance of all state-owned toll bridges from the Division of Highways to the Division of Bay Toll Crossings, effective November 18, 1963. Operation and maintenance of the following bridges are involved: San Francisco-Oakland Bay, Richmond-San Rafael, San Mateo-Hayward, Dumbarton, Carquinez, Benicia-Martinez and the Vincent Thomas Bridge in the Los Angeles-San Pedro Harbor Area. Maintenance costs of the bridges continue to be paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Operating costs are paid from toll revenue funds.

HIGHWAY RESEARCH AND DEVELOPMENT [a]								
Program and Performance								
Broad-gauge special investigations and studies not closely tied in with localized projects are grouped under the heading of highway planning. These include the annual and monthly traffic counts, long-range research studies of all types, and studies of the economic and other effects of freeways. Current and imminent major projects include co-ordination of the statewide city and county street and road deficiency studies called for by Senate Concurrent Resolution No. 62 of the 1959 Session, and a scheduled re-estimating of Interstate Highway System deficiencies as required by federal legislation. In the 1963-64 fiscal year a portion of this function has been categorized as a part of the cost of construction and therefore is included within the Capital Outlay portion of the budget.

SUPERVISION OF OUTDOOR ADVERTISING								
Program and Performance								
Administration of the Outdoor Advertising Act has been assigned to the Division of Highways in accordance with Article 2 of the Act, and is carried on as a function of the Maintenance Department. It is a self-supporting function, financed from revenues received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside incorporated areas.

GENERAL ANALYSIS

Objectives

Pursuant to Section 3820 of the Harbors and Navigation Code, this board has responsibility for the safety of navigation at the Port of Eureka and Humboldt Bay.

Program and Performance

The board, established under the provisions of Section 3800 of the Harbors and Navigation Code, consists of 3 members appointed by the Governor with the consent of the Senate. Each commissioner serves for a 4-year term. One commissioner, designated by the Governor, acts as ex officio surveyor of th port and secretary of the board.

The board's goals are two fold: First, to insure that th Corps of Engineers, United States Army, maintains the harbo standards adopted in 1953; and second, to further substantiat and justify the need for improvement of ingress to the harbo and deepening of existing channels.

The board was reactivated in 1962 because of unsafe cond tions which have arisen in this harbor.

GENERAL ANALYSIS

Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

Program and Performance

The department, established and operated under the provisions of Division 1, Chapter 1 of the Labor Code, through its 9 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workman's Compensation Law; establishes, enforces, and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women, and minors; promotes opportunities for apprentices; enforces laws relating to housing; prepares labor statistics and promotes fair employment and fair housing practices. The Division of Administration provides central services for the line divisions.

The work injury rate in California was 32.1 injuries per 1,000 employees in 1961, decreasing to 31.6 in 1962. However, the total disabling injuries increased from 162,055 in 1961 to 166,008 in 1962 with fatalities up from 832 in 1961 to 1,023 in 1962. The same trend is evident in 1963 with disabling injuries for the first 6 months up from 80,569 in 1962 to 81,377 in 1963. However, fatalities for the first 6 months of 1963 were down from 490 in 1962 to 462 in 1963. In an effort to reduce the disproportionately high and rising rate of 83.1 injuries per 1,000 employees in the construction industry, 22 additional construction safety engineers are included for 1964-65.

Total filings received by the Industrial Accident Commission in 1962-63 was 83,294 compared with 70,980 in 1961-62. This was an increase of 17.3 percent. A 15 percent increase in filings is estimated for the current and budget years resulting in a need for 20 additional referee units and related services which are included in 1964-65 at a cost of approximately $930,000.

Complaints regarding wages, hours, and employment conditions affecting industrial welfare and labor law enforcement continue to increase; an increase of 12.8 percent for 1962-63 over 1961-62 was experienced by the Division of Labor Law Enforcement. The division anticipates a workload increase averaging 10 percent for each of the 1963-64 and 1964-65 fiscal years.

Apprenticeship services are increased to provide for increased workload in on-the-job training under the federal Manpower Development Training Act, and for the operation of Apprenticeship and Training Information Centers in addition to normal workload increases.

In the Division of Fair Employment Practices 6 positions are proposed to meet continuing complaint workload relating to discrimination in employment.

The 1964-65 budget provides for the following increases in personnel:

	Positions
1. Administration	6
2. Industrial accident referee teams and services	96
3. Industrial safety inspections	46
4. Welfare and labor law complaint services	43.6
5. Apprenticeship services	26
6. Housing inspection services	3
7. Labor statistics and research	1.5
8. Fair employment practices	6
Total	228.1

The new positions and their purposes are discussed in the program and performance statements in the appropriate division.

DIVISION OF ADMINISTRATION

Objectives

To carry out the administration's policy and provide effective economical administration of the laws affecting this department.

Program and Performance

This division performs policy making, accounting, budgeting, personnel, procurement, housing and duplicating functions of the department. Also, within Administration is a small unit which supervises the claims of injured workmen under the Workmen's Compensation Self-Insured Program.

During the fiscal year 1963-64, a reviewing unit is authorized within Administration to review injury reports filed under the Workmen's Compensation Insurance Act to ascertain if vocational rehabilitation seems to be indicated. Indicated cases will be referred to the Department of Vocational Rehabilitation for action. To date, it is too early in the program to analyze any workload figures. It will take several years before any objective study can be made of the effectiveness of the results.

For 1964-65, it is proposed to strengthen the staff of the Division of Administration by the addition of 6 new positions, to cope with the workload generated by the increased personnel and workload within the entire department. Of these, 2 are in an administrative analysis unit, composed of 1 senior administrative analyst, and 1 associate administrative analyst proposed for workload analyses, organizational studies, and accounting methods and procedures. To meet workload increases in central services 3 intermediate typist-clerk and 1 junior clerk positions are proposed to provide clerical support for the increased professional staff, and increased accounting and personnel services related to the overall departmental increased staff.

Provision is also made for increased rentals when renegotiating leases or additional personnel in field offices necessitates additional space.

	DIVISION OF CONCILIATION						

Objectives

To promote sound union-management relationships in accordance with Section 65 of the Labor Code which provides for mediation activity in the Department of Industrial Relations.

Program and Performance

The State Conciliation Service adjusts labor-management disputes through conciliation, mediation, and arbitration procedures; conducts representation elections; prevents critical disputes and work stoppages through investigation; aids in the solution of labor problems which threaten curtailment of production of services; and is also required to administer certain arbitration, election and grievance procedures of the Los Angeles Metropolitan Transit Authority Act, the Alameda-Contra Costa Transit District Act; the San Francisco Bay Area Rapid Transit District Law and the Stockton Metropolitan Transit District Law.

DIVISION OF INDUSTRIAL ACCIDENTS

Objectives

To obtain for the injured workman and his dependents, with the least possible delay, all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission is established and operates under the provisions of Division 1, Chapter 5 of the Labor Code. A staff of 94 referees assists the commission in deciding cases brought before it. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission itself, on its own motion, may grant a reconsideration.

In 1962-63, 83,294 filings were recorded and 79,519 dispositions issued for an average of 992 dispositions for each of the 84 authorized referee units. It is anticipated that a 15 percent increase in filings will occur for a total of 95,788 in 1963-64 and 110,156 in 1964-65.

A total of 96 new positions are included for the 1964-65 fiscal year, to handle the anticipated 15 percent increase in filings and the increasingly large pending load. These consist of 20 referee units (4 positions each) plus ancillary help by 3 raters, 3 consultants and medical examiners and 3 intermediate stenographers. The addition of these positions is necessary to maintain the existing level of service, and is not expected to reduce the existing pending case load.

The addition of 1 junior counsel and 1 intermediate stenographer is proposed to handle increased workload on the Los Angeles information desk.

It is proposed to add 1 intermediate stenographer for the medical bureau examination workload in San Francisco. During 1963-64 backlog in filing in the Los Angeles central office necessitated the temporary approval of 3 intermediate typist-clerks. This workload increase is continuing and the positions are proposed on a permanent basis in 1964-65. In an effort to utilize typists and dictating equipment in lieu of more expensive hearing reporters, 1 hearing reporter position was eliminated in both 1963-64 and 1964-65 and 1 additional intermediate typist position temporarily approved during 1963-64. The typist position is included as proposed new for 1964-65 to continue the appraisal of this method.

DIVISION OF INDUSTRIAL SAFETY

Objectives

The primary purpose of this division is to reduce work injuries in employment and places of employment.

Program and Performance

The division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of interstate railroads, and seamen—and covers some 400,000 places of employment in such industries as agriculture, construction, mineral extraction, manufacturing, trades, services, transportation, and utilities. The division promulgates, after public hearings, standards of safety for all employments and conducts educational programs, including the preparation and distribution of educational materials.

The Industrial Safety Board, established by Division 1, Chapter 6 of the Labor Code, consisting of 4 members appointed by the Governor for overlapping 4-year terms and a fifth ex officio member, the Director of Industrial Relations, serving as chairman, adopts minimum safety standards for various operations. The safety standards, known as general safety orders, are published in the California Administrative Code, Title 8.

The work injury rate in California was 32.1 injuries per 1,000 employees in 1961, decreasing to 31.6 in 1962. However, the total disabling injuries increased from 162,055 in 1961 to 166,008 in 1962 with fatalities up from 832 in 1961 to 1,023 in 1962. The same trend is evident in 1963 with disabling i juries up from 80,569 in 1962 to 81,377 in 1963 for the fi 6 months. However, fatalities for the first 6 months of 19 were down from 490 in 1962 to 462 in 1963.

Employment during 1962 was up 3.6 percent over 1961, a during the first 6 months of 1963 employment increased percent over the first 6 months of 1962.

For 1964-65, a total of 46 positions consisting of 32 safe engineers, 3 district engineers, and 11 clerks are included follows:

On the basis of workload formula, 7 engineers and 1 d trict engineer for pressure vessel workload increases, and engineers for elevator inspection increases are included.

In addition, 22 safety engineers and 2 district enginee are budgeted for the construction section, based on surve lance, servicing of requests, prosecutions, accident investig tions, and special investigations, with prime considerati being given to the total number of active construction pr ects per year. Additional effort is needed to improve the po accident record of this industry which is more than doub the average for industry in general.

The inclusion of 11 clerical positions is proposed to pr vide necessary assistance to the additional engineering sta

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF INDUSTRIAL WELFARE

Objectives

To maintain the health, welfare, safety and comfort of women and minors employed in any occupation, trade, or industry through the adoption of minimum standards regulating their maximum hours, minimum wages, and working conditions in accordance with provisions of Sections 1173-1178 of the Labor Code.

Program and Performance

In the division, the Industrial Welfare Commission is composed of 5 members appointed by the Governor pursuant to the provisions of Sections 70-74 of the Labor Code. The commission issues orders establishing minimum wages, maximum hours and conditions of labor in various industries.

For the 1964-65 fiscal year the Industrial Welfare Commission is including funds to allow revision of Order 14-61 which covers the employment of women and minors employed in harvesting occupations. The commission plans to call a wage board composed of 15 members. In addition, the commission will need 1 technical assistant for a 3-month period, and 1 intermediate stenographer for a 4-month period, to complete this project.

Jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of those laws and regulations for women and minors which control their minimum wage, maximum hours, and standard conditions of labor as directed by the Labor Code and the regulations adopted by the Industrial Welfare Commission. Thirteen of the 14 existing Industrial Welfare Commission Orders which were revised during 1962-63 became effective August 30, 1963, increasing the minimum wage from $1 to $1.25 per hour. On August 30, 1964, the minimum wage will increase to $1.30 per hour.

The 2 Industrial Welfare Commission Orders regulating agricultural employment which became effective August 28, 1961, expanded coverage so that all employment of women and minors are now covered by wage orders, with the exception of domestic service. A total of 62,500 farm employers were added to the division's total estimated workload of 305,350 employers.

The division is directed by statute to supervise the payment of unpaid minimum wages and unpaid overtime pay for all women and minors wherever a violation is found, regardless of whether or not a complaint has been filed. The hours regulations require payment of premium rates for overtime based on the regular rate of pay. In addition to enforcing the many provisions which regulate the working conditions, the division must license and regulate industrial home work; license and regulate the employment of handicapped women and minors; issue special exemptions from the Industrial Welfare Commission regulations, and enforce the equal pay law for women.

During the 1962-63 fiscal year the division completed 9,857 cases, corrected 20,133 violations, benefiting 175,296 employees. A total of $263,641 was collected, representing minimum wage underpayments and premium overtime pay. Home work licenses numbering 105 were issued to employers, and 805 permits to individual home workers. A total of 1,499 special minimum wage permits, and 139 exemption permits were processed and issued.

A total of 11.6 new positions are added for the 1964-65 fiscal year. These include 4 additional welfare agents and 1 payroll auditor added to continue these services at the current level; and 4 industrial welfare agents are included to reduce the 9-month backlog now existing in the correction of violations affecting the employment of women and minors in Los Angeles County. Additionally, 2 intermediate stenographer-clerks are necessary to provide clerical support to the proposed new Los Angeles area positions.

DIVISION OF LABOR LAW ENFORCEMENT

Objectives

To protect the rights of the general public and those employees whose interests fall within the provisions of the California Labor Code.

Program and Performance

This division has the overall responsibility for administering and enforcing all labor laws that are not specifically delegated to any other authority. The major part of the work of the division deals with the enforcement of wage payment laws, the collection of unpaid wages; laws requiring contribution by employers to health and welfare funds; the payment of prevailing wage rates and overtime on public works projects; the compulsory workmen's compensation insurance law; the bonding of employers in certain industries; and laws restricting the hours of work in certain occupations. A substantial part of the division's activity is related to the licensing and regulation of private employment agencies, labor contractors and artists' man-

	Program and Performance—Continued						

agers; of farm labor contractors and of unloaders of farm produce in urban centers. The division is also charged with responsibility for enforcement of Child Labor Laws and certain restrictions upon employment of minors with the exception of those regulations that deal with minimum wages. Pursuant to the provisions of Chapter 2100, Statutes of 1963, the labor commissioner prescribes rules and regulations for trade schools, specifically standards for advertising, publicity, and placement activities.

The statistics for the division reflect a significant increase over previous years. The total caseload for 1962-63 increased 12.8 percent, while collections of money increased 18.6 percent to a new high of $3,612,813. Civil suits filed continued at about 40 percent over optimum. There were 694 such suits filed during the fiscal year. The "backlog" or body of cases not closed at the end of 1962-63 amounted to 38,810 representing an increase of 4,940 over the previous year.

The work of the division continues to grow in volume and in complexity; and the activity more time consuming as a result of this complexity. This fact continues to be attributable to the refined patterns of employer-employee relations. The current trends in government and labor-management relations have resulted in the frequent attendance at hearings of the division by attorneys, personnel management specialists, and labor relations experts.

Having experienced a caseload of 56,041 complaints during 1962-63, representing an increase of 12.8 percent, a 10 percent increase during 1963-64 and 1964-65 each is anticipated. This would mean a total caseload of 67,810 complaints during 1964-65.

In 1964-65 a total of 32 new positions are added because of an anticipated total workload of almost 68,000 cases, and because of required changes in operations, such as the requirements for certification to small claims court that wages are due and payable before the court will hear the case. These new positions include 7 deputies, 3 investigators, 2 supervising deputies, 1 attorney, and 19 clerical positions added in the 1964-65 fiscal year.

DIVISION OF APPRENTICESHIP STANDARDS

Objectives

Promotion and development of apprenticeship and other on-the-job training under the provisions of the Shelly-Maloney Apprentice Labor Standards of 1939, Sections 3070-3093 of the Labor Code. Section 3093 provides services for journeyman training, retraining of displaced workers, and the training of new workers entering the labor market in programs other than apprenticeship.

Program and Performance

The Apprenticeship Council establishes labor standards for apprentice agreements and issues rules and regulations which are administered through the division. The council has 16 members who represent employers, employees, the public, and state government. The Director of Industrial Relations is ex-officio secretary of the council and administrator of apprenticeship.

Since apprenticeship and other on-the-job training programs are voluntary on the part of employers and employees and their organizations, it is the division's function and responsibility to encourage and assist these groups to establish and maintain programs that will meet the State's growing needs for skilled workers and expand on-the-job training opportunities for the increasing number of youth entering the labor market and for workers who may be or have been displaced by automation and other technological changes. The division advises and assists in the preparation of written standards and agreements that comply with the regulations of the California Apprenticeship Council, Title 8, Chapter 10, California Administrative Code.

The division vigorously promotes and supports equal opportunity in apprenticeship and training without regard to race, creed, color, or national origin.

Under the federal Manpower Development and Training Act of 1962, the division develops and services on-the-job training and retraining programs for unemployed workers on a fully reimbursable contract basis with the United States Department of Labor.

DIVISION OF HOUSING

Objectives

Protection of the health and safety of occupants and the public through administration and enforcement of state housing laws and related administrative regulations in accordance with the provisions of Section 76 of the Labor Code.

Program and Performance

Division of Housing has responsibility for performing functions related to preparation, adoption, and revision of state building and housing standards for inclusion in administrative regulations applying to all types of housing occupancies. Statutory authority for these functions includes Health and Safety Code Division 13, Part 1 (State Housing Law), and Part 2 (Mobilehome Law); and Sections 2410-2425 of the Labor Code.

In addition to its direct enforcement jurisdiction, the division has supervisory enforcement responsibilities where local enforcement agencies assume primary enforcement of the state law.

The division furnishes consultative assistance to local officials, architects, builders, and interested groups in the enactment and enforcement of adequate building codes, investigation of substandard housing conditions, and organization of local housing rehabilitation and urban renewal programs.

Inspection and reinspection coverage of approximately 8,000 labor camps in the State, including an effective camp registration program is a continuing responsibility.

The division provides construction supervision and annual inspection of mobilehome parks and construction supervision and minimum maintenance of auto courts, resorts, and motels. Applicable fees are set by statute.

Enforcement of state building and housing standards applicable to apartment houses, hotels, and dwellings, under provisions of the State Housing Law is carried on, as is construction supervision under provisions of the Earthquake Protection Law where no local enforcement agency is established. Construction fees are collected for these services. Efforts will con-

	DIVISION OF LABOR STATISTICS AND RESEARCH						
	Objectives						
	The Division of Labor Statistics and Research has legal responsibility for compiling labor statistics for the State and administrative statistics for the department as assigned under the provisions of Section 150-153 of the Labor Code.						
	Program and Performance						
	The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 9 major metropolitan areas, and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations; also studies of wages and hours in industries employing women for minimum wage determination. In connection with the legal responsibility of the Department of Industrial Relations to monitor the payment of prevailing wages on public works, the division has responsibility for maintaining a file of current wage rates for all building trades occupations in all counties in the State. Administrative statistics are compiled regularly for the other divisions of the department. The volume of work processed for the department is continually expanding with the growth in cases processed by the various divisions for which administrative statistics are compiled. Added to this is the anticipated new workload of compiling regularly, statistics of wage claims under the new system of record keeping being introduced by the Division of Labor Law Enforcement; of compiling statistics of cases processed by the Division of Fair Employment Practices; and mechanization of certain of the accounting procedures of the department. Requested for 1964-65 in the Data Processing Section is 1 intermediate clerk to carry out a variety of clerical duties, many of which are now being handled by skilled machine operators in the section, with the resulting loss of valuable and needed machine time. With the greater emphasis on mechanization of the work of the various divisions of the department it is required that the tabulating machine operator staff devote full time to technical data processing and programming. Also, for maximum utilization of data processing equipment, it is essential that tabulating machine operators concentrate on data processing work. Clerical work resulting from revision scheduled during 1964-65 of the "Doctor's First Report of Work Injury" and "Employers Report of Industrial Injury" forms will require the addition of 0.5 man-year temporary help which is limited to June 30, 1965.

Personnel man-years	75.4	82.4	86.9	4.5

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

Program and Performance

The Fire Marshal's program includes fire prevention engineering, advisory and plan-checking services to the State Departments of Corrections, Public Health, Mental Hygiene, Public Works, Social Welfare and Youth Authority. Working drawings are checked for all public and private institutional occupancies, including jails and all public schools in California.

The field inspection program covers all schools, public and private, fairs and other places of public assembly, all institutional occupancies, organized summer camps, all state institutions, and dry cleaning establishments.

Law enforcement activities include: fireworks, transportation and storage of explosives, transportation of flammable liquids, sale and servicing of fire extinguishers, treatment and use of flammable decorations, flammable wearing apparel, and a bulletin listing service of building construction materials and equipment distributed on a subscription basis. The Fire Marshal also operates a laboratory to test various materials in order to establish fire safety standards.

A co-ordinated program for administering State fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy.

The 1963 Legislature increased fees for permits and licenses in several of the programs administered by the State Fire Marshal. This is reflected in reimbursements and revenues for the current and budget years.

In the 1963-64 fiscal year 1 deputy state fire marshal is abolished in the fire extinguisher program to keep staffing and costs in balance with workload and reimbursements.

The 1964-65 fiscal year budget includes 6 additional positions.

To provide more adequate service in the fireworks program, particularly field enforcement, two additional deputy state fire marshals are included. The increased cost is more than offset by increased revenue.

An additional deputy state fire marshal is included for the tank truck program to meet workload requirements. Reimbursements are sufficient for this staff increase.

The program for enforcement of fire safety requirements at organized camps requires the services of an additional deputy state fire marshal.

A fire studies analyst is included to compile and study data on fires and explosions occurring in school, institutional and public assembly occupancies. This will provide a basis for program evaluation and planning by the State Fire Marshal.

An additional stenographer is included to meet the increasing clerical workload in headquarters.

	DIVISION OF LABOR STATISTICS AND RESEARCH						
	Objectives						
	The Division of Labor Statistics and Research has legal responsibility for compiling labor statistics for the State and administrative statistics for the department as assigned under the provisions of Section 150-153 of the Labor Code.						
	Program and Performance						
	The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 9 major metropolitan areas, and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations; also studies of wages and hours in industries employing women for minimum wage determination. In connection with the legal responsibility of the Department of Industrial Relations to monitor the payment of prevailing wages on public works, the division has responsibility for maintaining a file of current wage rates for all building trades occupations in all counties in the State. Administrative statistics are compiled regularly for the other divisions of the department. The volume of work processed for the department is continually expanding with the growth in cases processed by the various divisions for which administrative statistics are compiled. Added to this is the anticipated new workload of compiling regularly, statistics of wage claims under the new system of record keeping being introduced by the Division of Labor Law Enforcement; of compiling statistics of cases processed by the Division of Fair Employment Practices; and mechanization of certain of the accounting procedures of the department. Requested for 1964-65 in the Data Processing Section is 1 intermediate clerk to carry out a variety of clerical duties, many of which are now being handled by skilled machine operators in the section, with the resulting loss of valuable and needed machine time. With the greater emphasis on mechanization of the work of the various divisions of the department it is required that the tabulating machine operator staff devote full time to technical data processing and programming. Also, for maximum utilization of data processing equipment, it is essential that tabulating machine operators concentrate on data processing work. Clerical work resulting from revision scheduled during 1964-65 of the "Doctor's First Report of Work Injury" and "Employers Report of Industrial Injury" forms will require the addition of 0.5 man-year temporary help which is limited to June 30, 1965.

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

Program and Performance

The Fire Marshal's program includes fire prevention engineering, advisory and plan-checking services to the State Departments of Corrections, Public Health, Mental Hygiene, Public Works, Social Welfare and Youth Authority. Working drawings are checked for all public and private institutional occupancies, including jails and all public schools in California.

The field inspection program covers all schools, public and private, fairs and other places of public assembly, all institutional occupancies, organized summer camps, all state institutions, and dry cleaning establishments.

Law enforcement activities include: fireworks, transportation and storage of explosives, transportation of flammable liquids, sale and servicing of fire extinguishers, treatment and use of flammable decorations, flammable wearing apparel, and a bulletin listing service of building construction materials and equipment distributed on a subscription basis. The Fire Marshal also operates a laboratory to test various materials in order to establish fire safety standards.

A co-ordinated program for administering State fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy.

The 1963 Legislature increased fees for permits and licenses in several of the programs administered by the State Fire Marshal. This is reflected in reimbursements and revenues for the current and budget years.

In the 1963-64 fiscal year 1 deputy state fire marshal is abolished in the fire extinguisher program to keep staffing and costs in balance with workload and reimbursements.

The 1964-65 fiscal year budget includes 6 additional positions.

To provide more adequate service in the fireworks program, particularly field enforcement, two additional deputy state fire marshals are included. The increased cost is more than offset by increased revenue.

An additional deputy state fire marshal is included for the tank truck program to meet workload requirements. Reimbursements are sufficient for this staff increase.

The program for enforcement of fire safety requirements at organized camps requires the services of an additional deputy state fire marshal.

A fire studies analyst is included to compile and study data on fires and explosions occurring in school, institutional and public assembly occupancies. This will provide a basis for program evaluation and planning by the State Fire Marshal.

An additional stenographer is included to meet the increasing clerical workload in headquarters.

WORKMEN'S COMPENSATION STUDY COMMISSION

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	–	$44,462	$55,538	$11,076 (24.9%)
Personnel man-years	–	1	1	

GENERAL ANALYSIS

Objectives

The Workmen's Compensation Study Commission's object is to conduct a study of all aspects of the workmen's compensation system, including consitutional and statutory provisions and administrative regulations, procedures, and practices.

Program and Performance

The commission was authorized by Chapter 2040, Statutes of 1963, and consists of 7 citizens appointed by the Governor and approved by the Senate. The chairman, selected by the Governor from among the commission members, serves as the executive officer and receives a salary fixed by the commission and subject to the approval of the director of finance. The commission also includes 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

In accordance with the enabling legislation, the commission is charged with the responsibility of determining whether the workmen's compensation system effectively contributes to the original, fundamental purposes of the workmen's compensation laws. A critical analysis of the permanent disability rating system and its actual effect upon injured men, including consideration of an effective rehabilitation program, will be made.

The committee has the power to hold hearings at such times as it may deem proper, to issue subpoenas to compel the attendance of witnesses and the production of related reports and documents. It has the power to engage the services of public or private research agencies for the rendition and affording of such services, studies, and reports to the commission as will best assist it to carry out its duties and responsibilities. It also may co-operate and co-ordinate with all city, county, state, and federal agencies engaged in any phase of study or rehabilitation of industrially injured workers.

The sum of $100,000 has been appropriated from the General Fund for the expenses of the commission in completing this study. The commission will advise the Governor and the Legislature of its findings before the end of the 1965 Regular Session, and cease to exist 90 days after the adjournment of the 1965 Regular Session, or such earlier time as its final report shall have been submitted.

GENERAL ANALYSIS

Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State to interpret laws, render opinions, and represent the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.

Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards, and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the coordination of requests from local enforcement agencies, and assistance in the locating of deserting parents.

The State Narcotics Act is enforced through offices loc in Fresno, Los Angeles, Sacramento, San Diego, and Francisco. Agents operating from these offices investigate kn and suspected persons for illegal possession, use, and sal narcotics. Prosecution of violators is accomplished through district attorney in each county.

The 1964-65 Budget provides for the following increase personnel:

Organization	*Positio*
Division of Administration	6
Division of Civil Law	56
Division of Criminal Law and Enforcement:	
Executive	4
Bureau of Criminal Law	34
Bureau of Criminal Statistics	8
Bureau of Criminal Identification and Investigation	34
Bureau of Narcotics Enforcement	2
Total	144

Totals, Workload and Administrative Adjustments	–	—1	—2	–	—$5,196	—$11,584

Objectives

This division carries out the administrative responsibilities of the Attorney General, maintains the general services necessary to the operating divisions of the department and operates the State Teletype System.

Program and Performance

Through the Fiscal Office, the Division of General Administration maintains fiscal control and internal management, budget preparation, purchasing, and mail messenger and duplicating services.

The State Teletype System is a communication service primarily for police offices with secondary use by government agencies. Departmental control centers are located in Sacramento, Los Angeles, and San Francisco.

In 1963-64 1 teletype operator was permanently deleted due to a reduction in the administrative messages handled in the San Francisco office. Also, in 1963-64, due to the reduction in staff and messages handled 1 supervising teletype operator was transferred from the San Francisco office to the Sacramento office as a night supervisor of the system. Workload increases and staffing patterns justify the continuation of this posit which is shown as proposed new, on a permanent basis 1964-65.

During 1963-64 a reorganization of the department remo the stenographer staff from this office and placed them u the supervision of the respective legal offices in the areas which they were located. This change involved a total of clerical positions of which 107 were transferred to the Divi of Civil Law and 27 were transferred to the Division of Cr inal Law and Enforcement. This transfer was made to refle more accurate relationship to the functions performed in t divisions.

In addition to the supervising teletype operator, a total 5 positions are included in this division in 1964-65 to ha increased workload. An accounting technician III and 2 cl are included to handle the increased general accounting o workload and workload related to the apportionment to ci and counties for Peace Officers' Standards and Training. addition 2 clerical positions are included to handle incre workload in the mimeograph section and in the supply roon the Sacramento office.

DIVISION OF CIVIL LAW

Objectives

This division is responsible for handling the civil and administrative legal problems of state departments, boards and commissions.

Program and Performance

Attorneys operating out of San Francisco, Los Angeles, and Sacramento represent the State of California in federal and state courts at all levels and represent officers, boards, and commissions before administrative tribunals. Legal opinions, either formal, informal, or oral are rendered as required by law, not only to state officers, boards, and agencies, but also to Members of the Legislature, district attorneys, and county counsels. In addition, other legal services normally performed by a firm of private attorneys for its clients are furnished, including the drawing of legal documents, consultation, and the rendering of advice on legal matters.

Tidelands Litigation

At the 1963 Session of the Legislature, the State Lands Division indicated a need for funds to pursue a decision from the United States Supreme Court as to the definition of the 3-mile off-shore limits, whether or not the State or the Federal Government has the authority to issue licenses to drill for oil in this area, and a determination to entitlement of oil royalties from the disputed off-shore areas. Accordingly, funds were appropriated to the State Lands Division in order to finance the services of 7.5 positions which were authorized in 1963-64 in the Department of Justice to pursue these decisions. In order to continue this suit, these 7.5 positions, consisting of 3 attorneys, 4 clerks and 0.5 man-years of temporary help are continued in 1964-65 on a permanent basis. In the event that a settlement is reached during 1964-65, these positions will be terminated.

Colorado River Litigation

The Colorado River Litigation Section is continued on a reduced scale into 1964-65 in order to prepare evidence of "present perfected rights" to water from the Colorado River pursuant to the decree of the United States Supreme Court and the Report of the Special Master. The parties have generally agreed that the "present perfected rights," which the court has held are entitled to priority, are to be determined on facts existing as of June 25, 1929, the date of the Colorado River Compact. The definition of "present perfected rights" is still in dispute but will be determined by a decree which the court enters and which in all probability will be entered in the present term of the court. The parties have agreed to a provision in the decree whereby each party will present evidence of its "present perfected rights" within 2 years from the date of the expected decree and the court thereafter will resolve disputes as to the extent of the parties "present perfected rights." Funds for consulting services are included for research and analysis of water use and supply and technical preparation of evidence. In view of the timing of submission of these documents funds will continue to be budgeted for this purpose through 1965-66.

[a] During 1963-64 a total of 134 clerical positions have been transferred from the Division of General Administration to the Division of Civil Law (107) and the Division of Criminal Law (27) in order to show a more appropriate relationship to functions performed.

DEPARTMENT OF JUSTICE—Continued

DIVISION OF CIVIL LAW—Continued

Program and Performance—Continued

A total of 56 positions are included in the 1964-65 Budget for this division of which there are 18 legal positions, 3 investigators, 2 technicians and 33 clerical positions.

Land Law Section

Two attorneys and 1 related clerk, temporarily approved in 1963-64 to handle the State Water Plan condemnation proceedings, are proposed as new in 1964-65 in order continue this program and insure the timely acquisition of land commensurate with the construction schedule of the project; 3 additional attorneys and 2 related clerks are included to handle the projected increase in condemnation proceedings as this project continues its southward progress to the Perris Reservoir; 1 attorney and 1 related clerk are also included to handle increased condemnation workload related to the Beaches and Parks acquisition program and the State College site acquisition program and other departments as required.

Governmental Law Section

One attorney and 1 related clerk are included in the Governmental Law Section to handle new workload resulting from the enactment of Chapter 1786, Statutes of 1963, which transferred the Division of Architecture from the Department of Public Works to the newly created Department of General Services.

Tort and Personnel Law Section

Since September, 1962 there have been 609 claims and 133 tort actions filed against the State. These claims and suits total approximately $56.9 million. As a result of the enactment of Chapters 1681, 1862, 1863, 1715, Statutes of 1963, which define limits of lability of public entities and its officials and employees, it is planned to temporarily approve 3 attorneys, 1 inv gator and 3 related clerks in 1963-64 to handle the new v load involved in the backlog of cases. These positions continued in 1964-65 as proposed new. To augment the pr staff in its efforts to reduce the backlog of cases, 3 addit attorneys and 1 related clerk are also included in 1964-65.

Administrative Law Section

Four attorneys and 2 related clerks are included to ha the increased workload in the Administrative Law Sectio a reimburseable basis from such agencies as the Depart of Investments and the Department of Professional and V tional Standards and its constituent boards, bureaus, and missions.

Business Law Section

One attorney, 2 investigators, 1 auditor III and 1 rel clerk are included to handle increased workload in the Busi Law Section.

Other New Positions

Eight clerical positions have been included to relieve supervisory legal positions of administrative detail an provide a more realistic staffing ratio of clerks to professi personnel; 9 clerical positions are included to establish a tral filing system in the 3 main offices of the departmen clerks are included to handle the increased mail room and chine room workload in the Los Angeles office; 1 libra II and 1 clerk are included to assist in handling the incre workload of the expanding library activity in the Los An office and 1 clerk is proposed as new to handle the incre workload in the library of the Sacramento office.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT

Objectives

This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is assumed when local enforcement is negated.

Program and Performance

The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts, prepares documents for extradition of fugitives, processes forfeiture of vehicles for violation of State Narcotics Act, enforces antitrust laws, and registers and reviews all charitable trusts. The compilation of crime statistics is a responsibility of this division. This is accomplished by the Bureau of Criminal Statistics located in Sacramento which maintains detailed statistics of all crimes committed in California, records of turnover rate of prisoners, juvenile delinquency figures, and a reporting system for narcotic violations.

Electronic Data Processing Program

In order to continue the conversion from manual to automated processing of documents in the Special Services Section of this division, the sum of $184,200 has been included in 1964-65 to finance the rental of electronic equipment essential to the operations. The Department of General Services as well as the Department of Finance are co-operating with the department on a consulting basis.

Reorganization

As noted in the program and performance statement for the Division of Administration the department has reorganized its clerical staff and as a result personnel of this division reflects an increase of 27 clerical positions. In addition, the Charitable Trust Unit, formerly located in the division's Executive Unit, has been transferred to the Bureau of Criminal Law as a line operation. This intra-division transfer involves a total of 5

[a] During 1963-64 a total of 107 clerical positions have been transferred from the Division of General Administration in order to show a more appropriate relationship to functions performed.

DEPARTMENT OF JUSTICE—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF CRIMINAL LAW AND ENFORCEMENT—Continued

Program and Performance—Continued

positions. Also, in 1963-64, all investigative positions, while not included as an organizational change, are now reporting to a supervising special agent in the area rather than an attorney. This change is in response to recommendations made over the past few years by the Department of Finance and the Legislative Analyst and will result in increased efficiency of the agents in the performance of their assigned duties.

Executive

The executive unit is the administrative structure which is responsible for the program and satisfactory performance of its 4 constituent bureaus, criminal law, criminal statistics, criminal identification and investigation, and narcotics enforcement.

In addition to the previously mentioned data processing conversion program which is organizationally located in this unit, 2 new clerical positions have been included in 1964-65 to assist in the conversion process and handle the clerical workload associated with this program.

A new position of civil defense operations officer and 1 related clerical position is included to provide a means of developing plans, co-ordinating programs with the California Disaster Office, conducting civil defense and disaster training and maintaining liaison with local police and sheriff jurisdictions relative to the civil defense and emergency law enforcement program. Under the provisions of Public Law 85-606, one-half the cost of these 2 positions is reimbursable from federal funds.

Bureau of Criminal Law

This bureau consists of 5 sections for which a total of 34 new positions are included in 1964-65. Of this total there are 12 attorneys, 2 investigators, 1 economist and 19 clerical positions. These new positions are discussed as follows:

Criminal Appeals and Writs Section—The workload of this section is tabulated in the chart below.

Office	1960-61	1961-62	1962-63	1963-64	1964-65
Sacramento	420	393	511	583	653
San Francisco	463	560	512	583	652
Los Angeles	522	633	808	915	1,026
Total	1,405	1,586	1,831	2,081	2,331

There are 35 attorneys authorized to handle this caseload and in view of the rapidly increasing workload there is sufficient justification to include 8 additional attorneys and 6 related clerical positions. In addition to the statistical factors, recent United States Supreme Court decisions place greater burdens on the staff such as the decision to appoint counsel in every case when an appellant has failed to file a brief. These 2 factors, workload and changes in procedures, have created a backlog of 936 cases at the end of 1962-63, or an increase of 374 cases over 1961-62. The addition of the 8 proposed new legal positions will assist materially in reducing the backlog for 1964-65.

Anti-Trust—During 1962-63 this unit averaged about 1 man-year of overtime and has not been able to file any new cases due to the demands of cases already filed, under investigation, or in the preparatory stages of filing. Because of this workload, new and valid complaints have not been acted upon. Accordingly, 1 attorney and 1 related clerical position are included in the 1964-65 Budget to assist in reducing the backlog of complaints and handling suits pending or filed. In addition to the attorney, an assistant economist position is included to relieve the attorneys of the tabular and statistical details associated with the anti-trust cases. More often than not, these suits require analytical study and comparisons which can be accomplished more economically by a position trained in these skills.

Charitable Trust and Registry of Charitable Trust—This section is responsible for protecting the public from the operations of fraudulent charitable trusts and registers all trusts organized for the purposes described in Section 12580 of the Government Code. In order to initiate action, conduct the investigation and file suits against several trusts, 1 attorney is incl ed in 1964-65. Further, in order to maintain the present stan ds of clerical workload associated wth the registry operati 3 new clerks are included in 1964-65. At the end of cale r year 1960 there were 2,950 registered trusts handled by 4 cl s. By the end of calendar year 1964 there will be an estin d 5,000 registrations, or an increase of about 70 percent, a it is for this increase in workload that the 3 new clerical posi is are included.

Consumer Fraud Section—The function of this section o co-ordinate fraud investigations and procedures and to a st local law enforcement and district attorneys in the enforce it of the fraud statutes against promoters and other criminal n spirators aimed at bilking the consuming public. As the p ic becomes increasingly aware of this activity the complaint d also increases. In order to cope with an ever increasing n plaint load, 2 attorneys, 1 investigator and 2 related cle l positions are included in 1964-65. This section co-ordinate s activities with those of the Office of Consumer Counsel to a d overlap of activities and to assist one another in the dissen n tion of information to the public and interested law enforcen t agencies relating to new schemes and promotions designe o deceive and defraud the public.

Constitutional Rights Section—An investigator positio is included in this section to investigate civil rights matters sp l ically concerning alleged discrimination in the field of hou g and employment. Occasionally the position would be used o cooperative basis to investigate alleged discriminatory activ s of local law enforcement agencies and related community p l lems. The department will utilize the position in those area f possible discriminatory practices where there is insuffic t staffing in other agencies to adequately investigate compla l The department further has indicated that the position l co-operate with rather than preempt other regulatory and r forcement agencies in this field.

Bureauwide Clerical Staffing—A total of 7 new clerical p tions are included to relieve the supervisory legal positioni f administrative detail and to provide a more realistic sta ratio of clerks to supervising professional personnel. Under present ratio, attorneys in a supervisory capacity are requ to perform routine clerical tasks and administrative du which can be more effectively as well as economically han by clerical positions. The present staffing of 2 clerical fo professional positions at the journeyman level remains changed.

Bureau of Criminal Statistics

This bureau is the State's agency for the continuing st tical study of the incidence of crime and delinquency, and processes of criminal justice. The bureau also collects d from city, county, and State agencies which have jurisdictio the areas where the crimes occur and responsibility for apprehension of offenders and operation of segments of crimi procedure and treatment-punishment at their respective lev

Narcotics and Local Detention—This unit determines the mensions of the narcotics problem, the effectiveness of new le lation in controlling the illegal use and sale of narcotics and results of humanitarian efforts to treat the offenders in a torative-type center. To handle the increased number of repo rap sheets and other data associated with this program 2 cle are included in the 1964-65 Budget. This increase in staff provide for a continuation of the currently authorized level service.

Superior Court and Adult Probations—This unit devel and prepares annual statistical listings and summaries to trict attorneys and probation departments, assists in the p lishing of 2 documents, Crime in California, and Delinque and Probation in California and other statistical reports re ing to adult probation. For the increased workload expected 1964-65 3 clerical positions are included in order to maint the presently authorized level of service.

DEPARTMENT OF JUSTICE—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF CRIMINAL LAW AND ENFORCEMENT—Continued

Program and Performance—Continued

Bureau of Criminal Statistics—Continued

Juvenile Probation—This unit collects case-data from the county juvenile probation departments, and provides the only statewide source for reporting on the conditions of juvenile delinquency and neglect. In order to handle increased workload projected for 1964-65 and maintain the timely preparation of juvenile reports, 1 additional clerk is included.

Tabulating Unit—This unit is responsible for all machine tabulating work done within the bureau. In order to handle the increased machine room workload, 1 key punch operator and 1 tabulating machine operator have been included in 1964-65. The workload of this unit is directly related to the other 3 units in this bureau.

Bureau of Criminal Identification and Investigation

This bureau was created to furnish information and assistance to California law enforcement agencies to aid in the identification and apprehension of criminals. There are 5 sections in the bureau for which a total of 34 new positions are included in 1964-65.

Administration—This section is responsible for the overall management of 4 technical sections and the bureau's teletype unit. This section has its headquarters at the Meadowview Road office at Sacramento. The 1964-65 Budget for this section includes an assistant chief of bureau and 1 related clerical position. The underlying need for this high-level supervisory position is that the span of control exercised by the existing chief is too great to be significantly effective. Considering that the bureau consists of about 560 full-time positions it would appear that improvement in the management structure is essential to sound operating practices in the bureau. Organizationally, the bureau will be divided into 2 functional groups: First, those sections dealing with criminal histories and records handling, i.e., administration, fingerprints, and records; and second, those sections dealing with active investigations, i.e., special services, investigations, and the technical services such as the crime laboratory, latent fingerprints examiner, etc. Considering the continuing growth and importance of this bureau it would appear to be sound administrative practice to provide the additional supervision needed in this bureau.

In the teletype unit of the administrative section, 2 new teletype operators have been included in 1964-65 to handle the increased teletype message workload and to provide for vacation and sick-leave relief for the 5 existing operators.

Fingerprint Section—This section files, compares and checks fingerprints for law enforcement and regulatory agencies at all levels of government. In 1964-65 it is anticipated that the increased workload will require 3 additional fingerprint examiners and 1 clerk. The enactment of Chapters 1665 and 1954, Statutes of 1963, requires the addition of 3 new fingerprint examiners and 1 clerk to handle the new workload. Chapter 1665 provides that deceased persons under the jurisdiction of coroners shall be fingerprinted and copies of those prints shall be forwarded to this bureau. Chapter 1954 provides for the fingerprinting and filing of such prints with this bureau, of all foster parents and boarding home operators. The combined workload of this new legislation will be approximately 52,000 new fingerprint cards in 1964-65.

Investigation Section—This section is responsible for statewide investigations when local agencies are inhibited by geographical boundaries or when expediency dictates the State to preempt the local investigation direction. It should be stressed that while the State may direct an investigation, local law enforcement agencies are customarily included and work with the State on a co-operative basis. In order to cope with an increasing workload and growing backlog of cases, 5 special agents have been included in 1964-65.

Changes in the employees retirement law, under the provisions of Chapter 2031, Statutes of 1963, redefined the bureaus special agents as law enforcement members of the retirement system at an incraesed rate of 36 percent rather than as miscellaneous member at the rate of 6.83 percent per member. The 1963-64 budget includes a total of $64,504 for the increased cost and $87,806 is included in 1964-65 for this purpose.

Records Section—This section, which is the central records file of all criminal records, handles name checks and other identification inquiries from all levels of government. Workload of this section is shown in the chart below:

	ACTUAL 1961-62	1962-63	ESTIMATED 1963-64	1964-65
Units of workload	7,686,736	8,306,287	8,969,784	9,198,942

In order to handle the projected workload increases the bureau has included 10 new clerical positions in 1964-65. In addition to the increased workload noted in the above chart, the enactment of Chapter 1665 and 1954, the deceased persons fingerprint law and the foster home-boarding home operator fingerprint law also added new workload in this section to the extent that 4 new positions will be required to handle paper work related to it.

Special Services Section—This section is responsible for the maintenance of records relating to such items as stolen property, pardons, fraudulent checks, weapons registration, tear gas and machine gun registration and licensing, photographs, preparation of exhibits, modus operandi file and other activities of equal importance in the identification and apprehension of criminals and recovery of property. This section has been selected to initiate the electronic data processing in 1963-64 because of the nature of information and data stored and the adaptability to electronic means of processing. While there are the usual difficulties to overcome in the conversion process there is no doubt that the plan is feasible. However, until the installation is completely operational, the inflow of documents and information will be continuing. For this reason, 3 clerical positions are included in 1964-65 to handle this workload and assist in the conversion. Increased workload in other phases of the bureau will be able to absorb these positions when it is determined that the reduced manual workload demands of the Special Services Section can no longer justify their continuation.

Bureau of Narcotics Enforcement

The Bureau of Narcotics Enforcement is the state's prime law enforcement agency established to detect and apprehend major narcotic violators and sources of supply, enforce those statutes relating to individuals licensed to prescribe, furnish, administer, possess, or dispense narcotics, and perform other enforcement and custodial duties relating to trafficking of narcotics. State narcotics agents are not restricted to geographical boundaries, other than state borders, but co-operation is extended mutually between federal and local agents and often actual assistance is tendered when the situation and circumstances dictate.

No new agent positions are included in 1964-65 although a clerical workload increase in the Los Angeles office requires the addition of 1 new clerk. In the Sacramento headquarters office, 1 new clerk is included to handle increased workload related to the Narcotics Officer Training Program, initiated in the 1962-63 fiscal year.

GENERAL ANALYSIS

Objectives

The Commission on Peace Officers' Standards and Training is charged with the responsibility of raising and maintaining the level of competence of the California peace officers through the establishment of minimum standards for recruitment and training.

Program and Performance

This commission was established in the 1959-60 fiscal year in accordance with the provisions of Chapter 1823, Statutes of 1959, and carries out its assigned duties and responsibilities under the provisions of Section 13500 of the Penal Code. The commission is composed of 9 members appointed by the Governor for 3-year terms. Of these 5 are sheriffs or chiefs of police or peace officers nominated by their respective sheriffs or chiefs of police, and 4 are elected officers or chief administrative officers of cities and counties. The Attorney General serves as an ex officio member of the commission.

The commission fosters the establishing of minimum standards of physical, mental, and moral fitness for the recruitment and training of city and county peace officers. These standards apply to those jurisdictions which receive state aid for peace officer training through the provisions of Chapter 1823, Statutes of 1959. Each jurisdiction participating in the program is pa reimbursed from the Peace Officers' Training Fund the enues of which are derived from an assessment on crim fines.

At the start of the program there were 72 jurisdictions gible for state assistance. At the end of 1962-63 there were eligible, representing coverage of about 94 percent of the ulation of the State. The commission is continuing to di its efforts to have the remaining 124 jurisdictions adopt o nances and participate in the program.

Section 13521 of the Penal Code amended by Chapter 1 Statutes of 1963, increases the assessment on criminal fines 10 percent in order to increase the hours of training from to 200 hours for regular personnel and to establish an 80-h course for supervisory personnel. If funds are available, a hour administrative course is also planned to begin in 1 Total expenditures for state assistance to local jurisdicti during 1964-65 is estimated to be $781,160. The detailed gram statement is shown in the local assistance section of budget.

The new field representative position, authorized in 1963-64 Budget, has been filled and a program of inspect of standards and compliance has been initiated.

GENERAL ANALYSIS

Objectives

The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an organization prepared in an emergency to become a part of the active federal military forces; the California National Guard Reserve, to provide for defense and security of California while the California National Guard is in active federal service; and the California Cadet Corps to provide a program of military education for high schools and junior colleges.

Program and Performance

The primary programs of the Military Department are the operation of the California Army National Guard and the California Air National Guard. Within these programs the State provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers and recruitment of enlisted personnel. Records are maintained of the military history of individuals, including personnel actions, verification of service or deeds, and qualifications for federal retirement.

The Military Department provides for training, in conformance with the discipline prescribed by the Department of the Army and Department of the Air Force and operates army officer candidate schools.

The department prepares plans for use of National Guard as state military forces and uses such forces as required for emergency situations, such as flood duty and fire fighting. It participates in the air defense program of the United States both in missiles and aircraft and maintains and operates armories, airfields, rifle ranges, supply points, repair and other facilities.

The Military Department also establishes priorities for the use and distribution of federal funds, equipment and supplies, and administers federal funds in excess of $22,000,000 allocated to California for pay, schools, uniforms, equipment and supplies.

The California National Guard Reserve program encompasses all the activities of the California Army National Guard except for the officer candidate schools and those activities financed from federal funds. All activities are conducted at a reduced level compared to the National Guard operation, du to the cadre nature of the organization.

The following tables show personnel strength, units, and i stallations of the state military forces.

	Actual 1962-63	Estimated 1963-64	Propos 1964-(
Army National Guard			
Personnel	19,736	20,100	20,95
Units	236	236	23
Air National Guard			
Personnel	4,111	4,551	5,13
Units	40	40	4
Reserve Forces			
Personnel	800	968	1,00
Units	51	61	6
Army Installations			
State-owned	108	110	11
Leased	14	12	1
Air Bases			
Flying bases	4	4	
Other bases	3	3	

Reductions of authorized positions include 6 air base guard because this function at 2 installations is now performed b federally paid personnel and 0.3 position on the basis of work load.

The 1964-65 budget includes 10.8 proposed new positions Two positions were established administratively during the cur rent year and are shown as proposed new positions in th budget year. These are air crew technicians for the Governor' new airplane. An additional lieutenant colonel is included t head the military personnel branch. This results from a reor ganization, combining the personnel branches of the forme army and air force divisions in a new military personne branch. A personnel analyst position is included to handle per sonnel matters related to civil service personnel.

An additional 6.8 custodian and janitor positions are in cluded to staff new or additional facilities. Of these, 1.8 are continuations of positions established administratively in the current year. These positions are requested with various effec tive dates to coincide with facility completion dates.

GENERAL ANALYSIS

Objectives

The department is responsible for enforcement of the provisions of Sections 23000 to 26000 of the Business and Professions Code, also known as the Alcoholic Beverage Control Act. It issues and transfers licenses and conducts qualification and compliance investigations. In the enforcement of the Alcoholic Beverage Control Act, it is responsible for preventing the sale of alcoholic beverages, where any activity contrary to the public welfare is associated with a licensee or licensed premises.

Program and Performance

The department functions through a headquarters office and area, district and branch offices. The field offices receive and review applications for new licenses and transfers of existing licenses, investigate the character of applicants, provide direct law compliance, and encourage, train and assist local law enforcement agencies to enforce the Alcoholic Beverage Control Act. Compliance is determined by inspection and investigation. Areas of most frequent violation include sales to minors, sales during restricted hours, sales to obviously intoxicated persons, operating disorderly premises, and business practices contrary to rules and regulations on fair trade, price posting and secret rebates.

Currently 34 different types of licenses are issued including on-sale beer, and on-sale beer and wine and on-sale general licenses for trains, boats, airplanes and bona fide business establishments; retail package houses, brokers and manufacturers of beer, wine, alcohol, brandy and distilled spirits.

The department also allocates new, transfer, renewal, and offer in compromise fees to cities and counties where the licensees are located. The 58 counties and 382 cities involved receive 90 percent of such fees.

The workload of the department is reflected in the following chart:

	Actual			Estimated	
New Licenses:	1960-61	1961-62	1962-63	1963-64	1964-65
New on-sale general	262	117	111	127	80
New off-sale general	–	145	128	170	109
Intercounty Transfer:					
On-sale general	–	24	52 [a]	–	–
Off-sale general	–	57	92	–	–
Investigations:					
Accusations	–	1,834	2,131	2,152	2,175
Petitions and protests	–	653	685	710	715
Applications denied	–	653	888	910	925
Licensees disciplined	–	1,922	1,979	1,995	2,010
Accusations dismissed	–	193	213	230	235
Active Licenses	44,605	44,869	45,137	45,437	45,637
Total of Licensing Action	64,234	64,804	64,891	76,000 [b]	66,000

Conversion to machine license writing and preparation of renewal notices starts during the 1963-64 fiscal year. The final steps of the conversion will not be completed until sometime during the 1964-65 fiscal year when the calendar year renewals are processed and permanent licenses written.

During 1963-64 the department plans a more intensive enforcement of fair trade laws in accordance with the provisions of Chapter 1026, Statutes of 1963. The increased workload involves the investigation of violations of Chapters 10, 11 and 15 of the Alcoholic Beverage Control Act and requires 35 additional positions as reflected in the salary supplement for which $283,000 was appropriated by Chapter 1026, Statutes of 1963.

This increased enforcement activity was added to area office staffs primarily, with the area offices in Los Angeles and San Francisco receiving most of the additional positions.

GENERAL ANALYSIS

Objectives

The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.

Program and Performance

The appeals board, as provided for in Section 22, Article 20 of the Constitution, consists of 3 members who are appointed by the Governor. The board determines whether the Department of Alcoholic Beverage Control has proceeded in the manner required by law, whether the department's actions are supported by the findings, and whether the findings are supported by substantial evidence in light of the whole record. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets approximately semi-monthly or as required in Sacramento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.

Since the creation of the board in 1954 approximately 1,900 cases had been decided as of June 30, 1963. During 1962, 162 cases were appealed, and 186 decisions were issued.

Under the provisions of Section 20, Budget Act of 1963, a senior stenographer position has been abolished administratively in 1963-64.

GENERAL ANALYSIS

Objectives

The Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of irrigation districts and other entities of the State.

Program and Performance

The Districts Securities Commission carries out its duties pursuant to the provisions of Division 10 of the Water Code.

The commission consists of the Attorney General, the Director of Water Resources, the Superintendent of Banks, and 2 members appointed by the Governor for a term of 4 years. In 1962-63 the commission reviewed and inspected the financial and physical condition of 174 districts as compared to 178 in 1960-61 and 173 in 1961-62 and assisted district officials with respect to financial problems involving the incurrence of indebtedness and other matters affecting the financial soundness of their districts. Investigations are made by the staff to determine the engineering, economic, and financial soundness of proposals by districts to incur additional indebtedness through the issuance of bonds or warrants or by contract with the Federal Government or State Government providing for water service, construction of facilities or loans. The commission passes upon the incurrence of major indebtedness by irrigation, water and other districts, and local agencies which request certification as to the eligibility of bonds as legal investments pursuant to the Districts Securities Commission Act. The commission also passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to ban investment companies, and other lending agencies is provi by making available factual information regarding the econo and financial status of the districts. This is of substant importance to both the investment companies and the distric for, when the financial soundness of a district can be support the credit of the district is strengthened, and financing can more readily secured at a reasonable rate of interest.

The federal program for assisting water resources developm by providing water service, construction of facilities, intere free loans and/or grants for non-reimbursable parts of proj costs has had a continuing but somewhat reduced effect upon commission's workload. The execution of contracts by distric providing for such assistance is subject to commission appro and requires substantially the same degree of investigation would be required in the case of financing by the issuance bonds. As of June 30, 1963, there were 50 applications, letters of intent, filed with the United States Bureau of Rec mation by districts under commission supervision requesti contractual assistance. This is a reduction of 20 applicatio over the previous fiscal year.

During 1962 the first contract between the State and a lo district for water from the California Aqueduct was approv by the commission. In the next several years it is anticipat that many such district applications will be filed for commissi examination and approval.

GENERAL ANALYSIS

Objectives

The Horse Racing Board regulates and supervises the operation of horse racing meetings where there is parimutuel betting.

Program and Performance

The Horse Racing Board was created by Section 25a, Article IV of the Constitution and operates under the provisions of Sections 11500 through 11528 of the Government Code.

The board, which consists of 3 members appointed by the Governor for 4-year terms, licenses trainers, jockeys, track officials, and other persons employed by the racing associations. Investigators check to determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are made on horses under the supervision of a board-appointed veterinarian. The workload of the board is indicated by the number of racing days and the number of licenses as follows:

	Actual		Estimated	
	1961-62	1962-63	1963-64	1964-65
Number of racing days	545	545	560	567
Number of licensees	9,667	10,241	10,741	11,000

The 1964-65 Budget is based on a program of 567 days of racing consisting of 290 days of thoroughbred (major tracks), 55 days of harness horse (major tracks), 59 days of quarter horse, 50 days of combination meetings, and 113 days at fair tracks. The 113 racing days at fair tracks represents an increase of 23 days over the original estimate for 1963-64. Of this increase, 21 days have been allocated to quarter horses at the Spring Fair in Sacramento beginning in 1964.

GENERAL ANALYSIS

The Department of Investment carries out its duties and responsibilities in accordance with the provisions of Sections 15480 through 15487 of the Government Code. The department is under the control of a Board of Investment consisting of the Superintendent of Banks, the Commissioner of Corporations, the Insurance Commissioner, the Real Estate Commissioner, and the Savings and Loan Commissioner. Each member serves as chairman in established rotation. During his service as chairman of the board, the chairman is known as the "Director of Investment" and is a member of the Governor's Council.

The board meets monthly at the State Capitol. The Governor may require its members to make reports of their work to the board.

GENERAL ANALYSIS

Objectives

The Banking Department is responsible for safeguarding depositors' funds in the state banking system.

Program and Performance

The Banking Department carries out its responsibilities and duties pursuant to Division 1 of the Financial Code (Banking Law). It is supported from assessments, license fees, examination fees, and other revenues derived from the banking business. The main programs of the department are to: (1) investigate applications for new banks and branches; (2) examine state-chartered banks, trust companies, trust departments of title insurance companies doing a trust business, and foreign banking corporations doing business in this State; (3) take over the affairs of licensees in financial difficulty for the purpose of liquidation or rehabilitation; and (4) investigate complaints against licensees and review activities of licensees for compliance with the Banking Law.

The Banking Law requires that each state bank be examined once during each fiscal year. During each annual examination, the examiner is required to determine the condition and resources of the bank, the mode of managing its affairs, the investment and disposition of its funds, the prudence of its management, the security afforded its depositors and creditors, and whether its articles of incorporation, and all applicable provisions thereof, are being complied with and into such other matters as may seem necessary or expedient.

The following table reflects the growth of state banks and the workload increases:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Banking offices requiring examinations:					
Number of banks	95	100	113	126	139
Number of branches	426	470	518	566	614
Total Banking Offices	521	570	631	692	753

During 1962-63, loans made by state-chartered banks increased $1.1 billion or 22 percent and total resources increased $1.3 billion or 14 percent. It is expected that this trend will continue through 1964-65.

Because of the increasing number of banks and branches and their growing resources, together with applications for new banking offices, 11 new positions are proposed in 1964-65 to meet the increased workload. These include 1 associate counsel, 5 bank examiner II, 3 bank examiner I, 1 intermediate stenographer, and 1 intermediate typist-clerk. In addition 1 new senior economist position is proposed to plan, organize, and conduct research studies on the banking structure and markets, on specific problems affecting financial institutions under state jurisdiction, and on economic factors of particular relevance to the state banking system.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is the protection of the public in the sale of securities. The division is also charged with responsibility for preventing fraud and usury, as well as unsound or overreaching business practices, in industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents, retirement systems, and trading stamp companies.

Program and Performance

The division carries out its duties and responsibilities under the authority of the Corporations Code, the Financial Code, and the Business and Professions Code. It is established under the provisions of Section 25300, Corporations Code.

Before securities (unless exempt) can be offered for sale in California, application must first be made to this division. It

Program and Performance—Continued

also examines and licenses stock brokers, agents for the sale of securities, and investment counsel. The division investigates the past history, properties, books and apparent prospects of the applicants and a permit, license or order is issued or denied. During the 1962-63 fiscal year there were 54,413 permits, licenses and orders issued pursuant to provisions of the Corporate Securities Law. It is estimated that 58,585 permits, licenses and orders will be issued in 1963-64 and 61,677 in 1964-65.

Industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems are regulated by first seeing that the statutory standards for engaging in such business are complied with before a permit or license is issued and second by conducting annual and other examinations in accordance with law. In 1962-63 there were 2,964 licensees subject to such regulation. It is estimated there will be 3,222 such licensees in 1963-64 and 3,408 in 1964-65.

Four auditor and 4 clerical positions have been included in 1964-65 to meet the increasing workload, consisting principally of an estimated increase of 220 licensees. The cost of the new positions will be partially reimbursed by the licensees who are examined.

GENERAL ANALYSIS

Objectives

The purpose of the Department of Insurance is to protect the general public, insurance policyholders and the rights of beneficiaries in California.

Program and Performance

The Department of Insurance is established under the provisions of Section 12906 of the Insurance Code. It is supported from license fees, examination fees, assessments, and other revenues derived from the insurance business. The main programs of the department are to: license companies and individuals who engage in the insurance business, admit insurers to operate in California, grant permits to issue securities and make changes in capital structure, approve certain types of policy forms, approve minimum workmen's compensation insurance rates, examine financial condition and procedures of insurers through field audits and analysis of financial statements, take over the California affairs of insurers in financial difficulty for the purpose of liquidation or rehabilitation, investigate complaints against licensees, check activities of licensees for compliance with all insurance laws, and to collect insurance premium and surplus line brokers taxes.

These programs are handled through four divisions: Administration, Compliance and Legal, License, and Examination and Financial Analysis.

The 1964-65 budget provides for the following increases in positions:

Administration	3
Compliance and Legal	16
License	4
Examination and Financial Analysis	7
Total	30

Administration

The functions under this division include fiscal and personnel management, office services, actuarial studies, and the administration of insurance companies in conservation or liquidation. This division also operates district offices in Sacramento and San Diego. The 1964-65 budget includes 3 new positions.

One actuary position is included in 1964-65 to meet the increased actuarial workload in the San Francisco office. Together with the increase in number of domestic life insurance companies there has been a parallel increase in the number of foreign life insurance companies seeking admission to California which has resulted in a substantial enlargement in the actuarial analysis and appraisals. Further, during recent years there has been substantial growth in the issuance of individual policies providing hospital, surgical, medical and major medical insurance, particularly on a noncancellable or guaranteed renewable basis.

The enactment of Chapter 2055, Statutes of 1963 will enable health insurance policies for persons age 65 or over to be written through joint activities of a number of insurers. The administration of this law will require actuarial research, analysis and appraisal in a complex field as a matter of public interest. Approximately one-half of the actuary's salary will b reimbursed to the State by companies examined.

A senior stenographer is also included in 1964-65 to furnis secretarial, clerical, and stenographic services for both actuarie in the San Francisco office.

A senior stenographer position is included in 1964-65 to pro vide clerical assistance to the chief deputy commissioner. Th new clerical position will be exempt from civil service unde the provisions of Article XXIV of the Constitution.

Compliance and Legal Division

This division processes applications for certificates of au thority to do business in California, permits to issue securities amended certificates of authority and withdrawal proceedings. The counsels assigned to this division also review policy forms policy riders, and application forms. They prepare accusations and statements of issues in disciplinary proceedings, represent the insurance commissioner at hearings and recommend th adoption, rejection or modification of proposed decisions, d legal research and prepare legal briefs and memoranda. Th Policy Services Bureau handles complaints against insurers while the Investigations Bureau checks the activities of li censees for compliance with all insurance laws.

A total of 16 new positions are proposed in 1964-65 to assis in handling the duties and responsibilities of this division.

During 1963-64, the department is proposing to reorganiz the Los Angeles office. Accordingly, the department is also re questing the change in classification of one assistant chief of division to associate chief of division in order to more properly reflect the duties and responsibilities assigned to the position This position change is shown in the 1964-65 fiscal year.

A junior-assistant counsel in the Los Angeles office is authorized in 1963-64 for 1 year only. The position is included in 1964-65 for permanent authorization to handle the increased workload of the legal section in Los Angeles. Applications by insurance companies for admission to California have continued to rise, as have requests for stock permits and applications for amended certificates of authority. The major factor contributing to workload increases in Los Angeles has been the increasing number of companies being taken over by the commissioner for either conservation or liquidation. The counsel's function in liquidations and conservations, the nature of the activity requiring various legal procedures, forms, filings, court appearances and petitions supports the need for a considerable amount of time from the legal staff.

The Policy Services Bureau has experienced one of the greatest workload increases in the Department. The 1964-65 budget includes a total of 5 new insurance officers III, 4 of which are to be located in Los Angeles and 1 position in San Francisco, with a portion of the time of the latter position being spent in Sacramento to relieve the workload in that office. In Los Angeles, the workload increase has averaged 19.4 percent a year and the backlog during 1963-64 is sufficiently high to warrant the approval of 1 position on a temporary basis. Three intermediate typist-clerks are requested in the Los Angeles office to provide clerical assistance to the proposed new positions. One of the 3 positions has been approved on a temporary basis during 1963-64 to meet the increased workload in Los Angeles.

Department of Investment

DEPARTMENT OF INSURANCE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Compliance and Legal Division—Continued

Two insurance officers I-II are requested on the basis of increased workload in San Francisco and Los Angeles. The total number of cases to be received in the next 2 years will be in excess of the ability of the presently authorized staff. A greater number of fire and casualty cases will be opened than life and disability licenses during 1963-64 and backlogging of the workload into 1964-65 would be detrimental to the public and to the producers. Two senior stenographers are requested to provide clerical assistance to the 2 proposed new insurance officers.

Temporary help equivalent to 2 man-years are included in 1964-65 on a reimburseable basis to assist in the conservation or liquidation of insurance companies. At the present time, whenever a company is seized by the commissioner for conservation or liquidation, it is necessary to shift investigators from their regular duties to assist in these assignments from a few days to several months and the result is that normal investigative work is backlogged.

License Division

This division processes all applications for licenses received in the department. The division screens all such applications to determine eligibility for a license and conducts the necessary examinations throughout the State to qualify the applicants for licenses. Upon successful completion of the examination the license documents are then issued by this division. A total of 4 new positions are proposed for this division to handle increased workload in 1964-65.

The workload of this division is indicated in the following table:

	Actual		Estimated	
	1961-62	1962-63	1963-64	1964-65
Examinations scheduled	23,091	24,948	25,477	26,191
Examinations given	18,698	20,338	20,929	21,639
Licenses issued [a]	109,265	106,806 [b]	120,191	86,065

[a] Fire and casualty licenses renewed every other year alternating with life and disability renewals.

[b] Life and disability renewals changed to 1 license per licensee.

An intermediate typist-clerk is included in this budget for assignment as license examination proctor in Southern California. This position will conduct license examinations in Los Angeles, San Diego, Bakersfield, Redlands and Santa Barbara. Over 60 percent of all license examinations are given in Southern California, and this added workload cannot be handled with the presently authorized staff. At the present time insurance officer II's and clerical personnel assigned to the insurance officer II and IV's are used for examinations. This position will be utilized in lieu of the professional positions as well as to handle an increased number of examinations in that area.

The 1964-65 Budget includes 3 intermediate typist-clerks in the San Francisco office to meet increases in clerical workload, due to the increase in licenses, company appointment documents, and resultant correspondence.

Examination and Financial Analysis Division

This division functions to protect the public interest from loss by insolvency of insurers or loss by improper or unlawful operation. To accomplish this the division performs periodic examinations of domestic insurers, receives and analyzes financial statements and audits and reviews tax returns filed by insurers. The 1964-65 Budget includes 7 new positions to handle workload for which this division is responsible.

Four insurance examiner I-II positions are proposed to meet increased workload in the Examination Bureau, 2 in the San Francisco office and 2 in Los Angeles. These positions are included to enable this bureau to maintain a 3-year examination cycle of all domestic insurers. This 3-year cycle is based on the need to maintain close financial touch, the statute of limitations on tax and violation matters and the prevailing system in use by other states on joint examinations. The cost of these 4 positions is reimbursed by insurance companies examined and shown as revenue to the department.

One insurance examiner II position has been included in 1964-65 to audit financial statements in the Financial Analysis Bureau. The number of insurance companies authorized to do business in California has increased from 682 in 1952 to over 830 in 1963. While increased number of companies has had an effect on the workload of the statement audit section, even more important has been the increase in size of insurers. The total assets of admitted insurers has increased from $83 billion in 1952 to $164 billion in 1963. It is this increased size of admitted insurers which has increased the complexity of statements to be analyzed and audited and contributed to the workload of this section. The problem of the larger company is compounded by the increasing complexity of securities portfolios often found in such companies, including more private placement securities, securities of affiliated and closely held companies, insurance and otherwise, which are not as subject to ready evaluation as are portfolios of publicly held issues.

One accounting technician II is included in the budget to perform the detail work connected with administration of the quarterly tax payment program. This position will be assigned to San Francisco, and will be available to assist in the nontechnical audit of financial statements as well as tax returns depending upon the volume of work.

One intermediate stenographer has been included in the 1964-65 Budget to assist in the examination program as well as in the new quarterly tax audit program.

Legal interpretation of Chapter 4, Statutes of 1963, 1st Extraordinary Session, has the effect of transferring the Surplus Line Brokers revenue to the General Fund 1 year before it was intended to happen. Accordingly, the 1964-65 fiscal year includes an appropriation of $500,000 from the General Fund which will in effect carry out the transfer as originally intended.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to the sale, purchase or lease, through agents, of real estate, business opportunities, mineral, oil and gas rights or lands, the offering of subdivided properties, real property securities and to assist in the advancement of education and research in the field of real estate.

Program and Performance

The Division of Real Estate is established and carries out its responsibilities and duties under the provisions of Division 4 of the Business and Professions Code.

Regulation, Licensing and Subdivisions:

The following table reflects the workload in the several licensing, regulation and subdivision activities.

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licenses in effect, June 30	144,183	141,443	144,246	147,000	149,900
Licenses issued	57,707	51,289	59,061	60,400	61,600
Reinstatements	11,824	8,091	9,430	9,500	9,500

Subdivisions—Out-of-State:					
Filings	86	84	46	40	50
Reports written	106	137	143	* 220	180
Acres	54,410	148,209	76,614	60,000	75,000
Lots	32,467	50,943	19,246	20,000	25,000

A basic responsibility of this division is the issuance of original real estate, business opportunity, and mineral, oil and gas licenses to applicants of good reputation who pass the required qualification examinations, including a second qualifying test for the holder of an original salesman license who proposes to remain a licensed agent for more than 2 years.

A new schedule of license and examination fees, pursuant to the provisions of Chapter 1550, Statutes of 1963, went into effect September 20, 1963, which will mean additional revenues for the division. While license fees were increased in some instances, the principal change was provision for separate examination fees, distinct from the license fees. Previously, the only examination fees required by law were charged in connection with re-examinations and tests for the 4-year renewal licenses. Included in the 1964-65 budget is 1 clerk to handle the changes in examination procedures and 1 clerk to handle the increased examination workload.

The licensing section has experienced a steadily increasing workload. In 1962-63 the total number of licenses rose to 144,246, an all-time high and nearly a 2 percent increase over the previous year. Increases of similar magnitude are anticipated in 1963-64 and 1964-65. Accordingly, 1 typist-clerk is budgeted in 1964-65 to handle the increased workload in the original licensing section and the transfer and change of address section.

As real estate transactions such as condominium, syndication, and others, increase in magnitude and complexity, and as the Real Estate Commissioner's responsibilities increase under the new legislation, the division has necessarily improved its auditing program to cope with these dimensions. In 1962-63 division auditors completed 103 formal audits involving books and accounts pertaining to real property securities dealers, real property securities permits, subdivisions, loan brokers, and trust accounts. In addition, division auditors embarked on a program of systematically spot checking procedures and fiscal operations of the larger brokerage firms throughout the State, specifically those likely to have large sums of clients' funds in their trust. Also, the auditors have been checking back on subdividers' books to make certain impound stipulations are being observed.

In order to handle the increased workload described above, 1 auditor II is included in the Northern California regulatory area for 1964-65.

Of continuing interest and concern to the public is the Real Estate Commissioner's jurisdiction over the offering of new subdivisions. The enactment of Chapters 927, (in-state subdivisions) 1819, (out-of-state subdivisions) and 860, (Condominium System), all passed during the 1963 General Session of the Legislature require that filings shall be made with the Division of Real Estate on any subdivision proposed to be sold or leased to the public. The term subdivision includes community apartment offerings and the increasingly popular condominium type projects. In 1962-63 the Division of Real Estate received 2,861 notices of intention to sell subdivisions, including in-state and out-of-state tracts, comprising a total of 154,901 lots or parcels on which 4,769 reports were filed. In making the filing the subdivider must give complete details about the physical aspects of the tract or project, sales methods and method of financing. Under the new laws the Commissioner is now empowered to withhold the issuance of the public report on any one of eight different grounds when the sale or lease of parcels would constitute "misrepresentation, deceit, or fraud" or when the subdivider fails to prove adequate financing for proposed community, recreational or other facilities, or when the agreements for management or services pertaining to common facilities in the offering are unsatisfactory. Where out-of-state subdivided lands are proposed to be offered to California citizens, the Commissioner is empowered to treat these offerings as real property securities, applying a fair, just and equitable test to them as is done before issuing a permit to sell any line of such securities. The new law also requires the Commissioner to make a more intensive check and investigation of those subdivision offerings, particularly of their financing arrangements.

Mail order operations where the subdivider fails to file with the California Real Estate Commissioner still persist. In the first quarter of the 1963-64 year, 49 desist and refrain orders were issued by the division, the majority of them directed toward subdividers who failed to comply with the California law, but nevertheless made direct mail offerings or offerings in national advertising media to citizens of this State. The desist and refrain order is not always effective since follow-up legal action against the defender cannot be undertaken in most cases, but resultant publicity has tended to make Californians a

* Including amendments for permits.

DIVISION OF REAL ESTATE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FRO 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

good deal more wary in their dealings with out-of-state land promoters doing business by mail, maintaining no offices or agents in California.

To cope with the additional responsibilities and duties imposed by the new subdivision legislation and to make regulation of subdivision offerings more uniform, a new subdivision unit has been established in the Sacramento office during 1963-64. Since the new laws became effective in September of 1963, it was necessary to establish the following 8 positions to handle the related workload: 1 deputy real estate commissioner III; 2 deputy real estate commissioner I; 1 associate real property appraiser; 1 associate counsel; 1 senior stenographer; and 2 junior-intermediate stenographer. Where the subdivision is "promotional" or is a co-operative or condominium type of apartment offering, there usually is a mass of complex details to be considered and it is quite possible that additional personnel will be required for subdivision processing.

The enactment of Chapter 1426, Statutes of 1963, introduces a new approach designed to accord financial protection to the public in dealing with licensed brokers and salesmen. Further it changes the name of the Real Estate Education and Research Fund to the Real Estate Education, Research and Recovery Fund.

The portion of the fund now to be allocated to Recovery will be available to pay unsatisfied judgments against licensees when the judgments are based upon acts for which a license is required and which involve fraud, misrepresentation or deceit. It is the duty of the division to examine carefully all claims made against the fund for legality, to ascertain that the claimant has exhausted all other remedies provided by law in an effort to collect his claim and to collect evidence for court presentation when unwarranted claims are filed.

To handle the workload involved for this new function, 1 deputy real estate commissioner III, 1 senior counsel and 1 senior legal stenographer are included in 1964-65.

In addition to the increases in workload described above, the ongoing workload of the division also shows increases, due to the growing number of licensees and a resulting increase in the number of complaints and legal actions. Further as the population expands and the demand for urbanization increases the problems associated with enforcement also multiply. In order to meet the increased workload related to growing enforcement and regulation problems of the division, 4 deputy real estate commissioner I and 4 clerical positions are included in the 1964-65 Budget. In addition 1 senior stenographer is included in 1964-65 to handle the increased administrative clerical workload in the Los Angeles office and 0.5 man-year of clerical temporary help is included to handle peak workload during the 1965 session of the Legislature.

Education, Research and Recovery

The purpose of the real estate education and research program is to achieve a professional orientation for real estate practitioners and to create a reservoir of information regarding land utilization, land marketing practice and the process of urbanization in California. These purposes are being achieved through the advancement of real estate education and research at the University of California, state colleges and junior colleges. The program is financed by a provision in the law wh specifies that 25 percent of the license fees collected by the R Estate Commissioner be apportioned to the fund.

The education and research programs at the various institutio are co-ordinated through the commissioner's office assisted the Commissioner's Real Estate Education and Research A visory Committee, comprised of representatives of the U versity, the colleges and the real estate industry. Resea studies resulting from grants to state colleges and Univers are aiding community development, and data and findings h been of assistance in developing legislation and planning p grams.

In accordance with an overall master policy plan develo by this committee which defines areas of activity, financial in 1963-64 is being made available to 13 state colleges to supp faculty travel in connection with real estate curricula; to state colleges for continuation of 7 research and educatio aid projects now in process; to 7 state colleges for new edu tion and research projects beginning in 1963-64; to 2 state c leges and the University for subject matter and teaching te nique workshops for teachers of real estate courses. Financ aid to the junior colleges for their real estate programs is bei furnished as follows: to 54 junior colleges for improving a refining real estate courses within each college district followi a uniform program consisting of graded courses; and 2 teacl training sessions have already been held during 1963-64, desig to improve subject matter knowledge and sharpen the skills real estate teachers, the majority of whom are part-time instr tors. A total of 10 such training sessions have been held ove 3-year period. In line with contemplated credentialing polici all workshops are geared to state credential requirements. T 1964-65 budget contemplates education and research proje to be conducted in 8 state colleges, and the revision of teacl guides and student workbooks, to be undertaken by both st and junior colleges. Plans call for 4 teacher training institu at a cost of $20,000.

These projects are in addition to the major real estate search program conducted by the University of California a University Extension's continuing education in real estate pr gram, formerly known as the real estate certificate progra The University also will offer 3 extension correspondence cours in real estate. Development of these courses was assisted by al cations from the fund, but the courses are now self-sustainin and no expansion is contemplated at this time. The long-ran plan for education and research assures a broad range of pr fessional real estate educational opportunities in the pub institutions of higher learning in California.

The following is a summary, by function, of the propos new positions described in the foregoing narrative.

GENERAL ANALYSIS

Objectives

The Division of Savings and Loan, through the Savings and Loan Association Law, safeguards the funds of investors in savings and loan associations.

Program and Performance

The Division of Savings and Loan carries out its duties and responsibilities under the provisions of Division 2 of the Financial Code.

The number of facilities requiring examination are:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Number of associations	192	189	208	219	234
Number of branches	161	186	199	220	246
Total Facilities	353	375	407	439	480

The major responsibilities of the division are: examining state-licensed savings and loan associations and all branch offices; test checking appraisals of all savings and loan associations loan portfolios; investigations, hearings and decisions on applications for approval of articles of incorporation of new associations, and for the licensing of new branches of associations; processing miscellaneous requests of associations such as the sale of loans, approval of mergers, changes in capital structure; and the relocation of facilities.

The division is supported by an assessment of an annual fee against each state-licensed association based pro rata on its total assets. The rate of assessment levied on December 31, 1962 was 13.6 cents per $1,000 of association assets.

Headquarters offices are maintained in Los Angeles with a branch office in San Francisco.

Following is a summary of the new positions included in 1964-65:

Function	*New Positions*
Administration:	
Associate counsel	1
Senior research analyst	1
Supervising savings and loan examiner I	1
Intermediate stenographer	2
Intermediate clerk	1
Subtotal	6

Special Examination Program:	
Savings and loan examiner III	4
Savings and loan examiner II	3
Associate real property appraiser	6
Intermediate typist-clerk	3
Subtotal	16
TOTAL	32

Administration

In order to handle the increased legal and hearings workload in the San Francisco office an associate counsel and 1 related clerical position are proposed as new in 1964-65. The addition of these positions will also allow more time for the assistant commissioner to perform the necessary administrative and policy-making duties required for the division.

In view of the increase in examiner personnel in 1964-65, the San Francisco office anticipates a related increase in the required supervisory workload and accordingly 1 new supervising savings and loan examiner I is included. The addition of this position provides the San Francisco office with an examiner supervisory staff comparable to the staff in Los Angeles.

A senior research analyst and a related clerical position are included in 1964-65 in order to derive full benefit from the improved inflow of economic and association performance data. In shaping meaningful policy, the commissioner requires a professionally competent full-time staff member to interpret data and recommend action. The research position will also assist in the setting of sampling controls in the appraisal program and the analysis of more complicated license branching and merger applications. These applications, under the new application instructions, place heavy emphasis on interpretation of economic data.

As a result of the new licensing and branching processes, file reference by outside attorneys, economists, and others have increased the clerical workload to the extent that 1 additional clerical position is required in the Los Angeles office.

Application and Licensing Program

New application instructions were adopted for branches and new charters this year. They mark a fundamental shift in emphasis in application content from site market analysis and prediction, to a showing of demonstrated management record and capital adequacy. In the application process, division personnel now concern themselves with problems arising from calculations of the applicant's capital and reserve strength, evaluation of the caliber of management by a variety of ratios, and the determination of the applicant's impact on the local savings and loan industry's competitive structure as shown by such economic and financial factors as size, office distribution, and account distribution.

Examinations

The examination program's primary objective is the annual examination of state-licensed associations. Workload figures indicate that 6 savings and loan examiner II, 2 assistant real property appraisers and 2 related clerical positions are required to maintain examination program on a current basis. The division estimates that 60 percent of the assets will be examined on a joint basis with the Federal Home Loan Bank Board, a program which was initiated in 1961.

Special Examination Program

The division has been in the main exercising its supervisory authority to determine the association's compliance with the Savings and Loan Association Law and supporting regulations by annual examination of all state-licensed associations. The commissioner has reviewed presently available evidence of conditions in the housing and mortgage finance markets. During the past year the degree of risk exposure of California savings and loan associations has increased. Associations are attracting plentiful savings capital by paying rates ranging in most cases from 4.8 percent to 5 percent and, in addition, they have large cash inflow from amortization payments. Given a high marginal cost of savings capital at present rates, associations have strong

GENERAL ANALYSIS—Continued

Special Examination Program—Continued

incentives to accept increased risks in order to obtain high mortgage yield rather than to settle for lower risk and less yield. The appropriate response of the division to this problem is to increase its examining and supervisory activities. In order to implement the accelerated examination program, 16 positions, consisting of 7 examiners, 6 appraisers and 3 clerks are included in 1964-65.

The examination program will concentrate on associations with high risk exposure or with announced savings rates higher than those prevailing in an association's area. Examiners will analyze all delinquent loans to ascertain the existence of pa terns of overconcentration, analyze management performance uncover dangerous procedures and practices, and examine co structions loans in depth to determine the existence of improp loan disbursements. The appraisers will concurrently field che actual construction to relate it to progress payments bei made. Accordingly the special examination is a needed respon by the division to changes in environmental conditions faci the savings and loan industry.

GENERAL ANALYSIS

Objectives

This board, organized and operating under the provisions of Chapter 4, Division 5, of the Harbors and Navigation Code, qualifies persons as pilots operating vessels on San Diego Bay.

Program and Performance

The 3-member board is appointed by the Governor to serve at his pleasure for terms not exceeding 4 years. Members include the mayor of San Diego as ex officio member, a nautical man, and 1 citizen, who must be residents of San Diego.

The board licenses pilots operating vessels on the San Diego Bay, after careful examination of qualifications; fixes rates of pilotage, and records fees received by each pilot as submitted to the board on monthly reports. There are 4 bar pilots currently licensed to assist vessels on this bay.

GENERAL ANALYSIS

Objectives

This board organized and operating under the provisions of Chapter 2, Division 5, of the Harbors and Navigation Code, qualifies persons as pilots operating vessels on San Francisco, Suisun, and San Pablo Bays.

Program and Performance

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun consists of 3 members appointed by the Governor for 4-year terms.

At the present time 25 pilots are licensed by the board.

Chapter 2227, Statutes of 1961 created the Pilotage Rate Committee for San Francisco, San Pablo, and Suisun Ba consisting of 5 members appointed by the Governor. Operat July 1, 1962, the committee's function is to make biennial ports to the Legislature concerning pilotage rates. The secret and employees of the Board of Pilot Commissioners for the F Francisco, San Pablo, and Suisun Bays perform the necess clerical, administrative and other services for the Pilotage R Committee.

During 1963-64 revenues from pilotage fees have been redu from 3 percent to 2 percent of gross pilotage fees to lower surplus in the Pilot Commissioners' Special Fund to an e mated one-year expenditure level.

GENERAL ANALYSIS

Objectives

To protect the public health, welfare and safety by licensing only persons and firms of demonstrated knowledge and abilities to perform services for the public, to prevent unauthorized practices upon the public, and to discipline those licensees who fail in their public trust.

Program and Performance

The 30 boards, bureaus and commissions of this department are responsible for regulating in excess of 600,000 persons practicing more than 50 professions and vocations in the State of California. A total of over 2,000 people are needed annually to fulfill the department's responsibilities, including 259 board and committee members, 605 permanent employees, and approximately 1,100 part-time expert examiners, proctors, and other temporary help.

The various boards of the Department of Professional and Vocational Standards are headed by boards of 5 to 13 members appointed by the Governor primarily from the particular profession or vocation regulated. The members usually serve overlapping 4-year terms.

In general, the boards have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licenses by means of inspection, investigation, and formal disciplinary action.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Each board employs a staff to assist with these functions. The cost of operations of the member boards is generally paid by the fees collected from those engaged in the occupations regulated.

The 1964-65 Budget of the member boards and departmental administration include the following proposed new positions:

Organization	Function	Number of positions
Board of Accountancy	Administration, examination and clerical	0.6
Board of Architectural Examiners	Administration, examination and clerical	1
Board of Barber Examiners	Examination and clerical	1.5
Cemetery Board	Clerical	0.1
Collection Agency Licensing Bureau	Administration and clerical	1
Contractors' State License Board	Regulation and clerical	26.8
Board of Cosmetology	Examination and clerical	2.2
Board of Dental Examiners	Administration, examination and clerical	0.5
Board of Dry Cleaners	Administration, examination and clerical	0.1

Support *(Professional and Vocational Standards Fund)*	$2,048,760	$2,317,031	$2,283,704	—$33,327 (—1.4%)
Personnel man-years	185.4	205.9	208.1	—2.2

GENERAL ANALYSIS

Objectives

The departmental administration, co-ordinates and supervises the administrative and financial affairs of its member boards, bureaus, and commissions.

Program and Performance

In carrying out the duties required under the Business and Professions Code beginning with Section 100, the departmental administration performs centralized accounting, budgeting, personnel, business data processing, internal auditing, legal, management and procedures analysis, business and other bookkeeping services for these agencies, and manages properties under the control of the department. In addition, investigative services are provided through the Division of Investigation.

During 1963-64 1 women's restroom attendant was transferred from the Board of Equalization to this division to correctly show the total maintenance charges, and 3 key punch operators were transferred from the Structural Pest Control Board to correctly show the total cost of departmental data processing. The additional temporary help authorization in the current year was used to move several boards within the newly remodeled Business and Professions building and for clerical help relative to the initial operation of the Bureau of Electric Repair Dealer Registration.

To carry out the various duties a total of 3 new positions are proposed for 1964-65.

Data Processing Section: 1 keypunch operator is provided t meet increased workload requirements of the Structural Pes Control Board.

Division of Investigation: 2 investigative positions are re quired for structural pest control investigations resulting fror 1963 legislation requiring the filing of completion reports.

Building Maintenance and Operation: Section 403 of th Business and Professions Code provides that the costs o operation, maintenance, repairs, and other reasonable and neces sary expenses shall be paid from rentals, and that the buildin will be subject to the supervision of the Department of Profes sional and Vocational Standards in accordance with rules an regulations established by the department and the Departmen of General Services.

The main building and its annex are operated on a self-sus taining basis. Major tenants, in addition to the department, ar the Board of Equalization and the Division of Corporations. A small unit of the State Controller's office also occupies space i the annex. Plans are being completed to move this portion of th controller's office to other buildings to provide additional spac for existing units of the department, to eliminate overcrowdin and unsatisfactory working conditions as well as office spac for new units of the department established under the provision of legislation enacted during the 1963 session of the Legislature A special repair and maintenance project for $115,635 is adde in the current year to provide the necessary alterations.

BUSINESS AND PROFESSIONS BUILDING ANNEX

Section 403 of the Business and Professions Code provides that the costs of operation, maintenance, repairs, and other reasonable and necessary expenses shall be paid from rentals and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with the rules and regulations established by the department and the Department of General Services The cost of operating and maintaining the building is defrayed by rentals received from the state boards occupying building space and fe paid by users of its parking facilities. Generally, the remaini receipts are apportioned back to the boards contributing to t cost of the building in proportion to their respective investment

Repayments to investing boards are estimated on an accru basis. Actual repayments are made annually, after the close the period in which net rentals accrued.

GENERAL ANALYSIS

Objectives

The Board of Accountancy under the provisions of Sections 5000-5135 of the Business and Professions Code administers the laws by establishing and enforcing regulations pertaining to the activities of certified public accountants and public accountants and the prequalification, examination, and licensing of these persons so as to protect the using public.

Program and Performance

The Board of Accountancy consists of 8 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco. The two types of licenses issued by the board are for certified public accountants and public accountants. The workload increases indicated in the chart below have been due to the increased number of examinations conducted in licensing certified public accountants and in the maintenance and evaluation of experience records for such persons prior to the issuance of licenses.

A half-time clerical position is included in the 1964-65 fiscal year for the Los Angeles office to increase an existing half-time position to full-time. This full-time position will provide in formation services to the public and furnish stenographic hel to the board and executive secretary when working in Los An geles and to the investigator assigned to the Los Angeles office Additional per diem for the board and 0.1 man-year for secre tary-treasurer to board are temporarily approved in 1963-64 an included in 1964-65 as a result of the enactment of Chapte 1339, Statutes of 1963.

The board's workload is reflected in the following table:

	Actual			Estimated	
Licenses:	1960-61	1961-62	1962-63	1963-64	1964-6
Certified public accountants	8,373	9,124	9,625	10,100	10,50
Public accountants	16,570	16,035	15,395	14,900	14,50
Total Licensees	24,943	25,159	25,020	25,000	25,00
Applications	4,052	4,134	4,416	4,400	4,50

Revenues from license renewal fees are received in January of each odd-numbered year.

Support *(California State Board of Architectural Examiners' Fund)*	$93,958	$117,813	$125,328	$7,515 (6.4%)
Personnel man-years	7.3	9	9.1	0.

GENERAL ANALYSIS

Objectives

The Board of Architectural Examiners under the provisions of Sections 5500-5604 of the Business and Professions Code enforces laws and makes regulations pertaining to the practice of architecture. It determines acceptable qualifications, examines, and licenses persons to practice architecture so as to protect the using public.

Program and Performance

The board consists of 9 members appointed by the Governor for 4-year terms, 3 of whom were added in accordance with the provisions of Chapter 2133, Statutes of 1963. The board maintains headquarters at Sacramento with branch offices at San Francisco and Los Angeles.

The principal workload of the board is in the prequalification and examination of applicants to practice architecture. Pursuant to Chapter 2133, Statutes of 1963, the licensing and regulating of Building Designers was added to the responsibilities of this board. All designers wishing to practice in the State must register during 1963-64 and no such registration can be made thereafter. Designers then have until 1972 to become license architects.

The increase of expenditures for the board for both th current and the budget year is due principally to the ne legislation and the need for additional expert examiners an 1 man-year of temporary help to meet the increasing workload

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-6
Licensees	3,498	3,791	3,979	4,300	4,50

GENERAL ANALYSIS

Objectives

The Athletic Commission is established and performs its operations under the provisions of Sections 18600–18783 of the Business and Professions Code. It administers the boxing and wrestling laws by establishing and enforcing rules and regulations pertaining to all professional and amateur matches and all persons who participate in them.

Program and Performance

The commission consists of 5 members serving 4-year terms. Headquarters are maintained in Sacramento with branch offices in Los Angeles and San Francisco.

While there was a drop in the commission's workload in the 1962-63 fiscal year, there is expected to be an increase in the 1963-64 and 1964-65 fiscal years due to renewed public interest.

The commission rejoined the World Boxing Association in t 1962-63 fiscal year.

The commission's workload is indicated by the following fi ures:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-
Licensees	1,454	1,545	1,285	1,564	1,56
Number of shows	823	1,074	845	1,000	1,00

Under the provisions of Section 20, Budget Act of 1963, special investigator positions have been abolished admini tratively.

Revenues from license renewal fees are received annually i January.

GENERAL ANALYSIS

Objectives

The Board of Barber Examiners under the provisions of Sections 6500-6636 of the Business and Professions Code enforces laws, rules, and regulations pertaining to the practice of barbering. The board also establishes minimum price schedules within any city or county upon petition signed by 75 per centum of the barbers in that city or county.

Program and Performance

The board consists of 5 members appointed by the Governor for 4-year terms. Headquarters are maintained in Sacramento with a branch office in Los Angeles.

Petitions to the board to establish minimum price schedules are continuing at the 1963-64 level. In the 1964-65 fiscal year 1 clerical position is included to handle correspondence and other workload resulting from the enactment of Chapters 569 and 690, Statutes of 1963. The workload stemming from this legislation involves the determination of eligibility of barber college students for future licensing; approval of apprenticeship training programs and instructor qualifications; holding additional examinations to comply with a 2-year limitation on the period of application and examination; revoking apprenticeship licenses for failing to take examinations; and processing appeals for extensions of the examination period. One-half man-year clerk position is requested for the Los Angeles office to increase an existing half-time position to full-time. The position will provide information services to the public and furnish stenographic help to the board and executive secretary when working in Los Angeles.

The board's anticipated increase in workload as a result of establishment of the new 2-year limitation on the apprenticeship period is reflected in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees	37,661	38,489	39,266	40,000	40,800
Applications	4,621	3,849	3,581	5,700	5,928
Petitions	15	35	26	25	25

Revenues from license renewal fees are received biennially in October of the odd numbered years.

GENERAL ANALYSIS

Objectives

The Cemetery Board, under the provisions of Sections 9600-9770 of the Business and Professions Code, is charged with the administration and enforcement of laws pertaining to certain cemeteries and licensing of cemetery salesmen and brokers.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento with a branch office in Los Angeles.

In addition to regulating certain cemeteries and licensing cemetery salesmen and brokers, the board is required to examine endowment care funds of cemetery authorities to determine the status and proper investment of such funds.

The board's workload is reflected in the following table:

GENERAL ANALYSIS

Objectives

The Board of Registration for Civil and Professional Engineers, under the provisions of Sections 6700-6799 and Sections 8700-8805 of the Business and Professions Code, administers the laws by adopting and enforcing rules and regulations pertaining to the practice of engineering and land surveying and prequalifies, examines and licenses persons to practice engineering and land surveying so as to protect the using public.

Program and Performance

The board consists of 9 members appointed by the Governor for 4-year terms. Of these, 7 members are engineers, 1 member is a land surveyor, and 1 member is appointed from the public. The board maintains headquarters in Sacramento, and branch offices in Los Angeles and San Francisco.

A study by the Organization and Cost Control Division, Department of Finance, of the licensing, clerical, field operations, general organization structure, and control of the board, has just been completed but not evaluated for policy implications at this time.

The 3 new clerical positions authorized in the 1963-64 Governor's Budget have not been established pending the outcome of the study.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees	38,806	40,090	41,193	43,400	45,500

GENERAL ANALYSIS

Purpose

The Collection Agency Licensing Bureau under the provisions of Section 6850-6956.1 of the Business and Professions Code enforces laws and regulations pertaining to collection agencies and the examination and licensing of officers and employees of collection agencies. In addition, the bureau registers employees, licensees, examines the financial accounts of licensees, and initiates receivership actions in cases of insolvency.

Program and Performance

The chief of the bureau is appointed by the Governor with the confirmation of the Senate and serves under the direction and supervision of the director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Bureau of Private Investigators and Adjusters with the salary expense being shared equally by each bureau. There is within this bureau a California Advisory Board of Collection Agencies consisting of 6 members, 5 from the industry and 1 from the public, all of whom are appointed by the Governor for 4-year terms. The bureau maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco.

Included in the 1964-65 Budget is 1 intermediate stenographer for the Los Angeles office primarily to handle clerical workload for the 3 auditors authorized for 1963-64 and also the workload involved in processing the Certified Public Accountants' and Public Accountants' reports required under the provisions of Chapter 1815, Statutes of 1963. This legislation requiring such annual reports will take effect in June 1964. As the major part of the increased workload will develop during 1963-64, this clerical position is temporarily approved to provide the required service and is proposed on a permanent basis in 1964-65.

In the 1963-64 and 1964-65 fiscal years $1,800 is included for board member per diems under the provisions of Chapter 1814, Statutes of 1963. Legislation will be introduced at the 1964 Budget Session of the Legislature to increase fees in order to continue the program on a self-supporting basis. The revenue estimates for 1964-65 reflect these proposed fee increases.

The bureau's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licentiates	736	711	660	623	600
Registrations	2,274	2,625	3,173	3,250	3,300
Applications	1,035	1,129	927	900	800

Revenues from license renewal fees are received annually in July.

GENERAL ANALYSIS

Objectives

The Contractors' License Board under the provisions of Sections 7000-7211 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations pertaining to contractors and prequalification, examination, and licensing of persons to practice in the various branches of the construction industry.

Program and Performance

The Contractors' License Board consists of 8 members appointed by the Governor for 4-year terms. The members, with the exception of the public member, are appointed from the following categories: 3 general building contractors, 3 specialit contractors, and 1 general engineering contractor. Appoin ments to fill vacancies in these categories will be from the san branch of the contracting industry as the member whose ter expired. The public member must not be licensed by the boar

In 1963-64, 5 intermediate typist-clerks and 4.2 man-years temporary help are temporarily approved in order to handle th increased workload and provide staff for the revised procedure as recommended in a 1962 survey by the Organization and Co Control Division, Department of Finance. These 5 positions a proposed in 1964-65 for continuation on a permanent basis.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

In 1964-65 there are a total of 26.8 new positions. These include 12 investigator and 4 related clerical positions to handle increased investigative workload. These positions will be established in 3 new branch offices in Santa Barbara, Santa Ana and south Los Angeles County. Also included are 7 intermediate typist-clerk positions to handle increased workload resulting from the increased number of licenses and applications, law and procedural changes. Of these 7 clerical positions, 5 are a continuation of those temporarily approved in 1963-64 and 2 are additional positions. In addition 3.8 man-years of temporary help are proposed for 1964-65 to handle the bonding renewal peakload period, to assist in the completion of the systems revision recommended by Organization and Cost Control Division, and to handle the increased number of licensees requiring renewal.

The growth in the number of the State's licensed contractors and increasing workload of the board is indicated in the chart below.

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65

GENERAL ANALYSIS

Objectives

The Board of Cosmetology under the provisions of Sections 7300-7446 of the Business and Professions Code examines, licenses, and regulates the practice of hairdressers, cosmeticians, manicurists, electrologists, beauty shops, and cosmetology schools.

Program and Performance

The board consists of 7 members including 5 licensed cosmeticians, 1 member representing schools of cosmetology and 1 member of the general public. The members are appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento with branch offices in Los Angeles, San Diego and San Francisco with examination facilities in Los Angeles and San Francisco.

Operating expenses are increased $15,000 in 1963-64 to p vide for an independent study to obtain recommendations improving the quality and the procedures of the examinati The funds for this purpose were approved in the 1962-63 bud but were not used.

The board's workload is indicated in the following table

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	196

Department of Professional and Vocational Standards

BOARD OF COSMETOLOGY—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS—Continued

Program and Performance—Continued

In both 1963-64 and 1964-65 funds are added for 1.5 man-years of temporary help (proctors) and 0.2 expert examiners (electrologist) in order to handle increased examination workload.

In 1964-65 an additional 0.5 clerical position is included to increase a presently authorized 0.5 position in the Los Angeles office to full time. This position handles inquiries from the public and performs general clerical duties for the board. Also included is $10,000 for the replacement of worn equipment at the examination sites.

A survey is currently being conducted by the management planning section of the Department of General Services in order to resolve certain management problems and determine staffing requirements for handling the board's increasing workload. Upon completion of this survey any necessary changes in staffing will be considered administratively and submitted subsequently to the Legislature for review and approval.

GENERAL ANALYSIS

Objectives

The Board of Dental Examiners under the provisions of Sections 1600-1748 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations pertaining to the practice of dentistry and by the prequalification, examination, and licensing of persons to practice as dentists and as dental hygienists.

Program and Performance

The Board of Dental Examiners consists of 8 members appointed by the Governor for 4-year terms. Seven of the members must be practicing dentists and 1 is a public member. The board maintains headquarters in Sacramento, with branch offices in San Francisco and Los Angeles.

The principal workload of the board is in the prequalification and examination, both written and practical, of applicants to practice dentistry. The number of licentiates shows a continuing yearly increase.

The board's workload is indicated in the following table

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licentiates	11,787	12,584	13,221	13,821	14,1
Applications	1,359	1,052	1,329	1,400	1,0

In 1964-65 an additional 0.5 clerical position is proposed to increase an existing 0.5 position to full-time in the Los Angeles office to handle the additional workload resulting from the increasing number of licentiates, applications and public inquiries. This position is responsible for disseminating information to the public concerning board policy and qualifications for licensing in addition to the required stenographic duties.

Revenues from license renewal fees are received biennially in May of the even-numbered years.

GENERAL ANALYSIS

Objectives

The Board of Dry Cleaners under the provisions of Sections 9500-9598.5 of the Business and Professions Code administers the law by adopting and enforcing rules and regulations pertaining to the practice of dry cleaning and by examining and licensing applicants to practice dry cleaning.

Program and Performance

The Board of Dry Cleaners consists of 7 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento, with branch offices in Los Angeles and San Francisco. The major portion of the increase in 1964-65 is $5,768 for the replacement of equipment used at the examinati sites. A minor increase in temporary help is included to hanc the required workload.

The board's workload is indicated in the following table:

Personnel man-years	–	8.5	8.5	–

GENERAL ANALYSIS

Purpose

The Bureau of Electronic Repair Dealer Registration administers and enforces Section 9800 through 9880, Business and Professions Code which provides for the registration and regulation of electronic repair dealers.

Program and Performance

This Bureau was created effective September 20, 1963 under the provisions of Chapter 1492, Statutes of 1963, and is to be terminated September 20, 1965. The Chief of the Bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. An advisory board, consisting of 5 members appointed by the Governor for 4-year terms is included in the Bureau. Of these members 3 are selected to represent the public and 2 are selected from the radio, phonograph and television repair industry.

In 1963-64 the equivalent of 13.5 man-years of service are included to handle the workload involved in carrying out the provisions of the 1963 legislation. This 13.5 man-years includes 8.5 positions in personnel services and the equivalent of 5 positions in operating expenses.

The 8.5 new positions include the following: 1 chief and 1 assistant chief and clerical support for them consisting of 1 senior stenographer; 1 senior and 4 intermediate clerks to handle the clerical workload related to the registration and regulatory functions; and 0.5 temporary help for peak workload periods.

The operating expenses provide for the equivalent of 5 positions to handle field services workload of either an investigative or technical nature.

In 1964-65 the operating expenses are increased to provide the equivalent of an additional 5 positions in field services to handle an estimated increase in the investigative or technical workload.

The bureau's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Registrants	–	–	–	10,000	10,750
Applications	–	–	–	10,000	1,000

Revenues from license renewal fees are received annually in June.

GENERAL ANALYSIS

Objectives

The Board of Funeral Directors and Embalmers under the provisions of Sections 7600-7729 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations pertaining to funeral directors, embalmers, apprentice embalmers, and by the examining and licensing of such persons.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. Of the 6 members 5 are licensed funeral directors or embalmers and 1 is a public member.

The board, in addition to the examination and licensing program, maintains control over an apprentice embalmer program. This program constitutes a substantial portion of the workload and is of increasing importance in policy considerations of the board.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65

Personnel man-years	16	16.2	16.5	0.

GENERAL ANALYSIS

Objectives

The Bureau of Furniture and Bedding Inspection, under the provisions of Sections 19000-19399 of the Business and Professions Code, administers the laws by establishing and enforcing rules and regulations pertaining to the selling and manufacture of furniture and bedding containing any types of filling materials and the licensing of persons to engage in such activities.

Program and Performance

Within the Bureau of Furniture and Bedding Inspection there is an advisory board which consists of 8 members appointed by the Governor for 4-year terms. The bureau maintains its offices and laboratory in Sacramento. The laboratory provides the analysis of filling material needed to insure compliance with the laws relating to public health and welfare. Because of the many advances in materials and fabrics, the laboratory maintains a continuing analysis program and also furnishes analytical services to the Purchasing Division of the Department of General Services on a reimbursable basis.

The increase of 0.3 man-year in temporary help in 1964-6 reflects the temporary help needs as a result of biennial licencin

No provision has been made for additional staff to hand increased workload required under the provisions of Chapt 2141, Statutes of 1963, which requires the bureau to licen and regulate manufacturers and dealers in stuffed articles oth than furniture. After procedures have been developed and wor load identified, staffing requirements will be considered admini tratively prior to submission to the Legislature for permaner authorization.

The bureau's workload is indicated in the following table

	Actual			Estimated [a]	
	1960-61	1961-62	1962-63	1963-64	1964-6

GENERAL ANALYSIS

Objectives

The Board of Guide Dogs for the Blind under the provisions of Sections 7200-7217 of the Business and Professions Code administers the laws relating to guide dogs for the blind.

Program and Performance

The board consists of 7 members. These include 5 appointed by the Governor for 4-year terms, the Superintendent of the School for the Blind, and the chief of the Bureau of Vocational Rehabilitation. This board was established for the pur pose of licensing and regulating guide dog schools and guid dog trainers. Nineteen licenses are in effect. Staff for thi board's work is currently provided jointly by the Departmen of Professional and Vocational Standards and the Departmen of Rehabilitation.

Revenues from license renewal fees are received one yea from the date each license is issued.

	Personnel man-years	1.1	1.2	1.5	0.3

GENERAL ANALYSIS

Objectives

The Board of Landscape Architects under the provisions of Sections 5615-5685 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations pertaining to landscape architecture and the examination and licensing of persons to so practice under the title of landscape architect.

Program and Performance

The Board of Landscape Architects consists of 6 members appointed by the Governor for 4-year terms.

The principal workload of the board is in the prequalification and examination of applicants to practice landscape architecture.

This board is combined with 3 others under one executive secretary for administrative purposes. The administrative costs are shown in the various boards then pro rated equitably to all 4 boards.

A 0.3 clerical position is included in this board and a similar amount is included in the other 3 boards' budgets to provide a full-time clerical position to handle the related workload in each board. A portion of the cost of the new part-time position is offset by a reduction in temporary help.

Workload of the board is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees	825	795	814	841	860
Applications	37	76	62	78	82

Revenues from license renewal fees are received biennially in February of the even-numbered years.

GENERAL ANALYSIS

Objectives

This function of the department was created by Chapter 1823, Statutes of 1963. The department is charged with the responsibility of registering and regulating those persons wishing to advertise themselves as child, family and marriage counselors.

Program and Performance

It is planned that the program will be administered by the Board of Social Work Examiners under contract with the department. Funds are budgeted to handle the workload required for initial registration which will be made on January 1, 1964. The board's workload is indicated in the following table:

	Estimated 1963-64	Estimated 1964-65
Licentiates	430	430
Applications	430	–

Revenues from license renewal fees are received biennially in December of the odd-numbered years.

BOARD OF MEDICAL EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES				
Support *(Medical Examiners' Contingent Fund)*	$576,358	$646,086	$615,151	—$30,935 (—4.8%)
Support *(Physical Therapy Fund)*	12,794	16,101	16,246	145 (0.9%)
Totals	$589,152	$662,187	$631,397	—$30,790 (—4.6%)
Personnel man-years	21.3	24.5	23.5	—1

GENERAL ANALYSIS

Objectives

The Board of Medical Examiners, under the provisions of Sections 2000-2497; 2540-2558; 2600-2631; 2650-2694; and 2900-2984 of the Business and Professions Code, administers the laws by establishing and enforcing rules and regulations for physicians and surgeons, podiatrists, drugless practioners, and midwives.

Program and Performance

The board consists of 12 members appointed by the Governor for 4-year terms. Within the board there is a Podiatry Examining Committee of 6 members which reviews applications and examines applicants for licensing as podiatrists; a Psychology Examining Committee of 8 members which examines and passes upon the qualifications of applicants for certificates and registration as psychologists; and a Physical Therapy Examining Committee of 5 members which reviews applications and examines applicants for licensing as physical therapists subject to approval by the board.

With the passage of the amendment to the Osteopathic Act (Proposition 22) in November 1962, workload of the Board of Medical Examiners increased substantially as 2,547 licentiates changed their designation from Doctor of Osteopathy to Doctor of Medicine.

The budget reflects the reduction of 1 man-year temporary help in 1964-65 due to a re-estimate of personnel required to handle increased workload resulting from transfer of licentiates from the Board of Osteopathic Examiners.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65

GENERAL ANALYSIS

Objectives

The Board of Nursing Education and Nurse Registration, under the provisions of Sections 2700-2830 of the Business and Professions Code, administers the laws by: the establishing of curricula for schools of nursing upon which accreditation of said schools may be based; establishing and enforcing rules and regulations pertaining to the practice of professional nursing; and by the examination and licensing of persons to practice as registered nurses.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. Of the 6 members, 5 are licensed professional nurses and 1 member is a public member. The board maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco.

The budget includes a total of 3.3 proposed new positions of which 1.7 are temporarily approved in the current year to handle an increased workload over that anticipated in the 1963-64 Governor's Budget. All of the new positions are requested in order to handle increased workload of the board.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
School of Nursing	59	61	60	69	71

BOARD OF OPTOMETRY

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES				
Support *(State Optometry Fund)*	$59,904	$63,992	$65,378	$1,386 (0.2%)
Personnel man-years	2.6	2.6	2.6	–

GENERAL ANALYSIS

Objectives

The Board of Optometry under the provisions of Sections 3000-3152 of the Business and Professions Code administers the laws by establishing and enforcing regulations pertaining to the practice of optometry, the inspection and accreditation of schools teaching optometry, and the examination and licensing of persons to practice optometry.

Program and Performance

The Board of Optometry consists of 6 members appointed by the Governor for 4-year terms.

The principal workload of the board is in the prequalification and examination of applicants and the maintenance of required records, which is reflected in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees	2,639	2,676	2,685	2,740	2,770
Applications	104	83	98	101	120
Branch offices	248	227	216	220	220

The temporary help increase in the current and budget year results from a rate change for a temporary clerical position.

Revenues from license renewal fees are received biennially in February of the odd-numbered years.

BOARD OF OSTEOPATHIC EXAMINERS

Headquarters Office at Sacramento

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
	SUMMARY				
	TOTAL EXPENDITURES				
	Support *(Contingent Fund of the Board of Osteopathic Examiners)*	$60,316	$30,228	$22,876	—$7,352 (—24.3%)
	Personnel man-years	5.9	1.5	1.1	—0.4

GENERAL ANALYSIS

Objectives

This board, established under an initiative act set forth as Section 3600-1 to 3600-3 of the Business and Professions Code, maintains high standards for the osteopathic profession, and assists and protects licentiates and the public.

Program and Performance

The Board of Osteopathic Examiners was created by initiative measure in 1922 and consists of 5 members appointed by the Governor for 3-year terms from graduates of osteopathic schools who are licensed to practice in this State and have been citizens for 5 years preceding appointment. With the passage of the amendment to the Osteopathic Act (Proposition 22) in November, 1962, a majority of the osteopaths chose to be licensed by the Medical Board. No new licenses will be issued by this board, therefore the projected workload consists of renewing the licenses and regulating the activities of an ever-diminishing number of licentiates as reflected in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licentiates	2,856	2,850	450	450	400

Revenues from license renewal fees are received annually in January.

GENERAL ANALYSIS

Objectives

The Board of Pharmacy, under the provisions of Sections 4000-4416 of the Business and Professions Code, administers the laws by adopting and enforcing rules and regulations pertaining to pharmacists, pharmacies, manufacturers and wholesalers of drugs, the pre-qualification, examination, and licensing of persons to so practice; and the control of sales of poisons and dangerous drugs.

Program and Performance

The Board of Pharmacy consists of 8 members appointed by the Governor for 4-year terms. Seven members must be registered pharmacists and 1 is a public member who must not be licensed under any of the healing art acts.

The board maintains headquarters in San Francisco with a branch office in Los Angeles.

Greater emphasis is being placed by all law enforcement agencies on the sale and control of dangerous drugs since such drugs are rapidly creating an area of concern which ranks with the narcotics problem. In accordance with this emphasis the board is increasing its liaison and training activities with law enforcement agencies.

The budget includes 1 assistant secretary to correct an existing staffing deficiency in the supervisory structure of the board and to handle increased workload arising from the growing complexity of the pharmaceutical laws.

The board's licensing workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees	21,242	20,425	21,140	21,150	21,250
Applications	600	589	668	670	670

Revenue from pharmacists' license renewals are received biennially in November of odd-numbered years while renewal revenues from pharmacy licenses are received annually in January.

GENERAL ANALYSIS

Purpose

The Bureau of Private Investigators and Adjusters, under the provisions of Sections 7500-7583 of the Business and Professions Code, administers and enforces the laws and regulations relating to private investigators, adjusters, repossessors, and employees and officers of private investigator agencies. The bureau also examines and licenses all private investigators, adjusters and repossessors.

Program and Performance

The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Collection Agency Licensing Bureau with the salary expense being shared equally by each bureau. The bureau maintains headquarters in Sacramento and a branch office in Los Angeles.

During 1963-64 a General Fund loan of approximately $15,000 will be required to offset a deficit fund condition until revenues are received in 1964-65 from the biennial renewals. Legislation will be introduced at the 1964 Budget Session of the Legislature to finance the program on a self-sustaining basis in subsequent fiscal years.

The following table indicates the bureau's workload:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licenses	1,433	1,450	1,506	1,550	1,550

Revenues from license renewal fees are received in July of each even-numbered year.

CERTIFIED SHORTHAND REPORTERS BOARD

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES				
Support *(Shorthand Reporters' Fund)*	$23,475	$24,828	$26,141	$1,313 (5.3%)
Personnel man-years	0.3	0.5	0.4	—0.1

GENERAL ANALYSIS

Objectives

The Certified Shorthand Reporters Board under the provisions of Sections 8000-8032 of the Business and Professions Code administers the laws by establishing and enforcing regulations pertaining to the practice of shorthand reporting under the title of certified shorthand reporter, and prequalifies, examines and licenses persons to so practice in order to protect the using public.

Program and Performance

The Certified Shorthand Reporters Board consists of 5 members appointed by the Governor for 3-year terms.

The principal workload of the board is in the examination and qualification of persons to use the title of certified shorthand reporter. Two examinations are given each year.

This board is combined with 3 others under 1 executive secretary for administrative purposes. The administrative costs are shown in the various boards then prorated equitably to all 4 boards.

A 0.3 clerical position and a similar percentage position is included in this and the other 3 boards' budgets to provide a full-time clerical position to handle the increased workload. A large part of the cost of the new position is offset by a reduction in temporary help.

Additional funds for out-of-state travel are budgeted to provide for attendance at the annual meeting of the National Shorthand Reporters Association. As a result of the enactment of Chapter 1703, Statutes of 1963, there will be an increase in the number of applicants for certification which will require a related increase in examination expense. Revenue is reduced in the budget year as 1963-64 was the first year of biennial license fees.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licentiates	812	899	951	1,050	1,069
Applications	229	145	293	350	350

Revenues from license renewal fees are received biennially in May of each odd-numbered year.

Personnel man-years	15.3	20.4	25.7	5.3

GENERAL ANALYSIS

Objectives

The Structural Pest Control Board under the provisions of Sections 8500-8695 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations relating to structural pest control and the examination and licensing of persons to practice structural pest control. The board also receives and maintains structural pest control inspection reports filed by structural pest control operators and furnishes copies of these reports to interested escrow holders or real estate brokers.

Program and Performance

The board consists of 6 members appointed by the Governor, of which 5 are licensed structural pest control operators and 1 is a public member.

The provisions of Chapter 1960, Statutes of 1963 require:

a. Structural pest control operators to submit work completion reports in addition to inspection reports.
b. Real estate brokers to notify all parties of interest to a real estate transaction of their rights to obtain certified copies of any inspection reports and completion notices on file with the board, when any party of interest requests an inspection.
c. Simplification of the procedure whereby certified copies of inspection and completion reports are furnished by the board to any person requesting them.

In addition, the board, in October 1963, completed 2 years of filing inspection reports after which time all files must be purged monthly of reports over 2 years old.

In 1964-65 the equivalent of 13 additional man-years of service are included to handle the increased workload needed to carry out the provisions of the 1963 legislation. This additional 13 man-years includes 10 new positions in personal services and the equivalent of 3 positions in increased operating expenses. The new positions are 1 supervising clerk II, 7 intermediate clerks and the equivalent of 2 clerical positions in temporary help. The operating expenses are increased to provide for 2 investigators in the Division of Investigation and 1 key punch operator in the Data Processing Operation of Departmental Administration. Of the 10 new positions, 3 are budgeted in 1963-64 and 1964-65 to make searches and provide copies requested by the public; 1 is budgeted in 1963-64 and 1964-65 to carry out purging of the files; 5 clerks (including 3 positions and 2 man-years of temporary help) are budgeted in 1964-65 to handle completion report filings. It was also necessary to include 0.7 man-years of temporary help in 1963-64 to handle the completion report filings. One supervising clerk is added in 1964-65 to provide the supervision needed for the enlarged clerical staff.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licentiates	3,091	3,160	3,286	3,350	3,400
Applications	663	754	955	1,000	1,000
Inspection reports filed	–	194,031	280,822	295,000	300,000
Certified copies requested	–	55,703	94,595	100,000	100,000

Revenues from license renewal fees are received annually in July.

GENERAL ANALYSIS

Objectives

The Board of Examiners in Veterinary Medicine under the provisions of Sections 4800-4905 of the Business and Professions Code administers the laws by establishing and enforcing rules and regulations pertaining to the practice of veterinary medicine, by the examination and licensing of persons to practice veterinary medicine, and the inspection of premises used by persons to so practice.

Program and Performance

The Board of Examiners in Veterinary Medicine consists of 6 members appointed by the Governor for 4-year terms. The principal workload of the board is in the prequalification, examination (practical and written), and licensing of persons to practice veterinary medicine.

This board is combined with three others under one executive secretary for administrative purposes. The administrative costs are shown in the various boards then pro rated equitably to all 4 boards.

A 0.2 clerical position is included in this board and a similar amount is included in the other 3 boards' budgets to provide a full-time clerical position to handle the related workload. A portion of the cost of the new part-time position is offset by a reduction in temporary help.

The board's workload is indicated in the following table:

Department of Professional and Vocational Standards

BOARD OF VOCATIONAL NURSE EXAMINERS—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

Objectives

The Board of Vocational Nurse Examiners under the provisions of Sections 2840-2895 of the Business and Professions Code administers the law by establishing and enforcing rules and regulations pertaining to vocational nurses, by establishing curriculums for schools teaching vocational nursing, and by the examination and licensing of persons to practice as vocational nurses.

Program and Performance

The Board of Vocational Nurse Examiners consists of 11 members appointed by the Governor for 4-year terms.[a]

During 1964-65 temporary help equivalent of 0.5 man-year is included to handle increased workload in the processing of applications, file maintenance and general correspondence.

Workload of the board is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Licensees:					
Vocational nurses	14,536	15,962	17,115	19,200	21,120
Psychiatric technicians	3,027	4,494	4,995	–	–
Applications:					
Vocational nurse	1,742	1,956	2,292	2,900	3,200
Psychiatric technicians	4,026	1,699	450	–	–
Schools of nursing	47	48	51	56	60
Extended campuses	125	125	146	161	165

Revenue during the 1962-63 biennial license renewal cycle for the psychiatric technicians failed to meet the original estimates to the extent that the past year activity was reduced to a minimum subsistence level in order to maintain an expenditure program within available resources.

The Legislature in the 1963 session did not appropriate funds for the continuance of this program due to the revenue deficiencies.

GENERAL ANALYSIS

Objectives

The Yacht and Ship Brokers Commission under the provisions of Sections 8900-8975 of the Business and Professions Code administers the law by establishing and enforcing regulations pertaining to yacht and ship brokers including the licensing of persons to practice as yacht and ship brokers and salesmen.

Program and Performance

The commission consists of 5 members appointed by the Governor for 4-year terms. The registrar also serves as the executive secretary to the Board of Landscape Architects, the Board of Examiners in Veterinary Medicine, and the Certified Shorthand Reporters Board. The full cost of the personal services of the registrar position is shown for administrative purposes in this budget with approximately 75 percent of these costs being recovered through reimbursements received from the 3 other boards.

A 0.2 clerical position is included in this board and a similar amount is included in the other 3 boards' budgets to provide a full-time clerical position to handle related workload of each board. A portion of the cost of the new part-time position is offset by a reduction in temporary help.

The commission's workload is indicated in the following table:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services or rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

Program and Performance

The Public Utilities Commission was created under the provisions of Article XII, Section 22 of the Constitution and carries out its assigned duties and responsibilities under the sections in the Public Utilities Code.

The commission consists of 5 members appointed by the Governor for 6-year terms to hear matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The commission then determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; street cars, trucks, buses, airlines and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders, and pipeline operators.

The commission regulates the issuance of securities and other transactions relating to the capital structure of public utilities, and protects the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

Reduction in charges for utility service amounting to millions of dollars and refunds to California customers of additional millions for excessive charges in the past for natural gas highlighted the fiscal year ended June 30, 1963.

Annual reductions in charges exceeded by $19,835,784 the total increases put into effect, the greatest net reduction in utility charges for more than a quarter century.

Gas customers throughout the State now pay $16.5 million less per year, electric rates were lowered $6 million and charges for telephone service were reduced $2.3 million per year, a total of $24.8 million. During the same 12 months, total increases of $5 million in basic rates became effective, leaving net reductions to customers of $19.8 million per year.

Not only were unit gas charges reduced for future months, but refunds to California distributing companies of $95.9 million were made by the interstate pipeline company, the El Paso Natural Gas Company, by order of the Federal Power Commission. This commission ordered the entire amount refunded to individual California customers.

The reduction and the refunds are the initial results of an intensive campaign which the commission and its staff have waged for more than a dozen years before the Federal Power Commission and in federal courts. Engineers and accountants who made extensive investigations and testified at hearings, and attorneys who presented arguments supporting their testimony devoted many days to the study of El Paso's operations and to active participation in Federal Power Commission hearings.

Passenger fare increases were authorized for various bus companies and water carriers and totaled $1.7 million during the fiscal year. Upward adjustments were also necessary in minimum rates for truck carriers of freight. Revenues of for-hire carriers of freight operating intrastate rose to $911 million in 1962 compared to $835 million the previous year. The bulk of this increase is attributed to the growth of the State.

Safety always has been an important part of the commission's work and continued progress has been made in safeguarding the public and employees. Installation of better automatic protection at railroad-highway grade crossings as well as construction of overpasses and underpasses at the most heavily traveled crossings has reduced hazards materially. A before and after study at 367 crossings which were improved shows that accidents were reduced by 65 percent. Both of these programs have been stimulated by legislative action making funds available to assist cities and counties in paying their share of costs. Inspections for impaired clearances along railroad tracks, overhead power and communication lines, and gas lines and underground gas storage facilities were made to insure their safe construction and maintenance.

To bring jurisdiction over the safety of motor vehicle operations upon public highways under one state agency, Chapter 2148 was enacted during the 1963 Legislature. This new law transferred the commission's safety jurisdiction over for-hire carriers of freight and passengers to the Department of the California Highway Patrol and involved the transfer of 7 positions from the commission staff.

The 1964-65 Budget provides for the following new positions:

Administration	4
Utilities Division	5
Finance and Accounts Division	3
Transportation Division	37
Legal Division	1
Examination Division	1
Totals	51

ADMINISTRATION

Objectives

The Administrative Division carries out the statutory duties provided for in the Public Utilities Code and maintains the general services necessary to the commission and its operating divisions.

Program and Performance

The statutory duties of this division include receiving and recording all official filings; processing and distribution of all commission decisions and orders; release of all official correspondence; administering oaths; certifying all official acts; issuing subpoenas for attendance of witnesses; processing notices of commission actions; authenticating official documents and testimony in any inquiry, investigation, hearing, or proceeding.

Other services provided by this division include the preparation of the annual budget; internal fiscal accounting; revenue collection; supervision of general business affairs of the commission; central personnel services; records management; sale of documents to the public; reproduction of papers; receiving,

	controlling and delivering incoming mail; dispatching all outgoing mail; custody of official property; maintaining storeroom for supplies; execution of all contracts, agreements and leases of property; advising the commission on administrative matters; and handling inquiries from the public and other state agencies regarding commission actions and procedures.						
	The number of overall formal filings received by the commission in 1962-63 amounted to 7,640 as compared with 7,684 for 1961-62.						
	Work volume connected with formal pleadings continued at a high level, with 1,321 such matters docketed. These consisted of 966 applications, 3 supplemental applications, 169 complaints, 85 petitions for rehearing, and 98 investigations.						
	During this period 94,146 copies of 1,996 decisions and orde were prepared and served by registered mail, regular mail, personal service to interested or affected parties as required.						
	In 1964-65 a total of 4 additional positions are propose These include 1 additional assistant secretary to handle th increased administrative workload in the commission's Sa Francisco office; 1 clerk to assist the proposed new assistar secretary on a half-time basis and to handle increased worklo in the commission president's office on a half-time basis; 1 cler in the personnel section to assist in handling the increase workload of that unit and 1 additional clerk to assume dutie currently being handled by technical personnel in the Los An geles office.

UTILITIES DIVISION

Objectives

The Utilities Division assists the commission in protecting the public by the regulation of privately owned gas, electric, communication, water, and steam heat utilities within the framework of the Public Utilities Code.

Program and Performance

The functions of this division include determination of plant, revenues and expenses for rate increase applications for utility service, valuation of utility property for condemnation purposes, certification matters, future requirements of utility service and adequacy of supply, abandonment of service, investigation of formal and informal complaints, disputed bills and other public inquiries, and other related matters. The addition of a new class of communication utility described by formal decision as "Mobile Radiotelephone" has resulted in establishment of 44 new utilities and attendant regulatory requirements. To handle the increased workload resulting from the adoption of this decision 3 new positions, including 2 engineers and 1 clerk, are included in 1964-65.

A majority of staff time is devoted to formal proceedings while certificates to establish new utility systems or facilities and utility engineering aspects of utility tariffs and services requires the utilization of a lesser portion of the staff time. Emphasis will necessarily continue to be placed upon ascertaining the cost to produce and deliver gas by out-of-state gas producers and suppliers to California customers, as well as the adequacy of the gas and electric resources to meet the growth of California.

PUBLIC UTILITIES COMMISSION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	UTILITIES DIVISION—Continued						
	Program and Performance—Continued						
	During 1964-65 it is estimated that about 2,500 informal complaints and 9,950 public inquiries will be investigated and answered which is approximately the same level of workload estimated for 1963-64. Administration of general orders is expected to require about 13 percent of the staff's time which will also include many phases of public safety. Division administration and various activities designated to insure reasonable utility service and rates is expected to require about 15 percent of the staff's time. The division has been instrumental in assisting the commission in arriving at decisions for maintaining the operations of the utilities on an economical basis, while successfully protecting the interests of the public consumer.						
	In 1963-64 6 man-years of temporary help are included to handle the increased workload in connection with the Garden Grove Water District Valuation proceedings. All commission direct costs related to these proceedings are reimbursed from the utility being served. Increased activity in the Gas and Electric Branch resulting from the establishment of atomic power plants has resulted in increased workload and accordingly 1 engineering position is included in 1964-65. Also, 1 additional engineer is included in 1964-65 to assist in the increased workload in the Hydraulic Branch. As the California Water Plan continues to develop, demands for commission services will also increase to the point where this activity will take on an increasingly dominant role in the division.

FINANCE AND ACCOUNTS DIVISION

Objectives

The Finance and Accounts Division supervises the application of accounting procedures prescribed by the commission, and conducts financial review and interpretation, rate and cost studies in connection with out-of-state natural gas producers and pipelines regulated by the Federal Power Commission.

Program and Performance

This division reviews applications for authorization to issue securities, prepares rate of return and cost of money studies and otherwise participates in the financial aspects of rate and certificate proceedings, makes accounting examinations of financial data of carriers and other utilities, reviews annual and other financial reports.

PUBLIC UTILITIES COMMISSION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	FINANCE AND ACCOUNTS DIVISION—Continued						
	Program and Performance—Continued						
	The major portion of this division's time and manpower is consumed in formal proceedings. During the fiscal year 1962-63 this division actively participated in 164 formal rate proceedings before this commission and 5 rate proceedings involving utilities regulated by the Federal Power Commission. Further, this division participated in numerous other formal proceedings concerning, among other things, the issuance of securities and related matters.						
	Outside of formal proceedings, the activity requiring the expenditure of substantial amounts of time is the audit of carriers in connection with the reporting of revenues subject to the one-third of 1 percent rate fund fee. During the 1962-63 fiscal year the division ascertained that revenue have been under-reported in the amount of $13,484,120. The additional fees and penalties billed as a result of these audits totaled $55,825. Overpayment of fees resulted in refunds totaling $33,168.						
	The commission authorized public utilities to issue $467,937,170 of securities during the fiscal year ended June 30, 1963, as compared with authorizations amounting to $1,265,885,364 during the preceding 12-month period.						
	The comparison between the 2 years is distorted by the fact that during the 1961-62 period stock-splits amounting to $897,149,322 were approved. Eliminating this amount from the total authorizations for the preceding year would leave a balance of $368,736,042 for the 12 months ended June 30, 1963, as compared with $467,937,170 for the 12 months ended June 30, 1963.						
	Annual and other financial reports of utilities filed with the division for 1962-63 totaled 4,271. Pertinent financial data contained in these reports has been summarized and furnished to the commission and to the staff.						
	In 1963-64, 0.3 man years of temporary help are temporarily approved to handle added workload in connection with the Garden Grove valuation studies. All commission direct costs related to these proceedings are reimbursed from the utility being served.						
	Overall workload of this division has increased to the extent that 3 new positions including 2 additional auditors and a clerk are proposed in 1964-65.

	TRANSPORTATION DIVISION						
	Objectives						
	This division regulates rates, service, safety and operating conditions of privately owned, for-hire carriers of passengers and property by railroad, highway, and water, and to a limited extent, by air.						
	Program and Performance						
	The division studies cost factors, service, rates, and regulations applicable to the movement of freight and passengers by railroad, highway, airlines, water carriers, express corporations, freight forwarders, warehousemen, wharfingers and carloaders. These studies are presented as exhibits in public hearings before the commission involving the establishment of minimum rates throughout the State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits summaries of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and presents evidence in transporta-						

PUBLIC UTILITIES COMMISSION—Continued

TRANSPORTATION DIVISION—Continued

Program and Performance—Continued

tion rate hearings before the Interstate Commerce Commission to protect the interests of California shippers.

The continued changes in transportation and related industries resulting from the State's rapid growth has created a greater workload. This growth is demonstrated in part by the rise in the revenue of for-hire carriers of freight in California from a total of $405 million in 1950 to more than $770 million in 1960, and to more than $911 million in 1962.

The increased workload is primarily in the field of cost finding and results of operations of freight and passenger carriers and public utility warehousemen for the fixation of reasonable rates, in the safety of railroad operations and railroad employees, and in the safety to the public of railroad-highway grade crossings.

During the year the commission issued 280 decisions involving adjustments of rates, rules and regulations for the transportation or storage of freight. Air transportation of freight and passengers has increased substantially. The number of airlines in California has increased 50 percent in three years. To assist in the development of fair and equitable rates to the public and carriers 1 additional engineer is included in 1964-65.

In regard to safety, almost 3,500 new industrial plants have located along the lines of California railroads in the past few years. Industrial tracks must be inspected for safety, including overhead and side clearances.

The commission now has jurisdiction over the safety of working conditions and equipment used by some 20,000 nonoperating railroad employees. This new work is in addition to jurisdiction over the safety of the functions of 9,500 operating employees. The implementation of several new commission orders and decisions has brought about an increase in workload. Accordingly, 4 new technical positions have been included in 1964-65.

The safety of railroad-highway grade crossings has become a pressing problem with the growth of the State. Areas along railroad lines formerly uninhabited now contain many large subdivisions or industrial plants which create heavy use of grade crossings. The staff inspects such crossings and makes traffic checks to determine whether cities or counties and the railroads should be required to install automatic protective devices, or whether existing protection, if any, should be improved.

Recent legislation requires the State Fire Marshal to designate highway routes to be used by motor trucks transporting explosives and other dangerous articles. Many of these routes involve railroad grade crossings which must be reviewed for appropriate protection.

In order to continue this program as well as expand the operations to include the reduction of private crossing hazards to the greatest possible degree the commission is budgeting 2 new engineer and 1 auditor position in 1964-65. It is hoped that the additional staff, together with a concentration of existing personnel, can serve to reduce crossing accidents.

The 14 field offices effect compliance of the carriers transporting property within the State by field investigations of carrier records, as well as advising carriers regarding operating procedures and practices directed toward a dependable and adequate transportation system in the State.

In 1963-64 under the provisions of Chapter 2148, Statutes of 1963, a total of 7 positions were transferred from this division to the Department of the California Highway Patrol in a further effort to centralize in one agency the enforcement of safety laws of vehicles operating upon the public highways.

The 1964-65 Budget includes 4 technical positions and 22 man-years of temporary help to continue the feasibility study initiated in 1963-64. These positions are necessary to handle the additional workload, both in the field and in the headquarters office related to the proposed conversion of manual rate computation to electronic data processing and computation. Also, the sum of $230,000 is budgeted in 1964-65 to finance a pilot study of the program to verify the conclusions reached in 1963-64.

All funds budgeted for these new positions and related expenses plus rental for electronic equipment are based on recommendations of the Data Systems Section of the Department of General Services.

In 1964-65, 3 new clerical positions are proposed including 1 stenographer to handle workload in the new Oakland field office and 2 positions to handle the increased workload in the mail and clerical pool.

LEGAL DIVISION

Objectives

The Legal Division provides legal service to the commission and staff counsel in certain proceedings before the commission.

Program and Performance

The Legal Division represents the commission in proceedings in all of the federal courts and all of the California courts, as well as federal regulatory agencies. It also represents the public interest in proceedings before the commission.

This division reviews all proposed commission orders and actions and co-ordinates with the Division of Corporations on security issues of utility corporations; provides staff counsel in certain proceedings before the commission; handles legislative matters; just compensation proceedings; analyzes records and recommends action on petitions for rehearing; advises concerning legality of pleadings and filing problems; handles complaints seeking immediate injunctive relief by interim order; advises the commission, the technical staff, political subdivisions, utilities, carriers, and the public on legal and procedural matters; reviews the technical staff's informal investigations and determines and recommends whether or not formal proceedings or court action should be taken.

This division spent a substantial amount of time representing the commission in proceedings in the United States Supreme Court, courts of appeals and district courts, in the California Supreme Court, district courts of appeal and superior courts, as well as before the Federal Power Commission, Interstate Commerce Commission and Federal Communications Commission. It also represented the public interest in matters before the California Public Utilities Commission itself.

In the fiscal year 1962-1963 there were 12 petitions filed in the California Supreme Court for review of commission decisions. Six of these were decided before the end of the fiscal period. There are 6 cases pending in the superior courts.

Staff counsel is required in major utility and carrier rate proceedings before the commission as well as investigatory and numerous other proceedings involving substantial questions of law. The transportation enforcement program involves review of possible violations, recommendations for proceedings in the courts or before the commission, and the preparation and handling of trials or hearing resulting from such recommendations. Time required in the performance of staff counsel functions has increased during the fiscal year.

During the past fiscal year 85 petitions for rehearing were handled by this division to review and analyze a matter determined by the commission, independently and objectively, and to make appropriate recommendations to the commission for disposition. Much time has been devoted to consideration of petitions for rehearing and advising other divisions of the commission and the public. More briefs are being required, as well as more detailed legal research on specific problems.

Proceedings out of the state are important and time consuming, requiring a great deal of preparation and absence of attorneys from the office for protracted periods. The interest of the California consumer of natural gas in just and reasonable rates is of vital importance and must be protected. Since California purchases over 75 percent of its natural gas from out-of-state sources, the commission in order to represent such interest adequately is required to appear before the Federal Power Commission in cases involving oil and gas producers as well as pipeline corporations.

The commission was a party in 30 proceedings before the Federal Power Commission, most of which are still pending. There were extensive out-of-state hearings, primarily in Washington, D. C. Hearings on the Permian Basin Area Rate Proceeding which commenced in October 1961, are still in progress and the commission has co-operated extensively with California gas distributing utilities in an effort to present a position which will benefit the State's natural gas consumers.

In addition to the proceedings before the Federal Power Commission, there are 2 matters of national interest pending before the United States Supreme Court. Seven matters are pending before the United States District Courts of Appeals, the most prominent cases being the four appeals of El Paso Natural Gas Company concerning rate increase filings made by El Paso, California's largest out-of-state gas supplier. Growth of the State and increasing reliance upon natural gas as a basic energy source requires continued participation in proceedings involving federal regulation in this field.

During 1962-63 there were 8 proceedings before the Interstate Commerce Commission, involving such matters as discontinuance of intrastate and interstate passenger trains, abandonments of portions of lines, rail-highway crossing accidents, control of Western Pacific Railroad, and intrastate motor transportation of property. The long-awaited decision in the Transcontinental Divisions cases was issued and petitions for reconsideration and modification of the order have been filed, and the commission is preparing to join in court proceedings filed as a result of the Interstate Commerce Commission decision.

Three proceedings are pending before the Federal Communications Commission, relating to telegraphic communications, teletype rates and service, and uniform systems of accounts concerning investment credits.

During 1963-64 0.1 man-years of attorney time was temporarily approved to handle the valuation proceedings of the Garden Grove Water District. All commission direct costs in connection with this proceeding are reimbursed from the utility served.

In 1964-65, 1 new senior legal stenographer is included to handle the increased clerical workload in the division.

EXAMINER DIVISION

Objectives

This function provides the hearing examiners to assure due process to those seeking formal relief from this agency.

Program and Performance

Examiners are assigned to all formal filings which require a decision of the commission. During 1962-63 a total of 1,996 decisions and orders were issued, of which 495 were rendered after public hearings. A total of 907 days of hearings were held, 286 in San Francisco, 351 in Los Angeles, and 270 in other cities in all parts of California. As of June 30, 1963 there were 638 matters pending.

In 1963-64 2 technical positions were authorized on a workload basis but no clerical assistance was provided on the basis that any increased workload could be absorbed by the existing clerical staff. However, because of a heavier workload than anticipated it cannot be absorbed by the existing staff and 1 new clerical position is, therefore, included in 1964-65.

	REPORTING							
	Objectives							
	This function provides the hearing reporters and transcribers for commission proceedings.							
	Program and Performance							
	Hearing reporters are assigned to all proceedings held before the commission. The reporters' notes are not transcribed unless ordered by either the litigants or the commission. Transcripts were prepared in 62 percent of the hearings reported in 1962-63. There were 162,709 original folios produced in the past fiscal year which compares with 218,157 original folios produced in 1961-62. The number of hearings totaled 907. No program changes are anticipated in 1964-65.

GENERAL ANALYSIS

Chapter 2037, Statutes of 1961, established the Resources Agency and authorized the appointment of an administrator. Under this organization the administrator is responsible for the supervision and the operation of the Departments of Water Resources, Fish and Game, Conservation, Parks and Recreation, State Water Quality Control Board, the 9 regional water pollution control boards, and the Water Rights Board. He is the chief adviser to the Governor in these program areas and as such participates in the development of administrative polic and insures that established policies are followed.

One additional clerical position, administratively establishe in 1963-64, is proposed for 1964-65 to provide clerical assist ance for the 2 recreation planner positions added to this offic by the 1963 Legislature. Rent and equipment increases gener ally reflect the impending move of this office to the Retiremen Building in Sacramento.

GENERAL ANALYSIS

Objectives

This department has as its principal objective the conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, and soil resources.

Program and Performance

The department is organized into 5 divisions: Administration, Forestry, Mines and Geology, Oil and Gas, and Soil Conservation.

The Division of Administration provides personnel, accounting and general office services, and organizational and procedural analysis for the other divisions of the department.

The Division of Forestry has primary responsibility for the prevention and suppression of fires occurring on about 39,000,000 acres. In addition the division also carries forward various land management programs such as the administration and enforcement of forest practice rules, forest advisory services, range improvement programs, production of nursery stock, management of state forests, and underwriting forest and fire research programs.

The Division of Mines and Geology, through its staff of field geologists, assists the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State.

The Division of Oil and Gas has supervision of the location, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits, to prevent contamination of fresh water sources penetrated by the wells, and to further the maximum recovery of oil and gas. The division also has responsibility for supervising repressuring operations in connection with the land subsidence which has occurred in the Wilmington area.

The Division of Soil Conservation assists in the organization and operation of local soil conservation districts and co-ordinates, under policy guidance of the State Soil Conservation Commission, the planning of the "small watershed" or Public Law 566 program.

The department is programmed to move from their present Sacramento headquarters in Office Building No. 1 to the Retirement Building on October 1, 1964.

In addition the headquarters of the Division of Oil and Gas, which has been located in San Francisco, will move into the Retirement Building in Sacramento when it is completed.

All general fund costs for rental of space in the Retirement Building and costs of relocation are included in the proposed expenditures of the Division of Administration. Retirement Building space rental for the Division of Oil and Gas is reflected in that division's proposed expenditures for each of the 2 special funds.

All general fund costs of the department for out-of-state travel have been shown in the Division of Administration. In the past these expenditures have shown in each division. The centralizing of these expenditures is consistent with the policy of placing greater reliance on the directors of the various departments in administering their out-of-state travel.

Another change initiated in this proposed budget is the incorporation of the Emergency Fire Suppression and Detection—Other Current Expense item within the support expenditure as an additional category of expenditure. This change will preserve all of the controls presently in effect on this item, reduce the number of separate items of appropriation in the budget and ease some of the administrative problems associated with keeping this item an Other Current Expense.

Major changes in levels of service projected for 1964-65 are reflected in the request for 61.1 new positions. These requests are dealt with in detail in the Program and Performance information preceding each division where positions are proposed. Positions proposed are in the following divisions:

Division of Administration	5.5
Division of Forestry	54
Division of Soil Conservation	1.6
	61.1

An addition of $260,000 is proposed for increasing minimum guarantees to contractors for airplanes used in the Initial Attack program.

An increase of $10,000 is proposed in the printing line item in the Division of Mines and Geology to allow a backlog of publications to be published. Also the last major complement of new scientific equipment contemplated under the 5-year mineral research program instituted in 1959-60 is proposed.

An adjustment representing an increase of $119,354 has been proposed for the 5 counties providing watershed protection on state-responsibility lands to bring these counties into closer parity with the level of support provided by state field forces

[a] Federal grants received under the Clarke-McNary Act are deposited in the General Fund, and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in nursery and service forestry program.

DEPARTMENT OF CONSERVATION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	DIVISION OF ADMINISTRATION						
	GENERAL ANALYSIS						
	Objectives						
	This division provides personnel and fiscal management services, performs organization and procedural studies and provides general office services for the various operating divisions of the Department of Conservation.						
	Program and Performance						
	The department has over 3,000 man-years of permanent personnel and approximately 4,800 employees during seasonal peaks engaged in a broad variety of conservation programs. Within the Division of Administration there are 2 analyst positions and 3 clerical positions responsible for the budget preparation and execution functions of the department. The junior staff analyst position directs the more routine process of budget preparation and review of documents involved in budget execution. The associate budget analyst is involved in the areas of budget justification and analysis. With the growth of the expenditure programs in the department and the increased competition for the tax dollar the need for presenting a balanced program within restricted dollars has become more complex.						
	In order for the department to meet its commitments to present the information required and to develop adequate workload standards in the various program areas of the department an assistant budget analyst position is proposed.						
	Another major area of the department's administrative program requiring additional recognition is the need for the development of an adequate departmental safety program. Such a safety program has several major objectives:						
	1. Economic saving in manpower and equipment resulting from reduction in compensation benefits paid and reduced repair time or replacement cost attributable to high cost per unit equipment.						
	2. Humanitarian purpose of reducing disabling injuries. Over the past few years, the Division of Forestry alone has had an accident frequency rate of 62 as compared with the statewide average of 22. This rate represents an average of 325 disabling injuries and 4,732 lost work days per year.						
	3. Develop good public relations. Accidents may involve the public; but even those that do not, generate adverse public reaction.						
	A safety officer and clerk are proposed to develop such a program. The presence of a safety officer will not relieve each employee and his supervisor from their prime responsibility for safety. This position's function will be primarily to carry on a continuous program of safety education among the employees to make them more aware of safety. Other state agencies engaged in such a program have materially reduced the number of accidents occurring annually.						
	Several clerical positions are proposed to cover areas of workload. An intermediate stenographer is proposed to provide stenographic and clerical assistance to the existing positions of fiscal officer and associate administrative analyst.						
	An intermediate typist position is proposed by an equivalent dollar reduction in temporary help to accomplish work in the personnel section.						
	A half-time position is proposed every other year limited to the General Session of the Legislature to assist the director's office in the increased workload in providing bill analysis services and other requirements during the session. In the past this position has shown only in the Salary Supplement, but beginning in 1964-65 it will be shown as a proposed new position every other year.

DIVISION OF FORESTRY

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of over 39,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 30,000,000 acres of state-owned and private lands. Under a contract arrangement with the United States Forest Service, 5,000,000 acres are protected, and 4,000,000 acres are protected through contracts with 5 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 6,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 26 counties.

Program and Performance

The increased population of the State has placed an additional pressure on the wildlands of the State due to a steadily growing number of permanent and summer homes and other recreational usages. In addition to the increased usage of these lands, the value of timber, rangeland, and watershed has steadily grown. These changing patterns of population and land values cause the Division of Forestry to review their operational facilities and equipment to assure that their basic fire plan is in step with these factors.

As part of the continuing conservation camp program, 4 new camps are scheduled for completion in the 1964-65 fiscal year 3 of which will accommodate 80 inmates and 1 will accommodate 100 inmates. Thirty-eight new positions are proposed to man conservation camps. Two of these positions will serv as inmate instructors at Prado Camp and will be reimburse by the Department of Corrections. Two additional civil eng neers are proposed to keep step with the growth of conservatio camps to design projects to be undertaken by the inmates.

It is proposed that an additional $260,000 be made availabl for rental of aircraft. This will allow the department to provic a higher minimum guarantee to the various contractors an assure their continuing availability.

Increased emphasis on fire prevention, as directed by Chapte 2038, Statutes of 1963, is reflected in the request for 8 add tional fire prevention officers and a clerk; 2 of the preventio officers and the clerk are proposed for Sacramento headquarter and 1 each for the district headquarters offices.

A forest technician is requested for Boggs Mountain Stat Forest in Lake County. This forest was acquired in 1949 unde the State Forest Purchase Act and consists of 3,433 acres. Thi forest has now reached a stage which demands an increase amount of effort for proper management. It is predicted tha with the more intensive management contemplated here bette than $15,000 a year can be expected from the sale of timbe products.

A state forest ranger II position is proposed to strengthe the program planning function in division headquarters.

Three clerical positions are also requested based on workload

The Youth Conservation and Training Program, initiated b Chapter 2051, Statutes of 1963, was instituted at Oak Gle Camp in Riverside County in November, 1963. This camp ha formerly served as a conservation camp but was deactivated fo that purpose to allow the youth program to start functionin immediately. This camp will hold 100 young men who enlist fo 6 months duration subject to 1 re-enlistment. Thus any ir dividual may serve up to 1 year in the camp. The Oak Gle Camp is to serve as a pilot program to determine whethe placing young men in the age group 16-21, who are school drop outs, in a camp doing useful work in the wildlands is an effec tive way of orienting these young men to a work environment

ADMINISTRATION

Program and Performance

The function of administration includes the office of the State Forester and the following staff functions: fire control; business management; engineering and conservation camps; training; fire prevention education; operation of the Davis warehouse and equipment repair shop; administration of the state nursery; and forest, range, and watershed management. The prime objectives are to develop operating policies, rules and regulations in accordance with forest and fire laws and administrative procedures of the State. In addition, technical assistance is provided to the field forces in the specialized staff fields.

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition, they assume staff responsibility fo equipment development and maintenance, communications, fir plan development and statistics, and forest fire research.

The business management section is responsible for the budge development, fiscal control, procurement agreements, and per sonnel matters. The section also supervises the activities of th Davis warehouse and shops.

The engineering and conservation camps section prepare administrative and fire control maps for the division's area o responsibility. In addition, they prepare construction plans an give guidance and supervision to the capital outlay and main tenance program. The section also co-ordinates the activitie of the Forestry Conservation Camp Program and develop

DEPARTMENT OF CONSERVATION—Continued

DIVISION OF FORESTRY—Continued

ADMINISTRATION—Continued

Program and Performance—Continued

standards for construction and maintenance of roads, firebreaks, and telephone services.

The training section is responsible for the co-ordination of 2 training centers and the development of other in-service training programs.

The fire prevention education section co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages, and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

The forest and range management section includes the forest management unit which is divided into 3 functions consisting of management of state forests, forest practice, and service forestry, and deals primarily with the programs concerning the management of the timber resources on private land within the State of California. The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to full production those timber-producing lands that are presently understocked or devoid of timber.

The division is responsible for the administration of 8 state forests. Three of these forests are presently staffed as demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management research. In the orderly conversion of these managed forests from old growth to sustained yield second growth stands, the State presently realizes annual revenue in excess of $250,000 from timber sales.

The function of forest practice administers the forest practice rules which govern logging practices on privately owned timberlands.

The function of service forestry provides technical advice to small timberland ownerships throughout the State in an effort to teach the owners proper management techniques. The service foresters provide technical assistance for the federal co-operative programs concerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative programs and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number of requests for assistance from private owners.

Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brushlands to more productive range types in order to increase the carrying capacity of the California rangelands.

Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the recommended species of forage plants to be sown to achieve the most effective sustained results.

Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeding projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

The state nursery program provides for operation of a nursery located near Davis and for 3 branch nurseries located at forestry conservation camps. The nurseries provide stock for public planting, windbreaks, soil control, and reforestation purposes.

Chapter 2038, Statutes of 1963, together with Chapters 2033 and 1458, Statutes of 1963, requires the Division of Forestry to strengthen enforcement efforts through new fire prevention measures. It is proposed that 8 fire prevention officers be added. Two of these positions will be assigned to work in the Fire Prevention Education unit headquartered in Sacramento. The remaining 6 will be assigned to district headquarters and are budgeted in Forest Protection—District Headquarters. Also proposed is a clerical position to assist the 2 prevention officers proposed in the Sacramento office.

One fire prevention officer is currently established in the division headquarters office. Under the 1964-65 proposal he would be assigned to specialize in civil enforcement cases. The 2 new positions would specialize, 1 in criminal enforcement and the other in hazard reduction enforcement.

Increased workload at the Davis Warehouse requires the addition of an intermediate typist-clerk at this facility. Growth in the size of the field operations as reflected more particularly in the conservation camp program and the air attack programs has produced an attendant increase in necessary clerical workload (related to purchasing and receipting). Centralized receipt and distribution of many items such as hose, fire prevention materials, etc., are handled by the Davis Warehouse.

A position of state forest ranger II is proposed in the Division Headquarters to strengthen administration through program planning in this large and multi-purpose division on both a long-range and an integrated short-range basis. The higher level leadership responsibilities in this program planning are being assigned to a deputy state forester who will be assisted in some of his present detailed responsibilities through a team approach with this additional ranger position. Leadership will be exerted through a broad participational approach with key line and program development personnel to define goals and programs and, where possible, to define objectives in measurable terms against which actual performance may be measured.

An intermediate stenographer is proposed for the Program Development and Control Section of Business Management. This position will provide stenographic support for the administrative assistant I who is responsible for program development and control.

An intermediate stenographer is requested to perform the clerical duties required by Chapter 2033, Statutes of 1963 in regard to processing timber operator permits. The cost of this position is offset by a fee imposed for the permits. This workload is being handled in the 1963-64 fiscal year with a temporary help position shown under workload and administrative adjustments.

DEPARTMENT OF CONSERVATION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	DIVISION OF FORESTRY—Continued						
	FOREST PROTECTION—DISTRICT HEADQUARTERS						
	Program and Performance						

The Division of Forestry is divided into 6 administrative districts headquartered in Santa Rosa, Redding, Sacramento, Fresno, Monterey and Riverside. Each of these offices is under the direction of a deputy state forester. Besides providing general direction for all fire control activities in the district, the district headquarters provides services of specialists in forest fire prevention, law enforcement, forest management, range and watershed management, engineering, construction and automotive maintenance.

The forest ranger units receive direction and guidance in all ranger unit activities from the district deputy state forester. The various specialists assist the ranger units in providing an efficient and effective program operation.

Eight fire prevention officers are proposed for the Division of Forestry to strengthen enforcement of new fire prevention measures passed in 1963 (Chapters 2038, 2033, and 1458). Two of these will be assigned to Sacramento Division Headquarters; the other 6 will be assigned on the basis of 1 per district headquarters office. These additional officers will make it possible to (1) investigate and prosecute more cases related to man-caused forest fires; and (2) recover more moneys spent by the State to suppress willfully set or negligently caused fires from the parties liable.

Two additional assistant civil engineers are proposed to perform the design of work projects in Districts I (Santa Rosa) and IV (Fresno). This is the second phase of a 3-year program to bring the ratio of engineers to conservation camp population closer to the standard set at the initiation of the conservation camp program. The standard is 1 engineer per 100 inmates plus 1 lead engineer per district.

With the opening of Konocti and Black Mountain Conservation Camps the total District I inmate population will be 520. There are presently 1 lead engineer and 3 engineers assigned to District I.

The completion of Mono-Inyo Camp and a projected increase of 15 wards to be housed at Mount Bullion Camp will bring the District IV inmate population to 480. This district currently has 1 lead engineer and 3 engineers assigned.

A forest technician is proposed for Boggs Mountain State Forest, a 3,433-acre tract located in Lake County. Of the 4 largest state forests this is the only one without a full-time forest manager. In the past, custodial duties were carried out by the Lake Ranger Unit. Technical forestry problems were handled to a limited extent by the district forest management section. The forest has now reached the stage of growth where more intensive management is required. Timber sales of mature timber must be administered which will bring in additional General Fund revenue. With sustained management of this forest an average annual return to the State of in excess of $15,000 could be anticipated.

	FOREST PROTECTION—FIELD SERVICES						
	Program and Performance						

The Field Services function provides for the operation of fire suppression stations, forest fire lookouts and ranger unit headquarters offices. The prime objective is to provide adequately staffed, trained suppression crews and related equipment to make prompt and efficient initial attack on forest, brush, and range fires in order to provide "basic fire protection." The field units are designed to provide a flexible organization to develop the required manpower and equipment needs to deal with large campaign fires in line with the concept of "basic fire protection."

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts and utilize 35 patrolmen for the protection of about 30,000,000 acres of state lands, private lands and intermingled federal lands under the division's direct protection responsibility. Related equipment includes fire trucks, bulldozers and transports. These units are integrated into the division's radio network to provide for prompt dispatch to and direction on fires.

Administrative personnel and key fire control personnel are hired on a yearlong basis. Fire fighters, cooks at suppression stations, lookouts, and a portion of the forest fire truck drivers are hired during the declared fire seasons. Crews are brought to peak strength as the fire season progresses in its intensity and are reduced as weather conditions become more favorable in the fall.

Ranger unit administrative personnel and patrolmen are actively engaged in fire prevention within their respective units. The program of fire prevention stresses both group contacts and on-the-ground contacts with individual landowners and forest users, in an effort to reduce the increasing numbers of man-caused fires as the population increases and constantly heavier use is made of our wild land areas.

The division is placing increasing emphasis on law enforcement, particularly in the field of civil action. Field administrative personnel supply the basic information for fire cost reimbursement claims that are processed through the Attorney General's Office for collection.

In addition, field administrative personnel are active in all programs of the division in forest and range management. One of the major activities in the timbered region is the inspection of logging operations to report compliance with the Forest Practice Act and to continue to develop active timber operator participation in fire prevention and suppression in his area of operation.

An increase of $260,000 in funds available for contracting air tanker services is proposed. The department considers that the State's needs for competent air attack services can only be achieved if adequate funds can be guaranteed to an air attack operator, insuring him a reasonable return for his time and money without depending on the occurrence of fires to gain this return.

This request proposes adding one additional air attack base at Garberville in Humboldt County to provide needed air attack coverage. However, this request also contemplates no increases in the numbers of fixed wing aircraft and helicopters presently contracted for. While this proposed budget for air attack operations does guarantee the availability of needed aircraft at specific locations and provides payment for their initial response, flight time and air drops, it does not contemplate payment for increased air activity in an unusually severe fire year.

If approved the augmented rental amounts will serve to reduce emergency fire suppression funds requirements for air attack operations.

EMERGENCY FIRE SUPPRESSION AND DETECTION

Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the regular crews are provided by this item. Also funds for revegetation of burned watershed as provided by Section 4006.5 of the Public Resources Code are provided from this category.

The regular amount proposed for the budget year is shown in the support detail starting in 1964-65. Heretofore it has been a separate item of appropriation within the other current expense items. It will be incorporated here as a category thus preserving the same degree of control while reducing the number of items of appropriation and facilitating the financing of this item.

Since requirements of each fire fluctuate quite widely estimates of expenditures by the more usual categories of expenditure (Personal Services and Operating Expenses) are not meaningful. Thus in the future only actual year expenditures will be shown in that form and then only for reporting purposes.

Since the actual past year (1962-63) and current year (1963-64) amounts were appropriated as separate items they are reported among the other current expenses.

	Totals, Emergency Fire Suppression and Detection				–	–	$320,000

FORESTRY CONSERVATION CAMPS

Program and Performance

The conservation camps are operated in co-operation with the Department of Corrections and the Department of the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program, the camps provide added manpower for forest protection and fire suppression work.

As of July 1, 1963 there were 25 permanent conservation camps, 3 mobile camps and 3 spike camps occupied by 2,080 Department of Corrections inmates.

During 1963-64, 3 new facilities are opening. These are Konocti (Lake County) with 80 inmates, Mono-Inyo (Mono County) with 80 inmates, and Prado (Riverside County) with 100 inmates. In addition, Rainbow Camp (San Diego) will receive an additional 20 inmates after it has been rehabilitated thus increasing its capacity to 80 inmates. With the initiation of the Youth Conservation and Training Program during the 1963-64 year, Oak Glen Camp (Riverside County) was deactivated as a conservation camp and thus reduced population capacity by 80 inmates.

As of July 1, 1964 it is estimated that there will be 27 permanent camps, 3 mobile camps and 3 spike camps occupied by 2,280 Department of Corrections inmates.

During 1964-65 3 80-man camps and 1 100-man camp are estimated to open. The 3 80-man camps are Black Mountain (Sonoma County), Piney Creek (Monterey County) and Cuyamaca (San Diego County). The 100-man camp is Baseline (Tuolomne County) attached to the Central Sierra Branch. Also 20 inmates will be dropped at Vallecito Camp (Calaveras County) to relieve overcrowding.

In addition to the camps for Corrections inmates are 4 camps housing 345 wards operated in co-operation with the Department of Youth Authority. These are Washington Ridge (Nevada County), Mount Bullion (Mariposa County), Ben Lomond (Santa Cruz County) and Pine Grove (Amador County). The budgeted strength of these camps is programmed to increase by 15 wards in 1964-65 to 360. This expansion will occur at the Mount Bullion Camp.

The proposed new positions are to staff the above facilities as follows:

Camp superintendents are proposed for Baseline, Piney Creek, Cuyamaca, Bautista and Georgetown. The latter 2 camps are scheduled for completion early in 1965-66 and superintendents are usually budgeted with sufficient lead time to permit the necessary work program planning and site development supervision to take place.

Assistant camp superintendents are proposed for Baseline, Piney Creek and Cuyamaca. In addition 2 more positions are proposed as inmate training instructors to be reimbursed by the Department of Corrections. These 2 added instructors will work at the Prado Camp.

Forestry Work Project foremen are proposed for Baseline (10), Piney Creek (8), Cuyamaca (8), Mount Bullion (1). A reduction of 2 foremen is proposed due to the reduction of 20 inmates to take place at Vallecito Camp.

Forestry equipment operators are proposed for Baseline, Piney Creek and Cuyamaca.

The deactivation of Oak Glen Camp accounts for the position reductions recorded under workload and administrative adjustments. The part-time camp crew cook was established for the 1963-64 year only while the Amador County Dam was under construction by contract with the Department of Fish and Game.

YOUTH CONSERVATION AND TRAINING PROGRAM

Program and Performance

Chapter 2051, Statutes of 1963, established in the Department of Conservation the Board of Directors for the California Youth Conservation and Training Program composed of the Director of Conservation, Superintendent of Public Instruction, Director of Employment, Director of Industrial Relations and the Director of the Youth Authority.

This board establishes the general policies governing the program. The program shall include the following essential elements:

(1) Procedures for the admission and discharge of qualified young men (ages 16-21).
(2) Determination of the vocational instruction to be afforded and the general conservation activities to be accomplished.
(3) Allocation of time of enrollees between conservation work, recreation, study, visitation and free time.
(4) Procedures for permitting enrollees to engage in emergency services such as civil defense, rescue services, disaster relief or fire suppression.
(5) Procedures for the handling of grievances and appeals.
(6) Procedures for contracting with other governmental agencies for use of enrollee work crews.

Early in the 1963-64 fiscal year the Oak Glen Conservation Camp (Riverside County) was deactivated as a conservation camp. On November 1, 1963, the Oak Glen Camp became the site of the Youth Conservation and Training Program. This camp holds up to 100 young men who have enrolled for a 6-month period of training. Each enrollee may reapply for only 1 additional 6-month period. The enrolled trainee receives $60 per month, of which $40 per month is withheld until termination of the enrollment period. Up to 20 percent of the youth trainees may receive added compensation up to an additional $10 per month for assigned leadership responsibilities.

DIVISION OF MINES AND GEOLOGY

GENERAL ANALYSIS

Objectives

The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral museum, laboratory, and library in San Francisco and licenses purchasers of gold and silver.

Program and Performance

The division's work is divided into 2 major phases: data development and accumulation and data presentation and dissemination.

Within the development and accumulation phase there are four major programs.

1. *Geologic Mapping.* This function encompasses mapping and compilation of the basic State Geologic Map, mapping of mineral deposits and mineral potential, and large scale urban mapping to determine local resources of industrial minerals and geological hazards.
2. *Mineral Commodities and Utilization.* This function encompasses the study and research of each of California's mineral commodities, from geological occurrence to economic development and utilization, compilation and analysis of use data; research on new or rare minerals and on possible new uses of more commonly known minerals.
3. *Geochemical and Geophysical Investigations.* This function calls for the application of the principles and techniques of chemistry and physics in field and laboratory in the exploration for and investigation of present and potential mineral resources, and laboratory support of geologic mapping and mineral commodity projects.
4. *County Mineral Resources Inventory.* This function covers field investigations of the mineral resources, geology and mining operations of each county; inventory of mineral resources; compilation and presentation of data on mineral resources for use of county and state economic development agencies.

The data presentation and dissemination phase is represented by 3 major functions.

1. *Technical Information.* This function deals with the dissemination of oral and written material related to geology, mines, and mineral resources of the State; mineral exhibits, reference library facilities; collection and preparation of sets of rocks and minerals for elementary schools in the State.
2. *Public Services Laboratories.* This function provides for identification of mineral, rock, and ore samples submitted by the public.
3. *Publications.* This function is responsible for the preparation and publication of bulletins, special reports, county reports, geologic and mineral resources maps and mineral information service.

The 1964-65 Budget reflects several changes. The division field office in Redding is scheduled to move into a state office building in that city about December 1, 1963.

An increase of $10,000 has been proposed in the level of printing to allow the division to print backlogged documents.

Also proposed is the last major complement of new scientific instruments envisioned under S.C.R. 33 of 1959 which established the mineral research and field study programs.

[a] Cost of employees' retirement and health and welfare benefits are recovered under co-operative agreements with the counties and accounted as direct abatements in all 3 years.

42							
43	**DIVISION OF OIL AND GAS**						
44	**GENERAL ANALYSIS**						
45							
46	**Objectives**						
47							
48	The primary responsibilities of the division are to supervise						
49	the location, drilling, use or maintenance, and abandonment of						
50	all oil and gas wells to prevent waste and damage to the oil						
51	and gas deposits; to prevent contamination of fresh water						
52	sources penetrated by the gas or oil wells; and to further the						
53	maximum recovery of oil and gas.						
54	The division also has the responsibility of supervising the						
55	formation and operation of repressuring operations for the						
56	purpose of arresting or controlling subsidence of land overlying						
57	oil and gas deposits when such lands are in danger of inunda-						
58	tion by the sea.						
59							
60	**Program and Performance**						
61							
62	Under the direction of the State Oil and Gas Supervisor, the						
63	division is organized into 6 districts, each supervised by an						
64	oil and gas engineer. In District No. 1, with office at Inglewood,						
65	California, the Wilmington subsidence area has been established						
66	and certain personnel there are assigned to that phase of						
67	supervision. The general duties of the division consist of: (1)						
68	inspecting oil and gas wells during drilling and abandonment						
69	operations to see that operations are properly performed as						
70	required by the law; (2) passing upon proposals to do all						
71	kinds of work upon wells; (3) determining whether or not						
72	proposed locations for new wells meet the spacing requirements;						
73	(4) preparing maps and cross sections to determine under-						
74	ground conditions in oil and gas fields; (5) maintaining surface						
75	maps showing locations of wells; (6) collecting data relating						
76	to wells and their production; (7) passing upon repressuring						
77	proposals for secondary oil recovery or subsidence arrestment						
78	purposes and supervising these projects; (8) passing upon						
79	proposals for underground oil field waste water disposal; (9)						
80	answering inquiries from the public; (10) preparing and writ-						
81	ing reports for publication describing structure and history of						
82	oil and gas fields and related subjects; (11) advising oil and						
83	gas operators as to drilling procedure in California; and (12)						
84	passing upon complaints and ordering remedial work or aban-						
85	donment.						
86	The general operations and subsidence programs are each						
	supported entirely by an annual assessment on oil and gas						
	produced. The work of the division includes a well inspection						
	service rendered to the oil and gas operators. This service is						
	rendered on a 24-hour basis every day in the year and fluctuates						
	with public demand for service. When this type of service						
	requirement decreases, the engineering time released is devoted						
	to writing of technical reports and the basic research that						
	must be done for this purpose and to use as a basis for an-						
	swering proposals to do work upon wells or to initiate sec-						
	ondary recovery or disposal operations. In this manner, the						
	technically educated and trained staff is maintained at a uni-						
	form level.						
	It is contemplated that the headquarters office of this divi-						
	sion, now located in San Francisco, will move to Sacramento						
	upon the completion of the new Retirement Building on Octo-						
	ber 1, 1964.						
	The proposed budget continues the existing level of service.

	DIVISION OF SOIL CONSERVATION							
	GENERAL ANALYSIS							
	Objectives							
	The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Conservation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the division authorizes purchases of equipment from the Soil Conservation Development Fund. This equipment is available for rent or sale to districts.							
	Program and Performance							
	Workload of the division is divided between the nontechnical and the technical types of assistance to the various soil conservation districts organized in the State. Nontechnical assistance generally covers advice and guidance on district administration, with suggestions and encouragement for suitable soil conservation activities. The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law 1018. The division is authorized 2 watershed planning teams which with a United States Soil Conservation Service planning team, will do planning work for small watershed projects, including upland management and diversion structures, for which the commission has approved an application. The purpose of the state-supported planning teams is to more quickly establish the state eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The structures may have a capacity up to 25,000 acre-feet including water conservation features if a portion of the cost of the water conservation features is borne by local interests. The equipment loan program has been reduced due to lack of availability of Federal surplus equipment. One associate hydraulic engineer and 0.6 man-year of temporary help are proposed to handle a backlog of requests from soil conservation districts for reconnaissance studies under the Watershed Protection and Flood Prevention Act (Public Law 566). Early screening of these requests allows the local districts to assess alternate methods of financing their projects if federal funds are not available to them under Public Law 566. Information developed through these reconnaissance studies will be of assistance to the local districts in developing long range comprehensive soil and water conservation plans.

OTHER CURRENT EXPENSES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
WATERSHED PROTECTION BY CO-OPERATING COUNTIES				
The counties listed below received payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. An increase of $119,354 is proposed for the budget year over the current year amounts as a means of bringing the level of support to these counties into closer parity with state field force support.				
Allotment to:				
Kern County	$376,159	$412,442	$439,730	
Los Angeles County	512,839	569,640	620,399	
Marin County	119,244	132,463	140,154	
Santa Barbara County	182,234	201,379	217,652	
Ventura County	188,428	210,203	227,546	
Totals, Watershed Protection by Co-operating Counties	$1,378,904	$1,526,127	$1,645,481	$119,354 (7.8%)
PRIVATE LAND PROTECTION BY UNITED STATES FOREST SERVICE				
For payment to the United States Forest Service for protection of state and private lands based upon acreages of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of Forestry.				
Protection of state-responsibility lands by United States Forest Service	$1,189,563	$1,281,277	$1,296,631	
Less: Administrative costs in support program	—11,314	—13,400	—14,000	
Contract with United States Forest Service	$1,178,249	$1,267,877	$1,282,631	$14,754 (1.2%)
WHITE PINE BLISTER RUST CONTROL				
Payments to United States Department of Agriculture to match federal expenditure for the control of white pine blister rust disease, and technical supervision of Conservation Camp crews doing control work on state and private timber lands.	$80,000	$75,000	$75,000	
EMERGENCY FIRE SUPPRESSION AND DETECTION [b]				
Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the regular crews are provided by this item. In the current year an additional $150,000 is provided from the Emergency Fund based on an estimate of expenditures for the balance of the year.				
SALARIES AND WAGES				
Temporary help	$24,406	$25,000	–	
OPERATING EXPENSES				
Housing	$12,564	$2,100	–	
Operating supplies and expenses	126,519	115,057	–	
Motor vehicle operation	3,660	8,300	–	

[a] Federal grants received under the Clarke-McNary Act are deposited in the General Fund, and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in nursery and service forestry programs.

[b] It is proposed to appropriate this item as a category in Support starting in 1964-65.

	WATERSHED RESEARCH			
	Payments to United States Department of Agriculture to supplement federal appropriations for the California Forest and Range Experiment Station of the United States Department of Agriculture in order to maintain the continuity of rainfall and stream flow records for the San Dimas Experimental Station, and to publish results of research of value in watershed management in California.			
	Allotment to the United States Department of Agriculture for watershed research	$23,472	$23,472	$23,472
	FOREST AND FIRE RESEARCH			
	A program of basic research, field studies, and investigations with respect to the prevention and control of forest and brush fires; reforestation of burned-over land and nonproducing lands; and other resource areas related to activities under the division's jurisdiction are provided in this item. The major portions of the research projects are contracted to the Pacific Southwest Experiment Station and to the University of California where research specialists conduct the studies. This has the twofold advantage of having specialists in the specific field conducting the program and often the program is expanded or integrated with similar research through the use of Federal or University funds. The Forest and Fire Research Committee of the State Board of Forestry attempts to integrate all research being done by governmental agencies and private companies in order to avoid duplication of effort and to foster the exchange of information and to combine research efforts.

DEPARTMENT OF FISH AND GAME

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES				
Support	$10,333,258	$10,523,193	$10,841,565	$318,372
Co-operative Game Management Program [a]	205,349	212,400	223,450	11,050
Co-operative Fisheries Management Program [a]	97,724	104,950	105,225	275
Co-operation with Pacific Marine Fisheries Commission	26,600	26,600	26,600	–
Purchase of replacement tankers	31,158	–	–	–
Totals (Fish and Game Preservation Fund)	$10,694,089	$10,867,143	$11,196,840	$329,697 (3%)
Personnel man-years	1,098.3	1,141.1	1,135	—6.1

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policies established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation, the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. In addition to establishing general policy, they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

Anticipated expenditures in the budget year are completely funded from anticipated revenue with a small increase in surplus expected at the end of the 1964-65 fiscal year. To accomplish this, the department proposes program augmentations almost exclusively in fully reimbursed areas.

Adjustments have been made in staff to meet changing workload requirements. In 1963-64, 6.5 positions were abolished administratively; of these, 1 clerical position in Administration was never established and is therefore being abolished, 1 position in Marine Resources Operations and 1 position in Region II, Game Management, are being abolished due to decreased workload in these areas, changing workload in the Delta Fish and Wildlife Protection Study and the Fish and Wildlife Evaluation Study (both reimbursed by the Department of Water Resources) resulted in reductions of 1.7 positions, 1 temporary help position in Marine Resources Operations budgeted for seismic inspections and reimbursed by private industry is being abolished, and 0.8 position of temporary help is being abolished at Nimbus Hatchery in Region II (reimbursed by the Federal Government) as a direct result of the installation of automatic fish feeders at this facility. These reductions are effective in 1963-64 and subsequent years.

In 1963-64, 8 positions were established administratively. These positions handle increased workload resulting from reimbursable program changes in Staff Operations. Of these positions, 2 are reimbursed by private oil companies and are for seismic and explosive inspection. The remaining 6 positions are all reimbursed by the Department of Water Resources and include 4.4 positions for studies in the Sacramento-San Joaquin Delta area, 0.6 for the completion of a salmon evaluation project at Shasta Lake and 1 position for fish and wildlife evaluation and enhancement at various water developments throughout the State.

In 1964-65, 18.9 positions are being abolished. Nine of these are due to moving game farm operations from Region III, Yountville Game Farm, to the Vacaville Medical Facility in Region II, where inmates will perform most of the work previously done by Department of Fish and Game personnel at Yountville. In Region IV, Game Management, 0.4 position of seasonal aid is being abolished as a result of the transfer of public shooting supervision on a federally-owned hunting area to the Federal Aid program (Pittman-Robertson).

The balance of 9.5 positions consists of the 6.5 positions abolished in 1963-64 and 3 temporary positions abolished to establish 3 permanent positions.

The 13.7 proposed new positions included in 1964-65 are to continue work in established program areas.

Three-tenths position of temporary help is requested for the Fish and Game Commission to handle legislative workload and is budgeted in alternate years.

In Staff Operations, 6.4 new positions, all reimbursed by the Department of Water Resources, are requested; of this total, 0.7 position is for the Delta Recreation Study, 4.5 positions are for the Delta Fish and Wildlife Protection Study, 0.2 position is for the Fish and Wildlife Evaluation Study, and 1 position is for the Evaluation of Fish and Wildlife Enhancement Study.

Also in Staff Operations, 2 positions, reimbursed by private industry, are requested for seismic and explosive inspection.

Three permanent clerical positions, 2 in Region III and 1 in Region V, are proposed to reflect a continuing workload increase which has not been of a temporary nature as originally anticipated. These 3 positions are offset by a corresponding decrease in temporary clerical positions.

In Marine Resources Operations, 1 temporary help position, reimbursed by the Department of Water Resources, is proposed to assist the Delta Fish and Wildlife Protection Study in San Francisco Bay.

In Region II, Game Management, 1 seasonal aid position is proposed to supervise public shooting on the recently-opened Delevan National Wildlife Refuge.

[a] Federal grants and expenditures therefrom are not included in the overall budget totals. Total co-operative program costs for Federal Government Dingell-Johnson and Pittman-Robertson programs are summarized below:

Game management (Pittman-Robertson)	$821,395	$849,600	$893,800
Fish management (Dingell-Johnson)	390,898	419,800	420,900
Total Program Costs	$1,212,293	$1,269,400	$1,314,700
Less: Federal grants	—909,220	—952,050	—986,025
Total State Share of Co-operative Federal Programs	$303,073	$317,350	$328,675

	REGIONAL OPERATIONS						
	Objectives						
	Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The hunting and angling public come in contact with the department through the regional offices, which are located at Redding, Sacramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-ordinate with a headquarters group responsible for statewide planning and research. Through decentralization, local supervisors of the various functions are located in the field where they can take action based on intimate knowledge and fieldwork.						
	Program and Performance						
	In general the regional program, in addition to a headquarters function, includes inland fisheries, game management, and wildlife protection. The activites of the inland fisheries operations are concentrated on hatcheries, stream improvement, fisheries investigation, and local water development problems. The activities of the game management program in the field include all phases of research, applied research, and management of big game and upland game. Field operation of the patrol is under the wildlife protection function. This latter function also supervises hunter safety programs, educational programs, and many field maintenance responsibilities.

GENERAL ANALYSIS

The game and fish management programs, known as the Pittman-Robertson and Dingell-Johnson programs, are administered by the Department of Fish and Game and financed jointly by the State and the Federal Government at the ratio of 75 percent by the Federal Government and 25 percent by the State.

GAME MANAGEMENT (Pittman-Robertson)

This is a program under which the Federal Goverment allots to the states, under a formula set up in the federal law, the moneys derived from the excise tax on sporting arms and ammunition. It is allotted on the basis of 25 percent state to 75 percent federal money. The rules and regulations under which these funds are made available to the states are specific and diligently supervised by the federal agency. Under federal law, no state may spend more than 25 percent of its Pittman-Robertson funds for maintenance and this must be on areas under the Pittman-Robertson program.

The amount of these funds varies from year to year, depending upon the returns from the federal excise tax and the amount carried over from the previous year. Funds not entirely used in any one year may be carried over for one subsequent year before they revert to the Federal Government.

It was also the full intent to permit use of these funds to encourage basic research.

Section 400 of the Fish and Game Code authorizes the acceptance of the federal funds and further provides that . . . "no funds accruing to the State of California from license fees paid by hunters shall be diverted for any other purpose than the administration of the Department of Fish and Game and for the protection, propagation, preservation, and investigation of fish and game."

SUMMARY OF PROJECTS COSTS

Wildlife management co-ordination	$38,010	$33,300	$33,500
Gray Lodge waterfowl management area	114,375	136,400	143,300
Game habitat development	126,527	150,700	140,700

Estimated savings	–	*—75,000*	*—78,000*
Reimbursements	–	*—107,700*	*—108,700*
TOTALS, CO-OPERATIVE GAME MANAGEMENT PROGRAM	$821,395	$849,600	$893,800
Fish and Game Preservation Fund	*205,349*	*212,400*	*223,450*
Federal funds	*616,046*	*637,200*	*670,350*

EXPENDITURE DETAIL BY PROJECT

WILDLIFE MANAGEMENT CO-ORDINATION

General direction, co-ordination, and inspection of all Pittman-Robertson projects is provided by this program. The co-ordinators assist in the selection, planning, and budgeting of all projects. Planning, co-ordination and supervision are furnished in administering the Game Management access development program and the land administration program of the department.

MENDOTA WATERFOWL MANAGEMENT AREA

Operation and development of this project provides a feeding and resting area for migratory waterfowl and includes:

Development—assist in construction of truck trails on withdrawal areas, road reconstruction, control of noxious vegetation, farming to grow waterfowl food crops, improvement of upland game habitat, and ponding to provide feeding and resting areas and public shooting 59

Maintenance—of levees, ditches, water control facilities, roads, and buildings 23

Management—assist in game census work and bag checks and providing public shooting for waterfowl and pheasants 18

WATERFOWL MANAGEMENT AREA AND WINTER DEER RANGE LAND ACQUISITION

Funds are provided for acquisition of additional lands for waterfowl management areas and winter deer range.

OPERATING EXPENSES				–	$25,000	$25,000
Totals, Waterfowl Management Area and Winter Deer Range Land Acquisition				–	$25,000	$25,000

WATERFOWL INVESTIGATION AND MANAGEMENT

This project provides for detailed surveys and evaluation of waterfowl migration, breeding areas and wintering areas. Compiled data is utilized for efficient management of waterfowl. The development of practical techniques for marshlands management for waterfowl use is also a goal. Included in this project are:

Investigations—establish methods of growing natural foods and increasing waterfowl use of marsh areas, test various plants for improved land use and waterfowl food production, determine the salt tolerance of waterfowl food plants to saline and alkali conditions, analyze data and write reports of investigations 40%

Management—trap, band, and analyze band returns to determine migration patterns, mortality rates, and population turnover; make periodic censuses on breeding areas and wintering grounds to determine population changes; make reports on status of waterfowl population for Pacific Flyway Committee as the basis for recommending seasons and bag limits to the Fish and Wildlife Service; calculate bag check from annual game take survey and make recommendations to waterfowl management area managers as to marshlands management procedures 60%

UPLAND GAME INVESTIGATION AND MANAGEMENT

Under this project statewide surveys are conducted to determine the distribution, numbers and habitat needs of the various upland game bird species pertinent to setting proper seasons and bag limits and for other management purposes. Project activities include:

Investigations—select release sites and release exotic and resident game birds and obtain follow-up information on such releases, analyze and write up data previously collected on pheasants, compile a history of exotic game bird introductions and a history of upland game hunting regulations in California, determine methods of obtaining post-hunting season pigeon population trends, study and evaluate methods of propagating and adapting plant species to improve upland game cover 82%

Management—determine pre-nesting population of mourning doves, determine post-breeding season of pigeon population, determine population trends of resident upland game, determine hunting pressure and harvest trends on upland game, advise regions of upland game matters and prepare special reports 18%

FISHERIES MANAGEMENT (Dingell-Johnson)

Federal aid in fish restoration is carried on under the Dingell-Johnson Act, which became effective in 1952. The funds allocated to the states are derived from the federal excise tax levied upon sport fishing tackle and equipment, and activities so financed are limited to the improvement of sport fishing. The states contribute 25 percent of the project costs.

California is one of six states which are able to conduct Dingell-Johnson financed work on marine or anadromous species because of the extensive sport fishery which is based upon at least 20 marine fishes.

The department's policy in suballocating federal aid funds to marine projects and to inland or freshwater projects (salmon and steelhead considered marine for administrative purposes) has been to base the split upon the ratio of fishing days spent in coastal waters including bays and estuaries to the number of fishing days in inland waters as determined by sampling surveys. The ratios are revised occasionally. The present apportionment is approximately 65 percent for inland fisheries and 35 percent for marine fisheries projects. Unusual or emergency conditions may cause these percentages to change from year to year.

All of the department's federal aid to fisheries projects come under the general administrative supervision of a coordinator at Sacramento.

Section 401 of the Fish and Game Code authorizes the acceptance of these funds and further provides that . . . "no funds accruing to the State of California from license fees paid by fishermen shall be diverted for any other purpose than the administration of the Department of Fish and Game and for the protection, propagation, preservation, and investigation of fish and game."

	SUMMARY OF PROJECT COSTS

EXPENDITURE DETAIL BY PROJECT—Continued

STREAM AND LAKE IMPROVEMENT

The purpose of this statewide project is to increase the yield of sport fishes through the restoration and improvement of habitat, as well as the development of access. During the 1964-65 fiscal year, it is estimated that the program will receive the following emphasis:

Habitat improvement by removing barriers to migrating fish ---------- 36%

Control of undesirable fish populations and aquatic plants ---------- 40%

Evaluation of forage animal introductions ---------- 6%

Improvement to spawning areas and miscellaneous habitat improvement ---------- 18%

PERSONAL SERVICES (See page 460, Salary Supplement)						
Authorized positions	8.2	8.6	9.1	$43,978	$46,967	$49,399

OPERATING EXPENSES				$34,454	$46,240	$44,461
EQUIPMENT				$608	$1,135	$2,460
Totals, Stream and Lake Improvement				$82,389	$99,300	$101,500

STURGEON AND STRIPED BASS STUDY

The project is now primarily concerned with the striped bass population inhabiting the Sacramento-San Joaquin River system, San Francisco Bay, and the Pacific Ocean off central California. It is designed to develop the management techniques needed to obtain continuing measures of the status of the population, and to fill gaps in the knowledge of the bass' life history. Work is being co-ordinated with the Delta Fish and Wildlife Protection Study to evaluate the effects of the California Water Plan on striped bass.

Specific jobs are:

Compilation of catch records ---------- 4%

Measurement of the abundance of young-of-the-year bass during their first summer ---------- 11%

Creel census ---------- 41%

Tagging study of adult striped bass ---------- 10%

Food habits study ---------- 23%

A study of the factors affecting striped bass egg and larva survival ---------- 11%

COASTAL STREAMS ANADROMOUS TROUT AND SALMON STUDY

The purpose of this study is to determine effective means of maintaining and enhancing stocks of salmon and steelhead trout in coastal streams. During the 1964-65 fiscal year it is estimated that the program will receive the following emphasis:

Determine the results of stocking hatchery-reared yearling silver salmon ---------- 39%

Determine if short-run, late-run king salmon can be established in small coastal streams ---------- 8%

Determine (1) the anadromous fish production of a watershed which has been undisturbed for many years, (2) the fish habitat of the areas, (3) the changes carefully controlled road building have on (1) and (2), and (4) the changes carefully controlled logging have on (1) and (2) ---------- 53%

OCEAN FISH HABITAT DEVELOPMENT

The purpose of this study is aimed at increasing the yield of marine sport fishes, especially near harbors used by small boat fishermen, through developing, testing, and applying methods for improving the environment. During the 1963-64 fiscal year it is estimated that the program will receive the following emphasis:

Evaluating the devices used to increase the angler yield. Quarry rock, concrete shelters, car bodies, and streetcars have been used to create artificial reefs. The evaluation is accomplished mainly by underwater observation by biologist-divers. Diving observations will be supplemented by fish yield observations aboard sport fishing boats fishing the artificial reefs 80%

Continue studies to develop successful kelp transplantation techniques ---------- 5%

Aid to counties and other interested parties in establishing new reefs, introduction of exotic fish, and other miscellaneous work ---------- 15%

EXPERIMENTAL MANAGEMENT OF WARMWATER RESERVOIRS

The objectives of the warmwater reservoir project are to develop and evaluate effective management techniques which will improve angling quality in older reservoirs, such as Millerton and Shasta lakes, and maintain or enhance fishing quality in comparatively new reservoirs such as Folsom and Berryessa lakes. During the 1964-65 fiscal year, the major emphasis will be placed as follows:

Evaluation of terrestrial plants in the zone of fluctuation 5%

Study of the relationship between the water withdrawal regime of a reservoir and the limnology of the reservoir 20%

Study at Pine Flat Lake for the purpose of evaluating an experimental introduction of striped bass ---------- 25%

Evaluation of the effects of the night fishing regulation on catfish harvest in Pine Flat Lake ---------- 5%

Evaluation of the feasibility of using electrofishing apparatus as a means of estimating the relative abundance of adult largemouth bass ---------- 10%

Evaluation of the feasibility of using rotenone as a means for estimating the relative abundance of young-of-the-year largemouth bass and bluegill ---------- 10%

Evaluation of the introduction of some new, presently unknown species of game fish, which has the potential of enhancing angling quality in warmwater reservoirs ---------- 25%

BLUE ROCKFISH MANAGEMENT STUDY

The objective of this project is to obtain necessary life history information on the blue rockfish essential for its proper management. During the 1964-65 fiscal year it is estimated that the different phases of the project will receive the following emphasis:

Survey of sportfish catch of blue rockfish and associated species to determine fluctuation in abundance of different size groups and total catch and effort at different fishing localities ---------- 38%

Study of age and growth, size at first maturity, and spawning habits throughout study area ---------- 12%

Survey of time and relative abundance of juvenile blue rockfish in the sport fishery. This will include tagging of young fish and special sampling during habitat survey ---------- 18%

Study of ecology of natural reefs and sportfishing yield in these areas. Tagging and intensive sampling will be done and maps of reef areas will be prepared ---------- 32%

EXPENDITURE DETAIL BY PROJECT—Continued

SOUTHERN CALIFORNIA MARINE SPORT FISH SURVEY

The purpose of this project is to provide data necessary for managing Southern California's marine sport fishes. The area to be covered extends from the United States-Mexican boundary to Point Arguello, including the marine waters around the offshore islands. During the 1964-65 fiscal year, the program will receive the following estimated emphasis:

Sampling the Southern California marine sport catch to obtain estimates of the total catch, species composition, and angler use. Fishermen fishing from private boats, piers, shore, and by skin diving will be interviewed 75%

Determining the relative value of Southern California marine sport fishing to other fisheries and recreational pursuits and the degree of competition for the same species between sport and commercial fishery interests 15%

Collecting data for life history studies on important species other than white seabass 10%

LAKE TAHOE FISHERIES STUDY

The basic objective of the Lake Tahoe Fisheries Study is to test methods of improving angling at Lake Tahoe. This study is in its final stages, and emphasis will be on writing up results of the studies, especially towards the end of the 1964-65 fiscal year.

The project has several specific objectives:

Determining if a substantial premium fishery can be established by plants of trout 10%

Determining if it is possible to significantly increase the catch of shore and top line anglers by relatively small put-and-take plants of large two-year-old trout 5%

Determining if production can be increased by introducing new forage (fish or invertebrates) that would fill gaps in the food catch or use a source of productivity not now being utilized. This phase of the study involves considerable sampling of the fish and fish food organisms in the lake and related life history studies. Some introductions of forage have already been made and others are contemplated 65%

Determining if present regulations are appropriate for the existing trout populations. This involves tagging lake trout and analyzing their movements and rate of exploitation 15%

Searching for other promising means of improving angling 5%

ENVIRONMENTAL AND BEHAVIORAL STUDIES OF COASTAL SPORT FISHES

The main purpose of this study is to increase the basic knowledge about the behavior and environmental requirements of various fishes living in the rocky subtidal area. These rocky areas are being subjected to increased utilization by sportsmen as the State's population increases. Wise management practices must be based upon a thorough knowledge of the area's inhabitants and their interrelationships. Emphasis during 1964-65 will be:

Studies, conducted by self-contained underwater breathing apparatus—diving biologists, upon fish movements, behavior, food habits, and interrelationships with various other animals. Fish movements will be determined using underwater tagging techniques developed by us during the Ocean Fish Habitat Development Project. Invertebrates will be studied and their relationships to various areas will be described as to depth and location. Their use as possible indicators of healthy or unhealthy reef conditions will be investigated 75%

Continue studies to develop successful kelp transplanting techniques 15%

Aid to counties and other interested parties in establishing artificial reefs and other miscellaneous work 10%

MARINE RESEARCH COMMITTEE

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
	SUMMARY				
	TOTAL EXPENDITURES				
	Support *(Fish and Game Preservation Fund)*	$86,682	$113,205	$90,644	—$22,561 (—19.9%)

GENERAL ANALYSIS

Objectives

Objectives of the Marine Research Committee are the development of the commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of this State.

Program and Performance

Research projects are selected by the 9-member committee which includes 5 members actively engaged in the sardine industry, 1 member of an organized sportsmen's group and at least 1 representative of organized labor.

Research is financed from a privilege tax of 5 cents per 100 pounds of sardines, pacific and jack mackerel, squid, herring and anchovies. Under provisions of Section 8046, as amended, Fish and Game Code, the privilege tax will expire December 31, 1965.

Carrying out of research projects selected by the committee is accomplished by contracting with other public and private agencies. The principal agencies whose services are utilized are the United States Fish and Wildlife Service, Scripps Institute of Oceanography and the Department of Fish and Game.

Principal research and investigations sponsored by the committee have concerned the Pacific Sardine Fishery which declined to a very low ebb in 1947-48. It was during this period that the Marine Research Committee was formed by the Legislature. The committee has devoted a major share of its revenue to sardine investigations in an effort to restore this fishery.

In addition to sardine research, the committee sponsors research and investigations of mackerel, anchovy, herring and related species; studies of oceanographic factors, including food habits, relating to the life history of these fish; and assesses the abundance and distribution of the various species.

The budget proposed for 1964-65 continues these investigations and research projects at a level commensurate with available funds.

Staff assistance to the committee is provided by contract with the Department of Fish and Game.

	TOTAL EXPENDITURES				
	Support *(Wildlife Restoration Fund)*	$84,175	$85,020	$85,467	$447 (0.5%)
	Personnel man-years	5.6	5.2	5	—0.2

GENERAL ANALYSIS

Objectives

Under provisions of the Wildlife Conservation Law of 1947 the board is authorized to acquire, restore, and maintain in a high state of productivity areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of the State. To accomplish this end the board may study and investigate suggested programs.

Program and Performance

The board is composed of the Director of Finance, the Director of Fish and Game and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of 3 Members of the Senate and 3 Members of the Assembly. Annually $750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horse races. The board is charged with the administration of this fund.

Through its staff the board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department of Fish and Game. The department is authorized to contract with other public agencies for such construction, management or maintenance.

During 1962-63 a special consultant was employed to review the present program and project a 5-year program for the Wildlife Conservation Board. This project was not completed during 1962-63 because of the urgency of the Accelerated Public Works Program. Consequently in 1963-64, 0.2 special consultant was set up administratively to complete this study.

GENERAL ANALYSIS

Objectives

The objectives of this department are to stimulate, as well as provide, recreation facilities for the use and enjoyment of the people of the State.

Program and Performance

The program is carried on by the 3 statutory divisions of the department. The Division of Administration will provide personnel, fiscal, and general office services and organizational and procedural analysis to the program divisions.

The Division of Beaches and Parks with the policy guidance of the State Park Commission acquires, develops and operates recreation units of statewide significance as well as preserves noteworthy or significant scenic and historic areas of the State.

The Division of Recreation, with the recommendation of the Recreation Commission, develops policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise.

The Division of Small Craft Harbors, together with the Small Craft Harbors Commission, assists local government and harbor districts in the development of small craft harbors and waterways through planning and construction loans and launching ramp grants. They may also construct a small craft facility which they may operate or turn over to a local governmental entity for operation. On July 1, 1962, small craft registration was transferred to this division from the Department of Motor Vehicles in accordance with Chapter 2132, Statutes of 1961. Other programs in boating safety education, harbor of refuge planning, and review of local boating ordinances were started in 1962-63. As a result of legislation passed at the 1963 legislative session new programs providing for licensing operators and maintaining boating records were added.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF ADMINISTRATION

Objectives

With the creation of the Department of Parks and Recreation by Chapter 2037, Statutes of 1961, the Division of Administration was organized to provide staff services and office facilities for the director and to provide administrative services for the department's operations.

Program and Performance

This division, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to the fiscal, budgetary, and personnel operations of the department.

Three positions were added during 1963-64. Eight-tenths temporary help—clerical and 1 accounting technician II were added in accordance with a contract with the Department of Water Resources under terms of the Davis-Dolwig Act. Three-tenths temporary help—clerical position was added, reimbursed from the Department of Water Resources for archeological or historical site investigations project. Four-tenths temporary help—clerical was added, reimbursed by the Department of Water Resources for the Oroville Damsite Overlook. Two-tenths temporary help and 0.3 equivalent position in overtime funds were added, reimbursed by the Division of Small Craft Harbors for data processing services. These 3 full-time equivalent positions are requested for continuance in the budget year and are shown as proposed new positions in 1964-65.

Seven and four-tenths additional positions are requested to augment the staff of the Division of Administration. One assistant counsel is proposed to provide legal assistance for the director and the department in the preparation of contracts and concession agreements. One accounting technician II and 0.9 temporary help—clerical is proposed for the Budget Section to assist in preparation of budgetary and management reports for the director. Two typist-clerks are proposed for the General Services Section. One clerk will assist in manning the Hearst reservation desk. Its need is based upon the additional reservations expected for the second floor tour at Hearst-San Simeon State Historical Monument. The second position is requested to provide clerical assistance for the assistant counsel and will be assigned to the typing pool to provide flexibility in work assignments. One tabulating machine operator has been requested for the Data Processing Section to relieve the unit supervisor of routine tabulating operations and to permit implementation of new tabulating applications. The Personnel Section has requested 1 typist-clerk and 0.5 intermediate clerk to post and maintain personnel records.

Increases in operating expenses are based upon the proposed move of the Sacramento office of the department to new permanent quarters during 1964-65. General Fund rental costs for the Sacramento office is shown under Division of Administration. The allowance for traveling—out-of-state has been continued at the same level as the current year, but the proposed General Fund expenditures for this item have been consolidated for the department and are shown under the Division of Administration. Charges for administrative services to the Division of Small Craft Harbors have been increased based on the division being fully supported from the Small Craft Harbor Revolving Fund effective July 1, 1964.

[a] A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

DIVISION OF BEACHES AND PARKS

Objectives

The State Park System is directly administered by this division through its headquarters office in Sacramento and district headquarters and field locations throughout the State. The 3 essential objectives of the division in administering the State Park System are to make the necessary plans, investigations and surveys which will enable them to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

The Director of Parks and Recreation is responsible for the administration of the program; however, general policies established by the State Park Commission provide guidance to the director and the chief of the division in the administration, protection, and development of the State Park System. The commission consists of 7 members appointed by the Governor with the advice and consent of the Senate for overlapping 4-year terms.

Major efforts of the division are on an extensive acquisition and development program. The workload of the division for the 1964-65 fiscal year is predicated upon a $6,000,000 development program. The details of the development program will be found in the Capital Outlay section.

The State Park System was previously funded from the State Beach and Park Fund. This special fund was abolished by Chapter 1878, Statutes of 1961 and beginning in the 1961-62 fiscal year the program is financed from the General Fund as supplemented by the revenue earned from service fees and concession charges.

This division is accomplishing a phased reorganization. In 1962-63 a Planning Unit was created, and certain development projects were transferred to the Division of Architecture for design and construction, thus permitting a change in emphasis in the work of the Development Section. In 1963-64 the Planning Unit was strengthened, the Technical Services Section was abolished, and the real property acquisition function was transferred to the Department of General Services.

The administration and planning and control functions have been arranged in final reorganized form and final strengthening of these units is proposed in this budget. In 1964-65 it is expected that the last phase of reorganization (park management function) will take place. The plan is to convert the present 6 districts into 3 regional administrative offices.

The support budget for the 1964-65 fiscal year requests personnel, equipment, and operating funds for increased workload in the division. The principal budget increases are due to the addition of new developments, estimated increased public use and attendance at existing beaches and parks and historical monuments, additional staff for the Reservoir Development Section and the Recreation Contract Services Unit, and a special allowance for deferred maintenance projects at various beaches and parks, offset by estimated increases in service fees resulting from State Park Commission actions to bring service fees in closer alignment with the costs of maintaining and operating the State Park System. Detail of the various program changes are reported in the program and performance for each function.

ADMINISTRATION

Program and Performance

The administration unit includes the staff and funds for operations of the State Park Commission and the chief of the division. The divisional business management activities were formerly conducted by the administrative services section. However, this section has been consolidated into the Department of Parks and Recreation, Division of Administration, as the result of a task force study.

One position, special representative—Division of Beaches and Parks, has been established in 1963-64 to act as a special assistant to the chief of the Division of Beaches and Parks. This is an exempt position to which the chief of the division is entitled. It is proposed to continue this position in the budget year and request an intermediate stenographer as clerical assistance. Operating expenses are continued at approximately the same level as the current year. An increase in the printing allowance has been requested for reprints and new prints of park folders and for publication of park rules, regulations and fee schedules.

PLANNING AND CONTROL

Program and Performance

Under the direct supervision of a deputy chief and within policies established by the State Park Commission, the director and the chief of the division, this unit is responsible for the determination of program, annual preparation of 15 park master plans, selection of projects, determination of needs and opportunities and scheduling of production efforts.

Under Executive and Park Projects 1 associate landscape architect position has been established for the 1963-64 year only for the Delta Recreation study, reimbursed by The Resources Agency. This study was authorized by Chapter 2094, Statutes of 1963. One intermediate stenographer is proposed to assist the deputy chief in preparation of planning and management reports. Upon reorganization of the Division of Beaches and Parks, positions formerly available for clerical assistance to this unit were terminated. These reductions are shown under park management.

The Recreation Contract Services Unit has been established to accomplish advance recreation planning at reservoir projects under terms of the Davis-Dolwig Act. All expenditures are fully reimbursed in accordance with a contract with the Department of Water Resources. Also 14.5 positions have been established in 1963-64 to carry on recreation planning at reservoir projects. The 15.8 positions requested in 1964-65 reflect a continuation of positions and program at approximately the same level based on reimbursements from the Department of Water Resources.

PARK MANAGEMENT

Program and Performance

Under the direct supervision of a deputy chief and in accordance with policies established by the Park Commission, the director and the chief of the Division of Beaches and Parks, this unit carries out its responsibilities for the overall management of the State Park System by establishing effective programs in administration, protection, preservation, development, interpretation, maintenance and operation of beaches, parks and monuments under its jurisdiction.

In Sacramento Headquarters one state park ranger V position has been established in 1963-64 to assist the deputy chief—park management in arranging for operation of the recreational facilities at various reservoir projects. This position has been set up in accordance with a contract with the Department of Water Resources to carry out provisions of the Davis-Dolwig Act and is fully reimbursed. The Davis-Dolwig Act requires the Department of Parks and Recreation to consult with the local government of an area in which a reservoir project is to be located prior to setting up operation and management of the

DIVISION OF BEACHES AND PARKS—Continued

PARK MANAGEMENT—Continued

Program and Performance—Continued

facility. A total of 6.4 positions were established in 1963-64 to provide stenographic services for the newly organized Sacramento headquarters of Park Management. These positions represent the partial year equivalent of 8 full-time positions which were terminated when the functions of the former Technical Services Unit were reassigned. Six-tenths temporary help position has been established in the Interpretative Services Unit, reimbursed by the Department of Water Resources, for the preservation of historical objects and for the Oroville Damsite Overlook. Also, 2.9 positions have been established for archeological survey. Of these positions, 1 was created by substitution of equivalent temporary help funds and 1.9 positions are reimbursed by contract with Department of Water Resources for preservation of historical objects. Twenty-five positions in the Property Acquisition Section have been transferred to the Department of General Services. The actual acquisition of land approved for addition to the State Park System will be accomplished by the Property Acquisition Division of the Department of General Services. Two clerical positions have been discontinued from the development section of the former Technical Services Unit in 1963-64 and 1964-65.

A total of 14.5 new positions are requested for 1964-65 for Sacramento headquarters. One state park ranger V, reimbursed from the Department of Water Resources, is requested to assist the deputy chief—park management on planning operation of reservoir projects. Eight positions (1 supervising stenographer I, 5 intermediate stenographer, 2 intermediate typist-clerk) were deleted when the former technical services unit was abolished. These 8 positions which formerly provided stenographic services for the technical services unit are now requested in order to provide similar services for the newly organized park management unit. Six-tenths temporary help position is requested for the interpretative services unit for preservation of historical objects and Oroville Damsite Overlook, activities financed by reimbursement from the Department of Water Resources. One state park archeologist, 1 state park historian I, 0.9 temporary help financed by reimbursement from the Department of Water Resources is requested for the archeological survey section for activities connected with preservation of historical objects. One associate architect and funds for 1 temporary help position are requested for the architectural services section. It is requested that these 2 positions be authorized for a period of 2 years. It is proposed that the architect shall design a comprehensive set of maintenance standards for similar classes of park structures and auxiliary facilities; develop criteria whereby through systematic review of state park facilities economic determinations can be made as to when facilities should be replaced versus continuing maintenance in the face of high costs; evaluate the relative priority of proposed deferred maintenance projects to determine that the most critical are undertaken first; interpret and explain the application of the recommended maintenance standard to the personnel of the Division of Beaches and Parks who will implement these standards.

The reservoir development unit is responsible for the preparation of preliminary plans and the supervision of construction of recreation facilities at all California Water Development Program reservoir projects. All expenses of this unit are fully reimbursed from capital outlay development funds for reservoir projects. This unit also assists the recreation contract services unit by reviewing advance planning reports and making recommendations to facilitate preparation of preliminary plans for future reservoir projects. Six positions have been established in 1963-64 to commence work on reservoir projects for which capital outlay appropriations have previously been approved.

In 1964-65 it is proposed to continue these 6 positions by showing them as proposed new and add an additional 9 positions to provide a full-time staff of 15. Funds for operating expenses and equipment related to these positions are also shown.

The district operations function is composed of the district headquarters and the field services. For administrative and operational purposes, the State is divided into 6 districts under the general direction of the deputy chief for park management. Each district is directly supervised by a district superintendent who is responsible for the operation and maintenance of state park facilities in his district for the beneficial use of the public. All matters pertaining to the staffing and operations of park units are administered and co-ordinated through the district headquarters. Districts are assisted in the historical and conservation fields by division staff headquartered in Sacramento.

Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks and historical monuments.

In 1963-64 adjustments have been made in district operations that add 8.8 positions. Two state park ranger I and 3 seasonal help—park aid positions have been added in accordance with a contract with the Department of Water Resources for staffing the Oroville Damsite Overlook. Also, 3.8 seasonal help—park aid positions have been added for removal and cleanup of flood debris at Folsom Lake State Park. In addition, 2 shipwright—casual employment positions have been converted to full-time shipwright-joiner positions at the San Francisco Maritime State Historical Monument. At the time the ships at the monument were undergoing restoration, a number of shipwright positions were needed on an intermittent basis. Now that restoration of the ships is virtually complete and the monument is in operation, 2 shipwright-joiner positions will be required for recurring maintenance. These 2 positions are shown as proposed new in 1964-65. One intermittent typist is proposed for District V headquarters to permit establishment of an expanded reservation system in connection with the proposed second floor tour at Hearst-San Simeon State Historical Monument. Two state park ranger I positions which were established temporarily in 1963-64 for the Oroville Damsite Overlook are shown as proposed new in 1964-65. Five of these positions are included in the total of 65.1 proposed new positions requested for District Operations but are presented here and discussed separately as they are not related to staffing guide justifications.

The Department of Parks and Recreation with assistance from the Division of Organization and Cost Control, Department of Finance, has prepared a staffing guide for the Division of Beaches and Parks field units. In its present form the guide sets forth such factors as parking spaces, acres, attendance, number of campsites and picnic units as major factors in determining man-year staffing requirements in each district. The present guide will undergo further refinement before it can serve as a firm staffing indicator.

The campsite parking space and picnic unit factors set forth in the guide have been applied in arriving at the recommended permanent staff for newly developed beach and park areas as proposed for 1964-65. Temporary help and seasonal aid positions have been proposed on a district-wide basis taking into account growth in attendance and acreage factors.

Staffing for historical monuments and such unusual parks as Anza-Borrego Desert and Squaw Valley are not included in the staffing guide and will still be justified on an individual basis until standard factors can be obtained for expressing workload requirements in these areas.

Expressed in general terms the staffing guide indicates a need for an additional position when any one of the following factors is satisfied or where a combination of such factors is found to exist: An additional 239 parking spaces at ocean beaches, 5,500 acres of land acquired, an increase of 180,000 in annual attendance, an increase of 62 campsites, or an increase of 60 picnic units. Positions not related directly to these factors are justified separately.

In addition to the 5 new positions previously discussed, field services has requested 60.1 additional positions in 1964-65 to provide operating personnel necessary to staff 636 new campsites, 125 new picnic units and other related state park facilities. Forty-two and five-tenths of these positions have been justified on the basis of criteria in the staffing guide. Seventeen and six-tenths of these positions have been justified on the basis of other criteria than those considered in the staffing guide. Detailed below is an analysis of the staffing proposed for 1964-65.

DISTRICT I ---------- 5.2 positions

Staffing Guide Criteria (4.2 positions):

Humboldt Redwoods State Park:

1 State park ranger III

3 State park attendant

0.2 Seasonal help—park aid

Fifty-five campsites at Hidden Springs are to be staffed effective July 1, 1964; 15,000 acres have been added at Bull Creek and increased attendance is expected.

Other Criteria (1 position):

Standish-Hickey State Park:

1 Seasonal help—park aid

Lanes Redwood Flats Grove containing 468 acres has been acquired. Personnel from Standish-Hickey will maintain and operate this undeveloped area.

DEPARTMENT OF PARKS AND RECREATION—Continued

DIVISION OF BEACHES AND PARKS—Continued

PARK MANAGEMENT—Continued

DISTRICT II ---------- 1 position

Staffing Guide Criteria (1 position):

MacKerricher Beach State Park:

1 State park attendant (effective May 1, 1965)

Twenty campsites and 25 picnic units are to be completed in June 1965. In addition 1.5 miles of trails have been added and must be maintained.

DISTRICT III ---------- 3.2 positions

Staffing Guide Criteria (1.2 positions):

Emerald Bay State Park:

0.4 Seasonal help—park aid

Twelve campsites are scheduled for completion in July 1964.

Folsom Lake State Park:

0.8 Seasonal help—lifeguard

A newly developed beach on the peninsula area at Folsom Lake justifies this lifeguard staffing.

Other Criteria (2 positions):

Folsom Lake State Park:

1 State park ranger I

1 Seasonal help—park aid

The newly developed peninsula area at Folsom Lake is in a remote location approximately 30 miles from park headquarters. This distance and lack of access to the area justifies the additional positions for supervision and maintenance.

DISTRICT IV ---------- 2.6 positions

Staffing Guide Criteria (2.6 positions):

Seacliff Beach State Park:

0.4 Seasonal help—park aid

One hundred parking spaces have been added at this beach and will be available for the full year in 1964-65.

San Mateo Beaches State Park (Francis Unit):

1.5 State park attendant (effective August 1, 1964)

0.7 Seasonal help—lifeguard (effective August 1, 1964)

Fifty picnic units are scheduled for completion in September 1964. These positions will provide lifeguard service, maintain the picnic area and collect service fees.

DISTRICT V ---------- 11.7 positions

Staffing Guide Criteria (7.9 positions):

Atascadero Beach State Park:

1 State park ranger II

1 State park attendant

1 Seasonal help—park aid

0.5 Seasonal help—lifeguard

One hundred campsites are to be staffed effective July 1964. These positions represent the initial staff for this park. They will supervise and maintain the campsite area, provide lifeguard service, and collect service fees.

El Capitan Beach State Park:

1 Seasonal help—park aid

Twenty campsites and 25 picnic units are to be staffed effective July 1964.

Joshua Trees State Park:

1 State park ranger II (effective April 1, 1965)

0.5 State park attendant (effective April 1, 1965)

0.2 Seasonal help—park aid (effective April 1, 1965)

Fifty campsites and 25 picnic units are scheduled for completion in May 1965.

Leo Carrillo Beach State Park:

1 Lifeguard

This position is required due to increased attendance at this beach.

San Buenaventura Beach State Park:

0.7 Seasonal help—lifeguard

This position is required due to increased attendance at this beach.

Other Criteria (3.8 positions):

San Simeon Beach State Park:

1 State park attendant

0.8 Seasonal help—park aid

This park has approximately 2 miles of undeveloped beach. These positions are requested to provide supervision and maintenance of the area and to collect service fees.

Morro Bay State Park:

1 State park attendant

This position is requested to provide full-time staff at the Morro Bay Museum during the period that it is open each day.

Emma K. Wood Beach State Park:

1 State park ranger I

This park has approximately 2.5 miles of undeveloped beach. This position is requested to act as park supervisor. Three existing positions at this park are currently supervised by staff from San Buenaventura Beach.

DISTRICT VI ---------- 36.4 positions

Staffing Guide Criteria (25.6 positions):

Lake Elsinore State Park:

1 State park ranger III

6 State park attendant

2.3 Seasonal help—park aid

1 Seasonal help—lifeguard

The Department of Parks and Recreation has arranged for the purchase of approximately 27,000 acre-feet of water to be delivered to Lake Elsinore in the spring of 1964. Based on the availability of water, an estimated 1,300,000 visitors will utilize the facilities of Lake Elsinore in 1964-65. These positions are requested to provide full-time supervision, operation and maintenance of the facilities.

Bolsa Chica Beach State Park:

1 Lifeguard

1.3 Seasonal help—lifeguard

These positions are required for public safety based on attendance at this beach.

Picacho State Recreation Area:

1 State park attendant

0.4 Seasonal help—park aid

Fifty campsites are scheduled for completion in August 1964. The positions are requested for maintenance of the campsite area, increased attendance and collection of fees.

LaCosta Beach State Park:

1 State park ranger II (effective January 1, 1965)

1 State park ranger I (effective January 1, 1965)

2 State park attendant (effective January 1, 1965)

1 Lifeguard (effective January 1, 1965)

1.6 Seasonal help—park aid (effective January 1, 1965)

4 Seasonal help—lifeguard (effective May 1, 1965)

Two hundred twenty-nine campsites are scheduled for completion in July 1965. Based upon past attendance at this beach in excess of 100,000 annually, these positions are requested to be effective in advance of the completion of the campsite area.

Mt. San Jacinto State Park:

1 State park ranger I

The addition of 978 acres and an estimated increase of 160,000 in attendance at this park justifies 1 position.

Other Criteria (10.8 Positions):

Lake Elsinore State Park:

1 Intermediate typist-clerk

Service fees collected from visitors at this park are required to be deposited in a special account. The additional record keeping involved with this special account, the size of the staff and the expected attendance at this park justifies clerical assistance for the park supervisor.

Anza-Borrego State Park:

1 State park ranger I (effective May 1, 1965)

1 State park attendant (effective May 1, 1965)

0.1 Seasonal help—park naturalist (effective May 1, 1965)

0.2 Seasonal help—park aid (effective May 1, 1965)

Because of operational problems, the staffing guide specifically does not apply to Anza-Borrego State Park. The scheduled completion of 100 campsites in June 1965 and increased attendance justifies the additional staff requested.

Salton Sea State Park:

1 State park ranger I

2 State park attendant

2.5 Seasonal help—park aid

A vast undeveloped area in this park receives high usage. This staff is requested to provide for maintenance and operation of this undeveloped area and to collect service fees from visitors.

Mt. San Jacinto State Park:

1 State park attendant

1 Seasonal help—park aid

This undeveloped mountain area requires additional staff for supervision, patrol, public safety, and protection of park areas.

A special allowance of $282,000 has been budgeted for deferred maintenance on park structures and auxiliary facilities. For the past several years complete maintenance has not been performed because of insufficient funds and lack of a maintenance standard. As a consequence, there are many essential maintenance projects to be completed. The amount requested here is specifically for deferred maintenance projects as opposed to current maintenance projects. These funds will be expended only after a comprehensive list of deferred projects have been reviewed to determine that the most critical ones are completed first. Additional operating expense and equipment items are budgeted to provide for continued operation of the existing parks and added new facilities.

HEARST SAN SIMEON STATE HISTORICAL MONUMENT [b]

Program and Performance

In 1958 the State acquired control and possession of certain real and personal property in San Luis Obispo County known as Hearst San Simeon State Historical Monument. The State's interest in the monument consists of title to approximately 22 acres of real property at a lower staging area near Highway 1, perpetual nonexclusive right of easement over approximately 6 miles of access road to an upper area, conditional title to approximately 127 acres of improved hilltop property, and a lease for certain personal property consisting of statuary, furniture, furnishings, antiques and objects of art. The State's obligation is to operate the monument exclusively for public purposes as a memorial and to maintain the structures, roads and personal property.

It is the established policy of the Division of Beaches and Parks to provide public access to limited areas of the monument only through guided tours. Annual attendance on these tours, in recent years, has been in excess of 300,000. A total of 69.1 positions are currently authorized to provide supervision, maintenance and operation of the monument. In 1963-64, 1 guide position was converted to seasonal help to permit flexibility in scheduling tours. This position is shown as proposed new in the budget year and an additional 25.8 positions are requested for 1964-65 to provide for an additional tour, which will open up new areas of the monument not previously open to the public. This second tour, which is based on great public demand, is expected to increase attendance at the monument approximately 60,000. The significant increase in operating expenses is an allowance of $60,000 for rental of buses which will provide transportation for the second tour. Reimbursements from service fees and concession charges are expected to more than offset operation costs.

[a] Hearst San Simeon State Historical Monument expenditures and service fees reflected in this total.

[b] Past year expenditures for Personal Services, Operating Expenses and Equipment shown in District Operations.

SQUAW VALLEY

Program and Performance

The State provides custodial, maintenance, and fire protection services and certain utilities for this park area under the terms of concession agreements. The conversion of 3.9 seasonal help positions to 1 automobile mechanic, 1 carpenter I, 1 painter I and 0.9 seasonal help—institutional fire fighter in 1963-64 and 1964-65 is due to a continuing workload and reflects the operating requirements at this park.

[a] Past year expenditures for Hearst San Simeon State Historical Monument are shown in District Operations. Estimated expenditures in 1963-64 and 1964-65 reflect direct operation costs only.

DIVISION OF RECREATION

Objectives

The Division of Recreation, established as the Recreation Commission in 1947 by the Legislature, became a division of the Department of Natural Resources by legislative act of 1959, and subsequently under the provisions of Chapter 2037, Statutes of 1961, became a division of the newly established Department of Parks and Recreation. The division chief, appointed by the Governor, serves at the pleasure of the director of the department. A 7-member citizen board of recreation commissioners, appointed by the Governor, advises the director and chief on matters of recreation policy. The commissioners serve for overlapping 4-year terms.

The chief of the Division of Recreation is administratively responsible to the Director of Parks and Recreation and has a field staff of 4 recreation specialists working out of a headquarters office in Sacramento and a field office in Los Angeles. This staff provides field services to communities throughout the State.

	DIVISION OF RECREATION—Continued						
	Program and Performance						
	The division and commission develop policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise. Community recreation agencies call upon the division for advice, co-operation, aid, and encouragement in the use of or development of recreation facilities and programs for public benefit.						
	The division assists in developing standards for recreation personnel and the promotion of training programs for administrators and volunteer and employed recreation leaders. In addition, the division is authorized to make studies and surveys and long-range plans of recreational facilities and programs necessary to meet recreation needs throughout the State. It participates with federal, state, and local governmental agencies in advance planning with respect to the development and co-ordination of recreation facilities and programs to eliminate gaps and overlaps.						
	Studies are conducted by the division to collect data on the more than 300 local recreation agencies in California which employ a year-round administrator. An inventory of land and water areas suitable for outdoor recreation as owned, leased or operated by local jurisdictions was prepared by the California Public Outdoor Recreation Plan Committee. A directory of recreation and park officials in federal, state, and local agencies in California is published annually.						
	The 1964-65 budget proposes staff and operating funds to continue this division at its current level of activity.

	DIVISION OF SMALL CRAFT HARBORS						
	Objectives						
	The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. Contained in these statutes is a directive to conduct studies or surveys to determine needs for harbor or boating facilities. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division has been on a loan basis. Chapter 2101, Statutes of 1961, now authorizes the division and commission to make grants to local governmental units for launching facilities.						
	Chapter 1454, Statutes of 1959, provided for 4 related programs: small craft registration, accident reporting, equipping regulation, and operating regulation. Chapter 2132, Statutes of 1961, provided for the small craft harbor registration program to be accomplished by this division. Formerly the Department of Motor Vehicles had been providing this service. In 1963 the Legislature added new programs that call for licensing of operators of vessels carrying passengers for hire, establishing and maintaining records of boating law violators and releasing information contained in accident reports filed with the division.						
	Program and Performance						
	The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. The commissioners are appointed by the Governor with the advice and consent of the Senate and they serve overlapping 4-year terms.						
	The general operations of the division, consisting of the administrative staff and the engineering and economic analysis staff are funded from the Small Craft Harbor Revolving Fund.						
	The boating registration unit which formerly was supported by the General Fund will, because of recent legislative changes, derive its support from the Small Craft Harbor Revolving Fund effective July 1, 1964.						
	One associate economist position in general operations has been discontinued as a shift in workload emphasis removed the need for this position. Three full-time equivalent temporary help positions were established in 1963-64 in boating registration to process a backlog of boating registration applications.						
	Eight new positions have been requested in 1964-65. Three of these positions are proposed for the general operations unit and are directly related to implementing recent legislative changes in the small craft harbors program. A business service officer I is requested in general operations to provide business service assistance to the chief of the division. Four positions are requested for the boating registration unit to provide additional assistance and supervision in the processing and accounting for an expanded registration and licensing program. Additional funds for operating expenses and equipment are provided commensurate with the proposed new positions and activities.						
	The headquarters office of this division is scheduled to move into the new Retirement Building on October 1, 1964, from its present space in Office Building No. 1. Thus an increased rental requirement is projected in 1964-65.

GENERAL ANALYSIS

Function

The department has responsibility for planning, construction, and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating, or restoring damaged property during time of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries, performs maintenance work on the Sacramento River Flood Control Project; approves

[a] A nonrevenue fund, neither the revenue nor the expenditures are included in the budget totals.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Function—Continued

designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts, reviews federal reports on flood control and water supply projects, administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigation; licenses artificial weather control operations; administers interstate compacts relating to water; administers the reallocation program to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies, forecasts snowmelt and other runoff.

Budget Format

The state operations budget for the department is presented on a program basis in order to provide information on the department's many projects, investigations, and activities. The programs are divided into 8 major categories. The categories are:

I. General Management—management of the department's activities.
II. General Investigations—water related studies of problems which do not require physical works.
III. Basic Data—collection, recording, and analysis of data bearing upon the quantity, quality, and availability of water.
IV. Project Planning—investigations having as their objective the formulation of physical works.
V. Operations—management of constructed facilities.
VI. Other Activities—work requested or required to be performed for other state agencies or local political subdivisions.
VII. Services—work requested or required to be performed primarily in support of the departmental program.
VIII. Design, Right-of-way, Construction Supervision—development of authorized projects.

The organization budget, which represents the costs of the department in terms of positions, related operating expenses, and equipment, is shown in detail in the Appendix in the Water Resources Revolving Fund. In addition, the department provides service to other agencies including other governmental levels which are reimbursed.

Departmental Costs:	1962-63	1963-64	1964-65
Support	$9,138,495	$10,232,005	$10,299,889
Capital Outlay [a]	17,699,803	29,808,459	35,248,931
	$26,838,298	$40,040,464	$45,548,820

I. GENERAL MANAGEMENT

General management includes the functions of executive direction of the department; legal services, departmentwide engineering guidance and review, graphic services, and public information; the administrative services of personnel and training, management analysis, budgeting and accounting, services and supply; and safety and equipment purchases. The pro rata charge is based on a rate structure which is designed to allocate management costs to programs based on the basis of direct labor costs of such programs.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
Executive	$389,272	$435,931	$462,477

II. GENERAL INVESTIGATIONS

General investigations are studies directed to the identification and analysis of one or more water-related problems. General investigations have specific objectives and, usually, foreseeable end points. They are concerned with such matters as the development of more accurate water use data for irrigated crops and urban areas, studies of saline water conversion, planning utilization of ground water basins, watershed management, analyses of water resources and future water requirements, and other aspects of statewide water planning.

[a] Does not include direct construction or right-of-way acquisition payments.
[b] Does not include expenditures of $1,817,829 for 1962-63, $2,046,608 for 1963-64, $2,266,919 for 1964-65 for Division, Branch and District supervision formerly included in General Management.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

INVESTIGATIONS OF SPECIFIC PROBLEMS

Sacramento Valley Seepage Investigation
(Support and Capital Outlay)

The objectives of this investigation are to evaluate present and probable future seepage damage along the leveed watercourses in the Sacramento Valley; to determine an equitable basis for allocating costs of corrective works needed to mitigate seepage damage associated with the operation of upstream water development projects, or to determine the basis for damage payments; and to make preliminary comparisons of costs and accomplishments of corrective works to indicate the need for detailed studies leading to authorization of definite projects.

By the end of 1963-64, practically all of the basic data for the investigation will have been collected and compiled.

During 1964-65, field surveys will be reduced in scope and extent to a relatively low-cost program of continuous or intermittent seepage observations sufficient to provide a reliable basis for demonstrating the validity of any damage claim. Studies of the frequency of river stage and duration will be made with and without future projects in operation. The resultant changes in seepage damages will be evaluated from the results of the frequency studies. A final report on the investigation will be written.

Delta and Suisun Bay Pollution Investigation
(Support and Capital Outlay)

The objectives of investigation are:

1. Provide data on flow distribution, circulation patterns, and other hydraulic characteristics of the major channels and waterways of the Delta-Suisun Bay system for use in design and operation of the Delta Water Facilities. These data will be obtained during fiscal year 1963-64.

2. Determine present water quality throughout area of investigation, including dissolved minerals, organic materials, oxygen relationships algae, and suspended sediments; and evaluate natural and manmade sources of degradation. Such data will be the basis for evaluating Delta water quality under future conditions and irrespective of the physical works selected for the Delta Facilities, and will be obtained during fiscal years 1963-64 and 1964-65.

3. On the basis of hydraulic model and prototype observations, predict and evaluate probable effects of San Joaquin Drainage Facilities, with termini at various alternative locations, upon biological conditions and salinity distribution in receiving water. This will be accomplished in fiscal year 1963-64.

4. Collate and evaluate water quality aspects of present beneficial uses and waste discharges, such data to be obtained in fiscal years 1963-64 and 1964-65.

5. Develop water quality guides for use in the operation of the Delta Water Facilities and San Joaquin Valley Drainage Facilities. This work will be started in 1963-64 and completed in 1964-65.

6. Preparation of a formal report thereon.

In 1963-64, tracer studies of certain hydraulic characteristics of Delta waterways needed for Delta Facilities planning will be completed. Alternative locations for the San Joaquin Drainage Facilities will be evaluated using (1) physical data obtained from prototype and hydraulic model studies and (2) chemical and biological data from other programs, supplemented as required by this investigation. A special program for determining effects of local agricultural drainage will begin. Short-term environmental studies including oxygen relationships, levee seepage rates, and physical and chemical properties of isolated sloughs will be conducted. Water quality data from other programs will be collated and evaluated, and a sampling program for additional water quality data requirements will be begun.

During 1964-65, the intensive one-year program for water quality sampling will be completed. Evaluation of the relationships of hydraulics and water quality to the operation of the State Water Facilities will be completed. The final report will be written.

Investigation of Water Quality Problems

The objective of this program is to determine and evaluate sources of impairment to water quality in particular areas where water quality problems have been indicated by water quality monitoring programs.

During 1963-64, reports will be published on water quality investigations of the Folsom-East Sacramento area and the Alameda Creek Watershed area. Work will continue or be initiated on studies of the San Diego Region, the Fresno-Clovis Metropolitan area, the Clear Lake area of Lake County, and the Klamath River area.

During 1964-65, work will continue or be initiated on studies of Santa Barbara, San Luis Obispo, and Lake Counties; of the Mountain View-Edison area of Kern County; and of the Upper and West Side of the Sacramento Valley.

Development of Standards for Water Well Construction

The objective of the program for development of water well construction standards is to formulate and publish recommendations for minimum standards of water well construction and sealing needed to protect and preserve the usability of the ground waters of the State. These recommendations form a basis for possible regulatory action by state or local agencies. Particular areas are selected for study on the basis of requests by interested local agencies where improperly constructed or sealed water wells may be contributing to impairment of the quality of water in ground water reservoirs.

During 1963-64, public hearings will be held on the preliminary edition of Bulletin Number 74-1, "Recommended Minimum Well Construction and Sealing Standards for Protection of Ground Water Quality, State of California," copies of which were widely distributed during the fall of 1962. In addition, reports recommending well construction and sealing standards for Del Norte County, and for the Central Basin Pressure Area of Los Angeles County, are scheduled to be published.

During 1964-65, a report recommending well construction and sealing standards for San Joaquin County will be published. In addition, work will continue or be initiated on studies directed toward development of similar standards for Oxnard Plain, as well as for Kern, Sutter, Yuba and Shasta Counties.

Federal-State Co-operative Beach Erosion Investigations

This program provides direct matching funds to the Corps of Engineers, United States Army, in accordance with the provisions of Public Law 727, 79th Congress, 2d Session, for the State's share of the cost of co-operative beach erosion investigations.

These are general investigations for basic data on a matching basis with the Corps of Engineers, and special investigations for specific problems in co-operation with local agencies which are a necessary part of the beach erosion projects. Funds for the State's share of construction of beach erosion control projects are included in the subvention section of the budget.

Lower San Joaquin River Water Quality Investigation

The objectives of the Lower San Joaquin River Water Quality Investigation are: to determine the status of water use in respect to water rights; to evaluate the impact of use of poor quality river water on the economy of the area; to identify the specific sources of poor quality river water and the quantities and qualities of water contributed by the various sources; to measure the present quality of water in the river and significant changes in water quality currently taking place; to predict the quantity and quality of river water under future conditions of development; to develop an equitable and feasible solution to the problem and to prepare a formal report thereon.

This program will be initiated in July 1964 and will be completed by June 1967.

The work program for 1964-65 will consist of the collection, compilation and collation of available information to determine its adequacy with respect to measuring the present quality of water in the river and with regard to predicting future quality conditions. Depending on the results of evaluating available information, pertinent studies will be initiated to satisfy the objectives of the investigation.

GROUND WATER INVESTIGATIONS

Sea-Water Intrusion Investigations

The objective of this program is to secure essential geologic, hydrologic, and water quality data to enable the evaluation of the extent and rate of intrusion of sea-water into the ground water aquifers adjacent to the coast primarily in Southern California.

This program consists of collection, analysis, and evaluation of ground water level and water quality data, water well driller's logs and pertinent geologic information. In areas already intruded by saline water where producing wells have been abandoned, it is necessary to acquire and repair existing wells for monitoring, and frequently to construct test holes to

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

Sea-Water Intrusion Investigations—Continued

explore the characteristics of subsurface aquifers and aquicludes.

In 1964-65, exploratory test holes and monitoring wells will be drilled in the Coastal basins of San Luis Obispo County.

The feasibility of acquiring and drilling test wells in Santa Maria and Santa Ynez Basins of Santa Barbara County will be investigated.

Planned Utilization of Ground Water Basins

The general objective of this investigation is a comprehensive study of major ground water basins to formulate a plan of operation that will permit the maximum utilization of ground water basins. This investigation is being conducted on a basin-by-basin approach with the Los Angeles County Coastal Plain, San Gabriel Valley, Chino Basin, and San Joaquin Valley in process during 1963-64.

The specific objective of each basin investigation is to delineate the boundaries and geology of the basin; to determine the hydrologic characteristics of the basin, including a re-evaluation of overdraft and the ground water storage available for replenishment; and to determine the best method for operation of the basin to achieve full conservation of local supplies and also provide for regulation of imported water supplies. Alternative operational plans will be formulated and the optimum plan will be recommended.

During 1964-65, reports on the operational phase and the entire investigation in the San Gabriel Valley will be completed. Chino Basin Studies of geology and hydrology will be completed and the report appendices prepared; and a mathematical model will be developed and tested. Geology and hydrology studies of the San Bernardino Valley will be initiated. Preliminary evaluation of geologic and hydrologic data in the San Joaquin Valley will be completed, selection of a modeling technique will be made, and a progress report on the investigation will be prepared.

Mojave River Ground Water Basins Investigation

This is the final year of a three-year investigation of the Mojave River Ground Water Basins, including Coyote, Harper, and Lucerne Valleys, all located in San Bernardino County. The objectives of the program are to estimate the magnitude of the local water supply in each basin through a study of the geology and hydrology of the area and to relate the local water supply to present and future water requirements. Detailed data will be developed to determine ground water basin boundaries, surface and subsurface geology, hydrologic balance and local safe yield, ground water storage and storage capacity available, water quality characteristics, and present and future ground water quality problems.

The investigation was initiated in 1962-63 with field studies, data collection, and a preliminary evaluation of the safe yield of the ground water basins. The preliminary data was used by the Mojave Water Agency in contracting for imported water from the State Water Facilities. During 1963-64, the study is continuing with detailed hydrologic studies including changes in ground water levels, inflow and outflow, and the interrelationships between ground water basins. The investigation will be completed in 1964-65 with preparation of a detailed hydrologic budget and determination of the present and future uses of water in the area. An analysis will be made of the effects of continuation of the existing operational conditions in the area. A final report will be prepared in 1964-65.

San Joaquin County Co-operative Ground Water Investigation

The objective of this program is to accurately define the extent and degree of ground water problems in San Joaquin County in order that a plan may be developed for their correction or alleviation.

The investigation will include an extensive review of numerous engineering reports prepared by the department and by several independent engineering organizations and an updating of the available historic water quality data.

San Joaquin County requested this investigation by resolution dated October 31, 1962. Since the information developed in this program will be of value both to San Joaquin County and the State it is planned to undertake this investigation as a joint effort between the State of California, Department of Water Resources, and San Joaquin County on a matching fund basis.

It is anticipated that the investigation will be completed in a 2½-year period beginning in the 1964-65 fiscal year.

Ground Water Basin Protection Studies

This program is a continuing investigation of specific ground water problem areas, with the objective of evaluating the problems, determining the practicability of their solution, and formulation of projects to protect the ground water basins. Individual investigations will require from 2 to 4 years to complete, depending upon the seriousness of the problem and the feasibility of corrective projects. Reports will be published on each specific investigation as the particular investigation is completed.

In 1964-65, the following work will be accomplished:

The work will be carried on exclusively in the Southern District and Bay Area Branch, except for minimal staff review and co-ordination in the Division of Resources Planning.

In the Southern District, studies of the salt balance project will be continued in the San Jacinto Valley, and a similar project will be started in the Lower Mojave River Valley of San Bernardino County. Studies of projects designed to protect ground waters from the deleterious effects of decomposing refuse products in the Azusa Rock and Sand Pit will be continued. Plans for a sea water barrier in the Oxnard Plain will be completed during the year, studies of the Bolsa-Sunset Beach project will have progressed about halfway to completion, and a new project investigation in the Mission San Luis Rey Basin of San Diego County will be initiated.

In the Bay Area Branch, hydrologic analysis of the ground water basins in Livermore Valley will be initiated, subject to an expression of local interest. Geologic data obtained for the most part in 1962-63 will be utilized as a base for studies on the occurrence and movement of ground water. Maps and graphs depicting recharge areas and their connection to aquifers will be made. Quantitative determinations of the physical properties will be made.

Work on the South Bay ground water basins investigations will be continued, and qualitative analysis of ground water management and saline water intrusion correction plans will be completed. Quantitative analysis of the most promising of these plans will be made. A report on the investigation and recommendations on additional quantitative studies will be made in June 1965.

Orange County Coastal Plain Investigation

The general objective of this investigation is to determine the ground water geology of the basins underlying the Orange County Coastal Plain, through conducting a comprehensive study of the basins.

Principal specific objectives are to delineate basin boundaries and internal barriers to ground water movement; to determine the subsurface extent and thickness of aquifers and aquicludes; to determine the transmissive characteristics and storage capacity of these water-bearing sediments; and to develop a mathematical model of the basin.

The study will span 4 years and will culminate with the publication of a report in the latter part of fiscal year 1966-67.

During 1963-64 the work program will include inventorying and collecting basic data, assigning state well numbers to well logs and records, field locating newly drilled wells, and commencing a comprehensive field study of the geology leading to the delineation of basin boundaries.

During 1964-65, geologic sections will be drawn to delineate the aquifers and aquicludes comprising the water bearing sediments. Water level data will be machine tabulated as a preliminary step to the ground water storage computations.

Sacramento Valley Ground Water Development Investigation

The objectives of this investigation are: to ascertain the hydrologic and geologic characteristics of the ground water basin to provide a basis for the determination of the quantity, quality, occurrence and movement of the water in the Sacramento Valley ground water reservoir and distribution system; and to formulate a plan of conjunctive operation that would provide for the optimum utilization of the ground water basin to meet local requirements and/or supplement the yield of the State Water Facilities. The work program for 1964-65, the initial year of the investigation, will be to review and analyze the data which has been developed under the Coordinated Statewide Planning Program and other related programs both within and without the department, to determine the necessity for, and schedule the collection of such additional geologic and hydrologic data as is indicated by the review and analysis and to prepare an interim office report setting forth in detail the overall work program and the scheduling of the interim progress reports and the final report.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

WATER RESOURCES PLANNING INVESTIGATIONS

Finalization of Preliminary Reports

The objective of this program is to complete preliminary and final reports on planning investigations in accordance with legislative requirements and departmental policy.

Work to be accomplished under this program includes: engineering, drafting, and other work necessary to complete bulletins; revision of bulletins as required by departmental review or as result of comments by local interests; holding of hearings to obtain comments from local interests; and in some instances, the responsibility for reproducing final editions of the bulletins.

Activity in connection with the finalization of various preliminary and final reports within the jurisdiction of the Area Branches will be continued during 1964-65. The reports on these investigations will be prepared for printing under this program.

Planning Manual Preparation

This program has as its objective the preparation of a comprehensive manual covering all aspects of water project formulation. This manual is necessary to ensure that water projects are formulated on a common and rational basis, in accordance with established standards. The manual will bridge the gap between general departmental planning policy and detailed technical procedure. When completed, it is anticipated that the manual can serve the purposes of guidance to the entire department, and to the planning engineer in particular, on matters associated with water project formulation. Moreover, the basic manual, supported by detailed technical procedures manuals, will establish uniform, but necessarily flexible guidance and procedures for the conduct of investigations, including the preparation of reports thereon.

During 1964-65, work on the various procedural manuals and the basic manual will be continued.

Co-ordinated Statewide Planning
(Water Requirements and Project Staging)

The availability of water supplies, present water uses, and the need for additional water conservation, flood control, water-oriented recreation, hydroelectric power generation, and water quality control and other purposes are evaluated under this program and utilized as the basis for formulating and staging, in time, projects required to meet these needs on a statewide basis. This is the core planning activity of the department since all other planning programs either depend on or contribute to the program.

Bulletins Numbers 1, 2, and 3 demonstrated that California's water resources are adequate to meet present and future water requirements, if properly controlled, conserved, and distributed. Bulletin Number 1, which reported the natural occurrence of California's water resources on an annual basis, must be revised to reflect availability on a monthly basis under present development, and must be continually updated as new data become available.

Bulletin Number 2 presented estimates of present (1950) water requirements, and projected requirements under full or ultimate development of the State at some unspecified, distant time in the future. It is necessary to determine water requirements at intermediate future points in time to provide the basic information for proper formulation of projects and derivation of the most economic staging of the additional water projects necessary to meet California's needs.

Bulletin Number 3 presented a flexible master plan for developing California's water resources to meet ultimate requirements. It is recognized that the California Water Plan is a physical plan that was developed without consideration of the elements of time and economics. The staging of specific developments under this master plan requires introduction of these two elements.

The Co-ordinated Statewide Planning Program maintains on an up-to-date basis the information presented in Bulletins Numbers 1, 2, and 3. Particular emphasis will be placed on the timed economic staging of the development of California's water resources. The results of the program are being published in reports presenting: (1) present land and water use in all the hydrographic areas of the State (12 will have been completed by the end of 1963-64), (2) comparison of the available water resources and future water requirements for the major regions of the State (reports on the San Joaquin Valley, Tulare Lake Basin, and a portion of the North Coastal area will be completed in 1963-64), and (3) the timing and magnitude of need for additional water and the formulation of a sequence of projects to develop water to meet these needs on a statewide basis. An interim staging report will be published in 1964-65.

With the rapidly expanding population and economy, the magnitude and character of California's land and water uses are continually changing. The water development activities of the federal agencies and the major local agencies are rapidly becoming more intensified. The Bureau of Reclamation is planning the East Side Project which would deliver initially some 1½ million acre-feet and ultimately some 4 million acre-feet per year to the San Joaquin Valley. The Bureau is also proposing the Auburn Project and other major developments in the Sacramento Valley. Both the Bureau and the Corps of Engineers are studying the North Coastal area for local and export purposes. Moreover, the major irrigation districts and utility districts are either developing or are proposing the development of much of the remaining water in the Central Valley.

Co-ordinated Statewide Planning provides a basis for review of water rights applications and federal and local agency water project proposals, thereby placing the State in a position to effectively guide the development of California's water resources to assure maximum benefit to the people. In addition, it ensures that adequate consideration is given to the water requirements of counties of origin.

The State Water Facilities, the initial unit of the State Water Resources Development System, has been formulated to meet water needs until the middle 1980's. About 15 years will be required for the feasibility studies, authorization, preparation of design plans and specifications, and actual construction of the second stage of the State Water Resources Development System. The selection of the second stage must therefore be determined prior to 1970. However, the opinion delivered in the U.S. Supreme Court case, *Arizona vs. California*, over the waters of the Colorado River may well advance the date of the second stage by several years. Hence, time is rapidly running out for completion of essential studies necessary to evaluate the water supply and requirements basic to proper formulation of the second stage.

The Co-ordinated Statewide Planning Program provides a continuing evaluation of changes in the magnitude and nature of land use and attendant water use, of water resources development needs, and of the contribution of individual projects proposed by federal, state, and local agencies to the solution of the water problems of California. It will establish the basis for assessing conformance of these projects to the California Water Plan and for determining their relative priorities in the overall development of the water resources of the State.

The present use of water in California is derived from present land use inventories. These inventories, coupled with surveys of suitability of lands for various uses, crop market outlook studies, and population projections, provide the basis for projection of future need for water and the water-associated functions of flood control, power generation, and recreation. The need for supplemental water development at any given point in time is determined as the difference between the future need and the availability of supply under existing development. Finally, the schedule of future need for supplemental water is integrated with the information developed from the project planning investigations to formulate the most effective and efficient sequence of project construction within the broad framework of the California Water Plan.

a. Land and Water Use Inventories

Land and water use inventories are the first step in determining water requirements and project development needs. Detailed knowledge of the various uses of the land and the suitability of lands for various types of use as indicated by land classification surveys, in combination with the unit values of water requirement associated with land use, provide the basis for establishing historical and present uses of water. The changes and trends derived from this information constitute one of the major elements utilized in projecting future needs.

Section 232 of the Water Code provides the basic authorization for the land use inventories. The land use and water requirement inventory in Southern California, previously carried out as a separate program, was incorporated into this program for the first time in 1963-64 and will be continued during 1964-65. During 1964-65, the following work will be done:

1. A land use survey will be initiated in the San Francisco-Oakland Bay metropolitan area to determine the ef-

II. GENERAL INVESTIGATIONS—Continued

Co-ordinated Statewide Planning
(Water Requirements and Project Staging)—Continued

a. Land and Water Use Inventories—Continued

fect of urban expansion on agricultural practices, and to provide a realistic basis for projection of future types and patterns of agricultural and urban land uses.

2. The field survey of land use of the Orange County area will be completed and reports on this area will be updated. A field survey of San Diego County land use will be initiated in the early summer of 1965.

b. Present Land and Water Use Reports

This phase of the program involves the preparation and publication of reports setting forth present land and water use and classification of lands in each of the watersheds of the State. In addition, the reports include information on the location and place of use of the diversions of surface water, history of use, type of use, and apparent water rights.

During 1964-65, land and water use reports will be completed for the Sacramento Valley West, and the Sacramento Valley Northeast Hydrographic Units; and, work will be continued on the preparation of reports in the Sacramento Valley Floor, Feather River, and Shasta Lake Hydrographic Units.

c. Water Resources and Future Water Requirements

In this portion of the program, the quantity and quality of the water resources (both surface and underground), and the build-up of water requirements with time in each of the watersheds of the State, are determined. These determinations utilize the basic data accumulated from the Land and Water Use Inventories portion of the Co-ordinated Statewide Planning program and from other programs of the department. The following major procedures are involved: (1) crop market outlook studies to enable realistic projections of future crop patterns; (2) projections of future land use; (3) evaluation of payment capacity or ability to pay for water; (4) projections of future economic demands for water.

The 1964-65 work program for the investigation will continue to evaluate the above-named items of water resources and future water requirements in the Sacramento River Basin Hydrographic area, and a similar study will be initiated in the Southern District of the department.

d. Project Staging

In this step the studies previously described are integrated, and the most favorable economic sequence and chronology of project development to meet growing needs throughout the State is formulated. The effect of future development in the watershed tributary to the Delta on the water supplies available in the Delta is a significant factor of this investigation. The effect of the demands in the import areas and the depletions resulting from increased development in the watersheds of origin, are integrated in a comprehensive operation study of the entire Central Valley that encompasses all local, state, or federal projects, and operation of the ground water basins. These studies form the broad basis for: (1) coordinated operation of state, federal, and local projects; (2) the sizing, justification, and staging of new projects. In addition, the results of these studies support contractual negotiations and analyses of funding requirements for the State Water Resources Development System.

During 1964-65, major emphasis will be placed on determining the economic demand for water in potential extensions of the State Water Project service areas, and an expansion of the operation study procedure to incorporate the effects of water quality management criteria, and additional water development projects, and a progress report on this phase of the program will be prepared.

e. West Side Crop Adaptability

The purpose of this investigation is to provide basic climatologic and soils data to be used in determining the physical adaptability of various crops to the soils and climatic conditions on the west side of the San Joaquin Valley. Interpretation and analysis of the data will be done as a cooperative project with the University of California. These studies will provide a basis for determining future water requirements in an area which is largely undeveloped at present.

During 1964-65, climatic data, consisting of wind movement, temperature, rainfall, solar radiation, and soil temperature for about 16 "major" stations, and maximum and minimum temperature records will be maintained for about 46 "minor" or satellite stations.

Co-ordinated Interagency Planning

The Co-ordinated Interagency Planning program will provide co-ordination of interregional and interstate water resource planning activities of federal and state agencies, with particular emphasis on the North Coastal and Colorado River areas, and on the interregional program proposed by the Secretary of the Interior, designated as the Pacific Southwest Water Plan. In addition, the program will finance staff participation in the activities of the California State-Federal Interagency Group and representation for the Director on the Southwest Water Council, Pacific Southwest Inter-Agency Committee, and the Committee of Fourteen.

RESEARCH INVESTIGATIONS

Unit Water Use—Vegetative

This program has as its objective the determination of unit values of consumptive use of water and water requirements by agricultural crops throughout the State. Three studies are being pursued toward the achievement of that objective, namely: determination of unit consumptive use values for selected irrigated and nonirrigated crops in major climatic zones of the State, and correlation of these measurements with agroclimatic data, thereby providing a means of predicting values of unit consumptive use of applied water for crops; measurement of evaporative indices and other agroclimatic data throughout the State to subdivide the State into agroclimatic zones having similar water use, and to provide the basis for estimating consumptive use; and measurement of applied water to determine crop requirements, irrigation efficiencies and water available for reuse and deep percolation.

These studies are being carried on in regard to these objectives, primarily in the northeastern part of the State, Central Coastal Area, and in the San Joaquin Valley. The 1964-65 program will be a continuation of the present program.

This program also supports basic research being conducted by the University of California.

Unit Water Use—Municipal and Industrial

The objective of this program is to determine unit values and trends for various urban and urban-related water uses throughout the State. The study involves the definition and delimitation of the major categories of urban water use, the collection of reliable data regarding these categories of water use, the analysis of these data, and the assembly and presentation of

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

RESEARCH INVESTIGATIONS—Continued

Unit Water Use—Municipal and Industrial—Continued

the collected data in utilitarian form. In 1964-65 these studies will be conducted primarily in the Los Angeles and San Francisco Bay areas, where activities will involve continuing collection of presently available urban water use data and the continuation of certain special studies initiated in previous years. Less intensive studies will be initiated in the Northern and Delta branches, particularly in relation to water requirements of timber by-products and pulp industries.

Nuclear Engineering and Saline Water Conversion Investigation

The purpose of the saline water conversion program is to apply conversion to the development and use of the State's water resources and to advance the techniques and economics of conversion. The purpose of the nuclear engineering program is to develop applications of nuclear energy and of isotopes to water resources requirements. The programs are statewide.

Activities in the conversion program consist of the investigation and analysis of processes, collection and analysis of technical and cost data on conversion plants, co-operation with public and private agencies conducting research and development, and the investigation and planning of the application of conversion plants as alternative sources of water supply for specific areas.

The nuclear engineering program involves the study of application of nuclear energy as a source of power for aqueduct pumping and conversion, as a heat source for distillation conversion processes, and as an explosive for excavation. The program also includes the development of applications of isotopes to water resources investigations.

Results of the saline water conversion activities are made available in the form of a departmental annual report. Also, results of work in both programs are made available as specific reports to project engineers having responsibility for power, water supply, or drainage investigations.

Federal-State Co-operative Surface Water Investigations

This is a continuing statewide program that provides for surface water investigations in co-operation with the U.S. Geological Survey. Currently, the major investigation under this program, entitled "Floods From Small Drainage Areas in California," treats documentation and analysis of floods from drainage areas of less than 10 square miles. The ultimate objective of the investigation is to obtain sufficient basic hydrologic data to define magnitude and frequency of floods on a regional basis for the entire State, and to obtain sufficient flood hydrograph data, on a statewide basis, for detailed hydrologic studies.

Approximately 300 crest-stage gages and 30 combination streamflow and precipitation recorders are operated throughout the State.

Federal-State Co-operative Ground Water Investigations

The objective of this program is to develop information on the geology and hydrology of ground water basins of California. This is a co-operative program with the Geological Survey, where the State participates financially on a matching basis and the Geological Survey does the work. Specific studies in this co-operative program include: ground water development studies in specific areas of the San Joaquin Valley, investigation of land subsidence in the San Joaquin Valley, collection of basic data on the ground water geology of certain Southern California desert areas, tabulation and analysis of aquifer tests, and investigation of specific yield and permeability of laboratory and field methods.

Federal-State Co-operative Irrigation Research

This program has as its major objective the development of knowledge concerning ground water recharge. The research is being conducted by the U.S. Department of Agriculture, Agricultural Research Service, under a co-operative agreement, whereby the State participates financially on a 50-50 basis with that agency. About 85 percent of the funds support research in physical and quality aspects of ground water recharge in the San Joaquin Valley, with emphasis on artificial recharge techniques and problems. The balance of the funds finance several irrigation, drainage, consumptive use, and related projects in Southern California.

To use water consumptively, whether for agricultural, municipal, or industrial purposes, is to commit the underlying ground water to gradual degradation. The only hope for delaying the eventual elimination of the ground water body as a useful source of supply, or in some instances for keeping a portion in acceptable condition in perpetuity, is to effect successful ground water management practices. One important such practice is economical ground water recharge.

Work will continue at the same level as in the previous year. The recharge studies will include preparation of two chapters of the Recharge Guide. This important study will continue to contribute knowledge in ground water recharge techniques; in the effect on quality of percolating waters; in improved materials and methods for the construction and operation of drainage systems; in analyzing the movement of water through actual soil profiles; in developing watershed management techniques; and in the development of techniques and procedures for determining vegetative water use.

Brushland Watershed Management Research

The purpose of this program is to determine the effect of various brushland management practices upon the production of runoff and silt. This is a research program conducted by the University of California at Davis, and partially supported by funds from the Department of Water Resources. The university is carrying on research activities on small watersheds in the vicinity of Hopland in Mendocino County and Lincoln in Placer County. The several small watersheds at each site are subjected to various treatments, such as burning, removal of trees and brush, planting of grasses, etc., and the runoff and silt content are measured quantitatively for each type of treatment. Results are published annually by the university.

Watershed management offers a potential source of substantial additional water, as there are millions of acres of uneconomic water use by native vegetation in zones of moderate rainfall. Successful watershed management offers the possibility of increased livestock production. The effects of such management on wildlife are being considered.

Federal-State Co-operative Forest Management Research

This is a research study of the possibilities of enhancing runoff from commercial timberlands below the snowline. It is being conducted by the U.S. Forest Service, through the Pacific Southwest Forest and Range Experiment Station, and is financed jointly on a 50-50 basis by the State and the Federal Government. This program was initiated in 1961-62, and is expected to continue for about 10 years.

The study is aimed at developing methods for best managing forested watersheds below the snowline. It is anticipated that these methods will increase water yield, improve the timing of water yield, improve water quality, mitigate floods, and help control sedimentation. These watersheds are largely commercial timberlands, which contribute about 30 percent of the State's streamflow. Forest management for water production in these areas may conflict with management for other purposes. This study will complement a similar co-operative study of forest watershed management in the snow zone which began in 1956. The California Department of Fish and Game is evaluating fish and wildlife benefits which may result from these studies.

Federal-State Co-operative Research in Snowpack Management

This is a research study of the possible enhancement of runoff through snowpack management. The program is conducted by the U.S. Forest Service, through the Pacific Southwest Forest and Range Experiment Station, with funds provided on matching basis by the State and the Federal Government. This co-operative program was initiated in 1956. Information provided by this study will be directed toward developing techniques for increasing and delaying the runoff from Sierra and Cascade snowpacks through selective timber management practices.

Objectives of the department are to learn how to obtain these water yield improvements for each forest and slope situation in the snow zones of the State, to improve water quality, to reduce sedimentation, and to minimize snowmelt flooding. Fish and wildlife enhancement possibilities are being studied also.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

RESEARCH INVESTIGATIONS—Continued

Pilot Levee Maintenance Study

The Pilot Levee Maintenance Study was established in 1962-63 to find ways of preserving the recreational and aesthetic values of the levees of the Sacramento-San Joaquin Delta without impairing the flood control function of the levees. Basic data necessary for analysis of problems and costs related to vegetative control in maintaining the levees will be developed. During 1963-64, test site preparation will continue, and analysis of alternative preservation methods will commence with data collection and cost tabulation. The work program for 1964-65 will be a continuation of analysis of data collected. Five years will be required to complete the study as part of the controlling conditions are dependent upon the slow growth of plant species and prolonged effect on wildlife. A report will be published upon completion of the study in June 1967.

Technical Methods Development

The objective of this program is to develop and recommend the introduction of new and improved technical procedures for conducting the various activities required throughout the field encompassed by water resources planning, and to prepare technical papers and memoranda thereon. Specific areas of interest are selected for intensive study, based upon priorities developed from results of general surveys. New technical methods are then developed for accomplishing more precise planning for the specific areas of interest studied.

General surveys have indicated a need for improved procedures to organize and utilize basic data. This program, during the 1964-65 fiscal year, will center on procedures for organizing, processing, and evaluating basic data, methods of evaluating data will be investigated and controlling parameters of data collection will be reviewed.

INVESTIGATIONS OF SPECIFIC PROBLEMS (Capital Outlay)

Federal-State Co-operative Leveling in Subsidence Areas

This is a co-operative program wherein the U.S. Coast and Geodetic Survey conducts surveys to determine the rate and areal extent of subsidence of the ground surface in areas subject to subsidence. The location and scheduling of operations is mutually decided upon by the co-operating agencies, and costs are shared equally. Data obtained under this program are vital to safe and economic design of canals, aqueducts, and other engineering structures in the State. Several areas of the State are subsiding at rates in excess of one foot per year. Presently-known areas of subsidence include the San Joaquin and Santa Clara Valleys, the Delta region, and the Long Beach area. The areas to be surveyed in 1964-65 are in the San Joaquin and Santa Clara Valleys.

Crustal Strain and Fault Movement Investigation

The objectives of the program are to determine the rate, constancy, and magnitude of ground distortion at sites proposed for engineering structures; to locate active faults where the ground surface may rupture as a result of accumulating crustal strain; to estimate the amount and direction of displacement across active faults which may occur during an earthquake; to develop rational seismic and crustal movement factors for engineering design and each site as related to type of structure; and to co-ordinate and support the work of other agencies engaged in engineering seismology and general seismological activities. Geology, geodesy, and seismology comprise the three major phases of the investigation of crustal strain and fault movement.

During 1964-65, additional emphasis will be given to the determination of ground motion spectra and rates of horizontal and vertical movement, using instruments and programs recommended by the Consulting Board of Earthquake Analysis.

Federal-State Co-operative Program for Horizontal and Vertical Control

Under this co-operative program, the U.S. Coast and Geodetic Survey conducts surveys to update the accuracy of all old stations and benchmarks in areas where water development facilities are proposed. The objectives of the program are to promote the safety, accuracy, and efficiency of water storage and conveyance and other engineering structures by means of improved geodetic control networks of greater density and accuracy. This program will enable state surveys for engineering and mapping to have the advantage of accurate checkpoints at intervals not to exceed five miles.

Comparisons between the original geodetic positions and elevations with resurveyed positions and elevations of some of the same points will provide valuable information on crustal stability. Location and scheduling of operations will be decided by mutual agreement between the co-operating agencies, after due consideration of the requirements of the State Water Resources Development System. This program is co-ordinated with other geodetic programs so that there is no duplication of effort.

During 1964-65, complete horizontal and vertical control networks will be established along the alignment of the California Aqueduct in water distribution areas. As old stations and benchmarks are resurveyed, discrepancies will be analyzed in terms of horizontal and vertical movement.

Federal-state Co-operative Seismologic and Geodetic Program

Under this co-operative program, the U.S. Coast and Geodetic Survey installs, operates, maintains, and interprets records of various seismographic instruments at sites proposed for features of the State Water Facilities. Special geodetic repeat observations and analyses in fault zones are also provided.

The objectives of this program are to provide instrumental measurements of the damaging, strong-motion characteristics of earthquake vibrations for analysis and application in engineering design of hydraulic structures and to delimit zones and measure rates of strain accumulation for analysis and appraisal of earthquake probability and frequency at sites of the various features of the State Water Facilities. This co-operative program does not duplicate the department's Crustal Strain program, but is an essential complement thereto. The location and scheduling of operations will be decided by mutual consultation of the co-operating agencies after due consideration of the requirements of the California Water Plan.

During 1964-65, strong-motion seismographs and seismoscopes will be installed and/or operated at Oroville Dam, at major aqueduct pumping plants, and at strategic locations along the aqueduct route. Seismograph records will be analyzed and interpreted. Previously completed field work of special geodetic repeat observations in California fault zones will be completely analyzed. Special geodetic observations in fault zones near or underlying features of the State Water Facilities will be made.

DEPARTMENT OF WATER RESOURCES—Continued

III. BASIC DATA

The continuing program of observing, collecting, analyzing, and reporting basic data is essential to water project development, flood control, and protection of water supply and its utilization. The department and other public agencies cannot accomplish their statutory and organizational directives without historical and current data concerning water supplies, water qualities, water uses, and water rights.

Basic data related to water are observed by many agencies, both public and private, with a scope and accuracy limited by their particular purposes. The department takes advantage of these limited data, and also gathers the additional data needed for the State's purposes of administration, planning, design, construction, and operation.

SURFACE WATER

Surface Water Quality Monitoring

The objectives of this program are to determine the quality of surface waters throughout the State; to detect significant changes in quality; to alert the appropriate control agency (regional water pollution control boards, state and local health departments, or State Department of Fish and Game) when critical conditions or significant adverse changes in quality are detected; and to compile and report data obtained in usable form.

To meet the objectives of the program, water quality samples are collected monthly from a network of approximately 180 sampling stations representative of the major streams and lakes of the State. Results of chemical, physical, and radiological analyses made as a part of the program are compiled and evaluated to develop a comprehensive understanding of factors which make up and alter the quality of water at any station.

Results of the analyses and an evaluation of changes in chemical water quality are published monthly in reports which are distributed to co-operators and other interested agencies. In addition, a report is published annually, setting forth results of analyses and an evaluation of trends in surface water quality.

Waste Water Quality Survey

The objective of this program is to encourage and support development of waste water reclamation projects in the State by collecting and publishing information on existing waste water reclamation facilities and operations, and on domestic and industrial wastes presently being discharged. This information is invaluable in identifying potential sources of significant amounts of additional water which might be reclaimed.

Operational features, costs, problems, and benefits of existing waste water reclamation works are studied and evaluated. Flow data are collected and, in water-deficient areas, waste discharges are sampled to determine the quality of water to determine if it is potentially suitable for reclamation. Research in the field of waste water reclamation is evaluated as to its possible influence on project development. Reports on the quality and use of waste water are issued biennially.

Surface Water Measurements

The purpose of this program is to provide basic streamflow data at a grid of gaging stations to supplement data gathered by other agencies. To accomplish this objective, the department operates about 200 gaging stations, makes measurements of water diverted from major streams, and provides technical assistance to co-operating local agencies in obtaining records of streamflow and diversion. The statewide net comprises approximately 1,600 gaging stations, of which about 1,000 stations are operated and maintained by federal, private, and local groups outside of the department measurement program; about 400 stations by the Federal-State Co-operative Surface Water Program; and about 200 stations by the department. Basic data obtained in this program are published annually.

Federal-State Co-operative Stream Gaging

This is a continuing, statewide program, in which the State participates financially with the U.S. Geological Survey on a 50-50 basis, in the operation and maintenance of a network of approximately 400 stream gaging stations. The Geological Survey performs the field and office work. Results are published annually by the U.S. Geological Survey.

Federal-State Co-operative Establishment of Gaging Stations

This is a companion program to the Federal-State Co-operative Surface Water Measurement Program. This statewide program provides for financial co-operation on a 50-50 basis with the U.S. Geological Survey in establishing new stream gaging stations and rehabilitating existing stations in the federal-state network. The U.S. Geological Survey carries out necessary field and office work.

Federal-State Co-operative Sediment Data Collection

The department participates financially on a 50-50 basis with the U.S. Geological Survey in the operation and maintenance of about 20 daily and 22 periodic stream sediment sampling stations, survey carries out the field and office work. The program consists of measurement of both characteristics and quantity of sediment transported by streams. Results are published annually by the U.S. Geological Survey.

GROUND WATER

Ground Water Quality Monitoring

The objectives of the Ground Water Quality Monitoring Program are to determine the quality of waters throughout the State; to detect significant changes in quality; to alert regulatory agencies when critical conditions or significant adverse changes in quality are detected; and to compile and report data obtained in usable form.

To meet the objectives of the program, water quality samples are collected from approximately 1,800 wells throughout the State. Results of chemical, physical, and radiological analyses made as a part of the program are compiled and analyzed to develop a comprehensive understanding of factors influencing or tending to alter the quality of ground water in the monitored basins.

Results of the analyses and an evaluation of changes in ground water quality are published in an annual report which is distributed to interested agencies.

Ground Water Measurement

The purpose of this statewide program is to collect, assemble, evaluate, and publish basic information on ground water levels for all significant ground water basins of the State. The program is carried on through co-operation with federal and local agencies. Information is made available through the preparation of ground water contour maps, monthly water levels reports, and annual data reports. Efforts to extend areas of local co-operation and to improve the monthly measurement grid will continue during 1964-65.

Federal-State Co-operative Ground Water Measurements

This is a continuing statewide program in which the State participates financially on a 50-50 basis with the U.S. Geological Survey in the monthly measurement of about 200 wells in the North Coast, North San Francisco Bay, and portions of the San Joaquin Valley. The program is fully co-ordinated with the department's Ground Water Measurement Program, and results are reported under that program.

DEPARTMENT OF WATER RESOURCES—Continued

III. BASIC DATA—Continued

CLIMATOLOGY

Climatologic Data

The objective of the statewide climatologic data program is to gather, correlate, and maintain reliable weather records for use by the department and other agencies. The program consists of: (1) evaluation of the adequacy of current climatologic data collection programs in California; (2) promotion of increased weather data collection in record-deficient areas through co operating agencies and individuals; (3) preparation of curren indexes to all climatological stations in and adjacent to Cali fornia; and (4) compilation and interpretation of weather in formation. As part of the program, the State assists the U.S Weather Bureau in its California data collection activities.

MAPPING

Federal-State Co-operative Mapping

The objective of this program is to provide topographic maps of the State at scales suitable for the purposes of the many using agencies.

This program is performed by the U.S. Geological Survey under a cooperative agreement wherein the State and federal government each contribute one-half of the costs. Areas to be mapped, scales of mapping, and priority schedules are mutually decided upon by both participants. Prior to publication, the department reviews the maps and indicates approval of each sheet or suggests desired revisions. Periodic reports are published by the department setting forth the current status of topographic mapping throughout the State.

Federal-State Co-operative Mapping Administration

The purpose of this activity is to provide the review of completed topographic mapping under the continuing Federal-State Co-operative Mapping Program, to maintain records of production planning and map completion under the program, and to provide information on availability of manuscripts of maps The State Index of Topographic Mapping is prepared under this program.

REPORTS

Preparation of Statewide Data Reports

The objectives of this program are to compile and evaluate the basic data collected on surface water flows, groundwater conditions, surface and ground water quality, and water use, and to compile and publish statewide data reports.

IV. PROJECT PLANNING

Project planning investigations are those investigations which have as their objective the formation of plans for physical works related to solution of some water-related problems. These investigations may range in scope from those of a reconnaissance nature aimed at comparing possible physical solutions, to those of a comprehensive nature aimed at determining the financial and engineering feasibility of a particular project, to those of intensive nature aimed at refining and up-dating project plans for changes occurring between the time of project authorization and actual project construction.

RECONNAISSANCE

North Coastal Area Investigation

The overall objective of this investigation is to formulate plans for the optimum staged development of the water resources of the North Coastal Area to satisfy projected demands for water and associated project services in both local and other water-deficient areas of the State.

This is a continuing investigation. A report with supporting appendixes (Bulletin Number 136) covering the current initial reconnaissance study phase of the long-range program is scheduled for completion in the summer of 1964. The advance planning program of the initial additional conservation features recommended in Bulletin Number 136 will begin in July 1964 (Additional State Water Facilities Advance Planning). The

DEPARTMENT OF WATER RESOURCES—Continued

IV. PROJECT PLANNING—Continued

RECONNAISSANCE—Continued

North Coastal Area Investigation—Continued

second phase of the areawide reconnaissance investigation will also begin in July 1964 (North Coastal Area Investigation, second phase).

This areawide investigation will be conducted at an intermediate level of intensity. It will be directed towards identification and staging of subsequent additions to the State Water Facilities with emphasis on possible early-stage Trinity River projects.

The investigational area encompasses the drainage basins of the Eel, Mad, Klamath, Van Duzen, Trinity, and Smith Rivers, including all of their tributaries; portions of the Russian River basin; and selected minor coastal streams which may afford opportunity for development of replacement fisheries. Studies include consideration of protection against recurring floods, development of the hydroelectric power potential, water-associated recreation, preservation and possible enhancement of anadromous fisheries, and the application of water-oriented land management.

Sacramento Valley East Side Investigation

This investigation comprises a comprehensive 5-year study of the water resources and water requirements of the 2,200 square-mile area east of the Sacramento River between the Feather River and Battle Creek. It will report on water projects for local and export needs. Projects having possibilities for near-future construction will be studied in detail. Consideration will be given to development of local irrigation and domestic water, hydroelectric power generation, and recreation and fish and wildlife enhancement, with emphasis on improving the anadromous fishery.

During the 1964-65 fiscal year geologic exploration will be concluded and detailed designs and cost estimates of initial project features and estimates of primary benefits will be completed. Field work on fish, wildlife and recreation aspects will be completed, and preparation of reports on these activities will be initiated.

The investigation will terminate in June 1966. A report will be published to guide local development and contribute to studies of statewide water project staging at this time.

Madera Area Investigation

The primary objective of this investigation is to publish a report, which is due in June 1965, setting forth a comprehensive water resources development plan for the Madera Area, resulting from an investigation which involves an evaluation of available water supply, the determination of water requirements, limited studies on flood and drainage problems, and project planning for development of local water supplies. The report will provide a basis for state, federal and local co-operation in maximizing the development of the economic potential of both the upper watershed and the valley floor portion of the investigation area.

A progress report will be published at about the mid-point of the investigation, setting forth progress of the investigation and other pertinent information for all concerned.

The work program for 1964-65 will include: completing project planning studies and developing preliminary plans and estimates for the most favorable of many possible project sites; completing economic studies of the investigation area; completing studies on recreation and fish and wildlife resources; and writing and publishing the final report.

FEASIBILITY

Coastal San Mateo County Investigation

This is a three-year investigation to formulate a comprehensive water resource development plan for coastal San Mateo County, and identify an initial feature, determine its economic justification, and study alternate means of financing its construction. During 1963-64, work will consist of: preliminary designs and cost estimates for the most promising of the 43 damsites investigated the preceding year, determination of economic demand for agricultural water, determination of demand for fresh water recreation, definition of fishery problems, and refinement of reservoir yield studies.

In fiscal year 1964-65 work will be directed toward publishing a preliminary report of the investigation findings. Preparation of this report will require that economic feasibility studies of initial features and potential financing programs be completed.

A final report will be published at the end of June 1965. This report will include analysis of local recommendations submitted during the public hearings.

Feasibility of Waste Water Reclamation

The purposes of this program are to evaluate data on quality and quantity of waste discharges and to conduct studies to determine the feasibility of reclaiming water from such sources for beneficial uses.

In many sewered metropolitan areas, water is wasted to the ocean or to interior saline lakes after a single cycle of use. Some of this waste water can be reclaimed and reused.

During 1963-64 a comprehensive and detailed survey of the potential for reclaiming waste water in the Coastal San Diego County area will be concluded and a report written. This survey includes a study of possible markets for reclaimed water, facilities for reclamation and distribution of water, and preliminary estimates of the cost of water reclaimed. During 1963-64, work will be initiated on a study of the reclamation potential in the Coachella Valley area of Riverside County.

During 1964-65, work will continue on the feasibility study for the Coachella Valley area. Studies of the feasibility of reclaiming water from wastes in the Ventura area will be initiated.

Box Canyon Project Feasibility Study

The objective of this investigation is to make a final feasibility study which could, if the project is found feasible, lead to actual construction of the Box Canyon Dam and Reservoir on the Sacramento River in Siskiyou County. This two-year investigation was initiated in fiscal year 1963-64 by the Legislature and will be completed in June 1965.

Economic justification and engineering feasibility of the Box Canyon Project was indicated by a reconnaissance study completed in 1962 by the Department of Water Resources.

In 1963-64 subsurface geologic exploration will be completed at the proposed damsite and in the borrow areas; data required for formulation of a fishery and game management program will be collected; and studies necessary for preparation of a detailed recreation land use plan will be initiated.

During 1964-65 the recreation, geology, and fish and wildlife studies will be completed; preliminary designs and cost estimates will be revised in accordance with subsurface geologic information; and final project sizing, formulation and economic analysis leading to determination of project feasibility will be completed. A report presenting findings of the study will be prepared for publication.

Recreation and Fish and Wildlife Enhancement, State Water Facilities, Post Land Acquisition Phase

This continuing program provides for: (1) developing recommendations for the construction and operation of features of the State Water Facilities which will provide for fish and wildlife and recreational use; (2) preparations of schematic plans for the development of lands acquired at the State Water Facilities for recreation and fish and wildlife use and (3) co-ordination with the staffs of other agencies statutorily or otherwise responsible for the design, construction, operation and maintenance of recreation facilities at State Water Projects.

Reports on schematic development plans will be completed for San Luis Reservoir and Forebay, and the Northern Division of the California Aqueduct. Preparation of plans and cost estimates leading to the finalization of the Oroville Reservoir schematic recreation development plan in 1966 will be continued. Emphasis will be placed upon the Craig, Lime Saddle, Foreman Creek, and Thermalito features of this major project. Work leading toward the finalization of schematic development plans for Perris, Cedar Springs, and Castaic Reservoirs will be continued. Tree planting and maintenance will be conducted at Castaic and Perris Reservoirs. Work will continue on securing information required to produce plans for Los Banos, Panoche, and Little Panoche Creeks flood detention reservoirs.

DEPARTMENT OF WATER RESOURCES—Continued

IV. PROJECT PLANNING—Continued

FEASIBILITY—Continued

Recreation and Fish and Wildlife Enhancement, State Water Facilities, Preland Acquisition Phase

This continuing program provides for: (1) studies and reports on the use of the State Water Facilities for enhancement of recreation, fisheries, and wildlife purposes in conformance with provisions of applicable portions of the Water Code, (2) preparation of plans for the acquisition of lands for recreation and fish and wildlife enhancement at the State Water Facilities, and (3) co-ordination with the staffs of other agencies statutorily or otherwise responsible for the design, construction, operation, and maintenance of recreation and fish and wildlife facilities at State Water Projects. Plans for acquisition and use of lands for recreation, fisheries, and wildlife enhancement proposed are submitted in report form to the Director of Water Resources for approval.

Reports on land use and acquisition plans will be prepared for recreational features and developments in conjunction with portions of the California Aqueduct in Fresno, Kings, Kern, Los Angeles, San Bernardino, and Riverside Counties and for Bethany Forebay. Similar reports will be completed for flood detention reservoirs above the California Aqueduct on Los Banos, Panoche, and Little Panoche Creeks.

ADVANCE PLANNING

Oroville Administrative Headquarters and Visitor Facilities Planning (Support and Capital Outlay)

The objectives of this program are to recommend the location, type, purpose and size of a visitor center at Oroville Reservoir; the agencies which should construct and operate the center; and the services to be provided by the center and fees to be charged for these services. These recommendations would be in report form which would serve as the basis for proposing financing for the facilities.

The work program for 1964-65 will consist of initiating detailed studies on the development of the center. These will include such items as a museum, exhibits, display of historical artifacts, reception and information areas, audio-visual equipment, workshop, office, library and study.

Other studies include planning for a guided tour of the underground powerhouse, transporting of visitors from the visitor center to the powerhouse, and display of fisheries and wildlife aspects at the center and at the Oroville Fish Hatchery.

Design of the Oroville Visitor Center will be closely co-ordinated with the Department of Parks and Recreation. Fish and game aspects will be co-ordinated with the Department of Fish and Game.

ADVANCE PLANNING (Capital Outlay)

Delta Water Project General Planning

The Delta Water Planning program is the core study, basic to the formulation of a final plan for the portion of the State Water Facilities required to transfer water across the Delta. Plans for the Delta will be formulated with the objectives of: (a) providing for the water development needs for local use and export; (b) providing for the enhancement of (or not greatly interfering with) the various separate water-associated economics and natural resources of the Delta; and (c) being compatible with plans of affected federal, state, and local interests. If such a plan cannot be developed, the criteria for project selection will be that of minimizing conflicts.

The work program for 1963-64 is being directed toward: (1) more adequately defining existing physical conditions; (2) confirming and refining design criteria; (3) developing data necessary for comparing and evaluating alternative Delta Plans; (4) developing data necessary for formulation of multiple purpose facilities and for mitigating possible detrimental effects on fish and wildlife resources and recreation; and (5) determining and evaluating the nature and extent of interest and responsibility of local, federal, and other state agencies concerned with the Delta. Studies will include: (a) completion of an office report on the levee test program initiated under the Delta Levees Investigation; (b) continuation of the continuous outflow measurement study at Chipps Island; (c) continuation of mathematical procedures for refining the salinity intrusion-Delta outflow relationship; (d) initiation of a soil moisture depletion study; (e) study results of the federal-state cooperative releveling survey of the subsidence surveillance program initiated in 1959 to determine affect on design criteria of a Delta water project; (f) continuation of the building of an electronic analog model of the Delta; (g) compilation of data on recreation use; (h) a continuation of operation studies to define operating criteria for the Delta water facilities in conjunction with the companion features of the State Water Facilities and the Central Valley Project; (i) preparation of preliminary designs and cost estimates for alternative Delta plans; (j) studies of benefits and detriments; (k) continue coordination activities with federal, state, and local interests; and (l) make final selection of project concept.

The 1964-65 program will include a continuation of uncompleted studies conducted during 1963-64. Project formulation studies will be completed and a report written (for release in March of this budgeted year) on the plan selected for the Delta water facilities. Following the final plan report, work will continue toward preparation of criteria and specification for final design of the project. Work will be initiated for defining the functional and physical requirements of the facilities. Preparation of office reports will be initiated to support findings of the final planning report and to present criteria and specifications of functional requirements to be used in final design of the project. Preparation of these office reports will continue into the following fiscal year. Coordination with local, state, and federal agencies, will be continued to insure that comprehensive development of the Delta will be integrated as part of the water development.

San Joaquin Valley Drainage Investigation

The purpose of this program is to select a specific drainage disposal plan for the San Joaquin Valley and thereafter to develop the selected plan to a pre-design level as an authorized feature of the State Water Facilities.

During the 1964-65 fiscal year a comprehensive report will be published on the facilities for the removal of drainage water from the San Joaquin Valley. Supporting office reports will also be completed. Preliminary negotiations will be conducted with local agencies and the U.S. Bureau of Reclamation for use of the proposed facilities.

A second phase of this program will consist of the operation of a pilot plant for biological treatment of drainage waters. This will involve the testing of various methods of growing and removing algae from the drainage waters and of disposing of the algae, to determine the specific cost of the process and its effectiveness. This second phase of the program will be developed only if the results of the preliminary work done in 1963-64 justify it. If the 1963-64 work indicates no need for further studies of biological treatment as a solution to the drainage water disposal problem, a brief report will be prepared presenting the results of the previous year's studies.

Feather River Basin Advanced Planning

The objective of the advance planning program is to develop information for preparation of construction designs and specifications of the State Water Facilities in the Feather River Basin. Advance planning studies have been completed for the Antelope Valley, Frenchman, and Grizzly Valley Dams and Reservoirs. Advance planning studies involve a review of hydrologic data; sizing of reservoir, spillway and outlet facilities; evaluation of potential service area including irrigation, domestic, and recreational uses; and development of operational criteria to maximize net benefits. On the lower Feather River, operating schedules for Thermalito Forebay and Afterbay will be evaluated for their effect on the maintenance and preservation of the fisheries resource. Studies will be made to determine the measures necessary to prevent a loss to both warmwater species and salmon spawning in the river channel below Oroville Dam.

During 1964-65 fisheries preservation studies on the lower Feather River will be continued. Final completion date for the program is scheduled for June 30, 1967.

Delta Water Project—Fish and Wildlife Protection

The Delta Fish and Wildlife Protection Study is the portion of the Delta Study charged with determining the effects of a Delta Water Facility upon the fish and wildlife resources of the Delta. This is a co-operative study being directed and con-

DEPARTMENT OF WATER RESOURCES—Continued

IV. PROJECT PLANNING—Continued

ADVANCE PLANNING (Capital Outlay)—Continued

Delta Water Project—Fish and Wildlife Protection—Continued

ducted jointly by the Departments of Fish and Game and Water Resources. Biological studies are being made by the Department of Fish and Game and engineering studies by the Department of Water Resources.

The objectives of this study are: (1) to determine how the design, construction, and operation of any Delta Water Project will affect the fish and wildlife resources and their use; (2) to recommend any changes in project plans, facilities, or operations required to protect fish and wildlife; (3) to recommend means for compensation of any unavoidable losses to fish and wildlife resulting from construction or operation of a Delta Water Project; and (4) to recommend practical measures which may be taken to enhance the fish and wildlife resources in connection with the development, construction, and operation of a Delta Water Project.

The 1963-64 work program will include: (1) studies to determine the relationship between Delta fish and wildlife and their environment, in order to predict the effect of a change in environment due to the construction and operation of a Delta Water Project on the fish and wildlife resources; (2) studies to determine methods of passing anadromous fish past planned structures in the Delta; (3) investigating methods of screening and guiding fish to insure their safe passage in project channels; (4) determining the food habits of Delta fish and wildlife; (5) surveying the abundance of shad and striped bass eggs during the spawning season.

The 1964-65 work program will include a continuation of the 1963-64 studies as well as other work necessary to determine effects of the Delta Water Project on fish and wildlife. These additional items of investigation will include: (1) effects of isolated slough on the plankton and benthos population of the Delta: (2) types of fish presently inhabiting isolated sloughs; (3) effects of changes in levee vegetation on wildlife populations.

Additional State Water Facilities—Advanced Planning

With the initiation of the Additional State Water Facilities—Advanced Planning Program, the Department of Water Resources will commence advanced planning studies of additional conservation and conveyance facilities of the State Water Resources Development System to be constructed by the State. The program initially will involve the Upper Eel River Diversion Project.

The program embraces nearly all disciplines of study pertaining to the development, control and conveyance of water. Evaluations under the program will be extremely detailed and will specifically define the location and capacities of the major features including dams, reservoirs, tunnels, hydroelectric power, and pumping installations. Detailed evaluations will be made for alternative dam and reservoir locations on the Middle Fork Eel River, including Spencer, Etsel, Jarbow, and Dos Rios; and on the Upper Main Stem Eel River including English Ridge, Garcy, Marshall, and Pressley Reservoirs. Studies for transbasin conveyance facilities will include detailed designs and cost estimates for the features comprising the two alternative diversion routes; either via gravity diversion to Glenn Reservoir, or via pumped diversion to English Ridge Reservoir with subsequent gravity diversion to Lake Berryessa. These features include Elk Creek Tunnel and Pumping Plant, Garrett Tunnel and alternative conveyance works to the Clear Lake Basin, Soda Creek Tunnel, the Upper Putah Creek Basin Power Recovery features, Stony Creek Tunnel, Thomas Creek Tunnels, and elements of the Glenn Reservoir Complex.

Geological explorations will be continued to further evaluate the structural adequacy of dam foundations, the conditions of the rock affecting the construction of tunnels, and the availability of construction material. This information is in all cases prerequisite to the initiation of feasibility-level design and cost estimates for the large hydraulic structures involved. Such detailed cost studies will be undertaken during the course of these studies.

Studies will be continued in greater detail to evaluate existing fisheries and to determine the measures necessary to preserve these resources when extensive water resources development is undertaken. Studies of water-associated recreation to develop land use plans and determine the recreation facilities to be included at each reservoir development will be made. Necessary detailed land acquisition, appraisals, and rights-of-way cost surveys will be made. Machine computing methods will be used where applicable to facilitate the necessary comprehensive reservoir and power operation studies.

Economic studies will be undertaken to determine benefits in all categories, economic costs, and repayment considerations to ascertain that the developments to be recommended for authorization and construction are optimum from an economic standpoint.

Expenditures for this program from the California Water Resources Development Bond Fund are contingent upon final authorization of the project.

V. OPERATIONS

The General Fund programs of Flood Operations, Flood Control Project Maintenance, Snow Surveys, Watermaster Service, Yuba River Debris Control, and others will continue at approximately the 1963-64 level.

The Capital Outlay programs relate to the management and physical operation and maintenance of the State Water Project. They include activities necessary for project formulation and planning for operations and the activities required to deliver water to customers from completed facilities. During 1964-65 Frenchman and Antelope Dams and Reservoirs and the completed portions of the South Bay Aqueduct Project will be operated and maintained. Work will continue with the Bureau of Reclamation on negotiation of operating agreements for the joint-use San Luis facilities and for co-ordination of the State Water Project and the Central Valley Project. Negotiations for the sale of Oroville power will continue. Work will continue to develop criteria and technical standards for operation and maintenance of the State Water Project. Study of the project control system will be continued. Negotiation of water service contracts will be continued, as will management of executed water service contracts.

SACRAMENTO RIVER FLOOD CONTROL PROJECT MAINTENANCE

The department operates and maintains on a continuing basis approximately 200 miles of levee, ditches and canals, weirs, pumping plants, and related facilities in the Sacramento Valley. Levees are patrolled during high water conditions and during dry seasons the crews work in continuous clearing of several thousand acres of overflow channels and bypass areas. These activities will continue at the same level during 1964-65.

FLOOD OPERATIONS PROGRAM

The purpose of the flood operations program is to provide a nucleus of personnel and equipment to operate the Flood Operations Center, to provide flood training for departmental personnel and local flood control agencies, and to co-ordinate operation of flood control projects. This program provides a focal point for co-ordination of flood fight efforts to local, state, and federal agencies. Flood operations manuals, training brochures, and other related material are prepared and made available to agencies and individuals active in flood programs as part of the department's co-ordination responsibility. A department-sponsored Flood Fight School will be held in 1964-65 as in prior alternate years.

FLOOD CONTROL PROJECT INSPECTIONS

This continuing program includes making semiannual inspections of federally constructed flood control projects in the Central Valley and Truckee River Basin and the preparation of the report entitled "Status of Project Levee Maintenance." This report sets forth the condition of a levee system aggregating 1,120 miles in length situated in 93 public districts and areas. Also included in the program is co-operative work with the United States Army Corps of Engineers in the latter's planning for repair and construction of flood control works. Technical assistance is also rendered local districts in assisting them with their maintenance programs. This work will continue on a uniform level during 1964-65.

This program includes the engineering review and preparation of letter reports on application to The Reclamation Board for encroachment on the physical works of the Sacramento-San Joaquin River Flood Control Projects. Following approval, inspection of work is made for compliance. This work will continue on a uniform level during 1964-65.

WATERMASTER SERVICE

Watermaster service was created by statutes of the Water Code in 1913, with actual service beginning in 1924. The purpose of this service is to distribute available water supplies, both surface water and ground water, on an equitable basis in areas where such supplies are inadequate to meet all demands. Water right owners who have had their rights defined by court decree or agreement may petition the department for watermaster service. At present there are 16 service areas involving surface water adjudication under the administration of 9 field watermasters in the northern portion of the State and three basins involving ground water adjudication under watermaster service in the Southern California District. Activities in the presently adjudicated areas will remain at the same level as those of the 1963-64 fiscal year.

[b] Included in support in 1964-65.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

FLOOD CONTROL MAINTENANCE AREAS

Features of the Sacramento River Flood Control Project are maintained by local agencies. If they desire, these agencies can request the State to perform the maintenance function for them, reimbursing the State for the entire cost of work done. There are provisions in the Water Code which also enable the State to form a maintenance area if it is found that the local agency is failing to provide maintenance in accord with federal regulations. During 1964-65 the department will perform maintenance work for 13 maintenance areas with an estimated 167 miles of levees in addition to 2 pumping plants.

FEDERAL-STATE CO-OPERATIVE YUBA RIVER DEBRIS CONTROL

The Yuba River Debris Control Project is a continuing program that provides for the storage of over 300,000,000 cubic yards of mining debris in the Yuba River overflow area upstream from Marysville which would otherwise pass into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers for the California Debris Commission and submitted to the Department of Water Resources for approval. A budget request for $50,000 is being made for the 1964-65 fiscal year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

RIVER FORECASTING AND FLOOD HYDROLOGY

This continuing program provides data and services on river forecasting and flood hydrology to the State Flood Operations Center. In co-operation with the United States Weather Bureau, this program provides river forecasts to public and other operating agencies and also provides the engineering studies necessary for the efficient operation of the flood control projects.

The program includes the development of criteria for forecasting techniques and hydrologic studies of stream basins, studies of channel capacities, flow-stage relations, methods of estimating probable maximum precipitation, and related items. It also includes responsibility for the river and rainfall hydrologic reporting network necessary for the operation of the Flood Operations Center. During 1964-65, it is anticipated that facilities of this activity and of the United States Weather Bureau will be moved to new quarters. This move will involve such significant items as the radar and tower and special display and electronic equipment.

CO-OPERATIVE SNOW SURVEY

The California snow survey program is an activity which, with field and financial assistance from co-operators, gathers and correlates snow data and allied information for the purpose of forecasting California water supplies in general and stream flow in particular. The program is statewide in scope. As part of this program, regularly scheduled measurements are made at about 300 snow courses in the mountainous areas of the State. Additional snow data are obtained from general area photographs, radioactive snow gages, and aerial snow depth markers. Allied data on precipitation, stream flow, reservoir storage, and other water conditions factors are gathered, compiled, and correlated and reported on as part of the program. Reports entitled "Water Conditions in California" are published in February, March, April, and May of each year. An abbreviated report summarizing water conditions in California at the end of the water year is published in October. About 80 percent of the field work is performed by program co-operators. The State, as co-ordination agency for this program, plans, directs, and co-ordinates the activities of the State and the co-operators wherein snow survey and allied activities are concerned. Additional allied activities include investigation of various phases of snow hydrology, supplying specialized snow information, and providing consulting services relative to snow occurrence, accumulation, melt, snow-load design factors, etc.

COMMUNICATIONS SYSTEMS ENGINEERING (Support and Capital Outlay)

This continuing program includes those activities which are of a communications nature, such as the mobile radio system, the radio telemetering network for reporting hydrologic data used in flood forecasting, and the co-ordinated control and communications system for operating the State Water Project. The mobile radio system, consisting of 170 mobile units, 34 fixed stations, and 50 portable units, provides 2-way voice communications for statewide flood control, operational, and construction activities of the department. The radio telemetering network provides up-to-the-minute data on river stages and precipitation from 32 key locations in the Sacramento, San Joaquin, and Eel River Basins. The program also provides for the planning of the operational control, telemetering, and communication links of the State Water Project. During 1964-65 it is planned to augment the communications system by the addition of 35 mobile radio units, 4 mobile radio system base stations, and 9 telemetering stations, primarily to serve the growing construction program.

ENGINEERING STUDIES FOR ATTORNEY GENERAL'S OFFICE

The Attorney General's Office relies upon the department as its engineering staff in matters pertaining to flood damage where legal action is taken against the State. The department assists the Attorney General's Office in preparing their case in defense of flood damage suits which are a result of severe flooding in Sutter and Yuba Counties during the December 1955 flood.

STATE PARTICIPATION IN FEDERAL CO-OPERATIVE PROJECTS

The State assumed an interest in Black Butte and New Hogan projects of the Corps of Engineers by underwriting the repayment of the costs allocated to water conservation. This program of review of the Federal Government construction program, accrual of capital costs, plan of operation, sale of water, and other factors is conducted because of the State's financial interest and to prepare for possible future sale of Black Butte and/or New Hogan water by the State.

Black Butte and New Hogan were completed in 1963 and began storing water during the 1963-64 year. The program for this year will be limited to co-ordination with the Corps of Engineers and Bureau of Reclamation and attendance at meetings to determine the current status of probable state responsibility.

This is a continuing project authorized by Water Code Sections 11252 and 11276 and will be terminated if the project is integrated into the Central Valley Project or if the Bureau of Reclamation obtains contracts for sale of the entire water yields within 7 years after the projects are ready to begin the storage of water.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

WATER CONTRACTS NEGOTIATION AND ADMINISTRATION (Capital Outlay)

The objectives of this continuing program are the negotiation and administration of contracts for delivery of water supplies from the State Water Project. The locations of agencies with whom contracts have been executed or are being negotiated range from Plumas County in the north to Imperial County in the south. Administration of executed water supply contracts involves maintaining liaison with the agencies regarding provision of facilities to serve the contractors, submission and approval of water delivery schedules, overseeing payment of surcharges, negotiation of amendments, and co-ordination of actions by the department in fulfilling the State's obligation under the contracts.

Most water supply contracts will have been executed by the contract option date of December 31, 1963. Amendments of the contracts to distribute any uncontracted-for portions of the minimum project yield will be completed by the second option date of September 30, 1964. Activities relating to contract negotiations and technical studies in support thereof will decrease during the budget year 1964-65. Activities relating to administration of contracts will increase in tempo during the budget year 1964-65 to the full scale required under the continuing program.

CO-ORDINATED WATER AND POWER OPERATION (Capital Outlay)

The objective of this continuing program is the development of the plan of operation of the State Water Project with respect to water and power production. This involves the making of operation studies and economic comparisons of alternative methods of operation. This program also involves cooperation with other agencies to develop plans for co-ordinated interagency water and power operations, including operation of the joint federal-state San Luis facilities and investigation of further co-ordination of the Central Valley Project and State Water Project. During 1964-65 the details of the operation programs will be perfected and extended to weekly and daily dispatching.

STATE WATER PROJECT POWER MANAGEMENT (Capital Outlay)

The Power Management Program consists of the consolidation and enlargement of 2 previous programs identified as "Power Contract Negotiation and Analysis" and "Project Power Development." It includes formulating power management policies and plans implementing them when approved and the direction and co-ordination of all electric utility management functions associated with the State Water Project. The program includes initiation and preparation of power system studies such as: Technical and economic consideration of alternative methods of pumping, power generation, power recovery, transmission, and integration and co-ordination of project power facilities with other utilities and regions; investigations of markets for project power, power cost and value; headwater benefit payments; study and negotiation for settlement of claims for power facilities destroyed by project development such as Big Bend Powerplant; development and establishment of power rate schedules; preparation, analysis, and negotiation of contracts and agreements for the purchase, sale, and interchange of power and for use of transmission and related power facilities of other power systems, technical preparation of customer billing for power service; preparation of necessary reports to regulatory agencies and monitoring of the supply, transmission, and use of electric power in the entire power industry in California and adjacent areas in relation to the effects on the State Water Project.

PROJECT POWER OPERATIONS AND MAINTENANCE (Capital Outlay)

The objectives of this continuing program are to establish criteria and procedures for operation and maintenance of project power facilities, to provide operating criteria for design, and to provide staff direction and guidance in initiating and continuing programs of operation and maintenance of project power facilities. The program also involves setting forth appropriate operation and maintenance instructions and procedures by means of manuals or directives for use by the operating units. During 1964-65 work on operation and maintenance personnel staffing and facilities and equipment needed for project operation and maintenance will be completed, as will be the plan covering the overall scope of power operation and maintenance. Work will continue on preparation of project power operation and maintenance schedules, manuals, procedures, etc., and development of formats for records and reports. The program will include review and evaluation of the operation and maintenance program for the South Bay Aqueduct's power facilities.

PROJECT REPAYMENT AND FINANCIAL ANALYSES (Capital Outlay)

The objective of this continuing program is to provide for the periodic preparation of reports and technical data on repayment obligations of the various water supply contractors for purposes of negotiation and administration of water supply contracts. Periodic reports on the financial aspects of the program will be prepared. Important technical portions of these reports are prepared under this program. This program also predicts project revenues and bond service requirements so as to permit adjustments of cost outlay schedules and/or bond sale and service programs.

During budget year 1964-65 detailed allocations of actual or estimated construction and operation costs of facilities among project functions and water supply contractors will be made and preliminary repayment data will be supplied to contract negotiation teams during contract negotiations. Annual revisions of repayment tables included in the various executed contracts on the basis of allocated costs will be prepared. Comprehensive analyses of the State Water Project as a whole with respect to construction and operation costs, financial requirements and costs, and project water and power revenues will be made periodically to determine the optimum staging of construction and financial management of these facilities.

STATEWIDE WATER AND POWER OPERATIONS CENTER (Capital Outlay)

The objectives of this continuing program are to provide an operations center for the State Water Project and to provide for co-ordination of project activation. Liaison with other water and power operating agencies will be maintained in order that the maximum benefits may be obtained from the operation of water resources developments in the State.

Work during 1964-65 will be directed toward continued planning of the operations center and co-ordination of activation of project operation and maintenance activities.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

PROJECT WATER OPERATIONS AND MAINTENANCE (Capital Outlay)

The objective of this continuing program is to provide the standards, criteria, and instructions necessary for implementation of project operation and maintenance for efficient continuous operation and maintenance of the State Water Project thereafter. The program will: determine and initiate data-gathering programs; conduct studies necessary to establish operating criteria and procedures and for co-ordinated operation with federal and local projects; determine the location and requirements of facilities, equipment, and supplies; develop reporting forms, procedures, and reports for reporting and recording the actual operation and maintenance activities; establish flow measurement, operational hydrology, and collection of technical data; develop operational forecasting procedures; and develop water quality criteria and water quality monitoring locations and procedures.

DEVELOPMENT OF AN OPERATIONS CONTROL PLAN (Capital Outlay)

The objective of this program is to develop a control plan for operation of the State Water Project. This plan will be formulated from an analysis and evaluation of data accumulated during operation of a prototype control system installed at the South Bay Aqueduct. Operation of the prototype control system will also serve to train personnel in the latest operating concepts and control techniques. Detailed functional specifications will be prepared for all equipment required for operation of the prototype control system. During 1964-65 the instrumentation and control equipment will be installed and the prototype control system placed in operation.

ESTABLISHMENT OF FEATHER RIVER CHANNEL CHARACTERISTICS (Capital Outlay)

The objective of this program, which began in 1963-64, is to establish the present channel characteristics of the Feather River and tributaries from Oroville Dam to its junction with the Sacramento River. Program activity in 1964-65 will consist primarily of field surveying, river soundings, and aerial photographing. The final product of the program will be large-scale maps showing topography and other pertinent data. This program is planned for completion in 1965-66.

PROJECT OPERATIONS AND MAINTENANCE (Capital Outlay)

This program provides for the operation and maintenance of the South Bay Aqueduct Project, Frenchman Dam, and Antelope Dam. The projects are operated and maintained in accordance with prescribed operation and maintenance procedures. Water releases and deliveries are made in conformance with contracts and agreements.

VI. OTHER ACTIVITIES

Certain statutory and regulatory activities and projects otherwise differentiated from the Basic Data, General Investigations, Project Planning, and Operations programs are grouped herein.

Advisory Services to Water Pollution Control Boards

The objective of this program is to furnish technical information and advice to the water pollution control boards regarding municipal and industrial waste discharges in support of the board's regulatory activities in establishing waste discharge requirements. In addition, the department notifies water pollution control boards regarding applications for permits to construct or enlarge dams, and forwards information on water quality, water rights, beneficial water uses, and known or suspected pollution hazards that might be associated with such activities.

Review of Reports of Other Agencies

The objective of this continuing activity is to review and prepare the views and recommendations for the State of California on proposed federal projects and local projects for which federal financial assistance is requested. In its review, the State makes recommendations with respect to such aspects as project service areas, upstream development and protection, capacities of project facilities, water rights, sequence of construction, and other matters, all with the objective of encouraging the optimum, timely, and co-ordinated development of the State's water resources. The California Water Plan, together with subsequent studies of all agencies, is utilized as a principal guide to this objective.

A flood plain information program is included under this activity. The program consists of co-ordinating activities of federal, state, and local agencies engaged in flood control matters; receiving local requests for flood plain information studies to be conducted by the Corps of Engineers, determining need for such studies and assigning priorities to requests received; reviewing the study after completion; and assisting local agencies in utilizing the information obtained from the study for future planning purposes.

Formation and Supervision of Public Water Districts

This continuing activity protects and furthers the public interest in the formation of public water districts by prior determination of the overall feasibility and propriety of district organizations, as well as by supervision of operating districts, to the extent required by law. The department provides statewide assistance on the formation and supervision of irrigation and water storage districts.

Administration of Flood Control Funds

The State Water Resources Law of 1945 and the Flood Control Law of 1946 established the policy of financial assistance by the State on federally authorized flood control projects.

As provided by this legislation, the State reimburses local agencies for the costs of rights-of-way and the relocation of affected facilities and utilities on projects approved by the Legislature. Under this continuing activity projects are reviewed and estimates of state costs are prepared. After project approval, the department receives and reviews claims submitted by the local agencies and makes eligibility findings thereon.

A biennial report of expenditures by the department is prepared for each regular session of the Legislature.

Administration of Beach Erosion Control Funds

The objective of this continuing program is to provide for the administration of the State's share of funds disbursed to other agencies for planning, designing, and constructing beach erosion control works. In addition, this program provides for staff study of beach erosion problems and proposed solutions.

Management of State Water Rights Filings

The objectives of this continuing program are, preparation and filing State Water Rights applications with the State Water Rights Board in accordance with the provisions of Section 10500 of the Water Code, review and preparation of comments

[b] Included in project water operations and maintenance for 1964-65.

DEPARTMENT OF WATER RESOURCES—Continued

VI. OTHER ACTIVITIES—Continued

Management of State Water Rights Filings—Continued

by the department on requests by various agencies for assignments or releases from priority of state applications, review and preparation of comments on water rights attaching to water development projects by various agencies, prepare water right analyses for reports on area investigations made to other units in the department, and administer the licensing of persons engaged in weather modification operations in California.

The projects on which state applications are involved are generally located in Sacramento-San Joaquin Valley and the north coastal area. Licensed rainmakers may operate throughout the entire state.

Statements are prepared and presented to the California Water Commission in co-ordination with the legal staff and area branches setting forth the department's views and recommendations on water rights attaching to various water development projects. Also a report will be prepared on the annual activities of licensed rainmakers.

California-Nevada Interstate Compact Commission

The department provides the California-Nevada Interstate Compact Commission of California with such technical and administrative services as the commission may require in formulating an interstate compact between the States of California and Nevada relating to the distribution and use of the waters of Lake Tahoe and the Truckee, Carson, and Walker Rivers.

During 1964-65 the department will continue to provide necessary engineering, administrative, stenographic, fiscal, and related services requested by the commission. The services will include preparation of technical information required for meetings of the commission, for meetings with representatives of interested parties, and for congressional committees; assembly of data for transmittal to the agency which will administer the compact; and necessary administrative, fiscal and stenographic services.

The cost of these services is reimbursed by the commission under provisions of an interagency agreement executed each fiscal year.

Klamath River Compact Commission

The Klamath River Compact Commission is a permanent commission established in 1957 to administer the terms of the Klamath River Compact between the States of Oregon and California. The State of California is represented on this commission by the Department of Water Resources. The commission does not have a regular staff and its work is contracted out. The Department of Water Resources provides the administrative and clerical services which the commission requires under terms of a service agreement. These services are fully reimbursed.

Investigations for Other State Agencies

State agencies frequently request the Department of Water Resources to provide engineering information and advice on questions of water resources and related matters. The agencies most frequently involved are the Districts Securities Commission, Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board, and the Division of Highways. Costs of these investigations are reimbursed by the requesting agency.

Special Investigations for Water Pollution Control Boards

The Special Investigations for Water Pollution Control Board's Program provides authorization for the department to perform special studies for the regional water pollution control boards. Costs of studies under this program are reimbursed by the regional boards.

Studies or other work under this program are arranged in advance and are provided for in an interagency contract with the State Water Pollution Control Board.

Supervision of Safety of Dams

This statutory function is a regulatory activity exercised pursuant to Division 3 of the Water Code. Its primary duty is that of supervision of the safety of dams by reviewing plans for the design of, and supervising the construction, maintenance, repairs, alterations, and operation of all dams in the State, except those federally owned. Incidental activities include the collection and publication of data on dams within State jurisdiction and the making of such technical investigations and the gathering of such technical data as are needed for a proper review of the various features of the design and construction of dams, reservoirs and appurtenances.

Salinity Measurements in the Delta

In the operation of the Central Valley Project, the United States Bureau of Reclamation requires certain information regarding salinity content for various locations in and around the Sacramento-San Joaquin Delta. The bureau has requested the Department of Water Resources to undertake the data collection phase of this program and has provided funds in the amount of $4,500 per year for this work. The department makes arrangements with private individuals to collect samples for chloride analyses at 17 stations on 4-day intervals throughout the Delta. A monthly report is transmitted to the bureau.

Map Information Office

The purpose of this function is to maintain an office to collect, review, and disseminate information on mapping and surveying activities throughout the State. It facilitates the reutilization of survey data of federal, state, county, and private agencies to minimize duplication of mapping and surveying work. A complete set of United States Geological Survey quadrangle sheets and a complete record of United States Coast and Geodetic Survey and United States Geological Survey horizontal and vertical control data are maintained for statewide use.

Electronic Data Processing—Future Requirements Studies

The purpose of this study is to determine present and future electronic machine facility needs of the Department of Water Resources.

The objective of this study is to prepare a department operational problem which will include workloads and procedural requirements and schedules; submit the problem to vendors for equipment proposals, evaluate the vendor's proposals, and make recommendations for selection of equipment.

Administration of State Financial Assistance for Local Projects (Capital Outlay)

The objective of this continuing program is to administer the program of state financial assistance to public agencies for development of needed and economically justified local water projects. This program also provides for administration of state financial participation in the construction of local projects where the objectives of the California Water Plan indicate that a project should be constructed to a capacity beyond the needs of the public agency, and for administration of state grants for costs allocated to recreational and fish and wildlife benefits of local projects.

Water Rights for State Water Facilities (Capital Outlay)

The objectives of this program are to acquire water rights for the State Water Facilities and to insure that applications for these facilities are protected to the maximum extent consistent with the Water Code.

The Department of Water Resources must appear at hearings before the Water Rights Board and the California Water Commission, and will be required to meet with parties who have protested a water right application. Hearings and meetings will require that information be prepared on the operation of the State Water Facilities and that such data be presented as necessary in the acquisition of water rights by the State.

Department representatives must also appear at hearings to insure that new developments will not encroach on new water made available by the State Water Facilities.

It is anticipated that during the fiscal year 1964-65 the department will participate in hearings before the State Water Rights Board and the California Water Commission as well as meet with protestants.

VII. SERVICES

These technical services are provided by specialty units to all division, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the programs, and include:

1. Engineering laboratories—statewide laboratory standards, and testing in concrete, soils, chemical, fluid mechanics, and corrosion.
2. Electronic data processing and programming—machine programming and electronic computer and data processing services.
3. Drafting services.
4. Subsurface explorations—drilling and geophysical surveys.
5. Mapping and surveying—statewide mapping co-ordination, aerial photo control, special instrument crews, photogrammetry, and planimetry services.
6. Automotive and heavy equipment pool—management of mobile equipment of all types.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

VIII. DESIGN, RIGHT-OF-WAY AND CONSTRUCTION SUPERVISION

The departmental costs associated with the California Water Development Program and Other Construction Activities are shown in detail immediately following the graphic presentation of the California Water Development Program and Other Construction Activities.

CALIFORNIA WATER DEVELOPMENT PROGRAM

The California Water Development Program consists of the detailed design and implementation of the State Water Facilities as defined in Chapter 1762, Statutes of 1959 (Water Code Section 12934(d)). The facilities, which are the initial features of the California Water Resources Development System, are incorporated in the following projects:

Feather River Facilities
Delta Facilities
South Bay Aqueduct
California Aqueduct
Coastal Aqueduct

This part of the budget includes the staff and related expenses for the design, acquisition and construction supervision activities necessary for the implementation of the California Water Development Program. The staff costs of these functions are financed in the Capital Outlay budget and reimbursed to the State Operations budget to provide specific staff and related expenses.

The proposed schedule of accomplishment of the 3 major work categories, design, right-of-way acquisition and construction for the current California Water Development Program is presented for fiscal years 1963-64 through 1969-70 as part of the explanation of each project. These schedules are based on the best current estimates of project emphasis and production potential. The following definitions of the work categories that are used to present the California Water Development Program in the budget are provided to give a general understanding of the significant elements of the program.

Design

The design category is made up of 2 phases, preliminary design and final design.

Preliminary Design—Preliminary design is the initial step in the design activity—the purpose being to perform detailed surveys and explorations to finalize hydraulic design, establish structure location and alignment, and define the limits of right-of-way requirements.

Final Design—Upon completion of preliminary design, the project moves to the final design phase, which includes:

1. Detailed design, which is the engineering studies and computations necessary for the proper selection and precise delineation of each element of the project;
2. Construction plans, which are the detailed engineering drawings of each element of the project from which the works are constructed;
3. Specifications, which are the required legal and technical provisions necessary for the definition of the type and quality of materials to be incorporated in the work, and the workmanship required to provide the finished structure as delineated in the plans;
4. Construction cost estimate, which is the engineering cost estimate for the project and is the basis upon which the director authorizes advertisement for bids and award of a construction contract.

Right-of-way Acquisition

The right-of-way acquisition function for the Department Water Resources includes right-of-way engineering, utility l location, permits and other agreements from public agenci management and clearance of acquired properties, and initiati and management of a substantial condemnation trial workloa Some of the appraisals and negotiations for purchase of priva property are being handled under contract with the Division Highways, and others by the staff of the Department of Wat Resources. All property acquisition is the responsibility a requires the management and control of acquisition by Depa ment of Water Resources personnel.

Coordination and liaison of right-of-way activities by D partment of Water Resources personnel is necessary betwe the Division of Highways, the Department of Parks and Rec ation, the Department of General Services, and in some i stances, with the U.S. Bureau of Reclamation. In eminent d main proceedings, which involve a very high percentage of t total rights-of-way required, the Attorney General's office involved and requires considerable liaison and manageme functions by Department of Water Resources personnel. A appraisals will be reviewed, all settlements will be reviewe contracts for independent appraisals services initiated and fe set, escrows handled and improvements disposed of by Wat Resources personnel. Upon appropriate clearance of rights-o way, the Division of Right-of-Way Acquisition will certify th the rights-of-way are available prior to calling for constructi bids. All construction plans and specifications will be reviewe by the Division of Right-of-Way Acquisition, and modificatio suggested as appropriate to treat with such matters as: co struction as mitigation of severance damages, coordination construction work with utility relocations, and phasing of t work to avoid delays in construction due to right-of-wa matters.

The Right-of-Way Engineering Branch will prepare map legal descriptions, acquisition documents, and exhibits in co nection with various phases of condemnation activities inclu ing Water Commission proceedings and individual trials. T Relocations Branch will negotiate agreements and will arran for relocation of necessary public and private utility faciliti and public roads, and will provide staff services for the Sout ern District in this regard.

Construction Supervision

Construction supervision involves contract administratio the necessary field surveying, interpretation of plans and spe fications, and enforcement of specifications and contract pr visions through inspection of the construction work to insu that the work performed by the contractor is in accordan with the plans and specifications.

FEATHER RIVER FACILITIES

The Feather River Facilities embrace the entire Feather River Basin and consist of five reservoirs in the upper basin designated as the "Upper Feather Division," and Oroville Dam and Reservoir and associated facilities designated as the "Oroville Division."

The Upper Feather Division consists of the Frenchma Grizzly Valley, Antelope Valley, Dixie Refuge and Abb Bridge Dams and Reservoirs. Frenchman Dam and Reservo was completed in 1962. The first 4½ miles, of a total of 8 mil of the recreation access road near Frenchman Reservoir w

DEPARTMENT OF WATER RESOURCES—Continued

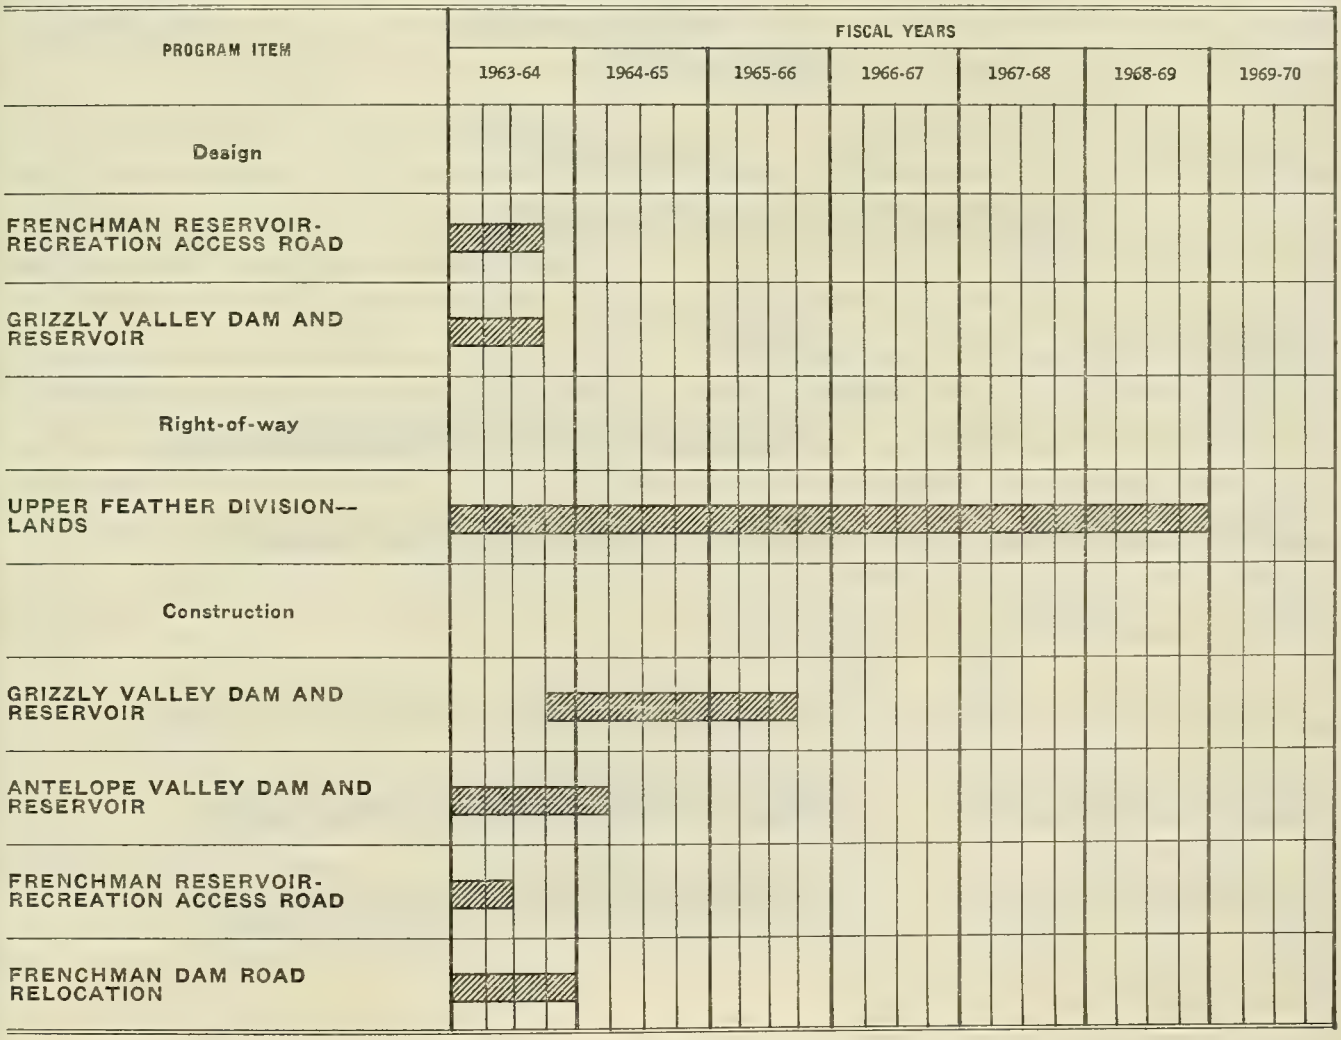
CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

FEATHER RIVER FACILITIES—Continued

be completed in the current fiscal year. The road from Chilcoot on U.S. 40A extends for 8 miles to Frenchman Reservoir Recreation Area in Plumas County. This road will provide better access for the public to Frenchman Reservoir. During 1963-64, the design will be completed and construction will start and be completed on the Recreation Access Road, first Stage, from Chilcoot to the U.S. Forest Service road. Construction will start on Recreation Access Road, second Stage, from the U.S. Forest Service road to Frenchman Reservoir. Funds were provided in 1963-64 to pave the first stage of the road and grade the second stage. In 1964-65 the grading of the second stage will be completed. During the 1963-64 fiscal year, the construction of Antelope Valley Dam and Reservoir will be completed, and the construction of Grizzly Valley Dam and Reservoir will start.

The Oroville Division can be described in two parts:

1. Oroville Dam and Reservoir, including spillway, power plant, fish hatchery, Western Pacific Railroad and U.S. Highway 40A relocations, and several county road relocations.



2. The Thermalito features consisting of the diversion dam, power plant, power canal, forebay, and afterbay, and miscellaneous relocations of roads and utilities.

Oroville Dam will be an earth and graded-gravel fill structure about 735 feet high, and the reservoir will store 3,484,000 acre-feet of water. The Thermalito features provide river regulation after power generation at Oroville and added power generation utilizing the remaining head available before return of the flow to the river. Storage in the Thermalito Afterbay provides water for pumping back through the system to the Oroville Reservoir.

At the close of the 1962-63 fiscal year, the major construction contracts under way included the Oroville Dam and Reservoir, including Diversion Tunnel Number 2, and the Thermalito Diversion Dam, Diversion Tunnel Number 1, Oroville Power Plant, Feather River Hatchery—Interim Facilities, Middle Fork Bridge, U.S. Highway 40A relocation from Oroville to Wicks Corner, Construction Headquarters, and Employee Housing. During 1963-64, design will be completed on the Oroville Dam Spillway, the first stage of the Thermalito Power Plant, and the Oroville-Quincy County Road relocation from Oroville-Forbestown Road to Middle Fork Bridge. In 1963-64, construction will begin on the Oroville Dam Spillway and on the Oroville-Quincy County Road relocation.

During the 1964-65 fiscal year, design will be completed on the Oroville Reservoir Site Clearing, Thermalito Power Canal, Thermalito Forebay Dam and Afterbay Dam, and the Oroville-Feather Falls County Road relocation. In 1964-65, construction will start on the Thermalito Power Plant, Oroville Reservoir Site Clearing, Thermalito Forebay Dam, Thermalito Afterbay Dam, Thermalito Power Canal, and the Oroville-Feather Falls County Road relocation. During 1964-65, construction will be completed on the Middle Fork Bridge and the Oroville-Quincy County Road from Oroville-Forbestown Road to Middle Fork Bridge.

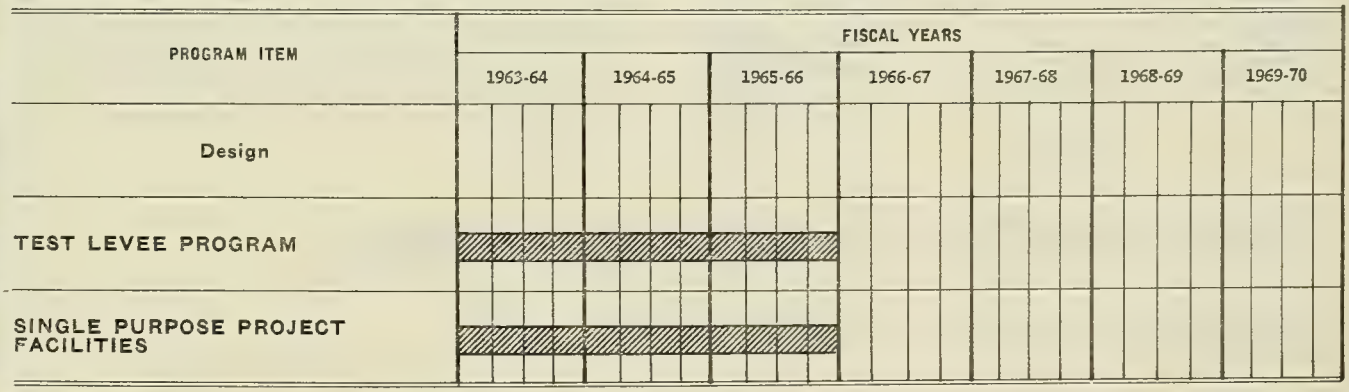
DELTA FACILITIES



This project is a necessary feature of the State Water Facilities to provide adequate water supplies through the Delta, provide some method of controlling salt water intrusion, and provide a means of transporting water across or around the Delta for the California Aqueduct without undue loss or deterioration in quality.

During 1962-63, a test levee program was initiated to develop design criteria, evaluate construction methods, and establish construction control necessary to build a levee system in the Delta.

During 1963-64, the test levee program will continue and preliminary design will be initiated on the agricultural water facilities.

In 1964-65, the 1963-64 program will be continued.

DELTA FACILITIES

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

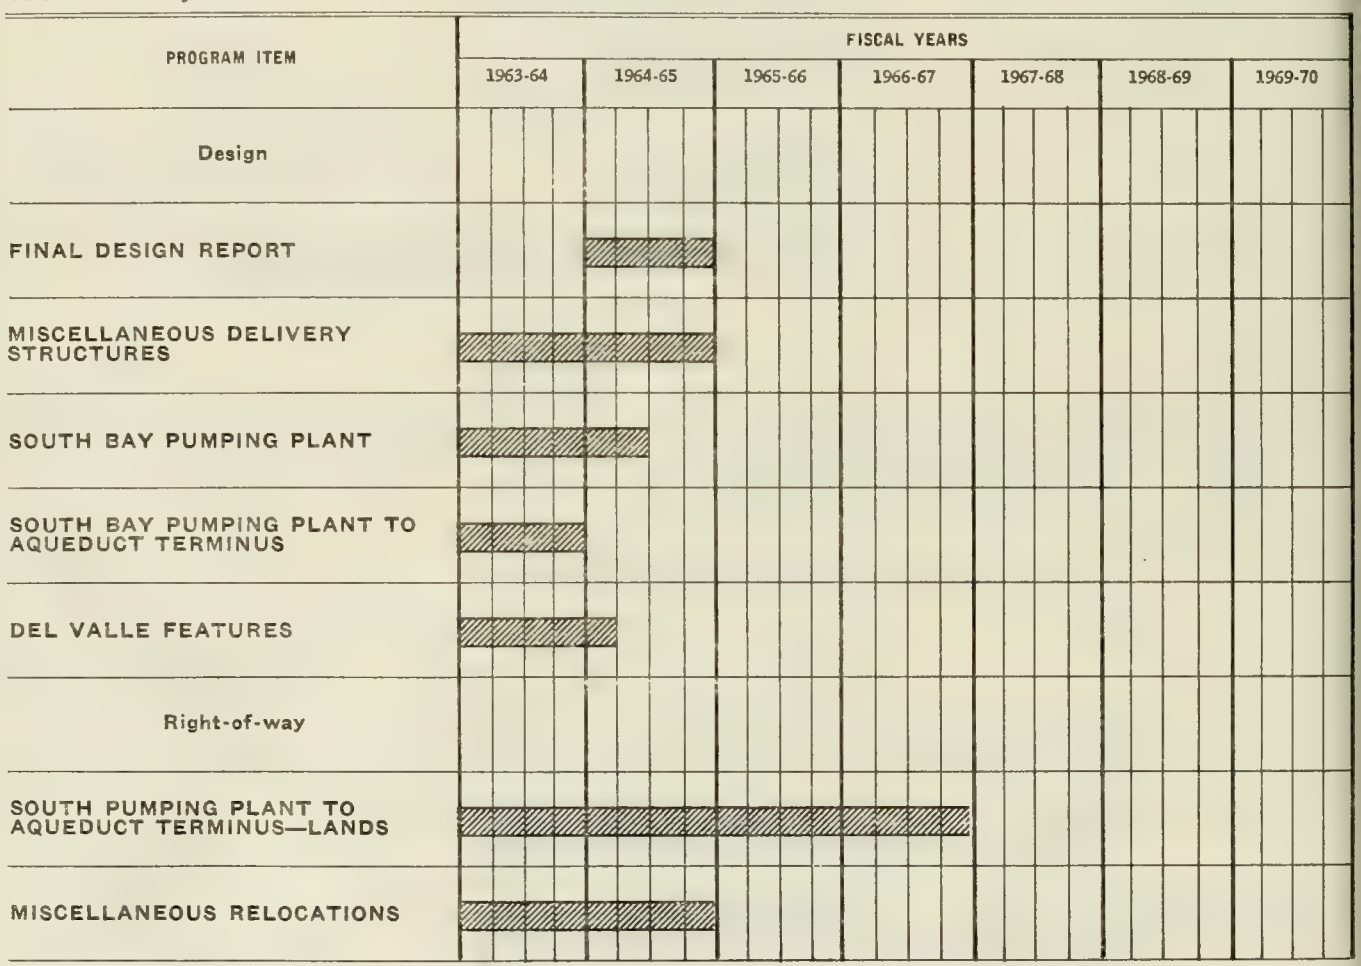
SOUTH BAY AQUEDUCT

The South Bay Aqueduct will convey water from the California Aqueduct to serve the Livermore Valley portions of Alameda and Contra Costa Counties, the southern "Bayside" portion of Alameda County, and northern Santa Clara County.

The main conduit will extend some 41 miles from Bethany Forebay on the California Aqueduct approximately 10 miles northwest of Tracy in Alameda County, to terminal facilities at the Eastside Treatment Plant of the Santa Clara Flood Control and Water Conservation District located 3 miles east of San Jose.

The South Bay Pumping Plant, already in operation, lifts water from Bethany Forebay to an elevation where it flows by gravity to the service areas. An interim canal 2 miles long and an interim pumping plant will supply water to Bethany Forebay from the U.S. Bureau of Reclamation's Delta-Mendota Canal until water becomes available from the California Aqueduct.

Regulatory storage for Livermore Valley and for the Alameda Bayside and the Santa Clara service areas will be provided by Del Valle Reservoir located on Arroyo Del Valle, 6 miles south of Livermore. Del Valle Reservoir will be connected to the main aqueduct by a short branch pipeline in which a pumping plant will be included. The plant will pump water between the main aqueduct and the reservoir with the direction of pumping depending on the reservoir water surface elevation and the water demands. Del Valle Reservoir will also provide flood protection for the Livermore Valley and for the downstream portion of the Alameda Creek Basin.



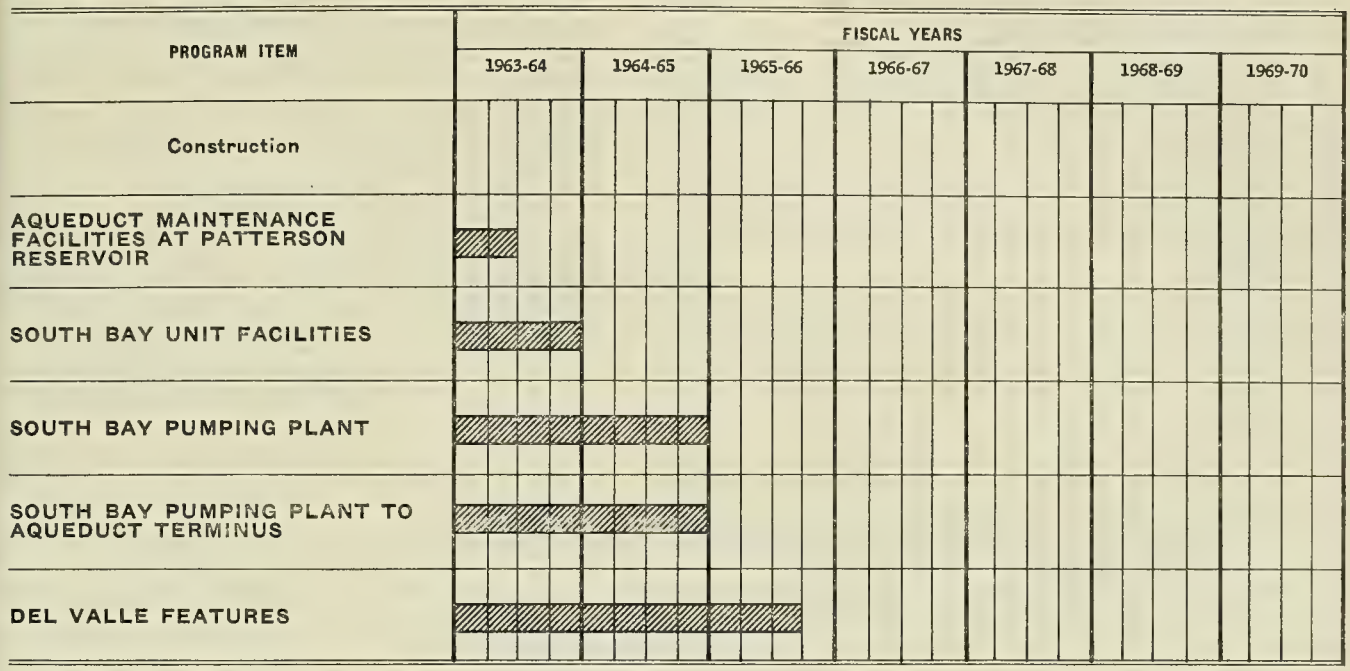
A very small terminal reservoir to satisfy operational criteria will be provided at the Eastside Treatment Plant.

At the end of fiscal year 1962-63, the first stage of the aqueduct was complete from the South Bay Pumping Plant to Patterson Reservoir, a distance of 9 miles. Construction was under way on the Alameda Division Canal, instrumentation and control facilities and on the La Costa and Mission Tunnels.

All design work for the South Bay Aqueduct will be completed during 1963-64 except for staging pumping units in second stage South Bay Pumping Plant and Del Valle Pumping Plant. During 1963-64, construction will start on the Del Valle and Sunol Pipelines, second stage of South Bay Pumping Plant, second stage Brushy Creek Pipeline, Santa Clara Pipeline, second instrumentation and control contract, and the Del Valle features, including the Del Valle Road relocation, dam and reservoir, pumping plant, and branch pipeline. The Alameda Division Canal, and instrumentation and control facilities to Patterson Reservoir will be completed.

During 1964-65, there will be no new construction starts, as all contracts in the South Bay Aqueduct will have been started the previous year. Construction will be completed on all instrumentation and control facilities La Costa and Mission Tunnels, Del Valle and Sunol Pipelines, second stage South Bay Pumping Plant, second stage Brushy Creek Pipeline, and Santa Clara Pipeline. All design work for South Bay Aqueduct will be completed during 1964-65. Initial water deliveries at aqueduct terminal facilities are scheduled for June 1965.

SOUTH BAY AQUEDUCT



DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

SOUTH BAY AQUEDUCT—Continued

SOUTH BAY AQUEDUCT—Continued

CALIFORNIA AQUEDUCT

The California Aqueduct comprises all of the State Water Facilities south of the Delta necessary to convey water to the state service areas in the San Joaquin Valley and Southern California.

This project is comprised of the following divisions: North San Joaquin, San Luis, South San Joaquin, Tehachapi, Antelope, East Branch, and West Branch.

The North San Joaquin Division includes the intake channel from the Delta to the Delta Pumping Plant, the fish protective works, Delta Pumping Plant, discharge lines and appurtenant features, the extension of Bethany Reservoir, and a concrete-lined canal which extends from the Delta Pumping Plant to San Luis Forebay, a distance of approximately 66 miles. These facilities will be located along the west side of the San Joaquin Valley, in Contra Costa, Alameda, San Joaquin, Stanislaus, and Merced Counties.

At the end of 1962-63, final design had been completed on the 2 canal embankment contracts, the intake channel from Byron Road to the Delta Pumping Plant, and the excavation for the Delta Pumping Plant. During the 1963-64 fiscal year, preliminary design will continue on the Fish Protective Works, and final design and right-of-way acquisition will continue on the remaining features to meet the construction schedule.

During the 1963-64 fiscal year, construction will be completed on the first embankment contract and construction will start on the second embankment contract, the intake channel from Byron Road to the Delta Pumping Plant, including excavation of the pumping plant site, the aqueduct in the reach from Del Puerto Canyon Road to Orestimba Creek, and on the Delta Operation and Maintenance Yard—Phase I.

During 1964-65, final design of the canal will be completed. Final design will continue on the Delta Pumping Plant and begin on the Fish Protective Works. The second embankment contract and the Delta Operation and Maintenance Yard—Phase I, will be completed. Construction will continue on the other active contracts, and construction will begin on the Delta Pumping Plant, the intake channel from the Delta to Byron Road, and on the 3 remaining reaches of aqueduct which are: Delta Pumping Plant to Chrisman Road, Chrisman Road to Del Puerto Canyon Road, and Orestimba Creek to San Luis Forebay.

The San Luis Division (joint state-federal facilities) includes the San Luis Forebay, the forebay intake canal, San Luis Pumping-Generating Plant, discharge lines and appurtenant features, San Luis Dam and Reservoir and appurtenances, a canal of varying capacity which will extend approximately 106 miles from San Luis Reservoir south to Kettleman City, and the Mile 18 Pumping Plant located about 18 miles southerly of San Luis Dam. These facilities will be located along the west side of San Joaquin Valley in Merced, Fresno, and Kings Counties, and are parts of the state-federal joint facilities of the San Luis Unit of the Central Valley Project. The U.S. Bureau of Reclamation, under a contract with the State, has the prime responsibility for design and construction of these facilities. This contract provides for 55 percent of the cost to be met with advances of state funds. The Department of Water Resources

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

CALIFORNIA AQUEDUCT—Continued

is responsible for part of the right-of-way acquisition program connected with the main reservoir.

During 1963-64, the U.S. Bureau of Reclamation will continue construction on San Luis Dam, San Luis Pumping-Generating Plant, San Luis Forebay Dam, and San Luis Canal, Reach Number 1. Construction will begin on Mile 18 Pumping Plant, San Luis Canal, Reach Number 2, and Los Banos Detention Reservoir.

In fiscal year 1964-65, the Los Banos Detention Reservoir will be completed, work will continue on other active contracts, and construction will start on Reach Number 3 and Reach Number 4 of the San Luis Canal. The Division of Highways will continue construction on the State Highway Route 152 relocation in 1963-64, and will complete the work during 1964-65.

The South San Joaquin Division includes about 120 miles of canal from Kettleman City to the Tehachapi Pumping Plant, Buena Vista Pumping Plant, and the Wheeler Ridge Pumping Plants. In this division, in addition to normal aqueduct construction, the work includes preconsolidation features to allow differential settlement in shallow subsidence areas prior to canal construction. Settlement is effected by ponding water along the alignment in the areas subject to subsidence. A major change in the program schedule has been made to reflect use of contracted local water supplies to accomplish the preconsolidation in lieu of project water delivered through completed aqueduct reaches. The aqueduct features in this division are in Kings and Kern Counties and will extend along the west and southwesterly side of the San Joaquin Valley, passing west of Buena Vista Lake to Wheeler Ridge, and then from Wheeler Ridge the aqueduct extends easterly to Pastoria Creek.

During fiscal year 1963-64, final design will continue on the aqueduct from Avenal Gap to Lerdo Highway and on preconsolidation features from Lerdo Highway to Wheeler Ridge. From Wheeler Ridge to the Tehachapi Pumping Plant, the design of preconsolidation features will be completed and will be under construction.

During fiscal year 1964-65, final design will be completed on the aqueduct reach from Avenal Gap to Lerdo Highway, on the excavation of the Intake Channel to Buena Vista Pumping Plant, and on the preconsolidation features from Lerdo Highway to Wheeler Ridge. Construction of preconsolidation features will continue through 1964-65.

The Tehachapi Division is comprised of the Tehachapi Pumping Plant, which includes the plant and appurtenant features, and the Tehachapi Crossing, which includes tunnels, siphons, and an open channel. The Tehachapi Crossing will extend from the Tehachapi Pumping Plant through the Tehachapi Mountains to the South Portal of the Tehachapi Tunnels.

During the 1963-64 fiscal year, preliminary design will continue on the Tehachapi Pumping Plant and the Tehachapi Crossing Siphons. Final design will start on the tunnels. Construction of the access roads will be completed.

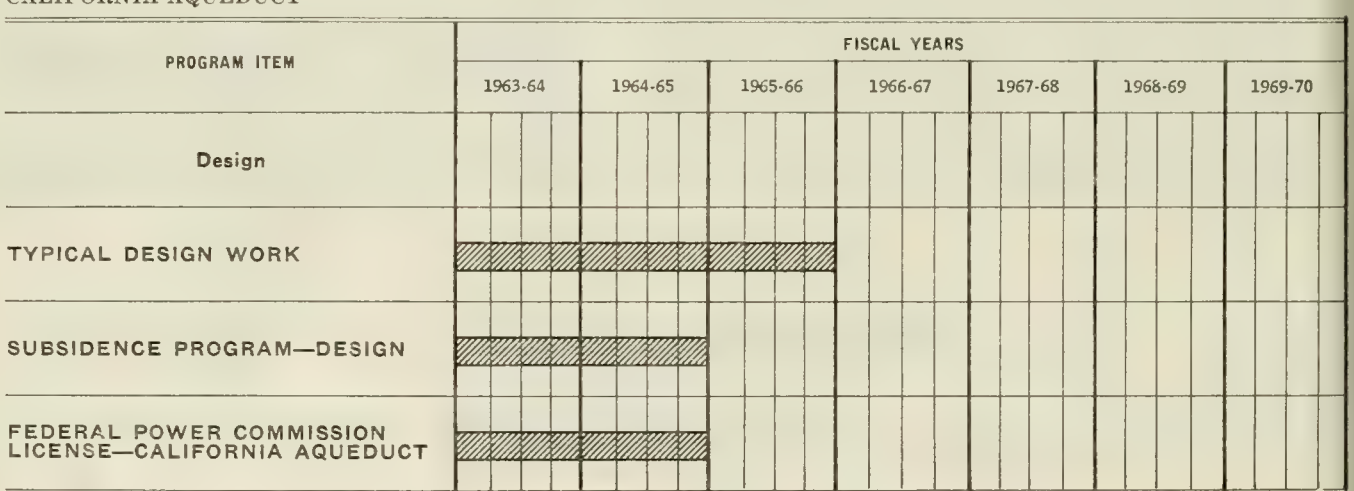
In fiscal year 1964-65, final design of the Tehachapi Crossing Tunnels will be completed and construction will begin. Final design will start on the Tehachapi Pumping Plant and the Tehachapi Crossing Siphons.

The Antelope Division, located in Kern and Los Angeles Counties, includes all of the California Aqueduct facilities required to convey water from the south portal of Tehachapi Tunnel Number 4 to the junction of the West Branch and East Branch Divisions. This division includes the Cottonwood Power Plant, surge tank, penstocks and other appurtenant facilities, and 19 miles of aqueduct.

During fiscal year 1963-64, final design will start on the aqueduct and preliminary design will continue on the Cottonwood Power Plant. In the 1964-65 fiscal year, final design of the aqueduct will be completed and preliminary design will continue on the Cottonwood Power Plant.

The West Branch Division includes all of the California Aqueduct facilities required to convey water from the junction of the West and East Branch Divisions to Castaic Reservoir. These facilities will be located in Los Angeles County and will terminate at Castaic Reservoir, in the vicinity of the community of Castaic. The division includes a pumping plant, power recovery plants, tunnels, and siphons, and Castaic Dam and Reservoir.

During fiscal year 1963-64, preliminary design will continue on all features and by the end of the fiscal year, preliminary design of the tunnels and siphons will be completed. Final design studies will commence on Castaic Dam and Reservoir and on the pumping and power plants.



In fiscal year 1964-65, preliminary design will be completed on Castaic Dam and Reservoir and will continue on the pumping and power plants. Final design will start on the tunnels and siphons, and final design studies will continue on Castaic Dam and Reservoir and on the pumping and power plants.

The East Branch Division consists of those portions of the California Aqueduct from the junction of the West and East Branch Divisions to Perris Reservoir, the terminus of the East Branch Aqueduct. In this division there are approximately 76 miles of canal, 31 miles of pipeline, 4 miles of tunnel, and the Pearblossom Pumping Plant, the Devil Canyon power development, Cedar Springs Dam and Reservoir, and Perris Dam and Reservoir.

During fiscal year 1963-64, preliminary design of the aqueduct will generally consist of that required to support land acquisition activities. Preliminary design will continue on all other features. Preliminary design of Cedar Springs Dam and Reservoir will be completed during the current year. Final design studies will be started on Pearblossom Pumping Plant, Devil Canyon Power Plants, Cedar Springs Dam and Reservoir, Perris Dam and Reservoir, and on the first 34 miles of the aqueduct.

During the 1964-65 fiscal year, final design studies started in 1963-64 will continue. Preliminary design of Perris Dam and Reservoir and of the tunnels will be completed. Preliminary design will continue on all other features.

COASTAL AQUEDUCT

The Coastal Aqueduct consists of those portions of the aqueduct system from the California Aqueduct near Avenal Gap in Kings County to a terminus at the Santa Maria River and includes all aqueduct facilities required to make water deliveries to San Luis Obispo and Santa Barbara Counties. No activity has been scheduled for fiscal year 1964-65.

COASTAL AQUEDUCT

WORK FOR OTHER STATE AGENCIES

LOWER SAN JOAQUIN RIVER FLOOD CONTROL PROJECT

The Lower San Joaquin River Flood Control Project in Merced, Madera, and Fresno Counties, extends from Friant Dam to the mouth of the Merced River. It consists of improvements to approximately 110 miles of natural river channel and construction of approximately 48 miles of leveed bypass channels to supplement the channel capacity of the San Joaquin River. The Department of Water Resources provides planning, design, right-of-way, and construction engineering services to the Reclamation Board in conformance with service agreements between the two agencies. Funds for this project are budgeted by the Reclamation Board and periodic transfers made to the Department of Water Resources, as required, to accomplish the engineering work on the project.

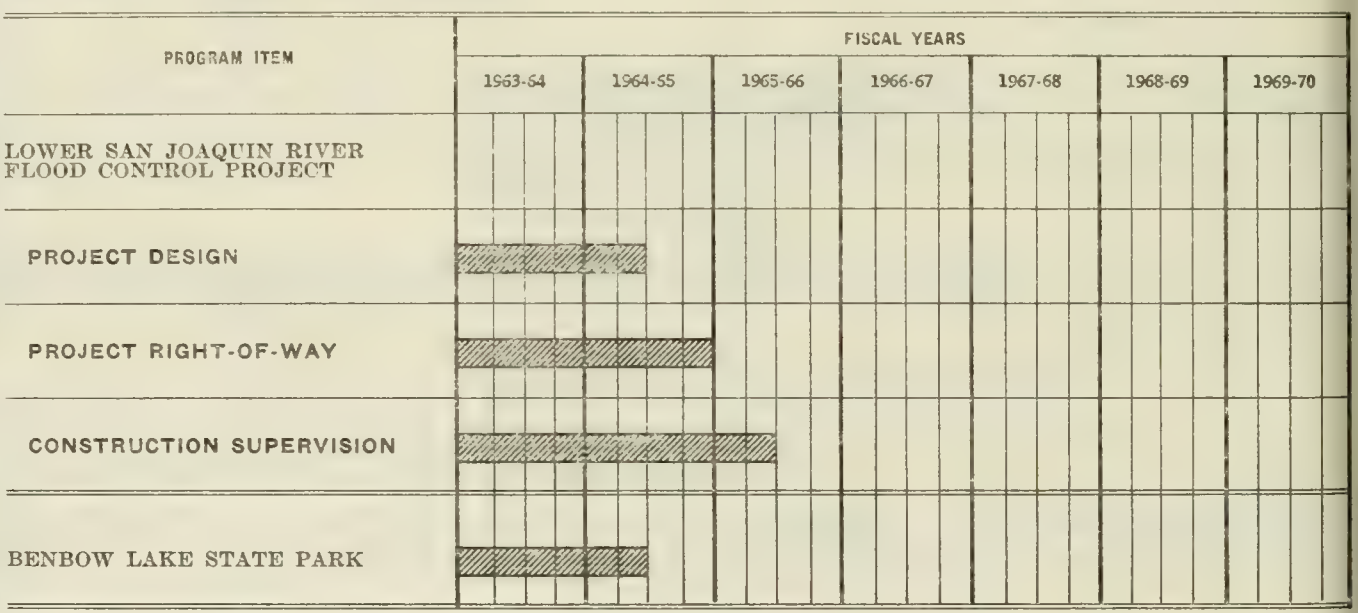
Eight construction contracts were complete at the close of fiscal year 1962-63. New levees along the San Joaquin River from the Merced River to Sand Slough and repair of existing levees were complete. All channel clearing in San Joaquin River has been completed to Mendota Dam. Mariposa Bypass is complete and levees on both sides of Eastside Bypass have been completed from the river interchange to the head of Mariposa Bypass and left bank levee of Eastside Bypass is complete from the head of Mariposa Bypass to the San Joaquin River.

Design work was completed during 1962-63 on the contracts for the remaining levees and bridges on the right bank of Eastside Bypass from the San Joaquin River to Mariposa Bypass, the Mariposa Bypass control structure, and Eastside Bypass from the interchange to Avenue 18½. Also, design of the remaining features in the project was started.

During 1963-64, design will be completed on all contracts except Chowchilla Canal Bypass, Fresno River to San Joaquin River; and channel improvements, Mendota Dam to Gravelly Ford. In 1963-64, construction will start on Eastside Bypass, San Joaquin River to East Side Canal; Mariposa Bypass control structure; Eastside Bypass, interchange to Avenue 18½; Eastside Bypass Weir; and Eastside Bypass, Avenue 18½ to Chowchilla Canal.

During fiscal year 1964-65, all design work on the project will be completed. Construction will start on the remaining 2 contracts in the project and contracts for Eastside Bypass, San Joaquin River to East Side Canal; Mariposa Bypass control structure; Eastside Bypass, interchange to Avenue 18½; Eastside Bypass Weir; and Eastside Bypass, Avenue 18½ to Chowchilla Canal will be completed.

BENBOW DAM



Benbow Dam on South Fork Eel River in Humboldt County, is a slab and buttress type structure 44 feet high and 283 feet in length. The reservoir has a storage capacity of 1,060 acre-feet and a surface area of 123 acres at normal operating level, which includes 11 feet of flashboards on the crest of the dam. The flashboards are removed in the winter, and the full length of the concrete structure becomes the spillway. A fish ladder is provided in the left abutment of the dam. Benbow Dam creates a reservoir used by the Division of Beaches and Parks for recreation purposes. Funds for this work are budgeted by the Division of Beaches and Parks, and periodic transfers are made to the Department of Water Resources to provide design and construction engineering services to the Division of Beaches and Parks on necessary repair work required to keep the dam operational.

During 1962-63, 43 reinforced concrete socket plugs were constructed for use in the crest of the dam during the period when the flashboards are not in use. Design was completed on a new cableway required for removal and placement of the flashboards and general operational use. Design was initiated on a new fish ladder. Construction of the cableway was started late in the fiscal year.

During 1963-64, the cableway construction will be completed. Final design, along with plans and specifications, for the new fish ladder will be completed and construction will be started. Design will be started on required repairs to the face of the dam.

During 1964-65, construction of the fish ladder will be completed. Design work on required repairs to the face of the dam will be completed and repair work will be started.

GENERAL ANALYSIS

Objectives

The State Water Rights Board, composed of three members appointed by the Governor for 4-year terms, is in charge of maintaining orderly procedure in the administration of the following programs outlined in Division 2 of the Water Code, State of California:

1. Administration of appropriation of unappropriated water through the application, permit and license procedure and to maintain records and make observations to verify compliance with the law in putting the appropriated water to beneficial use.

2. Investigation of physical facts and assistance to the courts in water rights controversies, and implementation of statutory procedures whereby an administrative determination of water rights can be made prior to court action.

3. Administration of the act requiring the recordation of data relating to the extraction of ground water in the counties of Riverside, San Bernardino, Los Angeles and Ventura.

4. Administration of the act authorizing the retention of ground water rights when extractions are reduced by use of water from an alternate source, which applies to eight counties of Southern California, and consists of recording statements filed by water users.

Factual material of the type recorded under items 3 and 4 is essential in providing information which can be used to prevent serious damage or loss of utility of a ground water basin and in maintaining the rights to water therefrom. Failure to act under either program could have a serious effect on the rights of water users in an area where the acts apply.

Program and Performance

During the 1962-63 fiscal year the board held 90 days of hearing including 51 days of hearing on six applications of Richvale Irrigation District and others for an irrigation and power development on the Middle Fork Feather River. Hearings were also held on proposed major water development projects of Calaveras County Water District and others on the North Fork of the Stanislaus River; United States Bureau of Reclamation, Stockton and East San Joaquin Water Conservation District and Calaveras Water District on the Calaveras River; and Yuba County Water Agency and Johnson Rancho County Water District on the Yuba River. The board issued 46 decisions on various projects.

During the 1963-64 fiscal year the board intends to hold hearings on the Kern and Sacramento Rivers and to complete the hearing on the Middle Fork Feather River project as well as to hold numerous additional hearings on applications of individual projects of a more limited nature. Decisions on the Kern River, Middle Fork Feather River, Calaveras River and Yuba River will be prepared and adopted during this fiscal year.

Applications representing major projects on the Kings River are pending, but the schedule for these hearings cannot be determined at this time due to negotiations between the water users and the Federal Government. It is expected that these hearings can be initiated during the 1964-65 fiscal year. Hearings will also be held on various individual applications at such time as they have been processed to the hearing stage.

A total of 536 new applications to appropriate unappropriated waters were filed during the 1962-63 fiscal year. While slightly less than the number filed during the previous fiscal year, the workload has remained high. Due to a continuing reduction in the amount of water available for appropriation, additional information is now required by the board concerning each application to determine if the application should be approved. Investigations are frequently necessary to determine whether the source named in the application has hydraulic continuity with the Sacramento River or Sacramento-San Joaquin Delta during the low flow period.

Orders were issued allowing extensions of time under 196 permits and changes in points of diversion, place of use, or character of use under 124 applications, permits or licenses. Seventy-four applications were canceled and 110 permits and licenses were revoked.

The recording of data pertaining to water right applications on a key sort card system modified to include flexowriter perforated tape has continued. Recording of data of approximately two-thirds of the active water right applications has been completed.

Inspections were made of 932 water projects throughout the State in connection with permit and license processing during the 1962-63 fiscal year.

Assignment of additional personnel and rearrangement of the inspection program has resulted in an additional number of projects being investigated notwithstanding their increased complexity.

Filings of notices pertaining to recordation of water extractions and diversions in four Southern California counties continued, with 183 first notices and 5,932 annual notices filed in the 1962-63 fiscal year.

Adjudication activities of the board proceeded on four court references, two of which were completed during the year with the filing by the board of its report of referee. Additional work was assigned to the board by the Court in the San Fernando Valley Reference, Los Angeles County. Inquiries were received concerning assistance on adjudications in one major stream system in Southern California and several smaller streams in Northern California. Indications are that one or more of these adjudications may be initiated this fiscal year.

The headquarters of the board is to be moved to the Retirement Building in the 1964-65 fiscal year.

The proposed additional engineering position and a one-half-time clerical position are needed to meet increased workload in the inspection program.

SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$189,531	$250,974	$145,199	—$105,775 (—40.7%)
Personnel man-years	67.5	72.6	82.5	9.9

GENERAL ANALYSIS

Objectives

This board co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction of levee systems and flood channels; reviews plans for encroachments on flood control facilities; and fulfills such construction obligations as have been assumed by the State in agreements with the Federal Government.

Program and Performance

The agency program involves work on a number of flood control projects in the Sacramento and San Joaquin Valleys. The major presently active projects of the board are the Sacramento River and Major and Minor Tributaries Flood Control Project, the Lower San Joaquin River Flood Control Project, the Calaveras River and Littlejohn Creek and Tributaries Project, the Sacramento River Bank Protection Project and Mormon Slough Flood Control Project.

RECLAMATION BOARD—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Construction work on all of these projects is done by the Corps of Engineers with the exception of the portion of the San Joaquin Project lying between the mouth of the Merced River and Friant Dam. The construction work on this project is being accomplished by the Department of Water Resources under an agreement with the Reclamation Board.

The primary function of this agency is the acquisition of the necessary lands, easements, and rights-of-way for these projects and the relocation of roads, bridges, and utilities as may be necessary in conjunction with their construction. In addition the board also is responsible for the control of encroachments upon the works of these various flood control projects and is responsible for the enforcement of sound maintenance standards.

Eleven new positions, 9 of which are primarily financed through charges to local assistance projects, are proposed for the budget year. In recognition of a growing backlog of condemnation cases, 2 engineering positions and 3 land agent positions are proposed for 1964-65. Three engineering positions are proposed as a result of description writing needs and 1 land agent is included for land acquisition requirements. Two additional positions are proposed to meet the clerical workload resulting from the accelerated land acquisition activity. In order to maintain time schedules, $6,176 in overtime payments has been authorized for 1963-64.

GENERAL ANALYSIS

Objectives

The Colorado River Board of California has the continuing and basic duty and responsiblity under State Law (Part 5 of Division 6 of the Water Code) of protecting the rights and interests of the State of California, its agencies and citizens in and to the waters of the Colorado River System.

Because the average water supply of the river system is not sufficient to serve all projects which could be constructed in the seven basin states, there has long existed keen competition among the various interests for the right to use of the water. Thus the functions of the board require intensive study of the water supply and of existing and potential irrigation, water supply and power projects throughout the seven states, Arizona, California, Nevada, Colorado, New Mexico, Utah and Wyoming, as well as constant observation of the proceedings of the Congress and of the executive departments of the Federal Government and State agencies concerned.

Under its basic responsibilities the board must protect California's water rights against encroachment from any cause or source, by engaging in interstate conferences, appearing at hearings before legislative committees and negotiating with the executive departments of the Federal Government; and by assisting the State Attorney General if interstate conferences must yield to litigation.

Program and Performance

The board comprises 6 members appointed by the Governor, each representing 1 of the 6 agencies having rights to the use of water or power from the Colorado River. The agencies are: The Metropolitan Water District of Southern California; Department of Water and Power, City of Los Angeles; San Diego County Water Authority; Imperial Irrigation District; Coachella Valley County Water District; and Palo Verde Irrigation District.

Major phases of the board's work program as anticipated for the current fiscal year and the fiscal year 1964-65 are summarized as follows:

1. Preparation of engineering and legal material for appearances before congressional committees, other bodies, and for conferences with interested federal agencies, senators and congressmen regarding pending legislation or licenses affecting California's rights and interests on the Colorado River.
2. Representation of the board in technical and policy conferences and in legislative, court and commission proceedings; co-ordination of work with the work of the Department of Water Resources, the Resources Agency, the Attorney General's staff, other California agencies including those represented on the board, special consultants, other states and the Federal Government; and cooperative efforts with representatives of other states and the Federal Government in seeking to resolve problems inherent in the operation of river facilities and the administration of the law of the river.
3. Study of reports on proposed projects for or related to the development, control and utilization of the water and power resources of the Colorado River System including analysis of engineering, financial, legal and policy aspects of the proposals as required, and preparation of formal views and recommendations to be transmitted to appropriate state and federal authorities and the Congress.
4. Analysis of the operations of existing and proposed developments on or related to the Colorado River System, to determine their effects upon the quantity and quality of the water supply available to the lower basin and in particular to California projects, and upon Colorado River power generation.
5. Collection, compilation and analysis of all available basic information on the water supply of the Colorado River System

GENERAL ANALYSIS—Continued

Program and Performance—Continued

and present and future use thereof, with fundamental objectives to:

(a) Acquire and interpret sufficient basic data to reveal exactly what has happened hydrologically in the Colorado River Basin in the past,
(b) find what factors and principles cause it to happen,
(c) determine on the basis of the knowledge gained, what is likely to happen in the future,
(d) predict the effects of additional developments, modifications of existing projects, and measures that may influence hydrologic phenomena, and
(e) evaluate the probable impact on California's projects and rights.

6. Collection and study of repayment and crop data on existing and proposed developments, and of data on economic growth, population and water requirements for all purposes, including agriculture, municipal and industrial supplies, and power generation.

7. Emergency studies and research needed in connection with the suit, Arizona v. California, et.al. Although the United States Supreme Court has published an opinion, the final decision has not yet been filed and the litigants are in the process of preparing decrees for the court.

8. Legal and engineering studies related to the administration of the law of the river including analysis and if necessary recommendation for board action to insure that the operation of the Colorado River System and potential related developments is in accordance with the provisions of the Colorado River Compact, the Upper Colorado River Compact, the Mexican Water Treaty, Colorado River Storage Project Act, the Boulder Canyon Project Act, and other relevant statutes, regulations and court decrees.

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission established by the State of Arizona to define a common boundary between the states along the Colorado River. Membership in the commission consists of the Attorney General, Director of the Water Resources, and the Executive Officer of the State Lands Commission. One member of the Senate, appointed by Senate Rules Committee and one member of Assembly, appointed by the Speaker are advisors to the commission.

Program and Performance

The California Legislature under Chapter 859, Statutes of 1963, and the Arizona Legislature have ratified the common boundary as defined by the boundary commissions of the two states.

This compact fixes by reference to stations of longitude and latitude, the location of the boundary line between Arizona and California on the Colorado River.

The program of this commission during the budget year will include the following:

1. Provide assistance in conjunction with Arizona to the United States Coast and Geodetic Survey which has contracted to physically set the boundary along the river. Completion of this work is anticipated by November of 1964.
2. Contract for a survey to establish the boundary in the area known as "Yuma Island" where the boundary line will divert from the river course and cross dry land.
3. Obtain congressional approval of the compact.
4. Provide assistance to local governmental agencies and private individuals where land has been transferred from one state to the other resulting in problems of jurisdiction and land titles.

GENERAL ANALYSIS

Objectives

The major purposes of this compact, with respect to the water resources of the Klamath River Basin are:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation, and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife, and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the 2 states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact Between the States of Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of 3 members. The Director of the Department of Water Resources represents the State of California. The representative of the State of Oregon is the State Engineer. The federal representative is appointed by the President. The representative of the United States serves as chairman of the commission without vote.

California's share of the expense of the commission together with the State of Oregon's share is deposited in a trust account from which all expenses are paid.

During 1964-65 work will continue on the program initiated in 1961-62 for finding a solution to the algae problem existant in the Klamath River waters, and completion is scheduled of a map to indicate land use as of 1957, the effective date of the compact. Studies of change in water use within the basin will be initiated to determine the effects on compact terms caused by the designation of large new wildlife areas in the Upper Klamath Basin.

California appropriations for this commission have been as follows:

Chapter 113, Statutes of 1957	$12,000
Budget Act of 1959, Item 265	2,343
Budget Act of 1960, Item 260	572
Budget Act of 1961, Item 270	5,698
Budget Act of 1962, Item 267	5,697
Budget Act of 1963, Item 267	5,333
Budget Act of 1964, Proposed	4,627

The budget of the trust account is shown below in order to reflect the total financial status of the commission.

GENERAL ANALYSIS

Objectives

The California-Nevada Interstate Compact Commission of California was created by Chapter 1810, Statutes of 1955. Its function is to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states for their approval an interstate compact relating to distribution and use of the waters of Lake Tahoe and the Truckee, Carson and Walker Rivers.

Program and Performance

The commission consists of the director of the Department of Water Resources and 6 other members appointed by the Governor from electors residing, owning property, or engaged in business in the areas comprising the basins of the Truckee, Carson and Walker Rivers, and Lake Tahoe. The chairman of the commission is selected by the members. All engineering, administrative and clerical services are furnished by the Department of Water Resources under terms of a service agreement which is renewed annually.

The work of the California Commission during 1963-64 will be aimed at completing a compact on all basins which can be agreed upon by June 30, 1964. This is in accordance with the program outlined jointly by the Governors of California and Nevada on November 11, 1963.

During 1964-65 the commission will:

1. Continue to negotiate with the Nevada Commission on acceptable terms for those river basins on which complete agreement has not been reached by June 30, 1964.
2. Review with appropriate local and federal agencies and other interested parties the terms of the compact which have been agreed to by the negotiating commissions.
3. Make such appropriate revisions in the compact as may result from review.
4. Present the completed compact to the state legislatures of California and Nevada for their approval during the period January through May 1965.
5. Arrange for introduction of consent legislation in Congress to obtain federal approval.

GENERAL ANALYSIS

Objectives

The principal objective of the state water pollution control program is to regulate the disposal of domestic sewage and industrial waste so as to preserve and protect the recognized beneficial uses of the waters of the State. Another objective is to prevent nuisances resulting from unreasonable waste disposal practices. In addition, 1963 legislation made the state board responsible for the co-ordination of statewide control and maintenance of water quality. The regulation of waste discharges is the primary responsibility of the 9 regional water pollution control boards. Prescribed waste discharge requirements must, in the final analysis, be reasonable and must be promulgated after balancing the interests of both the water users and the waste dischargers. For this reason, the regional boards are composed of local people appointed by the Governor and associated with 7 specified fields of interest.

In addition to the major task of prescribing, checking, and enforcing waste discharge requirements, the regional boards have the following other statutory duties and responsibilities:

1. To formulate and adopt long-range plans and policies for control of water pollution.
2. To co-ordinate the actions of the various state and local agencies in the control of water pollution.
3. To investigate conditions of pollution or nuisance.
4. To report cases of suspected contamination (actual hazard to the public health).
5. To recommend water pollution control projects needing financial assistance.
6. To request enforcement of water pollution control laws by appropriate federal, state or local agencies.

The 14-member State Water Quality Control Board has the following principal responsibilities:

1. To formulate and adopt statewide policy for control of water pollution and water quality.
2. To review actions of any regional board which may fail to take or obtain appropriate action to correct conditions of pollution or nuisance.
3. To refer cases of uncorrected contamination (hazard to public health) to any state agency having jurisdiction.
4. To administer statewide programs of financial assistance for sewerage construction.
5. To administer statewide programs of research in the technical phases of water pollution control.

Program and Performance

The program of the state and regional boards for the 1964-65 fiscal year is essentially a continuation of the current program with some expansion to take care of increasing workload made possible by federal program grant funds. Much of the expansion is reflected in implementation of the engineering and clerical positions authorized during previous fiscal years. The federal (Public Law 660, 84th Congress) program grants are made available for use in extending or improving state water pollution control programs. In California, during the early years of the grant program, the funds were used primarily to augment the state board's research program. Later, as work load increased, the federal funds were assigned to augment the overall water pollution control program. Although a large proportion of the federal funds are still used for the research program, a greater amount is assigned for expanded staff salaries and related operating expenses.

Three additional engineering staff positions (1 senior water pollution control engineer and 2 sanitary engineers) are included in the 1964-65 fiscal year for the regional boards because of increased workload.

The boards are delegated the responsibility of administering the federal (Public Law 84-660) construction grant program. This program was expanded in the 87th Congress by Public Law 88. California's allocation, formerly approximately $2 million annually, was increased to about $4 million in 1961-62, $4¾ million in 1962-63, $5 million in 1963-64, and $5 million is anticipated for 1964-65. Eligible communities may receive grants for construction of waste treatment works up to 30 percent of the project cost with a maximum of $600,000 per applicant or $2,400,000 total for a joint project. Each year since the start of the program in 1956, requested grants have totaled several times the available funds. Priorities are based on water pollution control needs determined by the regional boards and on financial needs found by the state board. Actual grants are made by the United States Public Health Service upon certification by the state board.

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

The program of applied research in the field of water pollution control is conducted to provide technical data to aid the boards in properly discharging their statutory responsibilities.

Program and Performance

The research program sponsored by the state board is carried out by contracting special projects with organizations or individuals competent in the particular field of research. A basic program had been supported since 1950 at a state level of approximately $80,000. In 1956-57 the research studies were expanded using federal (Public Law 660, 84th Congress) program grant funds in an amount of approximately $113,000 annually. The federal grants were scheduled to terminate in the 1960-61 fiscal year. However, Public Law 87-88 reinstated the program grants and, as a result, the state board expanded the 1961-62 research program to conduct investigations in a number of fields in which technical knowledge is urgently needed by water pollution control authorities. The expanded program is continuing in the 1963-64 and 1964-65 fiscal years through the use of grant funds to supplement basic amounts of $65,000 annually of state funds.

[a] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

SPECIAL INVESTIGATIONS FOR THE STATE AND REGIONAL BOARDS

Program and Performance

This category covers the cost of contracting with other agencies for field and laboratory services. Such services consist of technical investigations, inspection of waste discharges, and sampling and analysis of wastes and receiving waters. These services are contracted with state or other agencies best qualified to perform the required technical work. Primarily these investigations are to assist the regional boards in prescribing of waste discharge requirements, enforcement actions, and as a basis for establishing long range plans and policies with respect to water pollution control.

In the 1963-64 fiscal year, all funds were deleted for the statewide stream sampling program from the field and laboratory services budget and transferred to the Department of Water Resources for maximum coordination and economy.

The comprehensive study of San Francisco Bay, started in 1959-60 under Chapter 1909, Statutes of 1959, is being concluded in 1964-65 under contract with the University of California. Funds are included for the state board to conduct an exploratory survey in 1964-65 possibly leading to a comprehensive physical and biological study of the Salton Sea. Also funds are provided to implement the new duties assigned by the 196 session of the Legislature to the state board in the field o water quality control.

During the 1964-65 fiscal year, it is anticipated that expendi tures for these special investigations will be distributed amon the various regional boards and the state board as follows:

Regional Water Pollution Control Board:	
North Coastal (No. 1)	$400
San Francisco Bay (No. 2)	76,500
Central Coastal (No. 3)	16,000
Los Angeles (No. 4)	19,520

GENERAL ANALYSIS

Objectives

The major function of this commission is to co-operate with a similar commission representing the State of Oregon in formulating and submitting to the legislatures of California and Oregon for their approval an interstate compact relative to the waters of Goose Lake. The Federal Government is represented and participates in the compact negotiations.

Program and Performance

This commission was established by Chapter 1389, Statutes of 1961. The commission consists of 5 members, including the Director of Water Resources or his representative, the Director of Fish and Game and 3 members appointed by the Governor from persons residing in Modoc County. The members are appointed from qualified persons engaged in the following fields: (a) agriculture, (b) fishing, and (c) other industries.

The compact has been drafted and approved by both California and Oregon commissions and has been approved by the Federal Bureau of the Budget. Following this federal administrative approval, the compact was presented to the legislatures of California and Oregon for approval during the 1963 sessions. The California Legislature ratified this proposed compact with Chapter 1059, Statutes of 1963.

During 1963-64, consent legislation was introduced in Congress to obtain federal approval of the compact. The 1963-64 proposed budget included funds for this purpose. Fiscal year 1963-64 was the final year in which funds for the support of this commission were required.

GENERAL ANALYSIS

Objectives

The Department of Veterans Affairs administers the State's program of veterans' benefits and provides a claims and rights service to assist veterans in obtaining benefits to which they are entitled from the Federal Government.

Program and Performance

Programs administered by the department include the financing of farm and home purchases, educational assistance for veterans and veterans' dependents, and determination of eligibility for state benefits. The department also operates the Veterans Home of California and the Woman's Relief Corps Home.

In addition, the department administers the subventions for county service officers through which certain counties are reimbursed for a portion of the cost incurred by these counties in providing services to veterans.

ADMINISTRATION DIVISION						
GENERAL ANALYSIS						
The administration division provides policy and administrative direction to the other divisions of the department. This division includes the California Veterans Board (a policy-making body composed of 7 members appointed to 4-year terms by the Governor). It also includes the director, his deputies, and administrative service personnel.

	DIVISION OF EDUCATIONAL ASSISTANCE						
	GENERAL ANALYSIS						
	This division administers a program of educational assistance for California veterans, and dependents of veterans who died or were totally disabled as a result of service. The division provides educational counseling and assistance in securing admission to suitable institutions of learning. After acceptance into the program the students' grades are reviewed periodically and only those making satisfactory progress are continued				Only candidates whose federal benefits are no longer availab are eligible for this program. In addition, veterans must sho a legitimate need for further training. Acceptance of nondi abled World War II applicants was discontinued July 25, 195 For costs of this program and more detailed information, s Educational Assistance to Veterans and Dependents, page 77

	DIVISION OF SERVICE AND CO-ORDINATION						
	GENERAL ANALYSIS						
	The function of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference, care, or compensation provided for by the laws of the United States or the State of California. The headquarters and field service function provides for the determination of the eligibility of veterans to state benefits, including preference in civil service examinations. This function also provides advisory service to County Service Officers and performs a quarterly review of the service officers' activities. As of August 31, 1963, a total of 597,027 applications to establish California veterans' eligibility had been approved, an 166,113 veterans had established their eligibility for preferenc in civil service examinations. A major function of this divisio is to provide assistance to veterans in presenting and pursuit claims which the veteran may have against the United State as a result of war service. One position is eliminated under the provisions of Section 2 Chapter 1050, Statutes of 1963. One additional veterans repr sentative is included on a workload basis.

EDUCATIONAL ASSISTANCE TO VETERANS AND DEPENDENTS

This program, administered by the Educational Assistance Division pursuant to the provisions of Sections 981 to 981.8 and Sections 890 to 900 of the Military and Veterans Code, provides the opportunity for California veterans and dependents of veterans who died or were totally disabled as the result of service to continue their education. The total assistance is limited to $1,000 per veteran, and includes subsistence of up to $40 per month based on actual school attendance, plus necessary books and supplies up to a total cost of $50 per month. The educational aid to dependent widows and children is not limited as to total amount, but cannot exceed $900 per school year. Subsistence payments are limited to $50 per month for dependents attending college, and $20 per month for high school students. Assistance to widows is limited to not more than 4 years duration, or its equivalent in part-time training. Other eligibles may file for and receive assistance when they are between the ages of 14 and 21. Assistance may continue until the course is completed, or through age 26. The maximum age is increased through age 30 if the dependent's education is interrupted by military service. This is of particular importance to medical students and others who seek to complete long-term professional studies.

The Educational Assistance program encourages training, which might otherwise be beyond the applicant's financial means. While the low subsistence covers only a part of the present-day cost of school attendance, it serves as an incentive to continue in school and to divert other resources toward an educational goal.

Only applicants whose federal benefits are no longer available are accepted, therefore, there is no duplication with federal educational programs. Veterans must show a legitimate need for further training and must also demonstrate ability to successfully pursue the educational course requested. Division representatives also insure that the selected educational plans are financially sound, and entitlement is budgeted as necessary. Student's grades are reviewed periodically and only those making satisfactory progress are continued. As a result of these policies, substantial savings are realized and the full $1,000 veterans entitlement is seldom used; the average expenditure being approximately $500. However, increased enrollment in 1963-64 will require an additional $486,183 from the Emergency Fund.

The 1964-65 fiscal year is based on an estimated average enrollment of 13,100; 5,400 veterans and 7,700 dependents.

Since the State program of Educational Assistance to Veterans is no longer a priority item for General Fund support, it is proposed that the program for 1964-65 be financed from surpluses in the Farm and Home Building Fund. Because of the availability of this special fund surplus, financing for the education of dependents of veterans for 1964-65 is also transferred from the General Fund.

GENERAL ANALYSIS

Objectives

The Veterans' Home of California was established to provide a home for qualified California veterans who have physical disabilities and need hospital, chronic, or domiciliary care when they are unable to provide for themselves.

Program and Performance

The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken over by the State in 1897. As of June 30, 1963, there were 1,864 resident members, including 60 women veterans. The Federal Government acknowledges its responsibility for the veterans cared for by contributing $912.50 per year for the support of each member.

To be eligible for admission, a veteran must have been a resident of California for at least 5 years immediately prior to making application, and have honorable wartime service in the armed forces of the United States. He must have temporary or permanent disability to the extent that he is unable to follow a gainful occupation and be financially unable to provide for his hospitalization or domiciliary care. The home has no facilities for and does not accept veterans who are mentally ill, tubercular, chronically alcoholic, or addicted to narcotics or other drugs. Chapter 1825, Statutes 1959, authorizes the Department of Veterans Affairs to investigate the financial status of applicants and members to determine if the veteran is able to finance hospital or domiciliary care outside the home.

To carry out its medical program, the home's facilities include a fully accredited modern medical and surgical hospital of 449 beds and a 26-bed receiving ward. The home includes domiciliary unit of 55 beds for women veterans, a recreati center, and various specialized buildings, including some e ployee housing. The hospital staff has 20 full-time physician 103 registered nurses, and 182 hospital aids.

Convalescent hospital cases and most chronic ambulatory p tients are assigned to the convalescent barracks near the ma hospital. Members placed here are normally able to take ca of themselves, go to meals in their own dining room.

Approximately 56 percent of the present membership live the 7 domiciliary sections of the reservation. Of these section 6 are for male veterans, and 1 is for women veterans.

The veterans' home offers possibilities for the rehabilitati of members along physical, occupational, vocational, social, a spiritual lines. Unless employed at the home or excused by t chief of medical services, all domiciliary members are require to perform work therapy duties.

The 1964-65 budget provides for the beginning of a progra to improve the training of nursing personnel at the home. T purpose of this program is to train the nursing staff to provi care appropriate to the aging population. It will be very simil to, and is patterned after, the psychiatric technicians progra of the Department of Mental Hygiene. This program will d velop over a period of several years. Five additional gradua nurses and 7 additional hospital aids are included to meet i creased workload caused by the advanced age and increas disabilities of the member-patients. Two janitors and 1 laundr man are added for support and 1 painter for plant operatio These are on a workload basis.

[a] A public service enterprise fund, not included in overall budget totals.
[b] Federal grants and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The home provides custodial, medical, and nursing care for widows and dependent destitute unmarried daughters of Union Veterans who served honorably in the Civil War.

Program and Performance

Admissions to the home were closed in 1947 and effective May 1, 1954 the facilities were leased to private persons for the purpose of conducting a nursing home for the aged. C August 31, 1962 the home was closed and the one remaini member is receiving care in a nursing home under a contractu arrangement in accordance with standards of care and servi prescribed by the Department of Veterans Affairs. Under t provisions of Chapter 337, Statutes of 1951 the Woman's Reli Corps Home property has been transferred to the Universi of California by the Director of Finance.

GENERAL ANALYSIS

Objectives

This 5 member nonsalaried commission, created by Chapter 430, Statutes of 1957, is appointed by the Governor, to promote and provide for the welfare of Spanish War veterans and to assist in the maintenance of the headquarters of Department of California, United Spanish War Veterans.

Program and Performance

The program provides for the traveling expenses of the commission and for contractual services with the Department of California, United Spanish War Veterans.

	Other funds [a]	–	*2,545,530*	*5,137,708*

PROVISION FOR SALARY INCREASES

The majority of the State's officers and employees received salary adjustments effective January 1, 1964, in amounts ranging up to 10 percent in accordance with the provisions of Chapter 8, Statutes of 1963, First Extraordinary Session.

The 1964-65 Budget continues this program level and includes an additional $1,540,000 to finance this authorized salary level for the proposed new positions recommended for the 1964-65 fiscal year.

Legislation will be proposed to provide a salary increase program for the justices, judges and their attachés including an increase in the retirement contribution rate for both members and the State at a total state cost of $1,954,700 in the budget year.

The State's officers and employees whose salaries are set by statute have been budgeted for increases in salary levels at an additional cost of $213,623 during the 1964-65 fiscal year. This increase is dependent upon the passage of legislation to establish adequate compensation levels for these officers of California government.

The exempt positions, the salaries for which are approved by the Director of Finance, have been budgeted for an increase to permit adjustment in the salary ranges for these positions commensurate with those granted by the Personnel Board for related civil service employees. The implementation of this for the 18-month period starting on January 1, 1964 will amount to an additional $439,890 from the General Fund and will require a deficiency appropriation as an urgency measure.

	SUMMARY			
	TOTAL EXPENDITURES			
	Unallocated balance *(General Fund)*	–	$732,227	$1,000,000

GENERAL ANALYSIS

Objectives

To provide funds for various state agencies for unseen contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts as necessary are allocated to agencies by the Department of Finance upon finding of need.

Program and Performance

Unanticipated demands during the 1962-63 fiscal year required major allocations for emergency fire suppression, Department of Conservation ($422,000); increased size of election pamphlets, Secretary of State ($143,803); expenses of returning fugitive from justice ($80,000); court costs and county charges ($97,436); increased data processing costs related to OASDI, payroll deductions, uniform disposition of unclaimed property in safe deposit boxes and gift tax compliance, State Controller's Office ($317,343); costs related to United States versus Anchor Oil Company case, Department of Justice ($60,000); alterations to Archives Building ($122,500).

Major allocations during the 1963-64 fiscal year are for increased admissions, Department of the Youth Authority ($500,000); court cost and county charges ($60,000); increased costs due to population increase, Department of the Youth Authority ($182,716); revision of auto use tax law, State Board of Equalization ($280,761); emergency fire suppression, Department of Conservation ($150,000); increased number of students eligible for educational assistance, Department of Veteran's Affairs ($486,183); annuitants Health and Welfare benefits ($188,500); acceleration of adoptions, free textbook ($1,111,000); additional assistance to counties for Tuberculos Sanitoria ($177,915); provide protective groin against seve storms, Santa Barbara County, Division of Small Craft Ha bors, loan ($150,000); salaries of additional superior cou judges ($101,783).

Special appropriation bills in the amount of $3,750,000 wi be submitted to finance required allocations in 1963-64 fisc year. It is also proposed that $1,000,000 be appropriated for th 1964-65 fiscal year.

Authorization to make temporary loans is proposed in th amount of $500,000 to finance state agencies' operations tha would be curtailed due to delayed receipt of reimbursements o revenues. There will be no cost to the General Fund. Interes would be charged on loans to special funds. This is a minimu amount as indicated by past requirements.

The detail below includes allocations from the Emergenc Funds, Old Age and Survivors Insurance Fund (OASDI, Ite 287, Budget Act of 1963) and Salary Increase Fund made i the past and current fiscal years. All these allocations ar shown as available funds in each agency budget. The unallocate balance of the Emergency Fund shows as an expenditure in th section of the budget.

Advisory Commission on Indian Affairs

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
SUMMARY				
TOTAL EXPENDITURES *(General Fund)*	–	$5,000	$9,000	$4,000 (80%)

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 2139, Statutes of 1961, as amended by Chapter 1924, Statutes of 1963, to study the problems of the American Indians residing in California, and to propose needed revision of any and all State laws pertaining to the Indians and the 3 relocation centers in California.

Program and Performance

The commission consists of 9 members: the Director of Social Welfare, the Director of Public Health, the Director of Education, 3 members of the Senate, and 3 members of the Assembly. The commission is required to report its findings, together with any suggested legislation, to the Governor and the Legislature. The commission terminates on September 18, 1966.

GENERAL ANALYSIS

Objectives

The California Arts Commission was created by Chapter 1742, Statutes of 1963, to insure that the role of the arts in the life of our community will continue to grow and to play a more significant part in the welfare and educational experience of our citizens, and establish the paramount position of this State in the nation and in the world as a cultural center.

Program and Performance

The commission is composed of 15 members appointed by the Governor broadly representing all fields of the performing and visual arts. The commission and its staff will: make a survey of institutions within the State engaged in artistic and cultural activities, determine the artistic and cultural needs of our citizens, ascertain how existing and proposed resources should serve the cultural needs, assist communities in originating their own cultural and artistic programs, then submit an annual report to the Governor and the Legislature concerning the studies and recommendations of the commission.

TOTAL EXPENDITURES *(General Fund)*	$67,534	$129,167	$87,500	—$41,667 (—32.3%)

GENERAL ANALYSIS

The cash position of the General Fund will require supplemental sources derived from loans authorized from special funds to meet the cash disbursement obligations on time during the 1963-64 and the 1964-65 fiscal years. The loans occur during the months of December and January and will be repaid during the months of February, March and April from General Fund revenue collections.

	Totals	$857,259	$2,083,421	$3,330,093

GENERAL ANALYSIS

The expenditure of state funds to increase or decrease the Service Revolving Fund, the Correctional Industries Revolving Fund, the Small Craft Harbor Revolving Fund and the Revolving Loan Fund are consolidated in this section of the budget. Program and performance within previously authorized funds are separately reported elsewhere in this budget under the respective revolving fund activity.

The Service Revolving Fund (see Appendix) provides a variety of services to state agencies which include operation of central stores, data processing equipment rental, data processing service, documents sales, office machine repair, state printing, radio maintenance, rented buildings, reproduction service and transportation service. Additional General Fund capitalization in the amount of $1,330,093 is required for activities of the Service Revolving Fund. A schedule of "Summary of Augmentation Requirements" explaining the financing appears in the Service Revolving Fund budget. This amount represents the cost of fixed assets that cannot be financed within operations or from other reserves that become excess to current needs during the fiscal year.

Chapter 2127, Statutes of 1963 appropriates $35,000 from the General Fund to the Revolving Loan Fund (see Appendix) in order to provide loans to recipients of aid to the blind.

The Correctional Industries Revolving Fund (see Appendix) is authorized to meet the necessary expenses in the administration and operation of the industrial work programs of the various institutions under the jurisdiction of the Department of Corrections. The legal basis for this fund is found in Section 2714 of the Penal Code. A cash balance has accrued which is greater than necessary to carry out the current purposes of this section. It is anticipated that $600,000 will revert during the current year to the appropriations from which they came.

Section 8352(g) of the Revenue and Taxation Code appropriated $750,000 annually from the Motor Vehicle Fuel Fund to the Small Craft Harbor Revolving Fund (see Local Assistance). Chapter 2102, Statutes of 1963 increased this amount to $2,000,000 annually commencing in the current year. This sum represents money attributable to taxes imposed on motor vehicle fuel used in propelling vessels.

GENERAL ANALYSIS

Health and welfare benefits for annuitants of retirement systems are reported here as miscellaneous personal services. Statutory employees retirement and health and welfare benefits are reported for 1962-63 in this budget and are included in the various agency budgets in subsequent years. Also the appropriation of $5,000,000 for the Old Age and Survivors Disability Insurance program is reported in this budget for 1963-64 with $4,459,213 of the appropriation being allocated by executive order by the Department of Finance to the various state agencies. These funds are reported as expenditures in those budgets for 1963-64 and are included in their budget appropriations for 1964-65.

State contributions for state employees who are eligible for retirement service credit for federal service under the provisions of Sections 20921-20922 of the Government Code are reported in this budget.

The State's contribution for health and welfare increased from $5 to $6 during 1963-64 in accordance with 1963 legislation. This increase in the State's contribution is one of 2 factors creating the need for $188,500 from the Emergency Fund during 1963-64. The other factor is the offering to annuitants the opportunity to obtain these benefits in February 1963. This unanticipated offering increased the number of annuitants covered over that which was anticipated in the 1963-64 Budget. A reduction in the 5 percent of premiums for contingencies and administration to 4.1 percent on January 1, 1964, was offset by an increase in premium rates effective the same date. The costs for annuitants health and welfare benefits is based on the following average number of annuitants for each retirement system:

Retirement System	NUMBER OF ANNUITANTS 1962-63	1963-64	1964-65
Judges'	50	71	90
Legislators'	26	26	30
Employees'	7,927	8,677	10,300
Teachers'	56	58	68

GENERAL ANALYSIS

Chapter 1681, Statutes of 1963, set forth comprehensive rules governing liability and nonliability of the State for tort actions of public officers, servants, and employees. This act also sets forth rules governing extent of duty of the State to pay judgments against its officers, agents and employees and the duty of the State to indemnify such personnel with respect to claims based on liability within scope of the act.

The Budget Act of 1963 provided for an appropriation for the current year for the administration, investigation, defense and payment of tort liability claims, settlements, compromises and judgments against the State, its officers, servants and employees. Based on the limited experience of the current year, $1,616,000 is proposed for the budget year.

GENERAL ANALYSIS

These costs reflect compensation, hospitalization, and medical care as prescribed by the Workmen's Compensation Act, for state employees injured in line of duty, whose salaries are paid from the General Fund, and services of State Compensation Insurance Fund as adjusting agent. This is an increase of $190,000, or 8.5% over 1961-62.

GENERAL ANALYSIS

Objectives

This presentation indicates the interest and principal payments due the bondholders for state construction program bond issues sold for the purpose of providing cash for capital outlay programs previously financed by appropriations and included in the agency budgets. The bond source financed projects are not added into the statewide expenditure totals of the State of California as the footnotes indicate. The debt service costs for general obligation bonds are paid by the General Fund and are included in the statewide expenditure totals.

Program and Performance

The state construction program bond sales are timed to occur when cash is required and market conditions are favorable to implement legislative authorizations under provisions of the State Construction Program Bond Acts.

State Construction Bond Act	Total Authorized	November 30, 1963 Issued	November 30, 1963 Unissued
1955	$200,000,000	$200,000,000	–
1958	200,000,000	200,000,000	–
1962	270,000,000	50,000,000	$220,000,000

Three future bond sales of $50,000,000 each are planned to occur prior to June 30, 1965.

Other bond issues for building programs authorized in previous statutes are included in the following schedule.

Debt service for school building bonds is reported in the local assistance section of the budget under the heading of education. Debt service for public service enterprises is paid from revenue derived from the activity it relates to and is reported under the programs of the Veterans Farm and Home Building Fund of 1943, San Francisco Harbor Improvement Fund, the Small Craft Harbor Improvement Fund, and the California Water Resource Development Bond Fund.

EXPENDITURE BY ISSUE	ACTUAL 1962-63	ESTIMATED 1963-64	ESTIMATED 1964-65

DEPARTMENT OF GENERAL SERVICES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

The 1964-65 Capital Outlay program includes the acquisition of various mountain top sites, currently leased, for radio vaults. Property acquisition is proposed for temporary parking and future office building sites in San Francisco.

Alterations are needed in Sacramento because of agencies moving into the Retirement Building with subsequent moves of other agencies into vacated space. Involved are: the Veteran's Building, $300,000; Agriculture Building, $40,000; and Office Building No. 1, $368,000.

This budget includes $233,000 to air condition Office Building No. 1 in Sacramento. Modernization of the 3 elevators in the west portion of the Capitol is included. It is necessary to repaint the exterior of the Capitol.

Provision is made for the initial equipment complement for the Stockton State Building which will be completed in March, 1965.

A feasibility study is proposed regarding a possible future parking facility for parking adjacent to the State Capitol. A joint project with the City of Sacramento is under consideration.

Minor projects include the reroofing of the State Capitol and the extension of the lawn sprinkler system in Capitol Park.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Land acquisition	–	–	$100,000
General Fund			
To acquire sites for mountain top radio vaults.			
Land acquisition, San Francisco	–	–	437,500
To acquire property for temporary parking and future building sites.			
Alterations of Sacramento buildings		–	708,000
General Fund			
To alter space vacated by agencies moving into the Retirement Building.			
Air condition office building No. 1	–	–	233,000
General Fund			
To provide air conditioning for office building No. 1.			
Replace elevators, State Capitol	–	–	125,000
General Fund			
To modernize elevators in west wing of State Capitol.			
Paint State Capitol	–	–	90,200
General Fund			
To repaint exterior of the State Capitol.			
Equip Stockton building	–	–	19,246
General Fund			
To equip Stockton building opening March, 1965.			
Study of Sacramento city garage	–	–	5,000
General Fund			
To provide funds for a feasibility study of a parking lot on a joint venture basis with the City of Sacramento.			
Minor Projects: [b]			
Reroof State Capitol Building	–	–	36,630
Install sprinkler system, Capitol grounds	–	–	36,000

ESTIMATED 1963-64 EXPENDITURES

Minor Projects: [b]			
Alterations and equipment, executive offices	–	$33,200	–

[c] Expenditures from bond funds not included in overall budget totals.

DEPARTMENT OF AGRICULTURE

GENERAL ANALYSIS

The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews, advisors, and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the offices of the county agriculture commissioners and consists of protection of pla and animals from infectious diseases, pest animals, weeds a injurious insects and the prevention of the introduction a spread of crop and livestock pests and diseases.

No additional projects are requested for 1964-65.

District Agricultural Associations

DISTRICT FAIR CONSTRUCTION PROGRAM

The detailed expenditure of funds available for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are included in this statement for the purpose of showing the total program for capital improvements at fairs in one place. The amount budgeted for Capital Outlay at county agricultural fairs and citrus fairs is reported in Local Assistance for Other Purposes. The Capital Outlay Programs of the State Fair and Exposition and the California Museum of Science and Industry are shown in following sections.

Expenditures for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the Public Works Board. Provision is made to transfer the unused balances appropriated by Business and Professions Code Section 19627 for encouragement of agricultural fairs to meet increased needs for capital expenditures at fairs during 1963-64 and 1964-65.

The projects shown for each fair are those included in the recommended 5-year program for fairs.

ACTUAL 1962-63, ESTIMATED 1963-64 AND PROPOSED 1964-65 EXPENDITURES [1]

1st District Agricultural Association, Oakland			
Minor Projects:			
Relocate and reconstruct warehouse and maintenance yard (partial cost)	$1,069	$17,731	–
1-A District Agricultural Association, San Francisco			
Minor Projects:			
Prepare master capital improvement plan *(General Fund)*	–	30,000	–
2nd District Agricultural Association, Stockton			
Minor Projects:			
Construct poultry building	–	–	$30,000
Construct cold storage room in agriculture building	–	–	10,000
Improve parking lot, including access roads and lighting	59,147	10,000	30,000
Construct restrooms	–	22,000	–

The Museum of Science and Industry is located in Exposition Park, in Los Angeles, and contains permanent, and special short-term audio-visual educational exhibits, dedicated to the purpose of educating, informing, inspiring and enriching visitors by demonstrating the industrial and scientific progress of the State of California, and to illustrate and communicate the importance of industries, industrial enterprises, resources and products of every kind and nature as a vital factor in the economy of the State of California. This agency owns the 104 acres comprising Exposition Park, which includes the Los Angeles Memorial Coliseum, Los Angeles Memorial Sports Arena, the Los Angeles County Museum of Art, History and Science, the City of Los Angeles Rose Garden, and the City of Los Angeles Swim Stadium.

The Space Museum, which was authorized by the Legislature in 1959, is being developed with participation by major leaders in the aerospace industry, and will house exhibit gifts from industry, the United States government, and those exhibits constructed from private funds donated to the museum. Phase I, remodeling of the museum-owned National Guard Armory, which will house the new Space Museum, was completed in 1962. Phase II, replacing the entire roof and installing, in the southern half, a heating and ventilating system, is scheduled for 1963-64 and will make the Space Museum adequate for permanent occupancy. The opening is presently scheduled for the 1965-66 fiscal year.

Construction of the Hall of Health authorized by the Legislature in 1963 is in the planning stage, and necessary co-ordination with those expected to participate financially in the program, including Los Angeles County, is being completed.

During 1964-65 the budget provides for a new roof on the main museum building. The existing roof is 53 years old and repeated repairs have not remedied the continuing appearance of cracks and leaks.

Included in 1964-65 as minor projects are:

(1) The improvement of the rear entrance to the main museum building, necessary to accommodate the increased visitor traffic generated by the activities at the Sports Arena and Los Angeles Memorial Coliseum. This improvement conforms to the master plan for the cultural portion of the park.

(2) The improvement of permanent exhibits consisting of the Redwood Empire Room and Recreation, Parks and Forests Exhibits to bring them up to proper display standards.

The budget provides for extending the availability of funds previously appropriated for land acquisition. Negotiations are still in progress to acquire the last parcel of land originally contained in the approved Santa Barbara parking lot program. It is unlikely that these complex negotiations can be completed and the land acquired and improved in 1963-64. Therefore, the balance of funds to finance acquisition and necessary improvements is needed in 1964-65.

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

GENERAL ANALYSIS

The building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 inmate per cell
For a dormitory—1 bed per 50 square feet

The 1964-65 major construction program is directed primarily toward expansion of capacity to meet the needs of an increasing inmate population.

The 1964-65 major program includes funds to equip the following: the new Sierra Conservation Center, the inmate activity building at Chino, the Psychiatric Treatment Unit at the Medical Facility, and the kitchens and dining rooms at the Institution for Women. In addition, the construction program proposes construction of additional capacity for the institutio at Tehachapi, project planning, including working drawing for a special security facility on the grounds of the Medica Facility, Vacaville, site acquisition development and projec planning for a medical correctional institution in souther California, the replacement of two boilers and construction o an inmate activity building at San Quentin, an irrigation wate supply line at the Medical Facility, centralized dining room for the Institution for Women and an addition to the dairy a the Correctional Training Facility.

The minor construction program for 1964-65 proposes essen tial projects at older institutions, as well as projects to correc deficiencies and provide improvement of the physical plants o most institutions.

[c] Expenditures from bond funds not included in overall budget totals.

[1] Sierra and Southern Conservation Centers operated as branches of the California Conservation Center during 1962-63 and 1963-64. Expenditures are included under the California Conservation Center and shown here for informational purposes only.

[2] Correctional Institution at Tehachapi operated as a branch of the Institution for Men in 1962-63. Expenditures are included under the Institution for Men and shown here for informational purposes only.

[3] Funds for minor projects are appropriated to Departmental Administration for allocation to the various institutions. Expenditures are included in specific institution budgets and shown here for informational purposes only.

[1] Oak Glen conservation camp transferred to Division of Forestry in 1963-64.

[2] Population growth for 1966 and 1967 not allocated by institution.

[3] This total contains 104 capacity which will be budgeted in 1965-66 and will become available in 1966-67. Capacity adjustments of 24 at Correctional Training Facility and a new camp of 80 with Sierra Conservation Center.

[4] This budget proposes project planning for additional capacity of 1,200 at Medical Facility and site acquisition and project planning at Medical Correctional Institution of additional capacity by 1972 of 3,600.

[5] New camp to be budgeted 1965-66.

California Conservation Center

The California Conservation Center, located on 1,120 acres in Lassen County, about 7 miles east of Susanville, began receiving inmates in February 1963. This institution is a permanent facility, constructed of reinforced concrete and brick, with a rated capacity of 1,253 inmates including a 100-man camp and a hospital. Custodial security is provided for 600 minimum and 600 medium custody inmates, plus the capacity of the hospital. This institution will serve as a material and inmate manpower support center for 14 conservation camps in 1964-65.

This budget provides funds to correct construction deficiencies and improve the physical plant.

	Correctional Institution at Tehachapi			

This institution is located approximately 10 miles northwest of Tehachapi, Kern County, on approximately 1,680 acres of land. The present institution, with a rated capacity of 380 inmates, has been operated as a branch of the Institution for Men. On July 1, 1963, it became a separate institution, administratively responsible to the Superintendent, Institution for Men. This budget provides funds for construction of additional capacity and renovation of the existing institution and for minor projects to correct deficiencies and improve the physical plant.

	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct additional capacity and partial renovation of existing institution	–	–	$9,000,000
	This project will provide for the construction of 640 new dormitory, 30 hospital, and 20 isolation beds adjacent to the existing institution. It will also include construction of 160 additional beds on the site of the existing facilities plus feeding and ancillary facilities to service both existing and new construction.

Correctional Training Facility

This is a medium security institution with agricultural, industrial, academic and vocational training programs. It is located on 907 acres of land in the Salinas Valley, about 4 miles north of the town of Soledad.

The Central Facility is of permanent reinforced concrete construction and was completed in December 1951, with a rated capacity of 1,575. The north unit, also of permanent construction, has a rated capacity of 1,220. A temporary barracks facility with a rated capacity of 272, but a resident population of 630, operates as a farm unit. Five camps with a capacity of 320 are administered from the central institution. During 1964-65 a new conservation camp, Piney Creek, will be added to the camps administered by this institution.

Included in this budget are funds for construction of an addition to the dairy and for minor projects to correct deficiencies and improve the physical plant.

STATE BUILDING PROGRAM			
PROPOSED 1964-65 EXPENDITURES [a]			
Construct addition to dairy	–	–	$80,000
This project proposes an expansion of the dairy to permit increased production and distribution of milk to state-owned facilities in Central California.			
Minor Projects: [b]			
Renovate bakery area	–	–	27,170
Install sprinkler system in industries warehouse	–	–	8,500
Replace laundry equipment	–	–	5,240
Equip Piney Creek conservation camp	–	–	11,006
Replace reservoir roof	–	–	15,200
Alterations and improvement projects of $5,000 or less	–	–	3,400
ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]			
Construct warehouse	$169,050	—$21,850 [d]	–
Construct vocational shops	—27,260 [d]	–	–
Construct addition to North Facility Administration Building	—1,932 [d]	–	–
Construct addition to dairy	—841 [d]	–	–
General Fund			
Construct addition to industries warehouse	—1,347 [d]	–	–
General Fund			
Minor Projects: [b]			
Relocate vocational agricultural greenhouse	–	9,900	–
Replace laundry equipment	–	15,685	–
Recondition south barracks	–	4,990	–
Alterations for increased security	–	9,130	–
Provide 28 additional cells in old shower area	13,025	4,975	–
Construct storage facilities	34,869	111	–
Construct 2 dairy corrals and runways	8,913	87	–
Recondition culinary refrigerators	18,300	–	–
Recondition south buildings	–	346	–
Recondition quonsets and residences	–	172	–
Construct 2 dairy corrals	651	65	–
Construct vocational agriculture classroom	26,442	60	–
Alteration and improvement projects of $5,000 or less	22,052	16,941	–
TOTAL EXPENDITURES, CAPITAL OUTLAY	$261,922	$40,612	$150,516
General Fund	*122,064*	*62,462*	*70,516*
State Construction Program Fund [c]	*139,858*	*—21,850*	*80,000*

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

Deuel Vocational Institution

This medium-security institution is located on a 783-acre site in San Joaquin County 4 miles east of Tracy, and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities also available.

The institution has a capacity of 1,515 inmates, which includes a reception-guidance center with a capacity of 300 inmates, where Youth Authority wards committed by the criminal courts are processed, and an adjustment center to handle behavior problem cases in the younger age group.

Budget proposals include minor construction projects to correct deficiencies and improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES

Minor Projects: [b]			
Convert "K" wing to maximum security unit	–	–	$35,600
Install concrete pipeline for irrigation	–	–	9,750
Provide sprinkler system for industries warehouse	–	–	8,500
Alterations and improvement projects of $5,000 or less	–	–	11,300

[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

Institution for Men

The Institution for Men is located in San Bernardino County about 2 miles south of the town of Chino on 2,435 acres of land. This is primarily a minimum security prison with an extensive agricultural and industrial program. It was opened in 1941 and consists of reinforced concrete permanent main buildings, semi-permanent steel industrial buildings, frame buildings, and temporary steel barracks buildings. The institution has a rated permanent-type capacity of 768 with a capacity of 217 in the temporary barracks. The southern reception-guidance center is located on a 15-acre portion of the Chino site, and is reinforced concrete construction with a capacity of 550 inmates.

The budget provides funds for equipping the newly constructed inmate activity building and for minor construction projects to correct deficiencies and improve the physical plant.

Medical Correctional Institution

The Medical Correctional Institution, which was authorized by Chapter 1243, Statutes of 1963, is proposed as part of a complex of correctional facilities. This complex will include the following: a medical correctional unit of 1,200 capacity arranged in design of 2 or more sections for young men and with programming similar to the present Medical Facility; a correctional training unit for 1,200 men under medium security in 2 units of 600 each; a young men's medium security industrial training unit of two 600 man sections. The total capacity c this complex will be 3,600. It is planned as the major prograi in providing for the department's capacity requirements throug 1972, which at that time will be 33,000, excluding nonfelon nai cotic cases.

This budget provides funds for site purchase, development an project planning of this new institution.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Site acquisition, development and project planning To provide for initial planning and site purchase of a 1,200 man medical correctional unit to be part of a 3,600 man correctional center complex.	–	–	$300,000

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	Medical Facility			
	The Medical Facility is located in Solano County, about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are used for inmate and employee building areas. This institution, with a total rated capacity of 1,935, includes the central facility with a capacity of 1,342 and a reception-guidance center unit with a capacity of 593. During 1964-65 a new 100 capacity psychiatric treatment unit will be open in the central facility which will increase total capacity to 2,035. The central facility provides medical and psychiatric treatment and special custodial care for inmates suffering from mental illness, chronic physical illness, sexual deviation, severe emotional disturbances, and tuberculosis. Due to the types of inmates, emphasis is placed on the psychiatric and medical programs rather than the vocational, academic and industrial programs carried on in other institutions in the department. This budget provides funds for the initial planning of a 1,200-man special security unit to house the Department's most difficult to handle cases for which adequate facilities are not now available.. Provision is also made for equipping the Psychiatric Treatment Unit currently under construction, construction of an irrigation water supply line, and a minor project to correct deficiencies and improve the physical plant.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Project planning, including working drawings, for special security facility	–	–	$500,000
	This project will provide for initial planning of a 1,200-man maximum security facility.			
	Equip psychiatric treatment unit	–	–	80,730
	This project will provide equipment for the 100-man unit currently under construction.			
	Construct irrigation water lines	–	–	106,000
	This project will provide an irrigation line for receiving water for nondomestic purposes on state-owned lands. Use of water is per agreement with the local district to reserve water for current use and future expansion.			
	Minor Projects: [b]			
	Alterations and improvements project of $5,000 or less	–	–	4,055

Men's Colony—West Facility

The Men's Colony—West Facility is located at Los Padres adjacent to the East Facility, 5 miles west of the City of San Luis Obispo. The West Facility is a minimum security facility utilizing the hospital section of the former army installation at Camp San Luis Obispo to provide capacity for 1,350 inmates in barracks-type wooden buildings. The program has been designed especially to handle the older inmates. Minor projects are proposed to correct deficiencies and improve the physical plant.

Rehabilitation Center

The Rehabilitation Center is located at Norco, Riverside County, approximately 5 miles north of Corona. The center was authorized by Section 6550 of Chapter 12 of the Penal Code for the purpose of treating and housing nonfelon narcotic addicts. The facility is a former naval hospital which was acquired from the Federal Government without cost. Alterations made to the plant provide housing and auxiliary services to care for and treat 2,300 nonfelon addicts. The first inmates were received in January 1963.

State Prison at San Quentin

San Quentin is the oldest prison in the California System—the first buildings having been erected in 1852. It is a close-medium security prison with extensive industrial, education and treatment programs. The institution is located on 404 acres adjacent to San Francisco Bay in Marin County, about 3 miles southeast of San Rafael. The activation of Black Mountain Conservation Camp and the transfer of Crystal Creek and Deadwood conservation camps to the California Conservation Center in the 1964-65 fiscal year will bring the capacity of San Quentin, including camps, to 3,397. Included in this budget are funds for a boiler to replace 2 existing boilers which are 39 years old and a new inmate activity building. Minor projects are proposed to correct deficiencies and improve the physical plant.

	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct inmate activity building	-		$603,300
	This project will provide a new inmate activity building to replace the existing one which has become structurally hazardous.			
	Replace boilers	-	-	241,000
	This project will provide a new 35,000 pound per hour boiler to replace two existing boilers of 13,000 pounds each and which are 39 years old.

California Institution for Women

The Institution for Women is located in San Bernardino County, 7 miles northwest of the City of Corona on 120 acres, 62 of which are within the custodial enclosure.

All female felons committed to the Department of Corrections are confined in this institution, which must be able to handle all types of security, serve as a reception center, and provide necessary medical attention. The medical program has been stressed, as well as the academic, vocational and industr program. The capacity of the institution will be 971 beds wi the completion of the new reception-guidance center and t adjustment center now under construction.

Funds are requested to construct dining rooms adjoining t centralized kitchen previously funded and to equip the facili when completed. Minor projects are proposed to correct de ciencies and improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Construct dining rooms	–	–	$359,530
This project, along with the centralized kitchens funded in 1963-64, will provide adequate dining and food preparation facilities to replace the inadequate ones now in use.			
Equip kitchens and dining rooms	–	–	210,000
This project will provide the necessary equipment for the new feeding facilities.			
Minor Projects: [b]			
Construct warehouse	–	–	8,500

GENERAL ANALYSIS

The capital outlay program for the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population. The recent increases in commitment rates has caused a rise in institution populations that has created an urgency for additional capacities. For this reason, additional capacity is emphasized in the building program for this department.

Construction of the second and third 400-bed institutions and the administration building in the central services facilities are proposed for the Northern California Youth Center. Working drawings for the central laundry and a 200-bed girls' institution and 100-bed reception center are also proposed for the same institution. In addition, equipment for the first 400-bed institution and the central administration service facilities is included.

Funds for project planning, including working drawings, are proposed for the first phases of a new youth center in Southern California. This will include a central administrative core and the first housing units. This facility will ultimately house approximately 4,800 wards, including those in the present Youth Training School.

This institution, together with the Northern California Youth Center, is planned to meet the department's capacity needs for the next 20-25 years. Construction of a water storage tank to increase water storage capacity and installation of pipe to complete the replacement of an open ditch-flume water system are proposed for Fricot Ranch School for Boys.

One 50-bed living unit to replace an unsafe 40-bed unit is proposed for the Fred C. Nelles School for Boys in the 1964-65 fiscal year. Equipment for 2 other living units to be completed and occupied during the 1964-65 fiscal year is also included.

Installation of athletic field lighting is proposed at Paso Robles School for Boys to permit fuller use of available physical education facilities.

The increase in California juvenile population and resultant increased commitments will require additional reception center beds for boys and girls. Construction of a 100-bed reception unit for girls at the Ventura School for Girls during the 1964-65 fiscal year is proposed. This will enable the department to transfer girl reception center operations from the Southern California Reception Center to the Ventura School for Girls. The beds thus made available will be used for processing increased boy admissions. Two classrooms to provide educational facilities for increased institution population are also included.

Minor construction projects are proposed for all institutions with the exception of Fred C. Nelles School for Boys. Minor projects will provide for necessary alterations and improvements and small additions which will improve efficiency.

[c] Expenditures from bond funds not included in overall budget totals.

[1] Allocated to various Youth Authority institutions. Expenditures shown in the budgets for those institutions.

Northern California Reception Center and Clinic

This institution, located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins, has a capacity of 313 living unit beds plus 32 hospital and detention beds. Here all boys and girls committed from Northern California are received and processed for transfer to resident institutions. The major purpose is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given both for newly received wards and the serious medical and psychiatric cases developing in the Youth Authority's Northern California institutions.

The budget includes minor projects to correct deficiencies and improve the physical plant.

Youth Authority Conservation Camps for Boys

Four conservation camps are operated in co-operation with the Division of Forestry. The camps are located at Pine Grove in Amador County, Mount Bullion in Mariposa County, Ben Lomond in Santa Cruz County, and Washington Ridge Camp in Nevada County. In addition to the 4 main camps, 3 spike camps are operated as branches of the main camps on a year-round basis. Total capacity of these conservation camps is 360.

Projects are budgeted to correct deficiencies and improve the physical plant at the Washington Ridge Camp.

STATE BUILDING PROGRAM

Fricot Ranch School for Boys

Fricot Ranch School for Boys is a school for boys in the 8-13 age group. It has a bed capacity for 220 plus 12 hospital and detention beds. It is located in the foothills, 11 miles from the City of San Andreas, at an elevation of approximately 1,700 feet. The general terrain of the country is mountainous. Of the total of 1,090 acres, buildings are located on approximately 50 acres.

Construction of water storage and supply facilities is proposed for 1964-65. Minor projects are proposed in 1964-65 to correct deficiencies and improve the physical plant.

STATE BUILDING PROGRAM			
PROPOSED 1964-65 EXPENDITURES [a]			
Construct water supply and storage facilities	–	–	$107,700
This project will provide a 140,000 gallon water tank for a full day emergency supply of water. Provision is also made to complete the replacement of the open flume leading to the water supply of the institution.			
Minor Projects: [b]			
Construct additional electrical facilities	–	–	16,000
Construct staff residence	–	–	14,600
ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

	Northern California Youth Center			

The Northern California Youth Center is the first of 2 such centers planned for California. It is planned that all of the department's capacity requirements for Northern California in the next 20-25 years will be provided here. It is anticipated that twelve 400-ward institutions served by one central administrative and business services unit will be constructed on a large site in San Joaquin County. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, and hospital care will be provided by the central unit. Thus, the operational economies of a large institution are expected with the program benefits of small 400-ward units.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Services and Administration Facilities:			
Equip institution No. 1 and central facilities	–	–	$997,860
This will provide equipment for previously funded projects.			
Construct administration building	–	–	542,200
This project provides for the construction of central administrative facilities necessary to meet the requirements of operating a 1,200-bed capacity Youth Center.			
Construct 400-bed institution No. 2	–	–	6,342,300
This will provide for the construction of the second institution at the Youth Center. The rated capacity is for a 400-bed institution plus 16 detention beds.			
Construct 400-bed institution No. 3	–	–	6,250,285
This project provides for the construction of the third 400-bed institution at the Youth Center. The rated capacity is 400 beds plus 8 detention beds.			
Working drawings—laundry and dry cleaning plant	–	–	50,000
This project will provide working drawings for a laundry and dry cleaning plant for 1,680 wards and will be master planned for eventual expansion to serve a population of 4,800.			
Working drawings—girls' reception unit	–	–	375,000
This project provides working drawings for an institution containing 100 reception center beds and 200 training school beds for girls.			

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Construct central administrative and service facilities	–	$1,602,000	–
Equip central adminstrative and service facilities (partial)	$477	9,523	–

Southern California Youth Center

The Southern California Youth Center, authorized by Section 1760 of the Welfare and Institutions Code, is to be located near Ontario, adjacent to the Youth Training School. It is the second of 2 youth centers in California which are planned to handle the department's capacity requirements for the next 20-25 years. The first of these youth centers is the Northern California Youth Center located near Stockton. The southern youth center is planned to have a total capacty of 4,800, including the Youth Training School which is presently operating with a capacity of 1,200 wards.

The center will follow the same basic plan as its norther counterpart in that it will have a central administrativ and services facility providing utilities, maintenance, supply food preparation, business, and administrative services for institutions of 400 capacity each. Youth Training School wil require a limited amount of administrative services from th central administrative unit of the center.

This budget provides for the first increment of project plan ning and working drawings for the central administrative an service facilities and for the first housing units.

STATE BUILDING PROGRAM

	PROPOSED 1964-65 EXPENDITURES [a]			
	Project planning including working drawings	–		$300,000
	Provides project planning and working drawings funds for the central administrative and service facilities, and the first housing units.

	Ventura School for Girls			
	The Ventura School for Girls moved to a new institution, located in Ventura County, in July 1962. All buildings are of single-story reinforced concrete and brick construction. The institution has a capacity of 400 living unit beds and 66 hospital and detention beds. Each living unit houses 50 girls in single rooms. During 1964-65 a 50-bed living unit will be completed bringing institution capacity to 450 living unit beds. The projects proposed for 1964-65 are to construct a 100-bed reception unit for girls, and to construct and equip 2 home economics classrooms. The proposed construction will enable the Department of the Youth Authority to transfer girl reception center operations from the Southern California Reception Center and Clinic to the Ventura School for Girls. The space normally held for girls at the Southern California Reception Center and Clinic will then be made available for the processing of the projected increased boy admissions. The 2 classrooms will provide educational facilities for the increased ward population.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct 100-bed Reception Center	–	–	$1,400,450
	This project provides for the transfer of girl reception center processing from the Southern California Reception Center and Clinic to the Ventura School for Girls.			
	Construct 2 home economics classrooms	–	–	147,800
	Equip 2 home economics classrooms	–	–	15,225
	This will provide educational facilities and equipment for the increased capacity at this institution.			
	Minor Projects: [b]			
	Alterations and improvements to central laundry	–	–	21,900
	Projects of $5,000 or less	–	–	2,800

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[d] Unexpended balance reported as expended in prior year.

GENERAL ANALYSIS

The Department of Education administers 5 special schools for physically handicapped children, including 1 for the education of the blind, 2 for the education of the deaf and 2 for the diagnosis and educational evaluation of cerebral palsied children. The School for Cerebral Palsied Children, Southern California, now occupies rented quarters in Altadena and will be moved to new facilities adjacent to Los Angeles State College in March, 1964.

School for the Blind

This residential school, located in Berkeley, with a capacity of 200 students, provides for the education of blind and deaf-blind children. The construction program for the 1964-65 fiscal year includes a minor project in the amount of $6,000 to correct deficiencies and to improve the physical plant.

Enrollments

The 1964-65 Capital Outlay Budget for the University includes working drawings and construction for projects designed to provide capacity sufficient to house projected enrollments of 76,587 full-time equivalent (FTE) students in the fall of 1966 and 81,847 FTE in the fall of 1967. The latter figure represents an increase of 19,090 over the estimated FTE for fall 1963. Projects for which construction funds are requested in the 1964-65 Budget are planned for occupancy in 1966, while those projects for which working drawings are requested are planned for occupancy in 1967.

For purposes of meeting physical plant requirements, the Capital Outlay Budget for the University is based on fall enrollment projections rather than the average annual enrollments (an average of fall and spring enrollment) upon which the support budget is based. Historically, fall enrollments have exceeded spring enrollments and facilities are planned accordingly to accommodate the enrollments of the mor demanding semester.

Estimated future enrollments are based upon sta tistics of high school graduates and their progressio through the various collegiate levels with appropriat modifications designed to reflect admission policies an academic programs on particular campuses. While th projections are initially in terms of regular enroll ments, these are converted to FTE student enroll ments for purposes of estimating physical plant spac needs. The projected FTE figures are developed b establishing a relationship between regular enrollmen and FTE (total student credit hours divided by standard number of hours per student) in the mos recent year for which actual figures are available an applying this relationship to projected regular enroll ment figures.

The following table illustrates the actual University FTE student enrollments for fall 1962 and estimated FTE student enrollments for fall 1963 through 1967

Totals	57,835	62,757	67,592	72,391	76,587	81,847

Capacity

The basic unit for measuring capacity of instructional facilities in the University is a weighted average space standard. This standard, expressed in terms of assignable square feet (a.s.f.) per student, includes all the space directly and indirectly necessary for the instruction of the student: classrooms and seminars, class laboratories, research and office space for graduate students and faculty, and supporting space such as laboratory supply rooms, maintenance shops, and storage. The standards vary between levels of student and between academic disciplines. Graduate students and upper division students require more space than do lower division students because of the need for more research and laboratory space. Likewise, students in the natural sciences require more space than students in the social sciences due to the greater use by the former of laboratories housing more and larger pieces of equipment.

The weighted standards are based initially upon a classroom and seminar room utilization of 36 hours per week and a laboratory occupancy level of 24 hours per week. Classrooms and seminar rooms are further programmed so that 67 percent of student stations are occupied during each hour of use and in laboratories it is expected that 80 percent of the student stations will be occupied during each hour of use.

The rated capacity of a campus is established by measuring all space related to instruction (excluding space devoted to organized research) by discipline areas and dividing these figures by the respective weighted average a.s.f. standards per student. The result represents capacity in terms of FTE which may be handled by the existing plant. Capacity of proposed projects is computed in a similar manner.

The total of existing and funded capacity in the University is programmed at 64,439 FTE. Estimated enrollment for fall 1966 is 72,995 FTE. To reduce this deficit of space for 8,516 FTE, construction funds are proposed in the 1964-65 Budget for projects designed to add capacity for 3,820 FTE. Further requested are working drawings for projects to add another 6,448 FTE capacity. Total proposed capacity for fall 1967 amounts to 74,707 FTE compared to an estimated enrollment of 77,944 FTE. Medical school enrollments and space needs are not included in these figures.

Status of Authorized Capacity and 1964-65 Budget Provisions [2]

	Full-time Enrollment	Equivalent Capacity
Existing and funded capacity	–	64,439
1964-65 proposed projects (construction)	–	3,820
Fall 1966 Totals	72,955	68,259
1964-65 proposed projects (working drawings)	–	6,448
Fall 1967 Totals	77,944	74,707

Federal Legislation

During 1963 the 88th Congress passed two acts which will have an impact on the 1964-65 and future capital outlay programs. These acts are Public Law 88-129, Health Professions Educational Assistance Act of 1963 and Public Law 88-204, Higher Education Facilities Act of 1963. Both of these acts authorize federal funds to assist the various states in providing physical facilities to meet the needs of the nation's youth who aspire to a higher education. At the time this budget was prepared no federal funds had been appropriated to implement the legislation, therefore no savings have been anticipated in this capital outlay program. If federal funds do become available during the 1963-64 or 1964-65 fiscal years, provision will be made to provide for their use in achieving the objectives of both programs.

[a] While regular enrollment at Berkeley is to be held at 27,500, FTE enrollment will exceed this figure due to students carrying a number of credit hours which is, on the average, greater than the standard used to compute FTE.

[1] Excluding physical education and military science.

[2] Excludes medical centers.

UNIVERSITY OF CALIFORNIA—Continued

SUMMARY—Continued

PROJECTS PROPOSED FOR FINANCING IN 1964-65

The capital outlay program for the University for 1964-65 toals $63,674,100. Of the total, $61,678,000 is financed from the State Construction Program and $1,996,100 from the General Fund. Outlays for major construction projects account for $49,097,500 or 77 percent of the total program. The balance of $14,576,600 includes equipment, land acquisition, library books, project planning, and minor construction.

Science and Engineering Facilities

To meet the increasing emphasis on these fields, the program includes $28,195,800 or 44 percent of the total proposal for 1964-65. The bulk of this outlay is made up of construction financing of large projects at Berkeley, Santa Barbara, Davis, Los Angeles Center for Health Sciences, and San Diego.

Other Facilities

The 1964-65 request also includes $12,044,500 for working drawings and construction of facilities for other instructional program, libraries, research activities, and the necessary general service supporting units needed at a university. These facilities constitute 19 percent of the total capital outlay program.

Equipment

To equip buildings which will be occupied during 1964-65, the budget includes $9,012,200 or 14 percent of the total program.

Utilities and Site Development

Included in this request are construction items for the new campuses at Santa Cruz, Irvine, and San Diego totaling $4,914,500 plus another $3,942,700 for existing campuses. Of the latter $1,165,800 is requested to provide for necessary utilities to keep pace with the rapid expansion at the Davis campus.

Land Acquisition

Three projects are included at a total of $1,764,900 to purchase sites for future construction at San Francisco, Berkeley, and Santa Barbara.

Library Books

A total of $759,400 is requested for 1964-65 for acquisition of initial complements of books at San Diego (general campus), Irvine, Santa Cruz, and the San Diego Medical School.

Planning

This request totals $1,044,000 including $729,000 for preliminary planning of projects scheduled for working drawings in 1965-66, $200,000 for preliminary planning of selected projects scheduled for working drawings in 1966-67 which require additional time for development, and $115,000 for general planning studies. The latter studies include: a study of health science facility standards to cost $25,000, development of a master drainage plan for Berkeley at $40,000, and $50,000 for miscellaneous studies required in the development of a capital outlay program.

Minor Capital Outlay

The final portion of the capital outlay program totals $1,996,100 for minor capital outlay projects.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
STATE BUILDING PROGRAM			
PROPOSED 1964-65 EXPENDITURES[a]			
STATEWIDE			
Preliminary plans	–	–	$929,000
To provide for (1) the preparation of preliminary plans for projects to be proposed for funding of working drawings in 1965-66 in the amount of $729,000, and (2) the preparation of preliminary plans for selected projects scheduled for funding of working drawings in 1966-67 in the amount of $200,000.			
General planning studies	–	–	115,000
To provide for (1) development of health sciences planning standards $25,000, (2) the preparation of a master drainage plan for the Berkeley campus $40,000, and (3) general planning studies not related to specific projects ($50,000.			
Construct Sierra Foothill Range Agricultural Field Station	–	–	290,500
To prepare working drawings for and construct the first step of station improvements, including land development and office, barn, shop, storage, and staff housing facilities.			
Construct and equip West Side Agricultural Field Station	–	–	178,000
To prepare working drawings for, construct, and equip the completion step of station improvements, including land development and office, laboratory, storage, greenhouse, and staff housing facilities.			

[a] From State Construction Program Fund unless otherwise indicated.

1	**STATE BUILDING PROGRAM—Continued**			
2				
3	**PROPOSED 1964-65 EXPENDITURES [a]—Continued**			
4				
5	STATEWIDE—Continued			
6	Minor Projects: [b]			
7	Imperial Valley Field Station—provide cattle feeding and			
8	preparation and storage facilities sufficient for conducting			
9	environmental and nutritional studies on 400 animals	–	–	$40,000
10	Duplex apartment unit, Mt. Hamilton—construct a building to			
11	house married graduate students from Berkeley and Los			
12	Angeles campuses who must be in residence on Mt. Ham-			
13	ilton for their final predoctoral year of instruction	–	–	32,500
14	Tulelake Field Station—install 1,300 feet of 8-inch irrigation			
15	pipe with valves, sump, pump and drain line; and pro-			
16	vide asphalt coating for station parking area and entrance	–	–	12,500
17	South Coast Field Station—construct an addition of 2,500			
18	square feet to the equipment storage building and provide			
19	overhead doors and walls on east side of existing building	–	–	43,000
20	Photographic building, Mt. Hamilton—construct a 140 square			
21	foot building for liquid air machine and convert released			
22	space in photographic building to darkroom	–	–	5,700
23	San Jose Area Deciduous Fruit Field Station—remove struc-			
24	tures vacated by Women's Relief Corps Home and restore			
25	five acres of land for use in research for departments of			
26	agronomy, entomology, pomology and plant pathology	–	–	16,000
27				
28	BERKELEY CAMPUS			
29	Equip Wurster Hall	–	–	381,900
30	To complete funding of equipment for Wurster Hall (for col-			
31	lege of environmental design). Construction was funded			
32	in the Budget Act of 1961 and a first increment of equip-			
33	ment was funded in the Budget Act of 1963.			
34	Equip biochemistry building	–	–	471,000
35	To equip the biochemistry building funded for construction in			
36	the Budget Act of 1961.			
37	Equip chemistry unit 2	–	–	200,000
38	To provide a first increment of equipment for the chemistry			
39	unit 2 funded for construction in the Budget Act of 1963.			
40	Equip space sciences laboratory	–	–	100,000
41	To equip with office furniture the space sciences laboratory			
42	funded for construction from non-State funds.			
43	Construct alterations to Moses Hall	–	–	396,300
44	To prepare working drawings for and construct alterations			
45	to Moses Hall to accommodate the Institute of Industrial			
46	Relations and the Institute of Governmental Studies.			
47	Construct storm drain system	–	–	252,000
48	To prepare working drawings for and construct an initial			
49	increment of storm drainage facilities to control the			
50	storm flood runoff in the hill area and main campus.			
51	Construct and equip alterations to South Hall	–	–	375,000
52	To construct and equip alterations to South Hall to rehabili-			
53	tate and modernize the building and to accommodate			
54	the Institute of International Relations.			
55	Construct addition to engineering materials laboratory	–	–	3,958,000
56	To construct an addition and alterations to the engineering			
57	materials laboratory with specialized laboratories and			
58	supporting service facilities, offices, and shops for teach-			
59	ing and research in structural engineering and mechanics,			
60	hydraulics, sanitary engineering and transportation engi-			
61	neering.			
62	Construct alterations to Agriculture Hall	–	–	379,800
63	To provide matching funds for nonstate funds to prepare			
64	working drawings for and construct alterations to Agri-			
65	culture Hall to provide expansion of teaching and research			
66	facilities for the departments of entomology and parasitol-			
67	ogy and invertebrate pathology.			
68	Construct and equip alterations to life sciences building	–	–	176,000
69	To provide matching funds for nonstate funds to prepare			
70	working drawings for, construct, and equip alterations to			
71	life sciences building to provide expansion of teaching and			
72	research facilities for the departments of botany, zoology,			
73	and criminology, and the electron microscope laboratory.			
74	Working drawings for mathematical sciences building	–	–	163,000
75	To prepare working drawings for a building with classrooms,			
76	laboratories, offices, and a branch library to accommodate			
77	the teaching and research activities of the departments of			
78	mathematics and statistics.			
79	Land acquisition	–	–	420,000
80	To purchase parcels of land within the area designated in the			
81	long-range development plan for residence hall unit 4 and			
82	$50,000 for purchases of opportunity and necessity for			
83	academic and administrative facilities.			
84				

85 [a] From State Construction Program Fund unless otherwise indicated.
86 [b] Minor projects from General Fund unless otherwise indicated.

1				
2	**STATE BUILDING PROGRAM—Continued**			
3				
4	**PROPOSED 1964-65 EXPENDITURES [a]—Continued**			
5				
6	BERKELEY CAMPUS—Continued			
7	Minor Projects: [b]			
8	Richmond service and storage facility—replace defective material in fire sprinkler system, convert standard sprinklers to low-flow fog-type sprinklers, and install remote fire alarms	–	–	$20,000
12	Gill Tract—restore 4.5 acres of agricultural land used for war-time housing, by providing fencing, water system and drainage	–	–	25,300
15	Oxford Tract—complete construction of three greenhouses by installing booster fans, supplementary filters and air conditioning duct-work for plant growth chambers for department of soils and plant nutrition	–	–	50,000
19	Life sciences building—alter room 1570 to provide 24 station class laboratory for department of zoology	–	–	31,500
21	Donner Laboratory—construct sun screen for temperature control on southwest exterior of physics building	–	–	50,000
23	General campus—improve acoustical qualities in life sciences building and various other campus buildings	–	–	50,000
25	Hilgard Hall and Oxford Tract—provide two plant growth cabinets for instruction and research for department of soils and plant nutrition	–	–	20,000
28	Botanical Gardens in Strawberry Canyon—construct greenhouse, fern and cycad house, pot wash and storage building and extend cyclone fence for department of botany	–	–	38,500
31	Utilities—install underground communications ducts to service law, chemistry, physics and environmental design buildings	–	–	42,500
33	Warren Hall—install second elevator in existing shaft in this six story building	–	–	50,000
35	Forestry products laboratory at Richmond Field Station—convert sawmill shed for shop use and remodel vacated shop space in main building for laboratories and offices for department of forestry	–	–	50,000
39	Warren Hall—install book truck elevator for public health library	–	–	6,500
41	Life sciences building—alter rooms 2089 and 2093 to provide a laboratory service room and storeroom for department of botany	–	–	29,600
44				
45	DAVIS CAMPUS			
46	Equip physical sciences unit 2	–	–	771,000
47	To equip the physical sciences unit 2 funded for construction in the Budget Act of 1963.			
49	Construct utilities	–	–	1,165,800
50	To prepare working drawings for and construct utility improvements and extensions.			
52	Construct engineering building	–	–	3,900,800
53	To construct a building with classrooms, laboratories, shops, and supporting service facilities, and offices for teaching and research in engineering.			
56	Working drawings for alterations to physical sciences unit 1	–	–	17,100
57	To prepare working drawings for alterations to provide expansion of teaching and research facilities for the departments of astronomy, geological sciences, physics, and psychology.			
61	Working drawings for veterinary medical facilities unit 1	–	–	160,000
62	To prepare working drawings for a complex of buildings and field facilities to relocate and expand the teaching hospital and clinics of the school of veterinary medicine. This is the first step of a multiphase program which will release space for the biological science departments.			
67	Construct and equip second floor addition to Cruess Hall	–	–	259,600
68	To prepare working drawings for, construct, and equip a second floor addition on the south wing of Cruess Hall to provide expansion of teaching and research facilities for the department of food science and technology.			
72	Working drawings for biological sciences unit 3	–	–	97,800
73	To prepare working drawings for a building with classrooms, laboratories and auxiliary facilities, and offices for teaching and research in zoology.			
76	Working drawings for library expansion, step 2	–	–	97,500
77	To prepare working drawings for an addition to the library building to provide (1) bookstacks, student reading study stations, and service facilities to accommodate projected library collections and student enrollments, and (2) office and research facilities for the institute of governmental affairs.			
83

2	**STATE BUILDING PROGRAM—Continued**			
3				
4	**PROPOSED 1964-65 EXPENDITURES [a]—Continued**			
5				
6	DAVIS CAMPUS—Continued			
7	Working drawings for general campus improvements	–	–	$20,000
8	To prepare working drawings for general campus grounds improvements.			
10	Construct and equip general services unit 1	–	–	164,800
11	To prepare working drawings for, construct, and equip a building to house the campus telephone center.			
13	Minor Projects: [b]			
14	Robbins Hall—complete construction of unfinished basement area and provide two controlled environment atmosphere rooms for department of botany	–	–	47,000
17	Animal sciences building—provide cold storage facilities for carcass and meat quality studies for department of animal husbandry	–	–	24,000
20	Construct field building of 2,300 assignable square feet for relocation of department of entomology's apiary for humanities building site	–	–	50,000
23	Cruess Hall—alter rooms 155C to provide a cold laboratory for enzyme chemistry; 159, for a preparation laboratory for paper chromatography; 150D, a chemical hood, for the department of food science and technology	–	–	15,000
27	Irrigation and drainage field laboratory, step 1—construct a water measurement and control section outdoor field facility to accommodate 25 students per laboratory section for department of engineering—irrigation science	–	–	18,000
31	Horticulture building—alter room 211 to provide a general research laboratory by installing prefabricated controlled temperature roomette, autoclave and laboratory bench research area for department of zoology	–	–	23,500
35	Haring Hall—alter room 1112 to provide student research laboratories and faculty offices for school of veterinary medicine and modify room 1154 for student laboratory teaching for department of pathology	–	–	30,000
39				
40	IRVINE CAMPUS			
41	Equip library unit 1	–	–	220,500
42	To equip library unit 1 funded for construction in the Budget Act of 1963.			
44	Equip social sciences and humanities unit 1	–	–	284,500
45	To equip social sciences and humanities unit 1 funded for construction in the Budget Act of 1963.			
47	Equip natural sciences unit 1	–	–	838,400
48	To equip natural sciences unit 1 funded for construction in the Budget Act of 1963.			
50	Equip cafeteria	–	–	93,600
51	To equip the cafeteria funded for construction in the Budget Act of 1963.			
53	Acquisition of books	–	–	200,000
54	To complete acquisition of an initial collection of 75,000 volumes required for campus opening in 1965. Previous increments were funded in the Budget Acts of 1962 and 1963.			
58	Equip multipurpose unit 1	–	–	170,800
59	To equip multipurpose unit 1 funded for construction in the Budget Act of 1963.			
61	Construct utilities and site improvements	–	–	3,305,300
62	To prepare working drawings for and construct additional phases of general campus utilities and site improvements, including grading, roads, utility distribution systems and landscaping; and to provide University's pro rata share of cost of securing water supply and sewage disposal services.			
68	Construct and equip corporation yard unit 1	–	–	390,000
69	To prepare working drawings for, construct, and equip warehouse, shop, storage, and vehicle maintenance facilities to accommodate general campus service activities.			
72				
73	LOS ANGELES CAMPUS			
74	Equip chemistry—geology building addition	–	–	250,000
75	To complete funding of equipment for the chemistry-geology building addition. Initial increments of equipment were funded in the Budget Acts of 1962 and 1963.			

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

1				
2	**STATE BUILDING PROGRAM—Continued**			
3				
4	**PROPOSED 1964-65 EXPENDITURES [a]—Continued**			
5				
6	LOS ANGELES CAMPUS—Continued			
7	Equip Knudsen Hall	–	–	$210,000
8	To complete funding of equipment for Knudsen Hall (physics). Initial increments of equipment were funded from project balances and in the Budget Act of 1963.			
11	Equip main library alterations, step 1	–	–	76,800
12	To equip the first step of alterations to the main library funded for construction in the Budget Act of 1963.			
14	Construct central campus utilities	–	–	354,800
15	To construct utilities to serve new buildings in the central campus area.			
17	Working drawings for Franz Hall addition	–	–	140,000
18	To prepare working drawings for an addition to Franz Hall with specialized laboratories and auxiliary facilities, and offices for teaching and research in psychology.			
21	Construct utilities to the center for the health sciences	–	–	348,300
22	To prepare working drawings for and construct utilities to the center for the health sciences to accommodate increased utility loads.			
25	Construct central campus site development	–	–	209,200
26	To prepare working drawings for and construct site improvements, including development of physical education fields, walks and erosion control.			
29	Construct chemistry-geology building alterations	–	–	1,232,500
30	To prepare working drawings for and construct alterations and improvements to the chemistry-geology building and to provide an adequate ventilation and air-conditioning system.			
34	Construct law building addition	–	–	2,115,000
35	To prepare working drawings for and construct an addition and alterations to the law building with classrooms, offices, library stack and reading/study facilities, and auxiliary facilities for expansion of enrollment and research in law.			
40	Working drawings for theater arts unit 2	–	–	87,600
41	To prepare working drawings for a building with classrooms, laboratories, and auxiliary facilities to house the motion picture and radio-television divisions of the theater arts department.			
45	Working drawings for mathematical sciences building addition	–	–	145,000
46	To prepare working drawings for an addition to the mathematical sciences building with faculty offices, classrooms, and laboratories and auxiliary facilities for teaching and research in mathematics, astronomy and meteorology, and the general campus computing facility.			
51	Minor Projects: [b]			
52	Utilities—install cable from steam plant selectographic control console to remote cabinets in mechanical rooms of 16 buildings for centralized control of fans, compressors, and pumps	–	–	50,000
56	Chemistry building—alter room 4317 to provide specialized clinical class laboratory of 32 stations for school of dentistry	–	–	6,500
59	Humanities building—convert room 2118 to a 24 station language laboratory-classroom and HB-2225 for administrative offices for department of English	–	–	21,000
62	Economics building—alter third floor area of 8,100 assignable square feet vacated by department of economics, for departments of philosophy and oriental languages	–	–	35,500
65	Haines Hall—alter 26 rooms (vacated by social science departments) for use of department of French	–	–	25,000
67	General campus electrical system—eliminate hazards in old substandard primary electrical system protection devices, and feeder cables in physics building, Franz Hall and bridge transformer vault	–	–	49,000
71	Kinsey Hall—alter and improve machine shop by providing concrete floor topping, 200 foot tram rail, electrical and ventilating revisions for department of physics	–	–	6,700
74	Heating plant—eliminate hazards in high-voltage cable system by enclosing cables in overhead conduits and rerouting through the heating plant between high voltage switchboard and utility tunnel pit	–	–	49,200
78	Haines Hall—alter rooms 50, 52, and 54 and construct special storage racks and cabinets for ethnic collections for departments of letters and sciences, humanities and fine arts	–	–	5,000

[a] From State Construction Program Fund unless otherwise indicated.

8	General campus lighting—improve lighting in various class-			
9	rooms and corridors of Royce and Haines Halls and			
10	physics-biology building	–	–	$42,800
11	Engineering building unit 1—construct a 1,400 square foot			
12	environmental-architectural laboratory on roof to provide			
13	instruction and research space for the college of en-			
14	gineering	–	–	50,000
15	Botany building—provide environmental control facilities in			
16	rooms 431 and 433 for research in electron microscopy for			
17	departments of botany and plant biochemistry	–	–	5,400
18				
19	LOS ANGELES—CENTER FOR THE HEALTH SCIENCES			
20	Equip physical rehabilitation unit	–	–	747,700
21	To equip the physical rehabilitation unit funded for construc-			
22	tion in the Budget Act of 1961.			
23	Equip school of dentistry unit	–	–	109,000
24	To provide a first increment of equipment for the school of			
25	dentistry unit funded for construction in the Budget Act			
26	of 1963.			
27	Construct hospital and clinics units 2B, step 1 (Jules Stein			
28	Eye Institute)	–	–	89,400
29	To provide funds in addition to nonstate funds to complete			
30	funding of construction of the ophthalmological, teaching			
31	and research portions of the hospital and clinics unit 2B.			
32	The initial increment of state funds was provided in the			
33	Budget Act of 1963			
34	Construct hospital and clinics unit 2B, step 2	–	–	7,445,000
35	To construct an addition to, and related alterations to, the			
36	hospital and clinics unit 1 building with teaching beds,			
37	hospital service and support facilities, including radiology,			
38	outpatient clinics, and surgeries, and offices and labora-			
39	tories for the clinical science departments to provide for			
40	an increase in each medical class size from 72 to 128			
41	students, with corollary increases in interns, residents,			
42	and postdoctoral trainees.			
43	Working drawings for school of public health building	–	–	63,900
44	To provide matching funds for nonstate funds to prepare			
45	working drawings for a building with classrooms, labora-			
46	tories and supporting service and vivaria facilities, and			
47	offices for teaching and research in public health.			
48	Minor Projects: [b]			
49	Center for health sciences—provide sound insulation in 8			
50	student group study rooms in biomedical library	–	–	7,800
51	Center for the health sciences—Marion Davies Children Clinic			
52	—provide fan and duct work to complete the heating and			
53	cooling system in unfinished "B" floor area	–	–	15,000
54	Center for the health sciences—eliminate public safety hazard			
55	of outside east court deck area by installing a 3-inch			
56	concrete slab covering an area of 12,000 square feet	–	–	22,000
57	Center for the health sciences—provide adequate ventilation			
58	or temperature control in various laboratories and offices			
59	and improve lighting in 4 rooms on "A" floor of school of			
60	medicine building for department of pathology	–	–	21,800
61				
62	RIVERSIDE CAMPUS			
63	Equip physical sciences unit 3	–	–	890,000
64	Equip physical sciences unit 3 funded for construction in the			
65	Budget Act of 1962.			
66	Equip cafeteria	–	–	72,700
67	Equip cafeteria portion of cafeteria—student center step 1			
68	funded for construction in the Budget Act of 1963.			
69	Construct boiler addition number 3	–	–	195,200
70	To prepare working drawings for and provide a new boiler			
71	in the existing steam plant to meet increased steam de-			
72	mands.			
73	Construct utility and site improvements	–	–	100,300
74	To prepare working drawings for and to construct general			
75	campus utility and site improvements.			
76	Construct flood control storm drain	–	–	186,000
77	To prepare working drawings for and construct a flood con-			
78	trol storm drainage system in the central east-west arroyo.			
79	Construct utilities and site improvements for Moreno Ranch	–	–	168,500
80	To prepare working drawings for and construct a first step			
81	of utilities and site improvements for the Moreno Ranch			
82	consisting of fencing and irrigation system development.			
83

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	STATE BUILDING PROGRAM—Continued			
	PROPOSED 1964-65 EXPENDITURES [a]—Continued			
	RIVERSIDE CAMPUS—Continued			
	Construct agricultural sciences building	–	–	$2,816,600
	To construct a building with laboratories and auxiliary facilities, offices, and a branch library for teaching and research in the agricultural sciences, including agricultural departments being moved from the Los Angeles campus.			
	Working drawings for life sciences unit 2	–	–	99,000
	To prepare working drawings for a building with classrooms, laboratories and auxiliary facilities, and offices for teaching and research in the life sciences and psychology.			
	Construct classroom and office unit 1	–	–	2,366,000
	To prepare working drawings for and construct a building with classrooms, laboratories, and offices for general campus use and to accommodate teaching and research in mathematics and education.			
	Construct and equip glasshouses and headhouses	–	–	389,000
	To prepare working drawings for, construct, and equip two glasshouses and attached headhouses to accommodate the department of ornamental horticulture which is being transferred from the Los Angeles campus.			
	Construct and equip agricultural engineering shops	–	–	105,800
	To prepare working drawings for, construct, and equip a utility type shop building and outside paved work areas to accommodate agricultural engineering activities which are being transferred from the Los Angeles and Davis campuses to bring the activities into proximity to the areas being served.			
	Construct corporation yard addition	–	–	163,700
	Prepare working drawings for and construct corporation yard facilities consisting of additions to the carpenter's shop storage and receiving areas.			
	Minor Projects: [b]			
	Install 8" chilled water distribution supply and return mains to serve the physical sciences unit 3, agricultural sciences, and classroom and office unit one, and cafeteria-student center buildings	–	–	50,000
	Department of soils and plant nutrition—install deionized water unit for headhouse 6 and convert headhouse into a teaching and research laboratory for graduate students	–	–	20,000
	Domestic water system improvements—install two 75 horsepower, 500 gallon-per-minute domestic water pumps in existing pumping vault west of physical education building, and 2,600 feet of 8 inch transite water piping from the existing 12 inch domestic water line just south of glasshouse 16 to the new residence hall area	–	–	45,000
	Biochemistry headhouse 10—alter west end of headhouse 10 to provide a teaching and research laboratory for graduate students in the department of biochemistry	–	–	10,000
	Physical sciences unit 11—provide 50 gallon per hour water still with 300 gallon storage tank on roof area for department of chemistry	–	–	7,000
	Agronomy field headquarters building—construct metal building to provide office, workroom, and chemical and seed storage areas for department of agronomy field headquarters	–	–	25,000
	Boyd Desert Research Center—construct caretaker's facilities and install fencing at the Philip L. Boyd Desert Research Center	–	–	8,700
	General campus fire safety—provide fire alarm stations in the citrus experiment area, connect existing stations in the physical education building to steam plant central fire alarm terminal, and connect central system to City of Riverside system	–	–	20,000
	Telephone Building—construct a building of 2,300 assignable square feet for a Centrex telephone system	–	–	50,000
	SAN DIEGO CAMPUS			
	Equip building D for first college	–	–	716,700
	Equip first college's building D funded for construction in the Budget Act of 1962.			
	Equip general services and cafeteria building, step 1	–	–	80,600
	Equip cafeteria and student health areas of general services and cafeteria building, step 1, funded for construction in the Budget Act of 1963.			

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
STATE BUILDING PROGRAM—Continued			
PROPOSED 1964-65 EXPENDITURES [a]—Continued			
SAN DIEGO CAMPUS—Continued			
Acquisition of books	–	–	$200,000
To complete acquisition of an initial collection of 75,000 volumes for the general campus needs of the San Diego campus in 1965. Previous increments were funded in the Budget Acts of 1962 and 1963.			
Construct utilities and site improvements	–	–	666,500
To prepare working drawings for and construct utility extensions to new buildings and site improvements to central campus areas for the first college, improvements to the extensions of water supply and sewer systems for Scripps Institution of Oceanography, and to provide the balance of funds for the University's prorata share of the cost of road relocations to be undertaken by the City of San Diego.			
Construct building F for first college	–	–	3,319,700
To construct a building with classrooms, laboratories and auxiliary facilities, and offices to accommodate undergraduate programs in mathematics, life sciences, physical sciences, and applied sciences.			
Acquisition of books	–	–	159,400
To provide for acquisition of 10,000 volumes for the initial collection of the new medical school. A previous increment of 10,000 volumes was funded in the Budget Act of 1963.			
Working drawings for basic sciences building	–	–	346,200
To prepare working drawings for a building with classrooms, laboratories and auxiliary and vivaria facilities, offices, shops, and a medical library to accommodate basic science departments and related activities for the new medical school at San Diego.			
Minor Projects: [b]			
Institute of geophysics and planetary physics building—develop 2,000 square feet of unfinished basement area to provide two offices, radio-isotope counting laboratory, two sample preparation laboratories and storage rooms for institute of geophysics and planetary physics	–	–	45,000
Vaughan Hall Aquarium—provide fiberglass display tanks and polyvinyl chloride supply lines to prevent salt water corrosion damage to structure	–	–	50,000
Ritter and Sverdrup Halls—alter space vacated by the school of science and engineering to provide laboratories for the Scripps Institute of Oceanography	–	–	50,000
Ritter Hall—renovate old offices and laboratories and provide access to outside service yard for department of oceanography	–	–	15,000
SAN FRANCISCO CAMPUS			
Equip health sciences instruction and research unit 1	–	–	989,000
To equip the completed portions of the health sciences instruction and research unit 1 funded for construction in the Budget Act of 1960 and from nonstate funds.			
Construct interior completion of three floors of health sciences instruction and research unit 1	–	–	1,073,000
To prepare working drawings for and construct improvements to 3 of the 8 unfinished floors of the east tower of the health sciences instruction and research unit 1 to provide a first increment of laboratories and auxiliary facilities and offices to accommodate the increase in size of the medical school.			
Land acquisition	–	–	860,000
To purchase the site for the clinics' expansion and $100,000 for purchases of opportunity and necessity of land designated by the long range development plan for academic and administrative facilities.			
Minor Projects: [b]			
General campus electrical system—eliminate hazards in conductors, grounds, switches and feeders in primary electrical distribution system	–	–	36,200
Laundry-storehouse building—alter 2,800 square feet on first floor of building to provide office space for purchasing department	–	–	33,000
1373 Third Avenue—alter existing space to provide three additional offices for school of nursing	–	–	6,100
Medical research building—construct 12 enclosed animal runs to prevent injuries and cross infection of experimental animals	–	–	5,500

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

7	Minor Projects—Continued			
8	School of dentistry, medical sciences and clinics buildings—install 150 lockers and reconstruct 90 cabinets for storage of student instrument carrying cases to provide for expansion of school of dentistry classes	–	–	$28,000
12	Medical sciences building—provide alterations to exhaust fans on roof to alleviate excessive vibration and noise	–	–	5,500
14	Medical sciences building—alter 2,200 square feet of space in the library history room to provide for expansion of student study areas, improve lighting and provide locked bookcases	–	–	14,700
18				
19	SANTA BARBARA CAMPUS			
20	Equip marine biology laboratory	–	–	32,000
21	To complete equipping the marine biology laboratory funded for construction and a first increment of equipment in the Budget Act of 1963.			
24	Equip administration building	–	–	158,700
25	To equip the administration building funded for construction in the Budget Act of 1962.			
27	Equip engineering laboratories	–	–	214,100
28	To provide the second increment of equipment for use in teaching laboratories of the new college of engineering. First increment was funded in the Budget Act of 1963.			
31	Land acquisition for general campus expansion—89 acres	–	–	484,900
32	To provide the second of three annual payments toward the purchase of 89 acres of land extending west from the northwest sector of the campus to accommodate general campus expansion.			
36	Construct utility and site improvements	–	–	941,000
37	To prepare working drawings for and construct general campus utility extensions and improvements and site improvements.			
40	Construct engineering unit 1	–	–	3,062,600
41	To construct a building with classrooms, laboratories, supporting specialized equipment, service and shop facilities, and offices for teaching and research in engineering.			
44	Working drawings for classroom and office unit 3	–	–	124,200
45	To prepare working drawings for a building with classrooms, laboratories and auxiliary facilities, and offices for teaching and research in foreign languages and literature and education.			
49	Working drawings for library unit 3	–	–	128,000
50	To prepare working drawings for a building with stacks, student reading/study stations, and library service facilities for the general campus library; and offices for the social science departments.			
54	Construct cyclotron building	–	–	334,000
55	To prepare working drawings for and construct a building to house a 50MEV cyclotron and its ancillary equipment for teaching and research in nuclear physics and radioactive isotopes. The cyclotron is to be funded from non-state sources.			
60	Minor Projects;[b]			
61	Building 446—alter and remodel 5,600 assignable square feet in building to provide 66 office stations and 6 student academic counseling cubicles	–	–	35,000
64	Utilities—install 59 electric power poles to service the general campus area	–	–	40,600
66	Utilities—provide for university cost-share of construction of outfall sewage line by Goleta Sanitary District	–	–	50,000
68	Sea water pump house—construct an additional sea water filter unit and reinforce and extend existing sea wall	–	–	17,000
70	Industrial arts building—alter space in building to provide electrical, mechanical and chemical engineering teaching and research laboratories for department of engineering	–	–	30,000
73				
74	SANTA CRUZ CAMPUS			
75	Equip natural sciences unit 1	–	–	614,000
76	To equip the natural sciences unit 1 funded for construction in the Budget Act of 1963.			
78	Acquisition of books	–	–	200,000
79	To complete acquisition of an initial collection of 75,000 volumes required for campus opening in 1965. Previous increments were funded in the Budget Acts of 1962 and 1963.			

[a] From State Construction Program Fund unless otherwise indicated.

	STATE BUILDING PROGRAM—Continued			
	PROPOSED 1964-65 EXPENDITURES [a]—Continued			
	SANTA CRUZ CAMPUS—Continued			
	Construct utilities and site improvements	–	–	$942,700
	To prepare working drawings for and construct general campus utility improvements and extensions, and site improvements, including road, walks, water, gas, electric, and sewer extensions to initial buildings.			
	Working drawings for central heating plant and distribution system	–	–	51,600
	To prepare working drawings for a central heating plant and distribution system.			
	Construct library unit 1	–	–	2,550,000
	To construct a building with reading rooms, stacks, library service facilities, and offices to accommodate the general campus library, and on an interim basis, other academic and administrative activities.			
	Construct academic and dining facilities portion of residential college No. 2	–	–	953,000
	To prepare working drawings for and construct the academic and dining facilities portion of residential college No. 2 with (1) classrooms and faculty offices to accommodate instructional activities, and (2) dining facilities.			
	Working drawings for academic and dining facilities portion of residential college No. 3	–	–	36,100
	To prepare working drawings for the academic and dining facilities portion of residential college No. 3 with (1) classrooms and faculty offices to accommodate instructional activities, and (2) dining facilities.			
	Construct and equip fieldhouse	–	–	320,000
	To prepare working drawings for, construct, and equip a field house with shower, locker, and equipment storage facilities to provide for the campus' initial physical educational program.			
	Minor Projects: [b]			
	Site development—forest fire prevention—provide additional fire breaks and access roads to eliminate fire hazards	–	–	15,000
	Site development—poison oak eradication—apply weed-killing spray to site areas for library, social sciences and fine arts buildings	–	–	10,000
	Tidepool area development—construct a fence and a 150 square foot building to provide secure storage for equipment to be used for instruction and research by the departments of natural sciences	–	–	5,000
	Site development—construct new barbed wire fence where necessary and improve existing fence to keep cattle out of University building zones and adjacent private properties	–	–	5,000
	Central services building—provide 600 bookstacks for temporary library facility to shelve 75,000 volumes	–	–	30,000
	ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]			
	STATEWIDE			
	Preliminary plans	$600,000	$789,200	–
	Equip intercampus library facility at Richmond	–	149,500	–
	Acquisition of books for new campuses, steps 1 and 2	300,000	600,000	–
	Acquisition of land for Sierra Foothill Range Agricultural Field Station	–	100,000	–
	Construct and equip Kearney Horticultural Field Station	–	357,800	–
	Construct South Coast Agricultural Field Station, Step 2	–	176,100	–
	Acquisition of television equipment and facilities	200,000	177,228	–
	Land acquisition engineering field station—south	–	750,000	–
	Construct and equip San Joaquin Valley Westside Field Station development, step 2	250,000	–	–
	Construct and equip addition to Hastings College of Law building, step 1	282,300	–	–
	Minor Projects: [b]			
	Lindcove Field Station—install irrigation, drainage, frost protection systems, and weather station	–	49,500	–
	Imperial Valley Field Station—construct cattle barn and handling facilities	–	49,500	–
	Imperial Valley Field Station—construct 30,000-gallon domestic water storage tank	–	7,000	–

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

STATE BUILDING PROGRAM—Continued			
ESTIMATED 1962-63 AND 1963-64 EXPENDITURES[a]—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects—Continued			
Greek Theater—alter rooms 121, 122, and 123	–	$22,500	–
Construct sidewalks, loading bay, and relocate utilities on parts of Bancroft Way, Dana and Oxford Streets and Hearst Avenue	–	48,000	–
Life sciences building—alter room 1560 to provide specialized teaching laboratory	$45,400	–	–
Harmon Gymnasium—alter rooms 111 and 175 to provide faculty offices, seminar room, faculty research laboratory	15,500	–	–
Alter space in Cowell Annex and South Hall Annex to provide faculty offices	40,000	–	–
Life sciences building—alter laboratory rooms 3525 and 3551 to provide for 4 additional graduate students	19,500	–	–
Kroeber Hall—provide furniture and exhibit equipment to complete Lowie Museum of Anthropology	21,600	–	–
Forest products laboratory—install automatic sprinkler system in sawmill shed	6,000	–	–
Install back-siphoning prevention devices on various buildings	21,000	–	–
Hesse Hall—provide sound insulation in rooms 30 and 130	15,000	–	–
Gill Tract—construct 2 hot frames for tree seedling research	10,000	–	–
Life sciences building—rehabilitate room 5093 and add mezzanine	50,000	–	–
Heating plant—modify heating plant	27,300	–	–
Cory Hall—provide wooden deck for research on a radiometer and board-bend antennas	8,800	–	–
Kroeber Hall—provide a laboratory in undeveloped basement area	21,000	–	–
Forest products laboratory—provide wet-storage tank for research on logs and other wood materials	8,500	–	–
Improve lighting in several older permanent campus buildings	25,000	–	–
Gill Tract—construct two cold storage rooms in east end of insectary	17,000	–	–
Doe Library—install fire detection system above book stacks in main library	12,700	–	–
Gill Tract—remodel greenhouse No. 5	23,000	–	–
Oxford Tract—construct 324 tables for new greenhouses	17,000	–	–
Life sciences building—construct constant temperature facilities in room 1595	6,900	–	–
Wheeler Hall—improve ventilation system in auditorium to prevent reverse flow of air	10,000	–	–
Install telephone ducts in various campus areas	27,000	–	–
Install sanitary sewer line to Strawberry Canyon area	10,800	–	–
Extend utility line to site of student office building	25,100	–	–
DAVIS CAMPUS			
Equip library expansion	–	181,800	–
Equip classroom and office unit 2	–	282,000	–
Construct and equip vegetable crops controlled temperature storage facilities	559,700	30,000	–
Construct and equip residence hall unit No. 6	627,400	222,600	–
Construct utilities	420,000	392,200	–
Construct Agricultural Toxicology and Residue Research Laboratory	–	150,000	–
Construct humanities buildings	98,200	2,965,800	–
Construct physical sciences unit No. 2	124,100	3,910,300	–
Working drawings and site clearance for engineering building	–	228,000	–
Construct and equip plant growth research laboratories, step 1	–	333,000	–
Construct and equip ecological research laboratory	–	117,700	–
Construct campus entrance road developments	–	310,500	–
Equip physical sciences unit 1	244,000	–	–
Equip veterinary science laboratory animal housing unit 2	29,000	–	–
Equip biological sciences unit 2	652,200	–	–
Provide air conditioning for classroom and office unit 2	89,400	–	–
Construct west central campus road improvement and drainage, step 1	161,500	–	–
Construct low energy nuclear research laboratory	401,400	–	–
Construct and equip veterinary medicine isolation housing for large animal research	447,400	–	–
Construct and equip animal husbandry beef cattle feeding facilities	161,500	–	–
Construct administration building	2,174,100	–	–
Relocate and construct pomology field headquarters facilities	161,500	–	–
Minor Projects:[b]			
Haring Hall—construct instructional television studio	–	49,500	–
Walker Hall—convert released space to graduate engineering student laboratory, chemical and measurement laboratory	–	40,000	–

[a] From State Construction Program Fund unless otherwise indicated.

LOS ANGELES CAMPUS—Continued			
Minor Projects—Continued			
Law building—alter rooms 376 and 376-B for use as faculty offices and seminar room	$20,000	–	–
Building E—install desmogification equipment on ornamental horticulture greenhouses	20,000	–	–
Life sciences building—construct exhaust system for exhausting live steam from 11 rooms	8,600	–	–
University elementary school—alter and improve heating system for control of temperature in rooms 1,245 and 1,256	7,700	–	–
Home economics building—convert room 3,221 into a research laboratory	4,900	–	–
Life sciences building—alter rooms 5,318, 5,318-A, 5,322, 5,326 and 5,328 for storeroom and cleaning purposes	25,000	–	–
Install aisle lights in Royce Hall auditorium and in Schoenberg Hall	6,000	–	–
Royce Hall—convert classroom 170 to a 30-station language laboratory	49,500	–	–
Home economics building—provide water still and system for research areas	11,000	–	–
LOS ANGELES—CENTER FOR THE HEALTH SCIENCES			
Construct school of dentistry unit 1	–	$4,924,100	–
Construct student health service expansion	–	838,300	–
Working drawings for hospital and clinics unit 2B, step 2	–	196,200	–
Construct opthalmology clinic	–	800,000	–
Construct basic sciences unit 2A	11,373,400	–	–
Construct west medical campus utilities and site development	466,600	–	–
Working drawings for school of dentistry unit and expansion of student health service facilities	237,600	–	–
Minor Projects: [b]			
Center for the health sciences—construct microwave link to connect the center for the health sciences with off-campus teaching hospitals	–	20,000	–
Center for the health sciences—construct audio and video cable distribution system	–	20,000	–
University of California Hospital—alter outpatient clinic areas to provide expanded patient interviewing and waiting room facilities	–	15,000	–
University of California Hospital (Marion Davies Unit)—construct 100-station classroom in unfinished basement area	–	35,000	–
Center for the health sciences vivarium—modify tile base and walls in animal rooms	47,000	–	–
University of California hospital—improve lighting in all patient rooms	49,000	–	–
Center for the health sciences vivarium—modify research areas in Brain Research Institute	45,000	–	–
RIVERSIDE CAMPUS			
Equip library addition, step 1	–	177,700	–
Construct and equip agrichemicals and produce quality laboratory	323,000	142,300	–
Construct utilities and site development in glasshouse area	–	175,000	–
Construct site development	115,000	183,600	–
Working drawings for agricultural sciences building	–	99,000	–
Construct physical sciences unit 4	–	3,119,500	–
Construct central cafeteria	–	749,300	–
Construct and equip agricultural extension facility	–	298,400	–
Equip humanities building	350,000	–	–
Construct boiler addition	182,000	–	–
Construct electrical improvements—citrus experiment station area	96,100	–	–
Construct and equip custodial and grounds department headquarters	170,000	–	–
Construct physical sciences unit 3	2,601,000	–	–
Construct improvements to citrus experiment station irrigation, runoff, and salvage systems	323,000	–	–
Construct and equip purchasing department facilities	58,000	–	–
Minor Projects: [b]			
Construct aluminum lathhouse and mist chamber for citrus experiment station departments	–	45,000	–
Administration building—alter various administrative offices to provide for relocation and expansion	–	19,000	–
Physical sciences building—construct concrete floor for storage space and construct additional student lockers	–	44,700	–

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.

CALIFORNIA COLLEGE OF MEDICINE

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
1				
2	The California College of Medicine, an accredited medical			
3	school located in Los Angeles, was designated by the 1963 Legis-			
4	lature to become, on January 1, 1965, a medical department of			
5	the University of California under Chapter 1933, Statutes of			
6	1963.			
7	During 1963, the college had a long-range physical master			
8	plan developed which was designed to expand the college from its present 96 student class to a 130 member student class. This master plan and all medical school accrediting teams that have visited the college indicate that the first step in necessary improvement of college facilities is replacement of existing basic science units. The 1964-65 budget proposal is designed to initiate planning of such a facility.

Enrollments

The construction programs for the 17 state colleges are based on a projected enrollment of 124,560 regular students (FTE) in 1967-68. This enrollment estimate is an increase of 31,180 over the regular students (FTE) anticipated in 1964-65. This differs from enrollment estimates for support budget purposes where full-time equivalents of all students are considered. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollments have been estimated from statistics based on prior experience of the progression of students from high schools to the colleges and through the various collegiate levels. The state college data includes a compilation of the numbers of students by county of origin in order to allow a reasonable accurate distribution of students by college or university age. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges for 1961-62 and 1962-63 and estimated enrollments from 1963-64 through 1968-69.

[c] Expenditures from bond funds not included in overall budget totals.

STATE COLLEGES—Continued

SUMMARY—Continued

Full-time Equivalent Enrollments of Regular Students [1]—1961-68

Capacity

The basic unit measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and weighting, based upon the time of required attendance per unit of student credit in each type of classroom.

The weighting is predicated on utilization standards which fix minimum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms are programmed to be occupied an average of 75 percent of student capacity each hour of use, while activity rooms and laboratories are programmed to be occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory, or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from one school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use facilities which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The total of the presently existing and funded capacity for the fall of 1967 is programmed at 104,945 FTE. Enrollments for the fall of 1967 are estimated at 124,560 FTE; this would indicate a deficiency of 19,615 FTE to meet capacity needs in September of 1967. The construction projects proposed in this budget will provide a capacity for 7,886 FTE, and projects for working drawings funds are requested to provide capacity for 6,211 FTE raising the total capacity to 119,042 FTE. The difference between the total programmed capacity of 119,042 FTE and projected enrollments of 124,560 FTE is 5,518 FTE.

The capacity deficiency of 5,518 FTE will be partially provided for by the construction of 2 library-classroom buildings which are still in the planning stages. The addition of other permanent buildings at San Bernardino and Palos Verdes will further reduce the deficiency.

Status of Presently Authorized Capacity and 1964-65 Budget Provisions

	Enrollment	Capacity
1966-67 enrollment of regular students (FTE)	124,560	–
1967 existing and funded capacity	–	104,945
1964-65 proposed projects (construction)	–	7,886
1964-65 proposed projects (working drawings)	–	6,211
	124,560	119,042

The existing and funded capacity of the various college plants based on planned 1967 and 1969 (for specialized facilities) use is shown in the following table.

[1] Includes FTE of physical education and production activities (earned FTE).
[2] In rented facilities.

Master Plan Maximum Enrollments for State Colleges

Regular Students (FTE)

In accordance with results of studies of campus master plans conducted by the trustees since their organization in 1961, the following Interim Master Plan Enrollments are set up for purposes of facilities planning. Since studies are still in progress at San Diego, Sacramento, San Francisco, and San Jose State Colleges, maximum enrollment figures for these campuses as listed below may change following completion of the studies. Maximum enrollment figures have not yet been determined by the Trustees for the State College at Palos Verdes or Stanislaus State College.

Chico State College	6,000
Fresno State College	20,000
State College at Hayward	15,000
Humboldt State College	4,000
Long Beach State College	20,000
Los Angeles State College	16,800
Orange State College	20,000
State College at Palos Verdes	--
Sacramento State College	20,000
State College at San Bernardino	20,000
San Diego State College	20,000
San Fernando Valley State College	20,000
San Francisco State College	12,000
San Jose State College	17,000
Sonoma State College	12,000
Stanislaus State College	--
State Polytechnic College:	
Kellogg-Voorhis Campus	20,000
San Luis Obispo Campus	12,000
	254,800

Federal Legislation

During 1963 the federal congress passed Public Law 88-204, Higher Education Facilities Act of 1963. This legislation will have an impact on the 1964-65 and future Capital Outlay program. The act authorizes federal funds to assist the various states in providing physical facilities to meet the needs of the nations youth who aspire to a higher education. At the time this budget was prepared no federal funds had been appropriated to implement the legislation; therefore no savings have been anticipated in this Capital Outlay program. If federal funds do become available during the 1963-64 or 1964-65 fiscal year provision will be made to provide for use of federal funds in achieving the goals of the program.

PROJECTS PROPOSED FOR FINANCING IN 1964-65

The total Capital Outlay program for the state college system is $59,338,120. $58,309,070 is financed from the State Construction Program Fund and $1,029,050 from the General Fund for minor Capital Outlay. Expenditures for construction projects including designs totals $48,113,070, or 82 percent of the total program. The balance of $11,225,050 includes equipment, library books, land acquisition, and minor construction.

Science and Engineering Facilities

The importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating a continuing expansion of existing facilities. Included in this budget to meet these expanded enrollments are 11 projects (Chico, Fresno, Orange, Palos Verdes, Sacramento, San Bernardino, San Diego, San Francisco, San Jose, and Cal Poly at San Luis Obispo and Kellogg-Voorhis) totaling $8,486,200 which is 15 percent of the Capital Outlay program.

Physical Education Facilities

There are 13 projects for construction or working drawings in this budget to provide physical education facilities. These projects total $8,308,860 which is 13.9 percent of the total Capital Outlay program. They are located at Fresno, Hayward, Orange, Sacramento, San Bernardino, San Diego, San Fernando, San Francisco, San Jose, Sonoma, Stanislaus, Cal Poly at San Luis Obispo and Kellogg-Voorhis.

STATE COLLEGES—Continued

SUMMARY—Continued

PROJECTS PROPOSED FOR FINANCING IN 1964-65—Continued

Music, Speech, and Drama Facilities

Five projects are included for music, speech and drama facilities in the amount of $3,479,900 which is 5.8 percent of the total Capital Outlay program. These projects are for Fresno, Humboldt, Long Beach, San Diego, and Sonoma.

Other Instructional Facilities

A total of $6,614,010 or 11.1 percent of the Capital Outlay expenditures is proposed for other instructional facilities. These 7 projects located on 7 campuses are classroom buildings to provide lecture, activity and laboratory capacity required to serve increasing enrollments.

Site Development

Nine projects totaling $6,314,300 or 10.6 percent of the total Capital Outlay program are for site development. These projects provide for utilities, roads, walks, grading, drainage and some landscaping at 9 state colleges.

Land Acquisition

Three projects totaling $3,445,000 are included to purchase land for future construction at Humboldt, San Jose and San Fernando Valley State Colleges.

Other

The balance of the projects total $12,309,800 and include working drawings and construction projects for libraries, cafeterias, an administration building and remodeling projects. These projects are located at 10 colleges.

Equipment

A total of $6,451,000 is included in this budget for initial complements of equipment and equipment for buildings and facilities which are scheduled for completion in 1964-65 or prior years. The total cost of this equipment is 10.8 per cent of the total Capital Outlay program.

Library Books

This budget includes $300,000 to purchase initial complements of library books for the libraries at State College at Palos Verdes and State College at San Bernardino. Processing is provided for in the support budgets of the colleges.

Parking

This budget includes $1,600,000 for a multistory structure at Los Angeles. Parking fees are paid by users and after deducting operating expenses, the net reimbursement reduces General Fund expenditures for support. The total amount budgeted for parking in 1964-65 exceeds the amount of reimbursements available but will be offset by a corresponding reduction in the amount to be budgeted for parking in 1965-66.

Minor Capital Outlay

The final portion of the Capital Outlay program is a total of $1,029,050 which is included in this budget for projects for minor capital outlay including a number of equipment projects.

STATE COLLEGES—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	Trustees of the California State Colleges			
	The Trustees of the California State Colleges were established by Chapter 49, Statutes of 1960, First Extraordinary Session. They are charged with the responsibility of governing the state college system including the Capital Outlay program. This budget includes the funds for planning the construction projects on the various state college campuses. This budget includes $1,000,000 which will be appropriated to the Trustees. The Trustees select the architects to design the college projects. This budget provides $950,000 for preparation of preliminary plans during 1964-65 of which $200,000 is intended for projects which would normally be timed for the 1965-66 fiscal year, but which because of the complexities of the project must be in preliminary planning stages for longer than one year.

Chico State College

Chico State College, established in 1887, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 90 acres in the City of Chico, and there is an additional 644 acres in the college farm. Additional land is being acquired for an engineering building, corporation yard, and music-drama building.

An enrollment of 4,240 regular students (FTE) is anticipated for 1967-68. Existing and funded capacity totals 4,103 regular students (FTE).

This budget includes funds for construction of additional farm buildings and air-conditioning projects for the humanities and social science buildings.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Construct farm buildings—phase II	–	–	$401,700
This project will provide working drawings and construction for a beef cattle breeding barn; a farm mechanics shop; a field and fruit crops unit; and a sheep barn for the college's farm.			
Construct air conditioning, humanities classroom building	–	–	102,000
This project will provide for working drawings and construction of air conditioning in this building which has a capacity of 600 students (FTE).			
Construct air conditioning, social science building	–	–	117,000
This project will provide for working drawings and construction of air conditioning in this building which has a capacity of 800 students (FTE).			
Minor Projects: [b]			
Moving and reinstallation of equipment in new corporation yard	–	–	40,000
Construct new well and irrigation system on college farm	–	–	20,000
Resurface tennis courts	–	–	17,500
Alteration and improvement projects of $5,000 or less	–	–	21,750

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Land acquisition	$135,062	$149,438	–
Equip education-psychology buildings	–	87,400	–
Construct engineering building	–	1,876,000	–
Construct music-drama building	–	3,120,000	–
Construct physical science and agricultural buildings	—6,800	–	–
Working drawings for residence hall cafeteria	–	43,000	–
Air condition library	120,500	900	–
Equip remodeled administration building—phase II	5,587	2,813	–
Construct swine farrowing barn	35,775	1,125	–
Construct swine nursery and finishing unit	26,800	300	–
Construct swine boar unit	13,000	–	–

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

	Fresno State College			
	Fresno State College is a 5-year institution offering programs in teacher training, agriculture, and general education. The college is located on a site of 1,428 acres northeast of the City of Fresno. An enrollment of 6,940 regular students (FTE) is anticipated in 1967-68. Existing and funded capacity totals 6,697 regular students (FTE).			
	This budget provides for the construction of outdoor physical education facilities, air conditioning in the social science, speech arts, and science buildings. Equipment projects are included for the new library addition and the remodeled biology classrooms. Working drawings are included for a new administration-faculty building.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Equip library addition	–	–	$260,000
	This project will provide the equipment for the library addition which was financed by the Budget Act of 1963.			
	Equip remodeled biology classrooms—phase III	–	–	38,000
	This project will provide the final equipment needs for these remodeled facilities financed by the Budget Act of 1962.			
	Working drawings for administration faculty office building	–	–	45,000
	This project will provide working drawings for a facility to house 78 additional faculty and additional administrative personnel.			
	Construct outdoor physical education facility	–	–	60,000
	This project will provide for working drawings and construction of 5 acres additional multipurpose turfed areas including a practice football field.			
	Construct air conditioning for social science building	–	–	75,400
	This project will provide for working drawings and construction of air conditioning for the social science building.			
	Construct air conditioning for speech arts building	–	–	75,400
	This project will provide for working drawings and construction of air conditioning for the speech arts building.			
	Construct air conditioning for science building -wing H	–	–	58,800
	This project will provide for working drawings and construction of air conditioning for the science building—wing H

State College at Hayward

The State College at Hayward was established by Chapter 1681, Statutes of 1957, as the State College for Alameda County. On July 12, 1963, the Trustees authorized the change in name to State College at Hayward. This college offers courses in teacher education, occupational and preprofessional curricula, and liberal arts leading to a bachelor's degree in various fields. This college occupied its permanent site in the Fall Quarter of 1963. The site of 354 acres provides 173 net usable acres for buildings, parking and athletic fields.

A regular student enrollment of 4,780 regular student (FTE) is estimated for 1967-68. Existing and funded capacity totals 3,154 regular students (FTE).

This budget provides for site development, and for the construction of physical education facilities and cafeteria; working drawings for a general classroom building and equipment for academic facilities, corporation yard and boiler plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Working drawings for classroom building No. 1	–	–	$165,000
This project will provide for working drawings for a general classroom building with a capacity of 2,000 students (FTE).			
Working drawings for site development—phase V	–	–	10,000
This project will provide for working drawings for interior walks, roads, utilities and lighting.			
Equip science building—phase II	–	–	516,000
This project will provide equipment for the science building financed by the Budget Act of 1961.			
Equip fine arts building—phase II	–	–	65,000
This project will provide equipment for the fine arts building financed by the Budget Act of 1961.			
Construct physical education facilities	–	–	2,545,500
This project will provide for the construction of the gymnasium, activity rooms, handball courts, faculty offices, shower and locker facilities.			
Construct cafeteria	–	–	1,345,500
This project will provide for the construction of a cafeteria with a seating capacity of 835 students (FTE).			
Construct site development—access road	–	–	603,000
This project will provide for the working drawings and construction of the development of the main access road to the college campus.			
Equip corporation yard and boiler plant—phase II	–	–	52,800
This project will provide for the second complement of equipment for these facilities financed by the Budget Act of 1962.			
Minor Projects: [b]			
Construct outdoor physical education storage building	–	–	10,000
Remodel computer center	–	–	30,000

Humboldt State College

Humboldt State College is a 5-year institution offering programs—both graduate and undergraduate—in liberal arts, teacher education and vocational training. The latter includes curriculums in forestry management, fisheries, and game management. Humboldt State College is located on a site of approximately 96 acres in the City of Arcata. An enrollment of 2,380 regular students (FTE) is anticipated for 1967-68. Existing and funded capacity totals 2,393 regular students (FTE).

This budget includes working drawings for an art-music building addition and funds for additional site acquisition.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Working drawings for art-music building addition	–	–	$77,200
This project will provide additional specialized facilities for the disciplines housed in this building. The capacity of ths addition will be 141 students (FTE).			
Site acquisition	–	–	120,000
This project provides $70,000 for site acquisition needed for future instructional facilities and $50,000 for opportunity purchases in areas adjacent to the campus that have been master planned for general campus development.			
Minor Projects: [b]			
Remodel old library building	–	–	9,100
Equip auto mechanics building, final phase	–	–	33,000
Equip geology laboratory	–	–	10,900
Pave temporary parking area	–	–	8,000
Alterations and improvement projects of $5,000 or less	–	–	7,000

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

Long Beach State College

This college was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre site donated by the City of Long Beach.

An enrollment of 10,430 regular students (FTE) is anticipated in 1967-68. Existing and funded capacity totals 11,097 regular students (FTE).

This budget provides equipment for the physical education addition and corporation yard, construction of language arts classroom and faculty office building, industrial arts building No. 2, corporation yard, and air conditioning for classroom building No. 5.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Equip physical education addition	–	–	$99,000
This project will provide equipment for the physical education addition financed by the Budget Act of 1963.			
Construct language arts classroom and office building	–	–	1,968,800
This project will provide for construction for a classroom building to house the specialized speech and language arts facilities and 220 faculty office stations. This project will have a capacity of 106 students (FTE).			

[a] From State Construction Program Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

Los Angeles State College of Applied Arts and Sciences

Los Angeles State College, established in 1947, offers courses in business, economics, education, fine arts, applied arts, music, social sciences, natural science, biological sciences, technical sciences, physical education, and special education.

The college moved to its present 97-acre site in 1956 to accommodate the increase in student enrollments.

The master plan enrollment figure approved by the Trustees of the California State Colleges is 16,800 regular students. An enrollment of 14,090 regular students (FTE) is anticipated in 1967-68. Existing and funded capacity totals 13,083 students (FTE).

This budget provides for construction of an administration building addition, a general classroom building—parking structure, additional site development and working drawings for an addition to the library.

STATE BUILDING PROGRAM

	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct administration building addition	–	–	$2,691,800
	This project will provide for the completion of working drawings and for construction of an administration building addition. The college anticipates utilizing a portion of the building to accommodate 297 students (FTE) until the space is needed for administrative staff.			
	Construct classroom building No. 2 and parking structure	–	–	6,426,510
	This project will provide for the construction of a general classroom building with a capacity of 2,903 students (FTE). Because of a sloping terrain and a critical parking problem campus-wide it has been found feasible to provide this structure with an integrated parking facility in lieu of purchase of additional land for surface parking. The parking facility will form the two lower levels of the classroom structure and provide space for 438 vehicles on the lower deck plus 380 vehicles on a second level.			

[a] From State Construction Program Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

Orange State College

Orange State College is located on a site of 225 acres in the city of Fullerton. Funds for construction of the first permanent building were appropriated in 1961. This facility, a 6-story science building was completed in the Fall of 1963, and houses all of the programs of the college.

A regular student enrollment of 5,860 regular students (FTE) is estimated for 1967-68. Existing and funded capacity totals 2,606 regular students (FTE).

This budget provides for equipment for the music-speech-drama building, and science building, the construction of a library, swimming pool, and continued site development, and working drawings for conversion of science building classrooms to laboratories, a cafeteria, and site development, phase V.

STATE BUILDING PROGRAM

	PROPOSED 1964-65 EXPENDITURES [a]			
	Equip music-speech-drama building	–	–	$400,000
	This project will provide equipment for the music-speech-drama building financed by the Budget Act of 1962.			
	Equip science building, phase III	–	–	400,000
	This project will provide the third increment of equipment for this facility financed by the Budget Act of 1961.			
	Construct library building	–	–	4,716,000
	This project will provide for construction of a library which will ultimately serve 10,000 students (FTE). The building will also house the college's audio-visual department and provide temporary classroom space for 1,700 students (FTE).			
	Site development, phase III	–	–	520,500
	This project will provide for construction of inner campus roads, lights, utilities, and storm drain facilities for a portion of the campus.			
	Construct physical education facilities	–	–	220,000
	This project will provide working drawings and construction for a swimming pool.			
	Working drawings for conversion of science building classrooms to laboratories	–	–	45,000
	This project will provide for working drawings for the conversion of lecture classrooms to laboratories as planned when the building was constructed.			
	Site development, phase IV	–	–	150,000
	This project will provide for working drawings and construction of necessary service roads, walkways, lights, irrigation and landscaping for the physical education building scheduled for completion in June, 1965.			
	Working drawings for cafeteria	–	–	85,600
	This project will provide for working drawings for the college's permanent cafeteria.			
	Minor projects: [b]			
	Convert lecture room to science laboratory	–	–	10,200

[a] From State Construction Program Fund unless otherwise indicated.

State College at Palos Verdes

The State College at Palos Verdes was authorized by the Legislature by Chapter 65, Statutes 1960, First Extraordinary Session. It is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve. Five million dollars has been appropriated for the purchase of a permanent site; $200,000 has been appropriated for master planning and initial site development; $150,000 has been appropriated for an initial complement of library books. A site has been selected and is under consideration by the State Public Works Board.

It is planned to open the college in the fall of 1965 in temporary facilities on the permanent site. An enrollment of 360 regular students (FTE) is estimated in 1965-66 and 1,560 regular students (FTE) in 1967-68.

This budget includes a second increment of the college's initial complement of library books, site development, construction of the temporary buildings, and funds to purchase those items of equipment requiring several months to manufacture. Funds are also included for working drawings for the college's first permanent buildings; a science building and a combined library-classroom administration building.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Initial complement of library books—second increment	–	–	$150,000
This project will complete the acquisition of a basic complement of library books.			
Site development—phase I	–	–	1,300,000
This project will provide the necessary site preparation for temporary buildings and initial occupancy of the campus.			
Construct temporary buildings	–	–	818,900
This project will provide for working drawings and construction of temporary buildings to accommodate 829 students (FTE) and provide space for administrative offices, faculty offices and library.			
Equip temporary buildings	–	–	175,000
This project will provide the necessary equipment for the above temporary buildings.			
Working drawings for science building	–	–	88,000
This project will provide for working drawings for the first permanent science facility which will house other academic programs initially. The capacity planned for is 800 students (FTE).			
Working drawings for library-classroom-administration building	–	–	147,000
This project will provide for working drawings for a multipurpose building to be used ultimately as the library facility. The initial capacity is 1,000 students (FTE).			

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

	Sacramento State College			
	Sacramento State College, established in 1947, offers courses in teacher training, liberal arts and general education and occupational curriculums leading to a bachelor's degree in various fields. The college moved to its present 265-acre site in 1953 to accommodate the increase in student enrollments. An enrollment of 5,610 regular students (FTE) is anticipated in 1967-68. Existing and funded capacity totals 5,454 regular students (FTE). This budget provides for the construction of additional outdoor physical education facilities, and air conditioning of the business administration building. This budget also includes equipment for the new outdoor physical education facilities.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct outdoor physical education facilities	–	–	$270,000
	This project will provide for working drawings and construction of a new football field, track, and shower-locker room facility on the southern part of the campus to meet needs created by higher enrollments at this college.			
	Equip outdoor physical education facilities	–	–	3,500
	This project will provide the equipment necessary to properly utilize the project outlined above.			
	Construct air conditioning for business administration building	–	–	79,700
	This project will provide for working drawings and construction of air conditioning for this instructional facility.			
	Minor projects: [b]			
	Construct corporation yard addition	–	–	50,000
	Alteration and improvement projects of $5,000 or less	–	–	7,000

State College at San Bernardino

California State College at San Bernardino was authorized by the Legislature by Chapter 64, Statutes of 1960, First Extraordinary Session. It is scheduled to be a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

It is now planned that this college will open in the fall of 1965 in temporary facilities on the permanent site. An enrollment for 1965-66 of 400 regular students (FTE) and for 1967-68 of 1,100 regular students (FTE) is anticipated.

This budget provides for the second increment of the initial complement of library books, site development, construction of temporary buildings, equipment for the temporaries, construction of a fieldhouse and outdoor physical education facilities. Funds are also included for working drawings for the science classroom building which will be the college's first permanent classroom building.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Initial complement of library books—second increment	–	–	$150,000
This project will complete the acquisition of a basic complement of library books.			
Site development—phase I	–	–	1,000,000
This project will provide the necessary site preparation for temporary buildings and initial occupancy of the campus.

San Diego State College

San Diego State is located on a 275-acre site in an area that will become the population center of metropolitan San Diego. San Diego State offers 54 approved undergraduate majors and 33 masters' degree curricula. Enrollments have increased in all academic areas. An enrollment of 13,380 regular students (FTE) is projected for 1967-68. Existing and funded capacity totals 10,792 students (FTE).

This budget provides equipment for the business administr tion-mathematics building, cafeteria, and remodeled life scien area, construction of women's physical education addition, si development, and working drawings for music-classroom buil ing.

	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Equip business administration and mathematics building—phase II	–	–	$31,200
	This project will provide the second increment of equipment for this facility financed by the Budget Act of 1962.			
	Equip cafeteria	–	–	89,000
	This project will provide for equipment for the West Cafeteria financed by the Budget Act of 1962.			
	Working drawings for music-classroom building	–	–	62,000
	This project will provide for working drawings for a building to house 420 students (FTE) including practice rooms, rehearsal areas, faculty offices and necessary auxiliary areas.			
	Remodel life science building—phase III	–	–	284,000
	This project will provide for working drawings and remodeling of general laboratories to accommodate biological science instruction.

San Fernando Valley State College

San Fernando Valley State College became a separate state college July 1, 1958, by authority of Chapter 2265, Statutes of 1957. This college offers programs in teacher training, liberal arts, science and engineering. The campus, located in Northridge, currently comprises 268.8 acres, with additional property in the process of acquisition.

An enrollment of 10,020 regular students (FTE) is anticipated for 1968-69. Existing and funded capacity totals 9,542 regular students (FTE).

This budget provides for the final increment of equipment for the classroom building No. 1, administration-education building, fine arts building, and library and the first increment of equipment for the engineering building. It also provides for working drawings and construction of outdoor physical education facilities, an additional boiler and for site acquisition.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Equip engineering building, phase I	–	–	$295,000
This project will provide equipment necessary for program expansion and equipment which must be ordered in the 1964-65 fiscal year for delivery on the completion date of the building financed by the Budget Act of 1962.			
Equip administration-education building	–	–	200,000
This project will provide for a supplemental complement of equipment for this facility financed by the Budget Act of 1962.			
Equip classroom building No. 1—phase II	–	–	396,000
This project will provide the final allowance of equipment for this facility financed by the Budget Act of 1961.			
Equip fine arts building, 3d increment	–	–	48,500
This project will provide equipment necessary for program expansion as other disciplines vacate the facility initially constructed for multipurpose use.			
Site acquisition	–	–	2,000,000
This project will provide funds to complete the acquisition of 55 acres for campus expansion which was partially financed by the Budget Act of 1961.			
Construct additional boiler	–	–	99,000
This project will provide for the additional boiler in space provided for this anticipated expansion made necessary by addition of buildings.			
Construct outdoor physical education facility	–	–	250,000
This project will provide for working drawings and construction of running track and football field.			
Equip library building—3d increment	–	–	107,000
This project will provide the final increment of equipment to make this building operational as a library. The 4th floor of the library has served as the administrative offices for the college pending completion of administration-education building.			
Minor Projects: [b]			
Equip music building, final increment of equipment	–	–	48,000
Equip speech-drama building, final increment of equipment	–	–	25,000
Alterations and improvement projects of $5,000 or less	–	–	15,550

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Construct science building	—$19,776 [d]	–	–
Construct music building	—10,950 [d]	–	–
Construct fine arts building	—6,000 [d]	–	–
Construct speech-drama building	—2,906 [d]	–	–

San Francisco State College

San Francisco State College, established in 1899, offers courses in teacher training, liberal arts, and general education, and occupational curriculums leading to a bachelor's degree in various fields.

The college moved to its present 93-acre site in 1954 to accommodate the increase in student enrollments.

A regular student enrollment of 12,000 students (FTE) is estimated for 1967-68. Existing and funded capacity available totals 10,028 regular students (FTE).

This budget provides for equipment for classroom building No. 3 addition, multipurpose classroom, and music-speech building addition, remodeling of the physical education fields, and working drawings for a life science building.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Equip classroom building No. 3 addition	–	–	$125,000
This project will provide equipment for the classroom building No. 3 addition financed by the Budget Act of 1963.			
Equip multipurpose classroom	–	–	48,000
This project will provide equipment for the multipurpose classroom financed by the Budget Act of 1963.			
Equip music-speech building addition	–	–	950,000
This project will provide equipment for the music-speech building addition which was financed by the Budget Act of 1962.			
Remodel physical education fields	–	–	183,000
This project will provide for working drawings and construction for the remodeling necessary to bring existing facilities up to standard.			
Working drawings for life science building	–	–	240,000
This project will provide working drawings for a specialized life science facility with a capacity of 400 students (FTE).			
Minor projects: [b]			
Provide initial complement of equipment for physics laboratory	–	–	34,000
Conversion of science room to chemistry laboratory	–	–	13,000
Alteration and improvement projects of $5,000 or less	–	–	10,800

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Equip psychology—air science building	–	$212,200	–
Construct classroom building No. 3	–	1,157,200	–
Construct music facility	–	200,000	–
Construct psychology and air science building	$1,246,500	–	–
Working drawings for classroom building No. 3 addition	65,000	–	–
Construct music-speech building addition	–	2,156,700	–
Construct classroom building No. 2 addition	398,000	–	–
Equip engineering curricula, phase III	47,110	27,890	–
Equip engineering curricula, 2d increment	1,553	18,618	–
Equip multistory garage	2,587	3,706	–
Equip cafeteria addition	42,593	–	–
Construct residence halls	55,200	107,050	–

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

San Jose State College

San Jose State College was established in 1857. It is a 5-year, fully accredited college which provides both undergraduate and graduate instruction in the liberal arts and sciences, in applied fields, and in the professions, including the teaching profession. The college is located on a 127 acre site in the City of San Jose. An enrollment of 17,000 students (F.T.E.) is anticipated by 1967-68. Existing and funded capacity totals 11,995 students (F.T.E.).

This budget provides for equipment for classroom building No. 1, site acquisition, construction of science building No. 2, outdoor physical education facilities, and air conditioning for the library.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Equip classroom building No. 1	–	–	$100,000
This project will provide equipment for classroom building No. 1 financed by the Budget Act of 1962.			
Construct science building No. 2	–	–	5,452,800
This project will provide for a multistory building to furnish the laboratory and specialized facilities in science. This building will house a total of 437 students (FTE).			
Site acquisition	–	–	1,325,000
This project will provide for purchase of a site which will be used for general classroom buildings with a portion of the site having an interim use for temporary parking.			
Construct outdoor physical education facility	–	–	195,400
This project will provide a track and storage building on the south campus.			
Construct air conditioning for library	–	–	182,500
This project will provide for working drawings, equipment and minimal construction since the building was initially designed to accept air-conditioning equipment.			
Minor Projects: [b]			
Relocate sewer	–	–	30,000
Modify campus electrical system	–	–	50,000
Alteration and improvement projects of $5,000 or less	–	–	13,700

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Equip engineering building—phase II	–	$750,000	–
Remodel tower hall and language laboratory	–	588,725	–
Construct classroom building No. 1	–	2,400,000	–
Working drawings for residence hall cafeteria	–	42,800	–

Sonoma State College

Sonoma State College was established by Chapter 66, Statutes of 1960, First Extraordinary Session. It opened in the summer of 1961 in rented quarters near Cotati, in Sonoma County.

Planning is continuing for the first buildings on the permanent campus which was acquired in 1960 and is located 2 miles east of Cotati.

An enrollment of 1,340 regular students (FTE) is anticipated in 1967-68. This budget provides for phase III of equipment for the temporaries, construction of a music classroom building, a cafeteria, the second phase of the outdoor physical education facilities, phase III of site development and phase II of boiler plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Construct boiler plant	–	–	$276,000
This project will provide the chilling equipment necessary to make the boiler plant operational as a central air conditioning facility.			
Initial complement of equipment—phase III	–	–	107,000
This project will provide for the final complement of initial equipment for the expansion of programs being offered in temporary facilities. This equipment will be moved to the permanent buildings when they are completed.			
Construct music classroom building	–	–	1,296,500
This project will provide for a building to house general classrooms, faculty offices, and specialized classrooms for music education, band, and chorus, and will provide for an initial capacity for 300 students (FTE).			
Construct cafeteria	–	–	850,000
This project will provide for a campus cafeteria with seating capacity of 400 persons.			
Construct outdoor physical education facility phase II	–	–	322,500
This project will complete the physical education facilities of the college providing for track, football field and multipurpose areas.			
Construct site development—phase III	–	–	1,755,600
This project will provide for continued development of the site including surface preparation, drainage, primary roads, walks and utilities.			
Minor Projects: [b]			
Construct corporation yard, phase II	–	–	50,000

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

	Stanislaus State College			
	Funds for site acquisition for a new state college in Stanislaus County were appropriated by Chapter 1681, Statutes of 1957. On December 9, 1959, the State Public Works Board selected a site of 220 acres 1 mile north of the City of Turlock, and the property has been acquired. Stanislaus State College opened classed on September 10, 1960 in rented facilities on the Stanislaus County Fairgrounds. Site development projects are now under way on the permanent site of 220 acres. An enrollment of 760 regular students (FTE) is anticipated in 1967-68. Existing and funded capacity totals 981 regular students (FTE). This budget provides for equipment for classroom building No. 1, library building, and working drawings for physical education facilities.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Equip classroom building No. 1—phase II	–	–	$235,000
	This project will provide the equipment necessary to occupy classroom building No. 1 financed by the Budget Act of 1962.			
	Equip library building—phase II	–	–	135,000
	This project will provide the final increment of equipment necessary to occupy the library building financed by the Budget Act of 1962.			
	Working drawings for physical education facilities	–	–	76,100
	This project will provide working drawings for indoor physical education facilities including gymnasium, locker, shower and storage facilities.

California State Polytechnic College

California State Polytechnic College provides accredited educational programs at the collegiate level in agriculture, engineering and the applied arts and sciences.

The campus at San Luis Obispo is located on a 2,838-acre site and, including existing and funded facilities, has a capacity of 6,217 regular students (FTE). An enrollment of 6,960 students (FTE) is anticipated for 1967-68. To accommodate enrollment, this budget includes construction funds for an additional Science Building, working drawings and construction funds for the remodeling of the present Administration Building and Engineering East Building. Other projects include working drawings and funds for construction of a swimming pool, complex, and site development.

The Kellogg-Voorhis campus, located near Pomona, has an existing and funded capacity of 4,795 regular students (FTE). An enrollment of 7,070 students (FTE) is anticipated for 1967-68. To accommodate this enrollment, this budget includes a second increment of equipment for the Engineering Building. Other projects include construction funds for a men's physical education facility, modifications to the heating and ventilating systems in the Business Classroom and Science Buildings, and site development.

STATE BUILDING PROGRAM

	PROPOSED 1964-65 EXPENDITURES [a]			
	San Luis Obispo Campus:			
	Equip administration building	–	–	$100,000
	This project will provide the equipment for the administration building financed by the Budget Act of 1960.			
	Construct biological science addition	–	–	1,600,000
	This project will provide laboratories, lecture rooms, and faculty offices related to the science program with capacity for 525 students (FTE).			
	Construct physical education facilities	–	–	300,400
	This project will provide for a swimming pool and women's lockers and showers.			
	Equip physical education facilities	–	–	12,000
	This project will provide for the equipment for the swimming pool financed above.			
	Remodel old administration building—phase II	–	–	150,000
	This project will provide for the conversion of administrative offices to classrooms with the capacity of 43 students (FTE).			

[a] From State Construction Program Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in overall budget totals.

MARITIME ACADEMY

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	This school is located at Vallejo and will have an average enrollment of 250 students in 1964-65. Permanent facilities consist of 2 classroom buildings, engineering building, administration building, seamanship building, messhall, residence hall, and a gymnasium with pool.		The construction program for 1964-65 consists of minor projects totaling $16,600 to correct deficiencies and to improve the physical plant.

DEPARTMENT OF EMPLOYMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

The long-term building program of the Department of Employment proposes to replace leased premises with state-owned buildings with the exception of offices located in communities where there may not be a permanent need for a local office. This is a continuation of the program the department embarked upon during the 1948-49 fiscal year.

The department is presently leasing office space in many communities throughout the State. The acquiring of state-owned buildings will represent a substantial savings in rent paid by the department. The Federal Bureau of Employment Security will provide a rental grant to the Department of Employment which will be used to amortize the cost of the building projects over a reasonable number of years. Similar grants will also be made for maintenance and repair costs both during and after amortization.

The proposed projects would provide sufficient working space correctly designed to meet the specific needs and would be designed to provide for expansion. The department is continuing its efforts to build an outstanding employment service in California; and experience here and elsewhere in the nation indicates that suitable premises definitely contribute to employee and applicant acceptance of the program. With properly designed facilities, the department will give better service to employers, applicants, and claimants.

The 1964-65 Capital Outlay program of the department to be financed from the Department of Employment Contingent Fund is divided into the following major categories consisting of:

1. Land acquisition in 4 communities where new Department of Employment buildings are needed to serve the area.
2. Land acquisition adjacent to an existing Department of Employment building to provide for adequate parking facilities.
3. Remodeling of the employee cafeteria in the Department of Employment building in San Francisco.
4. Construction of an offstreet parking lot adjacent to Department of Employment building in San Francisco.
5. Preliminary plans for 1965-66 projects.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES[1]

Land acquisition for buildings—San Jose	–	–	$900,000
The department's field operations in San Jose are housed in 6 separate leased premises. It is planned to consolidate these operations within 2 separate buildings either on one site, or on separate sites convenient to each other. Building sites totaling approximately 150,000 square feet are needed to provide for the later construction of 2 office buildings of approximately 25,000 square feet each and off-street parking for approximately 300 vehicles.			
Land acquisition for parking lot—Sacramento	–	–	400,000
The lack of offstreet parking in the vicinity of the Sacramento Employment building is serious, and the problem will become more acute at the time a portion of the existing parking area is devoted to building purposes. A site of approximately 54,800 square feet is needed to provide for the later construction of an offstreet parking area for approximately 182 vehicles.			
Land acquisition for building—Palo Alto	–	–	375,000
Existing leased premises will be inadequate by the lease expiration date in April 1967. Building site is needed to provide for a future building of approximately 12,000 net square feet, land area to provide an offstreet parking area for approximately 150 vehicles and space for future building expansion.			
Land acquisition for building—San Luis Obispo	–	–	150,000
The premises presently occupied by this department's San Luis Obispo local and audit district offices are overcrowded and inadequate for the combined operations. Building site of approximately 40,000 square feet is needed to provide for the later construction of an employment building of about 7,000 net square feet and an adequate offstreet parking area for approximately 100 vehicles.			
Land acquisition for building—Oroville	–	–	125,000
The existing leased premises were occupied in 1957 and will be overcrowded by the lease expiration date in February 1967. Building site of approximately 40,000 square feet is needed to provide a future building of approximately 5,000 net square feet and offstreet parking for approximately 100 vehicles.			
Minor Projects:			
Remodel cafeteria in Employment Building—San Francisco	–	–	12,000
The existing employee cafeteria facilities are inadequate in size and equipment. This project consists of modifying and altering the employee cafeteria facilities in the building to increase the dining area and kitchen service facilities.			
Construct parking lot—Employment Building—San Francisco	–	–	11,907
Parking in the vicinity of this department's state building in San Francisco is a serious problem. This project consists of construction of an offstreet parking area for 35 vehicles on property already acquired for this purpose to partially alleviate the problem.

DEPARTMENT OF FINANCE

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	General Activities			
	The Department of General Services created by Chapter 1786 Statutes of 1963 has assumed the role formerly held by the Department of Finance in the development of Capital Outlay programs for state office buildings, grounds and related facilities. The proposed program for 1964-65 is presented in the Capital Outlay budget of the Department of General Services. Expenditures for the past year and estimated expenditures for the current year are reported in this budget. A reimbursement to the General Fund is anticipated in the budget year. The Budget Act of 1963 provided for a reimbursement from the Public Building Construction Fund. The Budget Act of 1964 will propose this reimbursement from the Veterans Farm and Home Building Fund of 1943 which will revert to the unappropriated balance in the General Fund. The Budget Act of 1963 included $60,000 to pay for the architectural design fees for the Governor's Mansion. Only $2,000 has been used from this appropriation, the balance having been paid from a prior appropriation. The balance of the 1963 appropriation is reverted to General Fund surplus.

State Fair and Exposition

The major consideration in the Capital Outlay program of the State Fair is the construction of the new physical plant on the new site in the north area of Sacramento. Chapter 1071, Statutes of 1957, appropriated $3,747,843 in 1957-58 and a like amount was appropriated in 1958-59 from the General Fund. Together with the proceeds from the sale of present facilities, this money is available for the new fair site program. In addition, Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of $6,500,000 annually for a period of 2 years, to finance further construction of buildings and facilities for a new State Fair. This initial authorization has been extended by subsequent action. Item 323.1, Budget Act 1960, extended the availability of Chapter 1071, Statutes of 1957. Availability of the funds was further extended by Section 19.7 of the Budget Act of 1961. Section 10.1 of the Budget Act of 1963 continued the availability of this appropriation to June 30, 1965 and reappropriated $898,000 of the balance for the support of the State Exposition and Fair Executive Committee, Department of General Services. It is anticipated that $400,000 of the new fair capital outlay appropriation will be expended during 1964-65 for Phase I of the architectural and engineering studies.

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates facilities distributed throughout the State including: 8 hospitals for mentally ill patients, 4 hospitals for mentally retarded patients, 2 hospitals housing both mentally ill and mentally retarded patients, and 2 training and research institutes. The latter 2 institutes are operated in conjunction with the University of California.

The Langley Porter Neuropsychiatric Institute, which was established for teaching and research, and the necessary clinical provisions connected with these functions, is operated by the department in conjunction with the University of California Medical School at San Francisco. A similar facility, the Neuropsychiatric Institute, a part of the Los Angeles Medical School of the University of California, was activated in December 1960, and operates at a rated bed capacity of 188. With the 117-bed capacity of the Langley Porter Institute, a total institute capacity of 305 beds is available.

During the 1962-63 fiscal year, available beds for mentally ill continued to exceed population. On June 30, 1963, 34,105 beds for mentally ill were available which exceeded by 18 the actual population of 34,087. It is estimated that capacity will continue to be greater than population. On June 30, 1965, capacity will exceed population by 973 beds. This estimate is based on the anticipated continuing reduction in the hospitalization rate for mentally ill which was 303.2 per 100,000 population in 1950 and is now estimated to be 182 on June 30, 1964, and 167 by June 30, 1965. The loss in bed capacity between June 30, 1963, and June 30, 1965, is 1,832 beds of which 769 is attributed to clearance of the site at Modesto State Hospital for a future replacement project. The balance of 1,062 is due to remodeling and modernization projects now in progress or funded, and scheduled deactivation projects.

Under recent federal legislation, matching grants are to be made available for the construction of community mental health centers for both the mentally ill and mentally retarded. Due to time limitations it was not possible to include a detailed program in this budget. Such a program together with recommendations is being developed and will be presented to the Legislature at the earliest moment.

The tables that follow set forth in detail actual and estimated populations and indicate the latest estimates of capacity resulting from presently funded projects.

[c] Expenditures from bond funds not included in budget totals.
[d] Unexpended balance reported as expended in prior year.
[1] Allocated to various institutions and expenditures shown in the budgets of the various institutions.
[2] Federal grants and expenditures therefrom not included in overall budget totals.

DEPARTMENT OF MENTAL HYGIENE—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Additional mentally retarded patients are admitted as bed capacity and related treatment facilities become available. As of June 30, 1963, 12,373 beds were available. A net addition of 720 beds will be activated during 1963-64 and 1964-65 bringing total capacity to 13,092 on June 30, 1965. A currently financed severely handicapped treatment unit will provide an additional 200 beds in the 1965-66 fiscal year. The tables that follow include population and capacity estimates for the mentally retarded.

A number of major projects are proposed in this budget, chief of which is the project for new feeding facilities at Stockton. Other projects provide for necessary remodeling, service and treatment facilities, and ward air conditioning. The final phase of land acquisition for a new facility for the Langley Porter Neuropsychiatric Institute is included. These projects are explained in greater detail in the budgets of the various hospitals. Essential minor construction projects are included to correct deficiencies and to improve the physical plant. These projects are also detailed in the individual budgets.

	Langley Porter Neuropsychiatric Institute			
	This institute, in conjunction with The University of California School of Medicine in San Francisco, operates a research, training, and treatment center in Northern California. It has a rated bed capacity of 117, and in addition operates a large outpatient clinic. Site acquisition funds were appropriated in 1962 and 1963 for the partial cost of a site on which a replacement of this institute will be constructed. Funds for the third and final phase of the site acquisition project are proposed to allow the project to proceed in an orderly manner. Minor projects totaling $16,500 are included to correct deficiencies and to improve the physical plant.			
	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Site acquisition for new institute—Phase III	—	—	$900,000
	This will provide for the third and final phase of land acquisition for the replacement of the existing institute. The ultimate replacement will result in a bed capacity of 250 and will be designed to accommodate a Mental Retardation Center, wards for geriatric, alcoholic, and juvenile delinquency problems, increased research facilities and general supporting facilities necessary to accommodate the teaching, training, research and treatment programs in mental illness and mental retardation. The existing institute cannot be economically expanded but will be utilized by the University of California for additional teaching facilities to meet the increasing demands for trained people in medicine and related fields.			
	Minor Projects: [b]			
	Office alterations	—	—	6,000
	Alteration and improvement projects of $5,000 or less	—	—	10,500
	ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]			
	Construct 4-story addition	—$105,360 [d]	—	—
	General Fund			
	Site acquisition for new institute—partial	—	$500,000	—

* Past year expenditures reflected in the capital outlay budget for each facility.
[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[d] Unexpended balance reported as expended in prior year.

Neuropsychiatric Institute at University of California, Los Angeles

This institute, constructed as a wing of the Medical School at the University of California at Los Angeles, operates a research training, and treatment center. It has a rated bed capacity of 188, and in addition it operates a large outpatient clinic. The facility was activated in December 1960 with the first patient admissions in January 1961. Minor construction projects totaling $14,404 are included for 1964-65 to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES[a]

Minor projects:[b]			
Alterations to psychiatric wards	–	–	$6,000
Alteration and improvement projects of $5,000 or less	–	–	8,404

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in budget totals.

	Atascadero State Hospital			

This hospital for the mentally ill had a rated bed capacity of 1,500 as of June 30, 1963. While no additional beds are under construction or funded, projects are proposed in 1964-65 which will enable this facility to handle increased admissions and releases by improving the effectiveness of the treatment program. These include construction of a treatment area, the constructio of a rehabilitation therapy unit, and the enlargement of th visiting area.

Minor construction projects totaling $42,000 are included correct deficiencies and improve the physical plant.

	STATE BUILDING PROGRAM			
	PROPOSED 1964-65 EXPENDITURES [a]			
	Construct addition to visiting area	–	–	$210,400
	Equip addition to visiting area	–	–	6,500
	Project will enlarge visiting room sufficiently to allow relatives and approved visitors the opportunity to visit patients within the allotted time, not now possible in small existing area.			
	Construct treatment area	–	–	430,205
	Equip treatment area	–	–	18,500
	Structure will provide space for basic treatment therapy including a professional library, a therapy room of 300 capacity, 11 small therapy rooms, offices, toilet facilities and necessary related storage and service areas.			
	Construct rehabilitation therapy unit	–	–	556,110
	Project will provide sufficient space to carry out rehabilitation therapy program and provide area for occupational therapy, area for arts and crafts and area for music therapy.			
	Minor Projects: [b]			
	Correct fire and safety hazards	–	–	16,000
	Improvements to laundry	–	–	16,000
	Improvements to building exterior walls	–	–	10,000

Camarillo State Hospital

This hospital for the mentally ill had a rated bed capacity of 6,091 on June 30, 1963. The major construction program proposed for 1964-65 is for alterations to the Receiving and Treatment Unit to provide the type and amount of space required for the medical treatment clinics, clinical laboratories and the central medical supply. Minor construction projects totaling $131,000 are included for 1964-65 to correct deficiencies and to improve the physical plant and grounds.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Alterations to Receiving and Treatment Unit	–	–	$339,800
Provides for alterations to space in Receiving and Treatment Unit for relocation of medical treatment clinics, clinical laboratories and central medical supply to meet present day hospital requirements.			
Minor Projects: [b]			
Renovation of wards 10 and 10a	–	–	22,800
Renovation of Children's Unit wards	–	–	15,000
Improvements to sewage treatment plant	–	–	7,500
Retube No. 4 boiler	–	–	22,000
Install fencing, Children's Unit	–	–	5,000
Patients' recreation facilities	–	–	20,000
Construct well	–	–	35,000
Alteration and improvement projects under $5,000	–	–	4,000

[a] From State Construction Program Fund unless otherwise indicated.
[b] Minor projects from General Fund unless otherwise indicated.
[c] Expenditures from bond funds not included in budget totals.

Metropolitan State Hospital

This hospital for the mentally ill had a rated capacity of 3,792 on June 30, 1963. The major construction program proposed for 1964-65 provides for remodeling and modernizing wards, equipment for the wards remodeled and modernized, and the air conditioning of the receiving and treatment building. Minor constructon projects totaling $75,500 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

	PROPOSED 1964-65 EXPENDITURES [a]			
	Remodel and modernize wards 205 and 207	–	–	$340,100
	Equip remodeled and modernized wards 205 and 207	–	–	6,000
	This project consists of alterations and additions to wards, together with necessary additional equipment items, to provide facilities more nearly conforming to present day hospital standards.			
	Air condition receiving and treatment unit	–	–	79,100
	This project provides air conditioning for the receiving and treatment unit housing medical and surgical, infirm and bedridden patients as well as patients receiving intensive treatment. It will provide refrigerated air circulation, ventilation, air cleaning, and the maintaining of humidity control for the health and comfort of patients.			
	Minor Projects: [b]			
	Replace water and sewer lines	–	–	28,900
	Remove acoustical tile	–	–	16,000
	Install fly fans	–	–	5,000
	Install hot water circulating system—wards	–	–	10,600
	Construct storm drain	–	–	8,000
	Alteration and improvement projects of $5,000 or less	–	–	7,000

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

Modesto State Hospital

This hospital for the mentally ill, a former temporary military hospital, had a rated capacity of 2,369 on June 30, 1963. Site clearance for the construction of a Mental Health Center involves the demolition of temporary buildings with a bed capacity of 769 and relocation of utilities and roads. For 1964-65 no major construction is proposed. Preliminary plans indicate the construction cost of the Mental Health Center to be in excess of $6,000,000 which is double the $3 million originally contemplated. Further review of this estimate will be made before construction funds are requested from the Legislature. Minor projects totaling $40,000 are included for 1964-65 to correct deficiencies and to improve physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Minor Projects: [b]			
Purchase and install bakery oven	–	–	$15,000
Laundry equipment	–	–	10,000
Install floor covering—wards	–	–	5,000
Improve electrical system	–	–	5,000
Renew corridor ramps	–	–	5,000

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Mental health center—phase I—project planning and site preparation	–	$255,000	–
Working drawings for receiving and treatment unit	–	100,000	–
Minor Projects: [b]			
Improvements to medical-surgical wards	–	8,700	–
Replace roasting oven—main kitchen	–	15,000	–
Improve pot washing section and scullery—main kitchen	–	12,000	–
Improve patients' toilets and showers	–	10,000	–
Improve dining room floor C-6	–	5,500	–
Alterations to surgery wing	$5,773	6,727	–
Alterations to medical-surgical wards	5,536	1,414	–
Construct patients' toilets and showers	6,698	13,302	–

	Napa State Hospital			

This hospital for the mentally ill had a rated capacity of 5,037 on June 30, 1963. Major construction projects proposed for 1964-65 include the final phase of remodeling and equipping food service units in the south ward group, and phase I of the remodeling and modernization of the "S" unit wards. Minor construction projects totaling $105,200 are included for 1964-65 to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Remodel and modernize "S" unit, phase I	–	–	$483,150
Equip remodeled and modernized "S" unit	–	–	20,000
Provide necessary alterations to ward building to conform to needs of present-day psychiatric treatment, including dining room and food service facilities, nurses station, bathing facilities, offices, day room, and related patient services.			
Remodel serving areas, south ward group, phase III	–	–	108,500
Equip remodeled serving areas	–	–	6,000
Final increment of program to convert food service units in this ward group to a cafeteria type of food service.			
Minor Projects: [b]			
Improvements to receiving and treatment building, phase II	–	–	49,900
Renovate and improve wards—children's unit	–	–	20,000
Install oxygen and suction therapy system, receiving and treatment building	–	–	9,500
Install sprinkler irrigation system	–	–	10,000
Improvements, Napa sewage treatment plant	–	–	8,000
Alteration and improvement projects of $5,000 or less	–	–	7,800

Stockton State Hospital

This hospital for the mentally ill had a rated bed capacity of 3,618 on June 30, 1963. During 1964-65 a net increase of 98 beds will be added as a result of previously authorized projects. The major construction program proposed for 1964-65 provides for the construction of a new central food service unit in the South Area. Minor construction projects totaling $94,900 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]			
Construct central food service unit (south area)	–	–	$1,387,200
Project consists of constructing a new food service unit to replace the present central food service unit at the main hospital to receive, prepare and distribute food. Project to include all necessary services and additional equipment. Existing usable equipment will be relocated from present food service unit.			
Minor Projects: [b]			
Relocate and construct hospital central supply (increment)	–	–	5,900
New entrance, north area	–	–	10,500
Install sand trap No. 3 well	–	–	6,600
Install fire sprinklers in cottages 4 and 5	–	–	6,000
Improvements to laundry building, clothing center and shoe shop	–	–	5,000
Modernization of cottage D-1	–	–	10,250
Install evaporator coolers, cottage 12	–	–	11,500
Grounds improvements, north area (increment)	–	–	20,000
Alteration and improvement projects of $5,000 or less	–	–	19,150

Fairview State Hospital

This hospital for the mentally retarded had a rated bed capacity of 1,946 on June 30, 1963. During 1963-64 and 1964-65, 676 additional beds, already funded, will be activated. For 1964-65, a major construction project is proposed to remodel Ward Building No. 1. Minor construction projects totaling $35,100 are included for 1964-65 to correct deficiencies to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [a]

Remodel and modernize Ward Building No. 1	–	–	$334,200
Provides for remodeling this unit which contains 280 beds for preschool age children. Includes resurfacing of concrete block walls, enlarging soiled linen room, improvement to ventilation system, mechanical and electrical work, and other alterations on each of the four wards to meet present-day hospital standards.			
Minor Projects: [b]			
Install floor covering on wards	–	–	10,000
Install wire glass in ward corridors	–	–	5,000
Convert existing EKG and BMR room in laboratory to infectious material room	–	–	6,100
Alteration and improvement projects of $5,000 or less	–	–	14,000

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES [a]

Construct auditorium	$401,400	–	–
Equip auditorium	–	$27,010	–
Alter and equip laundry building	126,200	–	–
Construct 5 wards buildings	—249,400 [d]	–	–

Multipurpose Psychiatric Centers

A total of $4,750,000 was appropriated in the Budget Act of 1962 for planning, land acquisition, and construction of 3 multipurpose psychiatric centers, contingent upon participation by local governmental units in the construction and/or operation and/or land acquisition of the centers. These multipurpose centers will offer a community-based alternative to state hospitalization of the mentally retarded in the areas where they are located and thus provide a measure of relief to those on the waiting lists for admission to state hospitals for the mentally retarded. The centers will provide for some of the following 5 services: 24-hour hospital diagnosis and care; day treatment; outpatient diagnosis and treatment; parent counseling; and 24-hour crisis assistance. Twenty-four hour care will be primarily for those cases whose condition is improvable or for those patients for whom a short period of hospital care is required until the patient can be transferred to a long-term facility.

Proposals for participation in the program are now being worked out in co-operation with interested local governmental units.

DEPARTMENT OF PUBLIC HEALTH

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

The Department of Public Health, in co-operation with local health departments is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

The 1964-65 Capital Outlay proposal includes funds for land acquisition, working drawings, and construction of a laboratory facility in the Los Angeles area. This laboratory is needed to replace the existing overcrowded leased facility serving Southern California. The lease on the present facility will expire in 1966.

Also included in the 1964-65 budget is $165,350 from the General Fund to finance a portion of the construction and equipment costs of a Cancer Research Facility in Berkeley. The major cost of this facility is being financed from federal grants that are insufficient to complete the facility. The total cost of the research center is $1,639,300 of which $1,473,950 is from federal sources and $165,350 from state funds.

STATE BUILDING PROGRAM

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

The California Highway Patrol is a statewide law enforcement agency functioning through a Sacramento headquarters, with field offices strategically located throughout the State. Its jurisdiction is principally limited to streets and highways outside incorporated areas.

This budget proposes the acquisition of sites for new field offices at Redding, Carlsbad and Mount Shasta. Construction funds are proposed for the Carlsbad Area Office on the new site as proposed above. Funds are also provided in this budget for construction of a new office in Bishop. Site acquisition funds for this office were appropriated in 1963-64. The construction of an addition to the headquarters shop building is also proposed. Additional funds are also required for the new headquarters building funded in 1963-64.

Minor construction funds are proposed for 5 projects at the Academy together with roof repairs to the existing headquarters shop building and an addition to the Los Angeles shop building for the Special Services Unit.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [1]

Purchase of site—Mount Shasta	–	–	$15,000
The present leased quarters at Mount Shasta are too small and unsatisfactory for staff office operation. No adequate parking area is available. Construction of a new office will correct these deficiencies and provide the Highway Patrol with a suitable location near new freeway construction.			
Purchase of site—Carlsbad	–	–	15,000
Existing facilities at Oceanside are in leased quarters. The owner will require the property for planned development at termination of the present lease. It is planned to purchase a new site south of Carlsbad in conjunction with acquisition of rights-of-way for a new freeway.			
Purchase of site—Redding	–	–	15,000
The current Redding office is in leased quarters which are too small and where parking facilities for state-owned vehicles is inadequate. Development of a new office of adequate size is proposed to eliminate these problems. A new site for this office will be purchased in conjunction with Division of Highways acquisition of right-of-way for improvements to U.S. 99.			
Construct area office building—Bishop	–	–	292,800
It is necessary to provide a new area office in Bishop to correct space deficiencies and provide for future requirements. Space will be provided for Department of Motor Vehicles functions as a part of this building. Funds for acquisition of the site were provided in the 1963-64 Budget.			
Construct area office building—Carlsbad	–	–	235,700
The present leased building in Oceanside is inadequate and the owner plans to use the land for other development at termination of the lease. A new building is proposed which will meet current and anticipated space needs for this area.			
Construct addition to headquarters shop building—Sacramento	–	–	227,800
The existing shop building has become too small to efficiently handle the work programs carried on here such as equipping new patrol vehicles. It is proposed to add a new bay to the present building which will provide adequate work area and shop space.			
Construct headquarters office building—Sacramento	–	–	200,000
It is necessary to augment the 1963-64 appropriation for the construction of a new headquarters building.			
Construction program planning	–	–	15,000
Minor Projects:			
Motorcycle accident investigation training area, phase II—Academy	–	–	22,500
Storm drainage, phase II—Academy	–	–	12,500
Repairs to emergency vehicle operations course—Academy	–	–	27,900
Roof repairs to classroom wing—Academy	–	–	34,225
Parking lot—Academy	–	–	19,550
Roof repairs to headquarters shop building	–	–	17,300
Addition to Los Angeles shop building	–	–	30,000
Handball court—Academy	–	–	2,000
Alterations and improvements of $5,000 or less	–	–	11,460

ESTIMATED 1962-63 AND 1963-64 EXPENDITURES

Purchase of site—Bishop	–	$50,000	–
Purchase of site—Placerville	–	12,500	–
Purchase of site—San Luis Obispo	–	5,000	–
Purchase of site—Truckee	–	25,000	–
Alta Substation site	$1,209	–	–
Purchase of site for Fresno Office	30,100	–	–
Working drawings—Truckee Office	–	8,000	–

DEPARTMENT OF MOTOR VEHICLES

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS

This service and tax collection agency, headquartered in Sacramento, functions through a network of field offices located in population centers throughout the State. During the budget year, the department will register and collect taxes and fees on 10,858,000 vehicles and issue new and renewal drivers licenses to approximately 3,276,000 applicants.

This department's capital outlay program provides for state-owned buildings where it has been determined that adequate privately owned leased facilities at reasonable cost are not available for the department to provide satisfactory services to the people in the area. The budget for 1964-65 fiscal year provides for purchase of sites for parking facilities near the Sacramento headquarters, and in Yuba City and for the construction of buildings in Montebello, Santa Maria, Berkeley, and Palo Alto. Funds for acquisition of sites for the construction items have been provided in prior budgets. The budget also includes funds for the addition of a second floor to the San Diego Office Building and to grade, pave and landscape additional parking area in Yuba City.

Construction money for North Hollywood was previously appropriated in 1961-62 fiscal year. This appropriation will revert June 30, 1964. A construction and street improvement appropriation for North Hollywood, with the exception of $25,000 in funds necessary for preparation of working drawings, is being proposed for reversion. Construction funds for a larger building, programmed for the anticipated needs of the department at this location, are proposed in this budget.

The department's support budget includes a proposal for late hours of operation in various field offices. This program is to provide for people who have bona fide needs for drivers licensing services at hours other than 8 a.m. to 5 p.m. In order to implement this program, we are requesting $84,000 for lighting of parking areas, skill test areas, and building exteriors in 42 offices which will participate in this program.

STATE BUILDING PROGRAM

PROPOSED 1964-65 EXPENDITURES [1]

Purchase of site for parking facilities—Sacramento Headquarters	–	–	$350,000
The funds are requested to implement general plans for creating a transportation center now occupied by the Department of Motor Vehicles and the California Highway Patrol. The property will be used in the future for the expansion of Headquarters Building No. 2 and for parking and related improvements.			
Purchase of site for additional parking facilities—Yuba City	–	–	12,000
The present facilities are inadequate to handle the volume of public parking needs at this office.			
Construct office building—Palo Alto	–	–	280,000
The present leased facilities have become inadequate to handle the workload of this office. Funds were appropriated in 1963-64 for purchase of a site in the Palo Alto area.			
Construct office building—Montebello	–	–	413,700
The presently leased building and parking have become inadequate to handle the workload of this office. A new office is proposed to correct these deficiencies. Funds for site acquisition were appropriated in 1963-64.			
Construct office building—Santa Maria	–	–	180,500
The present leased facilities have become crowded in office space and parking facilities. A new site will be purchased from the Division of Highways with funds provided in 1963-64. The proposed new building will provide an adequate office for the requirements of this area.			
Construct office building—Berkeley	–	–	285,000
The present facilities are no longer adequate in office space and parking area. A new office is proposed to provide suitable quarters. Acquisition funds for a new site were appropriated in the 1963-64 Budget.			
Construct office building—North Hollywood	–	–	409,920
Funds for construction of a new office were appropriated in 1961-62 and 1963-64. Since the first program was approved, the demand for driver improvement analysts and accident investigation has greatly increased. It is proposed to revert these funds and provide a building of adequate size to meet these demands.			
Addition of second floor to office building—San Diego	–	–	141,000
The present facilities have become inadequate for investigators and driver improvement analysts and their staffs. Original plans allowed for future expansion at such time when workload indicated expansion was necessary. It is now proposed to add the second floor to meet the increased needs.			
Construction program planning	–	–	20,000
Funds are provided for preparation of preliminary plans for the 1965-66 capital outlay budget.			
Minor Projects:			
Grade, pave and landscape additional parking area—Yuba City	–	–	10,000
Lighting of parking areas, skill test areas, and building exteriors in 42 offices	–	–	84,000
Remodel numerical file area—Los Angeles	–	–	15,000
Alterations and improvement projects of $5,000 or less	–	–	10,730

GENERAL ANALYSIS

The proposed expenditure program for highways is related to allocation of Federal Aid subventions and increased rates and fees for motor vehicle fuel and motor vehicle registration and weight fees enacted by the 1963 Legislature.

The 1964-65 fiscal year budget provides $215,000 to continue the Highway Safety Research Program first authorized by the Legislature in 1961. The Administrator of the Highway Transportation Agency, in conjunction with the California Highway and Transportation Research Council, has made an intensive study of the highway safety problem and developed a five-year plan to collect essential data which is necessary before substantial progress can be made. Annually, the highway safety research plan will be reviewed and brought up to date. Actual research is carried out by the Department of Public Works, California Highway Patrol, Department of Motor Vehicles and the University of California.

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1964-65 Fiscal Year, Showing Allocation of Construction Funds by County Group, Pursuant to Section 188, Streets and Highways Code

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL
Major construction and improvement projects	$144,933,000	$183,835,000	$328,768,000
Thin blanket program and deferred seal coat	3,000,000	2,000,000	5,000,000
Traffic stripe, pavement markings and signs	1,575,000	1,925,000	3,500,000
Construction engineering	18,400,000	18,100,000	36,500,000
Minor improvement and betterment	550,000	450,000	1,000,000
Right-of-way	65,617,009	89,827,091	155,444,100
Preliminary engineering and design	20,400,000	20,500,000	40,900,000
Bank protection and damage repair—Eel River	100,000	–	100,000
Highway planning	540,000	660,000	1,200,000
Contingencies	2,568,811	2,472,991	5,041,802
Totals, Reconditioning, Resurfacing and Construction of State Highways [a]	$257,683,820	$319,770,082	$577,453,902
Building, plants and equipment	3,375,000	4,125,000	7,500,000
State aid county highways, federal and matching funds [b]	2,961,281	1,222,025	4,183,306
Federal aid secondary urban extensions [c]	2,504,350	635,000	3,139,350
Railroad grade separation [d]	2,250,000	2,750,000	5,000,000
Totals, Expenditures Subject to Allocations Under Section 188, Streets and Highways Code	$268,774,451 (45%)	$328,502,107 (55%)	$597,276,558 (100%)

[a] Excludes honor camp construction which is not subject to allocations by county group pursuant to Section 188.7, Streets and Highways Code.

[b] Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

[c] Included in county group allocation pursuant to Section 143.3, Streets and Highways Code.

[d] Railroad grade separations allocation to cities and counties pursuant to Section 190, Streets and Highways Code.

[e] Previously authorized expenditures for Highway Safety Research included within preliminary engineering studies.

Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by California Highway Commission for the 1964-65 Fiscal Year

LINE	COUNTY	ROUTE Old	ROUTE New	DESCRIPTION	APPROXIMATE MILEAGE	ESTI CO
				NORTHERN GROUP OF COUNTIES		
4	Alameda	69	80	Distribution Structure (34.1) to 0.2 mile north of Powell Street (35.0); signs	0.9	$10
6	Alameda	69	17	Williams Street (22.8) to 0.3 mile north of Hegenberger Road (25.5) (portions); resurface	2.4	30
8	Alameda, Contra Costa	75	24	Caldecott Tunnel; renovation (Ala 2.9 to CC 1.4)	2.5	1,25
11	Alameda	105	92	San Mateo-Hayward Bridge (2.7) to Hesperian Boulevard (5.7); 4-lane freeway	3.0	3,50
13	Alameda	110	580	Route 5 (New Route 205) (0.0) to San Joaquin County Line (1.2); 6-lane freeway	1.2	1,35
15	Alameda	227	13	Atlas Avenue to New Route 5 (New Route 580) near Calaveras Avenue; 4- and 6-lane freeway	1.3	1,80
17	Amador	97	124	Between 2.4 miles north of Ione (10.2) and Route 54 (New Route 16) (15.0); 2-lane expressway	5.6	1,80
19	Butte	3	99	Palmetto Avenue (33.0) to 4.4 miles north of Chico (38.4) (portions); 4-lane freeway	5.4	4,10
21	Butte	3	99	Little Chico Creek (32.5) to East 8th Street; landscaping	0.2	5
22	Contra Costa	7	80	Carquinez Bridge-Crockett approaches; scaffold travelers for painting	–	6
23	Contra Costa, Solano	7	80	West Carquinez Bridge and Crockett approaches; air and water lines	–	19
25	Contra Costa, Solano	7	80	West Carquinez Bridge; scaffold travelers for painting	–	13
27	Contra Costa	107	680	0.7 mile north of Alameda County line (0.7) to 1 mile south of Danville (6.4); 6-lane freeway (Total estimate $7,700,000, $3,000,000 1965-66 fiscal year)	5.7	4,70
30	Contra Costa	7	80	At Road 20 (5.2); construct two northerly ramps	–	30
31	Contra Costa	106	4	Willow Road (0.7) to Cummings Skyway (4.9) (portions); resurface and reconstruct	4.2	27
33	Contra Costa	106	4	0.2 mile west of Cummings Skyway (4.7) to 0.1 mile west of Howe Road (9.7); 4-lane freeway	5.0	7,80
35	Del Norte	1	101	Klamath South Bank Road (5.5) to the intersection of Routes 101		
36		46	169	and 46 (New Route 169) in Klamath (6.4); 2 lanes of 4-lane freeway	1.1	2,70
37	El Dorado, Sacramento	11	50	Folsom Junction (73.5) to 2.2 miles east of Sacramento County Line (2.2); 4-lane freeway	8.2	4,50
40	El Dorado	11	50	2.0 miles east of Sacramento County Line (2.0) to 1.3 miles east of Bass Lake Road (4.2); 4-lane freeway	2.2	1,70
42	El Dorado	11	50	2.1 miles to 2.9 miles east of Phillips; passing lane	0.8	11
43	El Dorado	93	193	3.0 miles west of Georgetown (17.3) to Cool (26.9) (portions); 2-lane conventional (Casual labor)	1.8	10
45	Fresno	125	41	Lorena Avenue (22.9) to Fulton Street (23.5); construct main structure over U.S. 99 Business and Southern Pacific Railroad for 6-lane freeway	0.6	3,22
48	Fresno, Madera	126	145	0.3 mile south of Barstow Avenue (5.2) to 0.1 mile south of Avenue 5½ (0.4); San Joaquin River Bridge and connections; 2-lane conventional	1.3	37
51	Glenn	7	5	1.0 mile north of Artois (16.0) to Tehama County Line (28.5); 4-		
52		47	32	lane freeway (Total cost $6,600,000, $3,100,000 1965-66 fiscal year)	11.0	3,50
54	Glenn	45	162	0.9 mile east of Butte City; replace Bridge No. 11-18 (16.9) and reconstruct approaches	0.2	6
56	Humboldt	1	101	Dean Creek (14.3) to 3.4 miles south of Phillipsville (16.9); 4-lane freeway	2.6	2,30
58	Humboldt	1	101	Gannon Slough (88.1) to 0.2 mile north of 7th Street in Arcata (89.7); 4-lane freeway	1.6	1,16
60	Humboldt	20	299	0.2 mile west of Mad River (1.5) to Blue Lake (6.6); 4-lane freeway	4.9	5,60
62	Humboldt	20	299	1.6 miles (24.4) to 2.2 miles east of Redwood Creek (25.0); 2-lane expressway	0.6	27
64	Humboldt	35	36	1.3 miles (26.1) to 10.0 miles east of Bridgeville (34.8) (portions); curve correction (casual labor)	–	10
66	Humboldt	84	96	5.4 miles north of Willow Creek to 4.5 miles south of Weitchpec (portions); 4 sidehill viaducts—Bridges No. 4-140, 4-141, 4-142, 4-143, and replace cribs at three locations	–	27
69	Lake	89				
70		243	29	Kelseyville (22.9) to Lower Lake (10.7); resurface	14.8	27
71	Lassen	29	36	0.6 mile west of Eagle Lake Road (21.4) to Main Street in Susanville (24.6); 2-lane conventional	3.2	31
73	Marin	1	101	0.4 mile south of Waldo Undercrossing (2.9) to Corte Madera Creek (8.4); median barrier	5.5	23
75	Marin	1	101	0.3 mile south of Irwin Street (10.4) to Third Street (10.9); street and ramp adjustment and Grand Avenue Extension; grade and pave	–	50

	HIGHWAY PROPERTIES RENTAL FUND			
	Chapter 2157, Statutes of 1959 as amended by Chapter 1260, Statutes of 1961 (Section 104.6 of Streets and Highways Code). The department is authorized to lease any lands which are held for state highway purposes and to maintain and care for such property in order to secure rent therefrom. Rents required under the California Toll Bridge Authority Act, or any bond indenture under such act, to be deposited in a particular fund are deposited in the fund designated and rents received from property acquired for the National System of Interstate Highways are deposited in the State Highway Fund. Under the original act, all other rents were deposited in the Highway Properties Rental Fund for distribution in the ratio of 76 percent to the State Highway Fund and 24 percent to counties. The amendment to the act provided that 100 percent of rents deposited in the Highway Properties Rental Fund prior to the 1960-61 fiscal year and 76 percent of rents so deposited after the 1959-60 fiscal year to the effective date of the act were to be transferred to the State Highway Fund and the balance paid to the counties. After the effective date of the amendment, only 24 percent of the subject rents are deposited in the Highway Properties Rental Fund for disbursement to counties.			
	Accumulated surplus, July 1	$516,815	$729,365	$823,712

Additional Statements of Expenditures and Obligations and Revenues for 1962-63 and 1963-64 Fiscal Years, Submitted Pursuant to Section 143.2, Streets and Highways Code

Statement 1—Comparison of proposed expenditures and obligations to be incurred for the 1963-64 fiscal year in the current budget with proposed expenditures and obligations to be incurred for the 1963-64 fiscal year as shown in the budget submitted to the 1963 Session of the Legislature.

Statement 2—Expenditures and obligations incurred for the 1962-63 fiscal year, compared to budget allocations presented to the 1962 and 1963 Sessions of the Legislature.

Statement 3—Detail of major project allocations for construction of highways and bridges for the 1963-64 fiscal year, compared to budget allocations.

Statement 4—Detail of major project allocation for construction of highways and bridges for the 1962-63 fiscal year, as revised to June 30, 1963, compared to budget allocations.

Statement 5—Expenditures for maintenance by routes for the 1962-63 fiscal year.

Statement 6—Comparison of revised revenue estimates for the 1963-64 fiscal year with budget estimates submitted to the 1963 Session of the Legislature.
